Submission to Legislative Council Sessional Committee Government Administration A -Sub-Committee - Fin Fish Farming in Tasmania Inquiry

Dear Mr Wright

It kills off native species with the fecies of the fish in the nets because they are hung fed pellets the chemicals are laying on the bottom and killing of vegetation and other marine life

I endorse the following recommendations by the Tasmanian Conservation Trust: Improve transparency and enforcement by prosecuting fish escapes, fish kills, marine debris and seal and cetacean interactions.

Thank you for reviewing my submission

Yours Sincerely

Fionn Sinclair
