- (1) Notes that there is no better friend of Tasmania's resources industries, including mining and forestry, than the Hodgman Liberal Government.
- (2) Acknowledges that these industries employ more than 11,000 Tasmanians directly and indirectly, particularly in rural and regional areas, and create billions of dollars in income and export revenue for the State.
- (3) Further notes that the Tasmanian Greens' front groups – such as the Bob Brown Foundation, Save the Tarkine and the Wilderness Society, not content with the lock-up of 50% plus of the State, are engaged in an unreasonable and never ending campaign for more lock ups.
- (4) Further notes that these groups' latest push for another 680,000 hectares to be locked away in an extension to the World Heritage Area, would deliver a devastating blow to our resources industries, putting thousands of jobs at risk and adversely impacting the rights of recreational land users such as fishers, hunters and 4WD drivers.
- (5) Further acknowledges advice from the Department of State Growth that shows this land grab would:—
  - (a) ban mining in one of our most prospective mining regions, which includes more than 1,000 known mineral deposits;
  - (b) impact at least eight current mining leases;
  - (c) based on past expenditure, cost the State upwards of \$150 million in mining and exploration investment over 20 years;
  - (d) lock up more than 12,000 hectares of the Permanent Timber Production Zone and 91,000 hectares of our Wood Bank – the future potential production forest;
  - (e) cost a further \$250 million in the value of native forest harvesting over the next 20 years; and
  - (f) add to the sovereign risk issues that have seriously impeded investment in Tasmania for decades.
- (6) Calls on all Tasmanians to resist this destructive push and stand up for the very existence of our mining and forestry sectors, and the thousands of livelihoods they provide for Tasmanians. (27 September 2018)
