### **Integrity Commission welcomed**

The Tasmanian Liberals welcome the launch of the Integrity Commission today, which we hope will mark a new era of honesty and accountability.

We originally proposed the Commission and Labor had to be dragged kicking and screaming to establish it.

Labor finally acquiesced to setting up an Integrity Commission before the election in a bid to clean up the State Government's image.

We welcome the beginning of the Commission's operations and will work cooperatively with them if and when required.
