

(No. 43.)

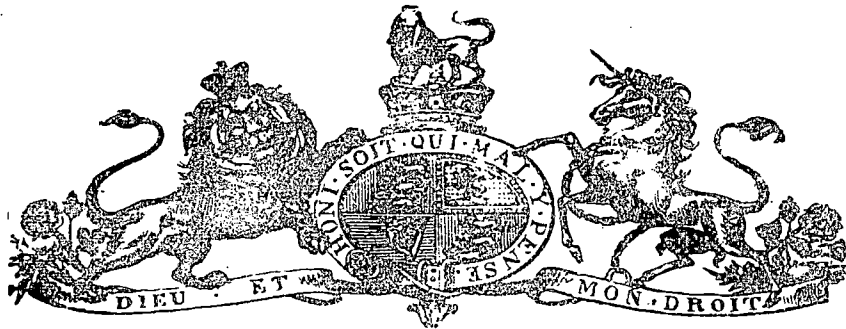

1886.

PARLIAMENT OF TASMANIA.

BOARD OF EDUCATION:

REPORT FOR 1885.

Presented to both Houses of Parliament by His Excellency's Command.

REPORT of the EDUCATION DEPARTMENT for the Year 1885.

To His Excellency SIR GEORGE CUMINE STRAHAN, Knight Commander of the Most Distinguished Order of Saint Michael and Saint George, &c., Governor and Commander-in-Chief of the Colony of Tasmania and its Dependencies.

02270H

MAY IT PLEASE YOUR EXCELLENCY.

1. I HAVE the honor to submit the following Report of the proceedings of the Education Department for the year 1885.

2. *Attendance.*—During the year 1885 there were 204 Schools in operation; the total number of distinct children on the Rolls for the year was 15,418; the average number on the Rolls from month to month was 10,531, and the average daily attendance 7465. As compared with the previous year the number of Schools has increased by 13, the total number of children on the Rolls by 572, the average number on the Rolls by 397, and the average daily attendance by 168.

3. *Progress of Schools.*—The progress of the Schools since the year 1863 is shown in the following Table :—

Year.	No. of Schools.	No. of Scholars on Rolls during the year.	Average No. of Scholars on Rolls from month to month.	Average Attendance.	Average No. on Rolls during the year at each School.	Average No. on the Rolls from month to month at each School.	Average Attendance at each School.
1863..	88	7124	4607	3426	80·95	52·34	38·92
1864..	97	7791	4987	3763	80·31	51·41	38·79
1865..	102	8294	5357	4074	81·31	52·42	39·94
1866..	101	8198	5159	3930	81·16	51·08	38·91
1867..	105	8346	5419	4112	79·48	53·14	39·16
1868..	109	8746	5649	4272	80·23	51·46	39·19
1869..	116	9316	5992	4511	80·22	51·66	38·88
1870..	128	9997	6678	5041	78·10	52·17	39·38
1871..	130	10,194	6786	5187	78·41	52·20	39·90

1885..	204	15,418	10,531	7465	75·57	51·62	36·59

4. *Monthly Attendance.*—The following table exhibits the comparative number of Scholars in average daily attendance from month to month during the years 1884 and 1885:—

MONTH.	No. of Schools.		Average Daily Attendance.		Average Daily Attendance at each School.	
	1884.	1885.	1884.	1885.	1884.	1885.
January.....	159	180	4822	6084	30	34
February	181	183	6976	7016	39	38
March	180	183	7190	6989	40	38
April	179	185	7290	7350	41	40
May	182	187	7516	7543	41	40
June	180	184	6995	7171	39	39
July	183	187	7151	7158	39	38
August	184	190	7343	7347	40	39
September.....	184	189	7433	7320	40	39
October.....	185	192	7792	7431	42	39
November.....	187	195	7584	7771	41	39
December	185	190	6942	7217	38	38

5. *Ages and Classification of Scholars.*—Returns have been received from Teachers of 194 Schools of the Ages and Classification of 10,320 Scholars on the Rolls at Christmas, 1885, which are summarised below:—

	C L A S S .						
	I.	II.	III.	IV.	V.	VI.	TOTAL.
Under Four years	73	—	—	—	—	—	73
Four years	229	3	—	—	—	—	232

Per-centage	34·94	25·31	18·86	12·31	5·94	2·64	—

6. *Religious Denominations of Scholars on the Rolls.*—The Returns exhibiting the Religious Denominations of 15,418 Scholars on the Rolls afford the following comparison with the previous year:—(See Appendix K.)

	Church of England.	Church of Rome.	Presbyterians.	Wesleyans.	Independents.	Other Denominations.
Scholars on Rolls, 1884....	7381 or 49·72 per cent.	2265 or 15·26 per cent.	841 or 5·66 per cent.	2544 or 17·13 per cent.	963 or 6·49 per cent.	852 or 5·74 per cent.
Scholars on Rolls, 1885 ...	7620 or 49·42 per cent.	2322 or 15·06 per cent.	905 or 5·87 per cent.	2427 or 15·74 per cent.	1029 or 6·68 per cent.	1115 or 7·23 per cent.

7. *Grant for Education.*—The total expenditure “In aid of Public Schools,” including Truant Officers and Increase to Teachers’ Salaries, amounted to £21,861 15s. 7d. The appropriation of this money is exhibited in detail in Appendices D. and I., and may be briefly recapitulated as follows:—

Objects of Expenditure.

	£	s.	d.
Salaries and Allowances of Teachers, Assistant Teachers, Pupil Teachers, and Paid Monitors	18,395	3	5
Rent of School Buildings.....	362	11	4
Repairing and improving School Buildings not the property of the State	416	11	2
Purchase of School Sites	85	0	0
Providing School Furniture and Fittings	646	6	10
Providing Books, Maps, and School requisites	35	7	8
Salaries of Truant Officers	636	7	0
Preparation of Plans and Supervision of Works	788	4	2
Miscellaneous Expenditure	496	4	0
TOTAL.....	£21,861	15	7

Repairs to Schools.

In addition to the above amount the sum of £1202 2s. 6d. was expended in the repair of School Buildings the property of the State.—(See Appendix E.)

Administration and Inspection.

The sum of £2646 9s. 0d. was expended on account of Administration and Inspection for the year. (Appendix F.)

8. *Cost of Instruction.*—The following statement exhibits the comparative cost of instruction for the year 1885 with the previous year:—

Average amount of Government Aid, exclusive of the cost of Administration and Inspection and of Repairs to Schools.

	1884.			1885.		
	£	s.	d.	£	s.	d.
Number of Scholars on Rolls, per head	1	7	5½	1	8	3
Average Number of Scholars on Rolls, per head	2	0	2	2	1	4½
Average Daily Attendance, per head	2	15	10	2	17	9½

Cost of Administration.

Number of Scholars on Rolls, per head	0	1	2½	0	1	1¾
Average Number of Scholars on Rolls, per head	0	1	8¾	0	1	8¾
Average Daily Attendance, per head	0	2	4¾	0	2	4½

Cost of Inspection.

Number of Scholars on Rolls, per head	0	2	6	0	2	3½
Average Number of Scholars on Rolls, per head	0	3	7¾	0	3	4¾
Average Daily Attendance, per head	0	5	0¾	0	4	8½

9. *Building Grants.*—During the year the sum of £26,638 8s. 4d. was appropriated, under the provisions of the Public Schools Erection Acts, in aid of the erection of School premises, &c. at the following places:—

	£	s.	d.
Ashgrove, Compensation for cancelling Contract	18	0	0
Back River, School and Residence	284	0	0
Barrington Junction, School and Residence	552	10	0
Burnie (Emu Bay), School and Residence.....	1266	5	0
Campania, School and Residence	545	5	0
Chudleigh, Extra Works School and Residence	79	18	0
Don, Schoolroom	423	6	5
Fernbank, School and Residence	530	0	0
Fingal, Extra Works, School and Residence.....	106	0	0
Forest, School and Residence	567	6	6
Formby, School and Residence	1136	0	0
Geeves Town, Alterations to Schoolroom	96	10	0
George Town, School and Residence	528	0	0
Goulburn-street, School Buildings	6328	0	0
Gould's Country, School and Residence	520	12	0
Green Ponds, School and Residence	1092	0	0
Green's Creek, School and Residence	594	12	3
Hamilton-on-Forth, Additions to Schoolroom	130	0	0

	£	s.	d.
Irish Town (Duck River), School and Residence	190	0	0
Kindred, School and Residence	583	6	2
Melrose Creek, School and Residence	594	0	3
Nook, Improvements to Buildings	59	15	0
North Bridgewater, School and Residence	640	8	0
North Motton, School and Residence	447	1	0
Nugent, Additions to Residence	84	1	0
Parattah, School and Residence	489	12	6
Penguin, School and Residence	828	0	0
Railton, School and Residence	583	9	2
Rhyndaston, School and Residence	394	2	0
Rokeby, School and Residence	447	1	0
Scottsdale, School and Residence	420	4	0
Sheffield, Extra Works, Schoolroom	55	0	0
Springfield, Residence	281	0	0
St. Leonard's, Residence	390	0	0
St. Mary's, Residence and Alterations to School	410	1	0
Tongataboo, Fencing	28	6	0
Trinity Hill, Additional Works	606	5	3
Tunbridge, Schoolroom	271	5	0
Upper Liffey, School and Residence	571	15	0
Upper Ringarooma, Schoolroom	250	14	0
Waratah, Additions to Schoolroom	102	15	0
Westbury, School Buildings	2085	0	0
West Kentish, School and Residence	581	17	10
Whiteford, School and Residence	445	4	0
	<u>£26,638</u>	<u>8</u>	<u>4</u>

These sums are not taken into account in calculating the cost of instruction.

10. *School Fees*.—The School Fees paid by parents in aid of Teachers' Salaries during the year amounted to £8030 4s. 8d., or £142 19s. 3d. more than in 1884: dividing this amount by the—

Number on the Rolls, gives, per head, 10s. 5d., or 2½d. less than the previous year:

Average number on the Rolls, gives, per head, 15s. 3d., or 3½d. less than the previous year:

Average daily attendance, gives, per head, £1 1s. 6½d., or 1½d. less than the previous year.

11. *Income of Teachers*.—Returns of the emoluments of Teachers who were employed during the year have been received, from which the following results have been compiled:—

	<i>No. upon which the Average is taken.</i>	<i>Average Annual Income.</i>	<i>Maximum Annual Income.</i>	<i>Minimum Annual Income.</i>
		£ s. d.	£ s. d.	£ s. d.
Schoolmasters and Mistresses con- jointly	44	201 15 0	865 19 0	106 0 0
Schoolmasters	81	139 17 0	603 18 0	62 1 0
Schoolmistresses in sole charge	53	68 12 0	217 5 0	41 2 0
Female Assistants	62	33 4 0	98 5 0	20 0 0

The above statements have reference to the income which is derivable by Teachers in connection with their Schools only, and do not include sums received for private tuition.

12. *Free Scholars*.—A Return of the number of children admitted during the year under free certificates is appended. The sum of £385 6s. 11d. was paid by the Department for their instruction, the average number of Free Scholars being 1098·25. (See Appendix J.)

The following statement will show the average number of Scholars receiving their instruction free, and the amount paid to Teachers by the State for their instruction for the past twenty-one years :—

	<i>Average No. of Free Scholars under Instruction.</i>	<i>Amount paid to Teachers for their Instruction.</i>		
		£	s.	d.
During the year 1865	896·00	359	7	6
Ditto 1866	1027·75	434	17	9
Ditto 1867	1118·00	470	15	9
Ditto 1868	1209·25	497	12	3
Ditto 1869	1438·00	586	4	3
Ditto 1870	1780·75	722	17	3
Ditto 1871	2013·50	850	15	9
Ditto 1872	1886·25	742	5	11
Ditto 1873	1533·50	629	9	5
Ditto 1874	1611·75	620	12	4
Ditto 1875	1603·25	593	16	1
Ditto 1876	1560·75	615	13	1
Ditto 1877	1461·25	558	19	2
Ditto 1878	1330·75	519	0	3
Ditto 1879	1219·75	473	14	3
Ditto 1880	1232·75	459	14	7
Ditto 1881	1249·75	475	7	6
Ditto 1882	1152·25	420	3	1
Ditto 1883	977·50	363	8	9
Ditto 1884	1067·75	388	15	0
Ditto 1885	1098·25	385	6	11

13. *Night Schools for Males.*—A Return of the number of scholars admitted into the Night Schools for Males during the year is annexed. The sum of £13 17s. was paid by the State for their instruction. (See Appendix H.)

14. *Schools established.*—Schools at the following places were established during the year :—Branhholm, Brothers' Home, Carnarvon, Dunally, Garden Island Creek, Glen Gala, Lachlan Native Tier, Parattah, Spreyton, Tongataboo, West Kentish.

15. *Schools closed.*—Aid was withdrawn from the Schools at Carlton, Mauriceton, Northdown, and Sidmouth, on account of the small number of children in attendance.

16. *Public Schools Exhibitions.*—In the month of June an Examination for Exhibitions was held. Twenty-one boys and twelve girls presented themselves; and, on the recommendation of the Examiners, an Exhibition of the value of £16 13s. 4d. per annum, tenable at a superior school for four years from the 1st of July, 1885, was awarded to each of the under-mentioned Candidates :—

<i>No.</i>	<i>Name.</i>	<i>Date of Birth.</i>	<i>Public School.</i>
<i>Boys.</i>			
1	Solomon, Arthur Charles	25 February, 1874	Longford.
2	Darcey, Martin	1 December, 1874	Queenstown.
3	Delmer, Delesford Harold C.	17 June, 1873	Glengarry.
4	Johnston, Thomas Henry	2 November, 1873	Macquarie-street and Battery Point.
5	Fox, Francis Ignatius	12 August, 1874	Battery Point.
6	Reid, Walter Alexander	2 October, 1873	Battery Point.
<i>Girls.</i>			
1	Bound, Mabel Mary	7 November, 1873	Whitemore.
2	Johnston, Mary Elizabeth	30 June, 1873	Green Ponds.
3	Wilson, Mary	27 November, 1874	Queenstown.
4	Bayley, Laura Frencham	3 June, 1873	Franklin.
5	Lewis, Eveline Sophia	8 June, 1873	Goulburn-street.
6	Guttridge, Isabella	1 July, 1873	Beaconsfield.

A Statement of the Expenditure under this head will be found in Appendix G.

17. *General and Local Inspection.*—On summarising Appendix L. it will be seen that 4683 visits have been made to the Schools during the year, of which 494 were made by the Inspectors of Schools, 1215 by Members of the Local Boards, and 1969 by other persons; and for the purpose of imparting Religious Instruction, 794 visits were made by Ministers of the Church of England, 152 by Ministers of the Church of Rome, 2 by Wesleyan Ministers, 15 by Ministers of the Independent Church, 16 by Ministers of the Church of Scotland, and 26 by Ministers of other denominations.

18. The Annual Reports of the Chief Inspector of Schools, of Mr. Inspector Rule, and of Mr. Inspector Bourdillon, are annexed. (See Appendices A., B., and C.)

19. The Board of Education ceased to exist on the 31st December, 1884, the control of Elementary Education being provisionally transferred to the Chief Secretary by Act of Parliament passed during the Session of 1884. By "The Education Act, 1885," 49 Victoriae, No. 15, a Department of Education was constituted under the control of a Minister of the Crown, to be styled Minister of Education, the office of Chief Inspector of Schools being merged in that of Director of Education. The work of re-organising the system of Elementary Education under the provisions of the new Act will be proceeded with as rapidly as circumstances allow.

J. W. AGNEW:

Education Office, Hobart.

APPENDIX A.

GENERAL Report for the Year 1885 by T. STEPHENS, Esq., M.A., late Chief Inspector of Schools.

Hobart, 29th March, 1886.

SIR,

I HAVE the honor to submit my General Report for the year ended 31st December, 1885.

To the Schools in the Southern Districts I paid during the year 194 visits, including the inspections of the Ragged Schools in Hobart, which I have undertaken for some years past in addition to my official duties. Special visits of inquiry were paid at intervals during the year to settlements still unprovided with the means of education, and to existing Schools in connection with matters requiring personal investigation. The examination of teachers and pupil teachers, of candidates for various offices under the Department, and of candidates for the Exhibitions which are annually offered to children attending the Public Schools, on all of which special Reports have been furnished, were conducted as heretofore, and the usual office work and correspondence were attended to. During, and for a short time previously to the passage of the new Education Bill through Parliament, the business of the School examinations, which are held during the latter half of the year, was somewhat interrupted by my being recalled from country tours for the purpose of supplying necessary information.

The ordinary number on the Rolls during the year at the Schools inspected was 2325 boys and 1696 girls, or 4021 in all. The number actually examined in the last five months of the year was, in consequence chiefly of the interruptions mentioned above, only 1557 boys and 1297 girls, or 2854 in all; but no examination was omitted or curtailed where a question of a teacher's promotion or any other question of importance was dependent on the result. The condition of the several Schools has been sufficiently described in my separate reports of inspection and examination. Since taking charge, under the Minister, of the general administration of the Department, the whole of my time has been too fully occupied in the transaction of routine business to allow me any leisure for discussing matters of detail connected with last year's work; but the actual condition of elementary education was fully described in my General Report for 1884, and no appreciable alteration has taken place during the last twelve months.

One of the most important matters connected with Education which will demand attention during the coming Session of Parliament will be the question of the provision of funds for the erection of School-houses. Having had few opportunities of knowing what has been done of late years under this head, I am not in a position to report upon it except in general terms; but there can be no doubt that a very material benefit has accrued from the liberal provision already made by the Legislature for this purpose, though in a few cases which have come under my notice the expenditure has been somewhat greater, and the advantage, from an educational point of view, somewhat less than was warranted by the circumstances. The high price of labour, and the difficulty of obtaining skilled workmen in country districts, must of course be taken into account. One great difficulty evidently has been to determine the order in which claims for expenditure on new buildings should be entertained. Those who are locally interested in the establishment of new schools naturally think that they ought to be served first, while others who see existing schools carried on in buildings which have become dilapidated, or were never adapted to school purposes, also lay claim to favourable consideration of their wants, and the question of the relative urgency of the several cases is not always easily settled. The difficulty has been increased by the circumstance that up to the end of last year each of the three inspection districts had to be separately dealt with, there being no means available for comparing the requirements of one locality with those of other parts of the island. The grants actually made by Parliament for new school-houses appear to have

been insufficient to meet all the claims which had been favourably entertained before the end of 1885, and some difficulty will be experienced in satisfying even a portion of the demands which will be made during the current year.

The work of re-organising the educational system, and making provision for its improvement and extension under the provisions of the new Act, will occupy time, and demand the most careful consideration of the minutest details of alteration, if lasting benefit is to be secured. I am glad to be able to report that the necessity for making some special provision for the training of teachers, which I have noted in my reports for many years past as the chief educational want of the country, has now been recognised, and I trust that the modest proposals for the initial equipment of a Model School, which have already been submitted for consideration, will receive the sanction of Parliament at an early date.

I have the honor to be,
Sir,

Your obedient Servant,

T. STEPHENS.

The Hon. the Minister of Education.

APPENDIX B.

GENERAL Report for the Year 1885, by JAMES RULE, Esq., Inspector of Schools.

Hobart, 20th April, 1886.

SIR,

I HAVE the honor to submit to you my General Report for the year 1885.

1. The work of inspection and examination of schools met with few interruptions. All that were open the whole year were visited twice or oftener, the number of visits being 207, to 79 schools; but only 75 of these, presenting 3761 pupils, were examined for results; the others, having been closed in the second half of the year, missed the regular examination.

2. The classification of the children examined, and the "passes" in each class, are thus summarised :—

	CLASS.							TOTAL.
	I.		II.	III.	IV.	V.	VI.	
	Division 1.	Division 2.						
Number examined	731	557	916	693	488	258	118	3761
Per-centage on Total	19+	15—	24+	18+	13—	7—	3+	
Passed in three subjects.....	731	556	897	532	261	141	86	3204
Per-centage on number examined	100	100—	98—	77—	53+	55+	73—	*78—

* This per-centage is exclusive of Class I.

3. The numbers that reached the several standards are as follows :—

[In	Reading.	Writing.	Arithmetic.	Reading only.	Writing only.	Arithmetic only.	Two subjects only.	All three subjects.	
								No.	Per-centage.
Not up to full work of Class I.	984	921	912	...	...	...	...	1050	28—
Up to full work of Class I....	801	961	1191	32	4	14	132	1135	30+
Up to full work of Class II....	868	887	981	93	1	64	310	947	25+
Up to full work of Class III....	521	536	338	95	...	24	372	332	9—
Up to full work of Class IV....	343	288	229	93	...	19	166	198	5+
Up to full work of Class V....	151	124	92	57	...	2	62	83	2+
Up to full work of Class VI....	93	44	18	49	...	...	30	16	0+
TOTALS.....	3761	3761	3761	...	...	..	...	3761	...

4. The progress of 2185 pupils was found traceable. Of these 17 per cent. had made good progress, 22 per cent. fair, 30 per cent. moderate, 29 per cent. slow, 2 per cent. none appreciable.

5. These results are better than those obtained in the year 1884, but there is still wide room for improvement. The work of the schools cannot be considered satisfactory as long as a large number of boys and girls leave them before acquiring sufficient elementary instruction to read a newspaper and write a letter, or make the easy arithmetical reckonings incident to ordinary business. This is the case at present; and only a very small per-centage of the scholars leave school with sufficient learning for the position of superior workmen. The chief blame for this unsatisfactory condition of Public Education rests with parents. Many neglect to send their children to school till they are compelled, and then allow only an

irregular attendance. Children, with average ability, who are ignorant of letters at the age of seven, require an uninterrupted course of instruction up to their thirteenth year to reach the higher standards. The great majority, beginning school work late and attending irregularly for a few years, do not obtain the full amount of instruction prescribed for the Third Class; without which, few can be expected to carry on the work of self improvement after leaving school.

6. The building of school-houses has advanced as fast as could be expected; but there is still much to be done before all that need instruction have a school within reach of their homes. A small per-centage of the population—shepherds' and constables' families, on outlying stations—cannot be included in any practicable scheme of school extension, but there are many thinly peopled districts where the difficulties ought not to be considered insuperable. The question of building in these districts must depend on the prospects of permanency in the population, and doubts in this respect cause hesitation or refusal to incur the expense of permanent school-houses. Moveable buildings are needed to meet this difficulty.

7. Although it is very desirable that the qualifications of teachers in the lower grades should be raised, it is to be expected that one immediate effect of a change in that direction will be an increase of difficulty in filling vacancies in small schools, unless a moderate degree of certainty in making a decent living is offered to those who might be candidates. The dependence on school fees for a large part of the income renders it too precarious to be attractive to anyone whose circumstances allow a choice of employments.

I have, &c.

J. RULE.

The Hon. the Minister of Education.

APPENDIX C.

GENERAL REPORT for the Year 1885, by G. BOURDILLON, Esq., M.A., Inspector of Schools.

SIR,

I HAVE the honor to submit my General Report for the year ending 31st December, 1885.

The district under my charge throughout the year was that assigned to me in 1884. It contains none of the large schools of the Colony, and comprises for the most part small schools situated, in many cases, in the midst of a scattered population. My Report, therefore, does not deal with certain points, such as the Pupil Teacher System, which are chiefly connected with the schools in Hobart and Launceston, and the larger townships in the island. Sixty-eight schools were visited in 1885. With the exception of a few which were either temporarily closed, or else not yet established at the time of my visit to the locality, these all received the regular visits of inspection in the former half of the year, and of examination in the latter. The time not spent in this work, with the exception of three weeks for which I had leave of absence, was fully occupied with the annual examinations of Teachers, Pupil Teachers, and candidates for Exhibitions; special examinations of Teachers in the Probationary Class, and of candidates for employment as Teachers; enquiries in localities where application was made for the establishment of schools; reports on a variety of subjects; and the other duties that devolve on an Inspector beyond the actual work of inspection and examination of schools.

The system of inspection adopted in Tasmania has always appeared to me to be a peculiarly sensible one. According to this system, two separate visits for distinct purposes are to be paid by the Inspector in every year to each school in his district, besides incidental visits for special purposes. The object of the visits of *examination* is plain to all. The work done in the past year is tested by a careful examination of the whole school. The results of the examination of each individual child are recorded in the case of the three most essential subjects of Reading, Writing, and Arithmetic; and by a reference to the nominal lists the progress of any child may be traced for a series of years. In the other subjects of instruction the examination is as a rule more general, and the progress recorded of each class as a whole. But here, too, in the case of all written work, the papers of children in the fourth and higher classes may at any time be referred to. The use of the other regular visit, that of *inspection*, may not be quite so clear at first sight, but to my mind these visits are fully as important as the former. Beyond the inspection of premises, furniture, and apparatus, and the occasional detection of irregularities, the Inspector has an opportunity of quietly watching the usual working of the school. Defects in methods of management and instruction can be noted, and suggestions made to the teacher. The mode of giving instruction in any particular subject can be compared with the results obtained in the last examination, and where the results have been unsatisfactory, the cause may frequently be found in defective methods. The Inspector often notices room for slight changes and improvements, and I have invariably found suggestions well received by teachers.

Thus the two visits have different objects: the one being designed to test results, the other to observe how these results are obtained. It is to be hoped that no permanent reduction will be made in the staff of Inspectors which will render the continuance of this system impossible. Some time might indeed be saved by the two visits being made on consecutive days, but that of inspection would then lose half its value, as the school would be prepared and all made ready for the visit. Besides this, the Inspector would then visit each locality only once in the year. More frequent visits, not less, are to be desired.

In the visits of examination, two thousand one hundred and seventy-two children were examined in sixty-four schools, giving an average of thirty-four to each school, as against an average of thirty-one in the sixty-five schools examined in the previous year. The results on the whole are encouraging. While there

is a large increase of failures in arithmetic, there is a considerable decrease in the failures in reading, and some decrease also in the failures in writing. Throughout the schools generally the children have been found more strictly classified in accordance with the Programme of Instruction, although there are still too many cases in which promotions have been made either because a child has been a long time in one class, or because a child is older than the rest of the class, or else because parents complain of a want of progress, or for some other reason, and not the only right one,—viz., that the child has thoroughly mastered the work of the class from which the promotion is made. Such premature promotions do harm to all; for while the children thus promoted are doing work too high for them, and only receiving confused impressions, the progress of the rest of the class is also retarded. An opportunity is offered to teachers in the issue of the new Standard of Instruction to thoroughly re-classify their schools, and the fault of placing children too high will for the future be regarded in a more serious light.

Fuller statistics of the results of the examinations might be given, but such figures are found to be chiefly useful in correcting general impressions left upon the Inspector's mind. Separate reports on each school have already been furnished, and it appears most advisable here merely to gather together some of those features, each of which has been noted as common to a considerable number of schools. It should, however, be mentioned that there are schools in which the defects here noticed are conspicuous by their absence.

Reading.—In Reading some improvement has been noticed generally. There is still, however, in many schools a great want of expression and intelligence even in the upper classes. Children should be taught as far as possible to realise that the main object of reading is to learn what is written, and not merely to be able to pronounce, with correct articulation, certain combinations of sounds. In the lower classes it is not an unknown thing for a teacher to let child after child read without stopping even to correct actual faults. The result of this is manifested in some cases by slipshod reading in the upper classes, where children will sometimes read words of four or five syllables glibly, and yet persistently omit monosyllables, or put wrong ones in the place of right. The leaving of the instruction of the lower classes in this subject exclusively to monitors or inexperienced assistants is a habit to be deprecated.

Writing.—The most general defect, perhaps, in those schools where the writing is not good, is that the children merely practise writing without being really taught. It is a common thing, too, in Class II. to find writing allowed that is too small. Teachers have complained occasionally of the pressure of parents in this respect. Every child, however, should learn to write a large hand well before he is allowed to write small, or steadiness of hand is not likely to be acquired. Bad spelling is frequently fostered by the length of passages given for transcription, and by the want of a careful correction of mistakes in transcription and dictation. Where children correct one another's work mistakes are frequently left unnoticed. With regard to both Reading and Writing, it should always be borne in mind that far more is learnt by a little done well than by much done carelessly or imperfectly.

Arithmetic.—The preponderance of failures in this subject is due to a complicity of causes. At the root of all lies the fact that, from the very first, children are often taught to do sums without having it made plain to them what they are doing. In illustration of this, it was found in the examinations last year that in many cases where children in the Second Class could do easy sums in subtraction, when they were given first the upper line and then the lower, and told to subtract the latter from the former, these same children if told to take, say, seventeen from thirty, would place the seventeen above the thirty and then probably borrow a hundred to make the sum possible. That the Teacher is generally responsible for this want of intelligence is shown by the fact that in many schools the whole class fell into the error, while in others all stated the sum correctly. The difference as a rule was between school and school, not between child and child. The same fault not unfrequently extends to the higher classes. Children go through processes and produce "answers" without having any idea of what they are doing. In some schools there is far too little oral instruction, aided by the black-board, and too much simple exercise with cards and books. To give instruction well in Arithmetic is, perhaps, a more difficult task than to teach children to read and write, but better results would be obtained in this subject if all teachers did their best to make the work intelligible from the first, and illustrated the different processes by examples drawn from everyday life. Under the best instruction, however, the actual failures in Arithmetic would naturally be more in number than those in Reading and Writing, as the subject admits of a more definite standard and a more exact test.

Geography and English Grammar are really well taught in some schools, and with very fair success in a considerable number of others. From these there is a downward gradation to those schools in which the results are almost *nil*. To render instruction in these subjects in any degree efficient, there must be, besides exercise on slates and paper, real oral teaching, and not merely the hearing of lessons, which are too often learnt by rote.

Instruction in *Scripture History and Narrative* is given generally throughout the district, and in many schools the children answered readily and well in examination. I have not heard any complaint made of sectarian doctrines being inculcated by the Teacher, nor am I aware that any Teacher in the district has laid himself open to censure in this respect. It does not, however, appear to be sufficiently understood by all teachers that Sacred History is one of the regular subjects of instruction, and that, while the time and method of teaching it are prescribed by special regulations, it is not left to the option of the teacher to give instruction in the subject or not as he pleases.

In the few schools in which *English History* is taught some acquaintance with the subject was, as a rule, shown. Larger results may be looked for now that the subject is prescribed for Class V. as well as VI.

The above comprise all the subjects, with the exception of *Needlework*, in the majority of the schools in the district, though in some few instances instruction is given in *Singing* and *Drawing*.

To pass to more general points. Many of the defects observed in our schools may be traced to the want of any adequate means of training for the teachers. Undue stress, however, is sometimes laid upon this want. It does not follow that because a teacher enters upon the work without any previous special training, he or she must therefore always remain an indifferent teacher, and never improve in school management or in methods of giving instruction. There are teachers in Tasmania to whom the greatest praise is due for the pains with which they endeavour to overcome as far as possible the effects of a want of training. Not only do they prepare themselves for the Annual Examination of Teachers, but they study books on school management and apply to their work the rules and advice they find given there; they take every opportunity of conferring with more experienced teachers; and, most important point of all, they carefully prepare lessons before giving them in school. In a word, they take up teaching as a profession; they realize that they know little of it at first; they set to work to become as efficient as may be in the exercise of it, and such efforts are invariably crowned in a greater or less measure with success. Others, on the contrary, take none of these pains, and therefore never become teachers worthy of the name. It may safely be stated that a considerable number of untrained teachers have never once considered that there is any special art in teaching—at any rate, any art that they may acquire. If these teachers followed the example of those described above, and gave themselves heartily to their work, there would soon be a vast improvement seen in many of our country schools. In one point this difference in teachers is especially noticeable, and that is in the use of books. It is far too common a sight to see a teacher, book in hand, teaching children to repeat parrot-wise what is written therein. This is especially the case with Grammar and Geography. A teacher was once observed asking for the definition of an *island*, and referring to a book to see whether the answer given was correct or not! It is impossible that anyone should teach effectively to others that which he has not mastered himself. From this cause come the confused notions so often manifested by children, and the tags of technical definitions applied at haphazard in answer to questions. The teacher must have an intelligent knowledge of a subject himself before he can hope to impart such a knowledge to the children. Some teachers would be astonished to find how much less of dreary drudgery there is in teaching out of the head than in endeavouring to convey the contents of a text-book straight to the minds of the children. The words applied to the Prussians are worthy of the attention of all teachers in Tasmania: “The Prussian teacher has no book. He needs none. He teaches from a full mind.”

In spite of all the provision made for education in Tasmania, it still remains a fact that a considerable number of children are being brought up in ignorance, even in families living within easy reach of State Schools. The appointment of a Truant Officer for the Country Districts has been attended with some good. Over and above more definite and tangible results, certain latent indications of good effected have been observed by the Inspector in localities visited by this officer. But to render the work really effectual, it would be necessary to make further appointments in this direction, and it is possible that some other means at least as effective, and less expensive, might be devised. The enforcement of the compulsory clauses of the Education Act must, however, ever remain a difficulty. But there is another side to the question, of how to make education general. “In Prussia,” it has been observed, “education is not flourishing because it is compulsory; it is compulsory because it is flourishing.” *Compulsion* should be only supplementary to *attraction*. Those only have to be driven who will not be drawn. And as far as possible parents should be made desirous to send their children to school because they feel it to be good for them. The first step to secure this end must consist in offering a really good article by providing good and sufficient buildings and good teachers. State Schools should be rendered attractive not so much by prizes for the few as by the sound education they offer to all. The second step consists in fomenting as far as possible a general sense of the value of education. Parents too often appear to regard State Education in the light of an imposition, involving a tax in the shape of fees, and not as an institution established by the people themselves through their representatives, for the general good of the community. A sound public opinion may be largely encouraged by the tone adopted by the Press when speaking on the subject.

I have, &c.

G. BOURDILLON.

The Hon. the Minister of Education.
