III.—SPECIAL COURSES AND EXAMINATIONS IN PURE AND APPLIED SCIENCE.

The Council has for some years past had under consideration the great need of extended means of instruction for students looking forward to a Degree in Science as a guarantee of professional qualifications, especially those connected with Mining and Mining Engineering. There was also the question of making provision for a course of examinations adapted to the requirements of non-matriculated students working in the same direction, but not at present in a position to enter on a regular course for a University Degree. Some of the latter class are devoting themselves to special branches,

such as chemistry and assaying, the metallurgical treatment of ores, experimental mechanics, physical geology and mineralogy, &c., while others are desirous of taking up a comprehensive course with a view to qualification for the office of Mine Manager. To all such students, the University ought to lend a helping hand; but the funds at its disposal have barely sufficed for the maintenance of the existing teaching staff, and the conduct of the Public Examinations and Examinations for Degrees. All that it was possible to accomplish during the past year was to make some provisional arrangements for instruction and examination in Science subjects, which, it was hoped, might prove helpful in the right direction.

The restoration of the University Grant to the amount provided by the Act of Incorporation has now made sufficient provision for the necessary addition to the Professorial Staff, and the initial expenses connected with Practical Science teaching. In its next Annual Report, the Council hopes to announce that it has secured the services of an Officer thoroughly well qualified to take general charge of the proposed course, with special responsibility for those branches of it which are connected with the Mining Industry.

IV.—MATRICULATION ROLL.

The number of names on the Roll of Matriculated Students now stands at 112, including the names of those who have proceeded to Degrees in the University. The entries during the year were 14, namely:—

John Derwent Hayle.
Oscar Henry Jones.
Edith Rhoda Hurst.
Nelly Maria Smith.
Charles Chant.
Thomas Duncanson McEwan Kay.
William Henry Dawson.
Ernest Des Vœux Dobson.
Russell Young, Jun.
Margaret Egerton Murray.
Robert Aubrey Murphy.
Isabella Elizabeth Mather.
Mildred Celia Miles.
Andrew Holden.

V.—DEGREES CONFERRED.

On Commemoration Day, 19th December, the Annual Meeting of the University was held in the Town Hall, at which your Excellency was unfortunately unable to be present as Visitor and give your usual address. The annual address was given by the Chancellor, the Rev. George Clarke, who also conferred the Degrees severally specified on the following candidates:—

Doctor of Medicine:

Gustave Heuzé Hogg (Edinburgh).

In the early part of the year there were three admissions *ad eundem gradum*, viz.:—

Bachelor of Arts:

William Alexander MacLeod (N.Z.), 20th March.

Bachelor of Science:

The total number of students of this University who have been admitted to Degrees is 31.

VI.—LECTURES DELIVERED AT THE UNIVERSITY.

The number of Lectures delivered at the University throughout the Academic year averaged 70 in each week. The number of Students attending under the University Professors and Instructors at Hobart and Launceston was, in the last term, 35.

VII.—TEACHING AT LAUNCESTON.

The University Professors have continued to pay weekly visits to Launceston to deliver lectures and give students assistance and direction in their several courses of study. Additional teaching was given during the year by Mr. H. C. Kingsmill, M.A., and Mr. A. W. B. Perceval, B.A., who were appointed in 1895, the former giving instruction in Mathematics weekly, under the Professor in that subject, and the latter in Modern Languages, also weekly. The number of students in Launceston was, in the last term, 10.

VIII.—THE COUNCIL.

The Council has again this year to report the removal by death of one of its most prominent Members, by which the Vice-Chancellorship became vacant, after it had been held for little more than a year by the late Mr. James Backhouse Walker. Both as a Member of the old Council of Education, and of the Council of the University, Mr. Walker rendered signal services to the cause of higher education in this Colony. The Council, accordingly, desires to record its appreciation of the same, and of the deep and intelligent interest he ever took in the work and welfare of the University, also its unfeigned sorrow for the loss of so estimable a man and so trusted a colleague.

The following is the List of Members of the Council for the year:—

* Re-elected for years 1900-1902.

† Re-elected for years 1900-1901.

‡ For six months in the year the Chief Justice was acting as Administrator of the Colony. Thus becoming *ex officio* Visitor of the University, he was consequently unable to attend business meetings of the Council during that period.

XIV. PARLIAMENTARY APPROPRIATION.

It is a matter of satisfaction to the Council that Parliament has discontinued the annual reduction which has been made for several years past in the amount fixed by law for payment out of the Consolidated Revenue Fund to the Council of the University. This amount of £4000 has been diminished by various sums for every year from 1893 to 1899 inclusive, the aggregate reduction being £8000.

The appropriation of the undiminished grant for 1900 will enable the Council to make provision for a Chair of Mining, and for such equipment of the Physical and Chemical Laboratories as will probably suffice for present necessities. The intimate relation of practice to theory has to be constantly impressed on students in all departments of science, but the laboratory exercises will fail to produce satisfactory results

unless the instructor is supplied with necessary materials and apparatus. These, at the outset, need not cost more than the amount which, by judicious and economical management, may be made presently available, and, when the need for further equipment becomes evident, the Council is confident that its requirements will be liberally met.

XV. ACCOUNTS.

The audited Account of Income and Expenditure, required by the provisions of "The Tasmanian University Act," is hereto appended.
