

(No. 49.)

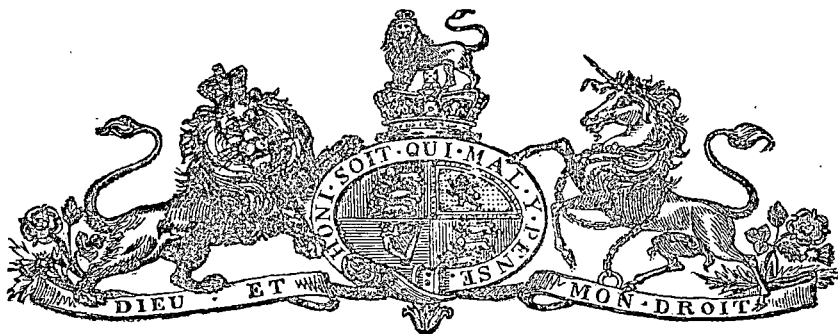

1879.

T A S M A N I A.

HOUSE OF ASSEMBLY.

REPORT OF THE CHIEF INSPECTOR
OF SHEEP.

Laid upon the Table by the Colonial Secretary, and ordered by the House to be
printed, September 19, 1879.

REPORT OF THE CHIEF INSPECTOR OF SHEEP.

Inspector of Sheep Office, Hobart Town, 14th August, 1879.

SIR,

I HAVE the honor to submit the following Report upon the working of the Scab Act during the years 1878-9 to the 30th June.

In my Report dated the 17th July, 1878, I stated that all the Districts in which sheep had been under licence the previous year were reported clean; but I had not thought it desirable to have them declared "Clean Sheep Districts" under Section 10, "Scab Act, 1875."

Subsequently, in the month of August, a small flock of about 300 sheep in the Richmond District were found to be infected. In this case, I believe, the infection proceeded from straggling sheep left on the run by the former occupant, whose management had been of the worst description. It was alleged that the infection had been brought from Oatlands by a lot of sheep purchased there by the present occupant. This allegation, however, had nothing to support it either by evidence or rational probabilities. The sheep referred to had been brought from the Fingal District, which had been clean for years, and where no sign of disease has made its appearance up to this date.

No case has since arisen in the Richmond District; and I believe I shall be justified in having it declared a "Clean Sheep District" at an early date, with other districts where the sheep have been clean for some years.

Another case arose in October last year in the southern part of the New Norfolk District, on the eastern bank of the Derwent, immediately adjoining the Dromedary Range. It turned out that some wild sheep from the Dromedary got into a flock of sheep on the Lawn Farm and infected them. These sheep were at once dealt with under Section 2, "Scab Act, 1877," and cleansed. Measures were at the same time taken by Mr. William Harrison, the Inspector, to search the Dromedary Range. In this he was energetically assisted by Mr. A. Downie, who deserves great credit for the gratuitous services he rendered on that occasion. The result was the capture of about 40 sheep of all ages, some of them with four years growth of wool. One or two of these were found to be diseased; and as there was no means of tracing them to owners the whole were destroyed.

The Inspector was under the impression that the whole of the wild sheep on the Dromedary had been secured; but so late as June last some more were captured, three of them being diseased. These the Inspector destroyed; and has, with my sanction, adopted such measures as, I believe, will ensure the capture and destruction of any stragglers that may yet remain on the Dromedary Range. Had it been possible to trace these sheep to owners of course I would not have sanctioned their destruction, as such a course has not been authorised by the Act since the Consolidation Act of 1875 was passed. But as owners could not be found for these sheep I deemed it the safest course, in view of the public interests, to destroy them.

On many occasions during the last 7 or 8 years small lots of unshorn sheep, that had been out for years, have been found; but this is the only occasion in which disease has been found amongst them. This case, standing alone out of so many in different parts of the Colony, is no doubt an argument in favour of the presumption that another such will not arise; this, however, is only a presumption. Other cases of a similar kind are possible; nay, I may say, are fairly presumable. Hence it is that I am so strongly of opinion that the strictest inspection at all public sales, and elsewhere, should be continued for some considerable period after the Colony has been officially declared to be clean.

I have always apprehended that when all the flocks had been declared free from disease, wild sheep from the unoccupied crown lands might turn up in some of the neighbouring flocks on runs where the back fences, if any, are of the most wretched description; around the Dromedary Range, for instance, until now there cannot be said to have been any back fences at all. In consequence of this last invasion of diseased sheep from the Dromedary I considered it necessary to have the Lawn Farm and the adjoining small farm, known as the Grange, placed in quarantine under "The Scab Act, 1879."

There are 600 sheep on the Lawn Farm and 400 on the Grange. They have been dipped under Mr. Harrison's personal supervision, and he reports them to be clean; but of course some time must elapse before these farms can be released from quarantine and the remainder of the New Norfolk District declared a Clean Sheep District. With this exception, at an early date I hope to be enabled to request you to advise His Excellency the Governor to declare the whole of the remaining undeclared districts, both north and south, to be "Clean Sheep Districts." Many of them have been virtually clean districts for some years, but I did not consider it advisable to have them declared so, having a due regard to the interests of sheepowners in those districts as well as the interests of sheepowners in districts which have been "Clean Sheep Districts" so far back as 1873.

I may repeat what I stated in my last Report, that there is a reasonable probability of my being able at no distant date to advise you that Tasmania may be declared clean under "The Scab Act, 1879."

Here, I think, it will not be amiss if I refer more particularly to that Act—or rather, I may say, more correctly to a clause in the Bill which was thrown out in Committee. The clause thrown out provided for the reimposition of the half-penny per head contribution for the year 1880, in order to keep up what I believe to be a necessary amount of inspecting power for a reasonable period after the country has been formally declared clean under the Act.

The question, as you are aware, was disposed of in a thin house, at the fag end of a Session, and no division was taken upon what assuredly was the most important section of the Bill; consequently I am unable to know what was the exact parliamentary opinion on the question, as debates in committee are rarely reported at any length unless they have a political and party bearing. I believe, however, that the contribution of one half-penny for 1880 was opposed on the ground that it was unnecessary, as the country might be said to be clean; and, that being so, the department ought to be reduced and, by consequence, the impost on the people lessened. The same opinion I am aware has been expressed by a few sheepowners throughout the country; but I venture to say that if the most intelligent and most observant sheepowners were polled to-morrow on that question, they would give their voice in favour of my views being carried out irrespective of any consideration of whether the contribution should be a farthing or a half-penny per head for another year.

On the 1st question, as to the necessity of a continuance of a sufficient inspecting power for a considerable period after the country has been declared clean, and what may constitute sufficiency, I think I may without presumption hold the opinion that I ought to be, if I am not, the best judge.

As to the contribution under the Scab Act being a tax or impost on the people, I deny it. It is not even a tax or impost upon sheepowners in the proper sense of the term. In the first place it was an investment of capital on the part of sheepowners to get rid of a disease in their flocks which lessened their value and, by consequence, the value of their properties. On this part of the question I can show that since March, 1870, up to the 30th June last, the amount of money invested in the form of payments from the Scab Act Fund is £26,583, the return from which up to the present time may, on rational grounds, be computed at over £1,200,000. The particulars of my calculation will be found in Paper B appended to this Report, and the Treasury account showing the receipts and expenditure under the Scab Act from the 1st March, 1870, to the 30th June, 1879.

The 2nd aspect of the question is, that instead of being a tax or impost now it is, and has been for some years, an insurance.

The lands of the Colony now produce 10,000 bales, or 3,000,000 lbs. more wool than they produced before the introduction of the Scab Act. Proper care and sufficient inspection are required to maintain it. Do away with inspection, save the contribution or premium, and it is possible enough that scab would again be introduced, when it would run through the country like wildfire, and the same process that has been gone through before would have to be repeated, to the infinite loss of sheepowners as well as to the public at large. Last year three lots of scabby sheep arrived at Sydney from California, within four months, and, in accordance with the law in New South Wales, were destroyed.

I shall therefore deem it my duty again to urge upon the Government that during the ensuing Session of Parliament a Bill be introduced to reimpose the half-penny per head contribution to the Scab Act Fund during the year 1880.

Unless this half-penny is again imposed for another year the number of Inspectors must necessarily be reduced about one-half on the 31st December next, which, in my opinion, may prove "penny wise and pound foolish" economy. Moreover, I think it will be most unfair to myself and the department to weaken the inspecting power at the very time when it appears to me to be so essential to maintain it.

I may remark here, that whenever any question concerning the Scab Act has come before the public or before Parliament, it has been treated as a purely sheepowners' question, affecting their interests alone; hence the small interest taken in the subject by many members of the Legislature. Some gentlemen, representing city constituencies, look on passively, thinking, and in point of fact saying, that they do not understand the question: "It is for the country members to deal with it;" "It is no business of theirs."

This view of the question has always appeared to me to be a most erroneous one. I deny altogether that the question is a mere sheepowner's question. In my opinion it is no more a sheepowner's question than it is a question for every member of the community who eats mutton, or may in other ways be interested in the prosperity or otherwise of a part of the community which contributes about half a million sterling to the exports of the Colony.

If the income of sheepowners has been increased by a quarter of a million sterling annually through the operation of the Scab Act—which I maintain it has, and more—assuredly the general public must be interested in many ways in the expenditure of this additional income. It is not hoarded up; every sixpence is expended in the country. To this source may be traced certainly not less than from £15,000 to £20,000 a year of the increased Customs Revenue during the last 5 or 6 years. This source is also of a permanent character; and therefore has an advantage over increased revenue arising from mineral discoveries, which experience has demonstrated in Victoria and elsewhere may be exceedingly productive for a few years, but are soon exhausted, at least so far as alluvial deposits are concerned.

The number of sheep returned is about the same as last year. The Table underneath shows the number of sheep, and the quantity and value of wool exported each year, from the 30th June of one year to the 1st July of the following, made up from Customs Returns of wool exported; and number of sheep returned to this office since 1870:—

ABSTRACT of Wool Exports for the last Ten Years, and Number of Sheep.

	<i>Hobart Town.</i>		<i>Launceston.</i>		<i>TOTAL.</i>		<i>No. of Sheep.</i>
	<i>Lbs.</i>	<i>Value.</i>	<i>Lbs.</i>	<i>Value.</i>	<i>Lbs.</i>	<i>Value.</i>

It will be observed that the increased quantity of wool in last year's returns is very large, although the number of sheep is much the same. I will not remark on that subject here, but will deal with it fully in an Appendix attached to this Report marked B.

The number of stud sheep exported in 1878 is the smallest for the last 8 years, principally owing to restrictions imposed by the Victorian* Government last year having been of such a prohibitory character that Tasmanian breeders determined not to send any sheep to the annual August sales.

The Victorian Regulations have recently been relaxed, and the concession of 10 days instead of 4 days before dipping, which I endeavoured unsuccessfully to get the Victorian Government to concede last August, has now been accorded in Regulations dated the 11th July last.

I am glad to say, however, that many sheep that were shut out of the Melbourne market last August were afterwards sold in New Zealand at much higher prices than they would have realised in Victoria.

The Customs Return of value given in the following table is totally misleading. 277 sheep sent to New Zealand which appear as having realised £1615, actually sold for about £9000.

NUMBER and Custom House Value of STUD SHEEP exported since 1870 inclusive.

The number of sheep returned in Live Stock Returns, and under the Scab Act, since 1860 is as under :—

	<i>In Live Stock Returns.</i>	<i>Under Scab Act.</i>
From 1860 to 1869, average number	1,730,000	
1870	1,531,187	1,416,665
1871	1,349,775	1,349,134
1872	1,305,489	1,306,359
1873	1,395,353	1,323,480
1874	1,501,531	1,531,242
1875	1,714,168	1,700,454
1876	1,719,768	1,783,072
1877	1,755,142	1,804,486
1878	1,831,278	1,845,810
1879	1,838,831	1,845,086

Importations of fat sheep and bullocks in 1878 show a small increase on the previous year, the greater number by the T.S.N. Company's steamers on ships' account.

	<i>£</i>
1869. Bullocks, 1722; sheep, 16,540; value.....	31,695
1870. Ditto, 1640; ditto, 17,900; ditto.....	27,945
1871. Ditto, 928; ditto, 13,053; ditto	18,230
1872. Ditto, 827; ditto, 5398; ditto.....	12,102
1873. Ditto, 900; ditto, 13,188; ditto	19,843

1874. Bullocks, 790; sheep, 19,958; value.....	29,158
1875. Ditto, 1211; ditto, 22,971; ditto.....	36,462
1876. Ditto, 805; ditto, 12,054; ditto.....	22,708
1877. Ditto, 904; ditto, 8385; ditto.....	19,820
1878. Ditto, 1347; ditto, 10,980; ditto.....	23,392

There were exported from Tasmania in 1878,—

	£
15 head of cattle, valued at	420
And 289 horses, valued at	10,044
	£11,044

The export of horses was almost entirely to New Zealand and Victoria.

The number of cattle returned in the Live Stock Statistics for the years 1873 to 1877 showed a gradual increase, which has been continued to a larger extent than usual in 1878. To an extent, indeed, for which I can see no satisfactory reason. I am inclined to think there must be some error in the returns.

In 1873 Cattle were returned at	104,594 head
1874 ditto.....	106,308 ditto
1875 ditto	110,450 ditto
1876 ditto	118,694 ditto
1877 ditto	124,459 ditto
1878 ditto.....	121,187 ditto
1879 ditto.....	126,276 ditto

During the year 1878 the export of rabbit skins was 1,131,672,—being the largest number ever shipped from Tasmania. In 1877 the number was 709,572. Notwithstanding, however, this large increase in the number of rabbits destroyed, I believe they are more numerous than ever. They are spreading all over the country, even into country not favourable for burrowing. In some parts of the country the settlers are taking energetic steps to destroy them; and, by erecting rabbit proof fences, protect their properties from the inroads of their neighbours' rabbits; but, generally, the magnitude of the plague is not understood and fully realised. Where there are no rabbits now, or only a few, settlers flatter themselves with the idea that, because there have been only a few on their properties for many years, there will never be any more. This is a most dangerous delusion; and, ere long, I fear they will find it so to their cost. Very many, however, will not awake from it until their pastures are destroyed, their stock perishing for want of food; and, by consequence, themselves nearly if not quite ruined.

I do not believe that the evil will ever be overcome effectually without some very stringent legislation on the subject.

In one way the rabbit curse is on all fours with the scab. One settler destroys his rabbits at considerable expense, and could then keep them under at a very small annual outlay; but his neighbour does nothing. He waits upon Providence to come to his assistance, and breeds rabbits to such an extent that they must go abroad for food; and thus his neighbour's efforts to grapple with the evil are neutralised. In short, it is labour in vain for any one to destroy his rabbits unless he fences off his property at the same time. This involves great expense; and would not be necessary if every man was compelled by some stringent law to kill his own vermin.

The number of sheep specially inspected by the District Inspectors from the 30th June, 1878, to 30th June, 1879, was 767,543, and miles travelled 25,968.

I also append a Return of stock received at the Hobart Town Main Line Railway Station, which Mr. Grant was good enough to furnish me with. It is not altogether unconnected with the working of the Scab Act, inasmuch as sheep would not be allowed to travel by rail unless they were clean.

Appended to this Report is a detailed Return of sheep throughout the Municipal and Police Districts, with the names of the owners.

Recently I found it necessary to send an Inspector to King's Island. It appears that a Company in Ballarat, Victoria, rent the island from the Tasmanian Government, and have partially stocked it with sheep from Victoria. They have now 3000 sheep on the island, and from the Inspector's (Mr. Allison's) Report it is capable of carrying a much larger number under proper management. Mr. Allison reports the island as having great capabilities, instead of being the barren, scrubby waste it has always hitherto had the character of.

In conclusion I may say that the task I undertook in 1870 has been accomplished, so far as material results are concerned, affecting all sheepowners excepting breeders of stud sheep. Before they can reap the full benefit of the Act the country must have been officially declared clean for at least 12 months. Then, no doubt, the existing vexatious and unnecessary restrictions in the neighbouring Colonies will either be removed altogether, or greatly relaxed. But, excepting the few breeders of stud sheep, the whole of the other sheepowners throughout Tasmania have for some years been in the full enjoyment of all the material advantages I predicted in 1869 and 1872 would flow from the operation of the Scab Act. If any scab does still exist among wild sheep in the mountains, and other outbreaks should be the result, it must be clear that it can never go further than one or two flocks if proper inspection is maintained; and consequently the existing increased income of sheepowners is secure so far as scab can effect it.

To this (possibly the last Report I may have to make under the Scab Act) I append the calculations made by Mr. Robert Clerke and myself in 1869, my revised one of 1872, and again in 1878, together with my present one, showing the approximate amount I consider the Scab Act has produced to the Colony up to the 30th June last.

I am quite aware that Inspectors under the Scab Act have been viewed by very many as mere ordinary Government officers, whose services were amply paid for by a salary of £200 a year and £150 allowances for travelling expenses.

The duties which Inspectors were called upon to perform—particularly in the early stages of the work—required not only skill and energy, but also great discretion. There exists, I know, in the minds of some sheepowners in districts freed from scab some years ago, that its prolonged existence in some of the Southern Districts must have arisen from the fault of Inspectors; this is not a correct opinion. The difficulties Inspectors have had to contend with vary greatly in different parts of the Colony, from the nature of the country, and from sheep being constantly moved to and fro to sales more in one part of the Colony than another.

In some districts, after the autumn sales, hardly any sheep would be moved during the year; whereas in other districts, more particularly in the south, the same sheep might be seen at 3 or 4 different sales in a month, within a radius of 50 or 60 miles,—consequently, if any infection existed it was continually being scattered broadcast in spite of the utmost vigilance on the part of the Inspectors.

I think, therefore, as they are not in a position to defend themselves from undeserved censure, it is incumbent upon me to say that it is not on the Inspectors the censure should fall, but upon the over merciful infliction of penalties in most cases of prosecutions under the Act,—particularly in the districts where scab mostly prevailed, in the southern portion of the Island. In very many cases the infliction of merely nominal penalties completely neutralised the efforts of Inspectors.

In the course of 9 years' administration of a new law, which was distasteful to five-sixths of the sheepowners, and absolutely hated by a considerable section of them—bristling with difficulties, I may say—it would be singular if some errors were not committed. If errors have been committed by Inspectors, I am glad to be able to say that they were not only few in number but trifling in character; and that at the present moment I have the greatest confidence in the members of the inspecting staff.

In the immediate view of what I consider will be a premature reduction in their numbers, I think it but fair to them as well as to myself to show approximately, in what I hope is an intelligible form, what their labours and my own have realised to the Colony, at a cost which I think must be considered trifling in the extreme when compared with results.

I have the honor to be,
Sir,

Your obedient Servant,

JAMES WHYTE.

The Hon. THOS. REIBEY, Colonial Secretary.

RETURN of Sheep in Tasmania in the several Municipal and Police Districts up to the 30th June, 1879, showing their Condition on that date.

I.—MIDLAND AND EASTERN SHEEP DISTRICT, embracing Campbell Town, Fingal, Glamorgan, and Ross.

* 400 of these sheep were infected in June by wild long-woolled sheep from the Dromedary. Are now reported to be clean; and it is hoped that the last of the wild sheep have been captured and destroyed.

† The same observations apply to 600 of these,—owner Mr. Barwick. Farms in quarantine, and must remain so for some time to come.

SUMMARY of Number and Classification of SHEEP in Tasmania, as per Return furnished to 30th June, 1878.

MIDLAND AND EASTERN SHEEP DISTRICT, embracing Campbell Town, Fingal, Glamorgan, and Ross.

<i>District.</i>	<i>Number of Sheep.</i>	<i>Number of Lambs.</i>	<i>TOTAL.</i>	<i>Clean.</i>	<i>In Quarantine.</i>
Campbell Town	129,127	21,808	150,935	—	—
Fingal	101,946	24,399	126,345	—	—
Glamorgan	51,216	14,763	65,979	—	—
Ross,	60,299	16,049	76,348	—	—
	342,588	77,069	419,607	—	—

NORTH-EASTERN DISTRICT, embracing Evandale, George Town, and Selby.

Evandale	104,606	23,582	128,188	—	—
George Town	47,694	10,953	58,647	—	—
Selby	50,741	12,077	62,818	—	—
	203,041	46,612	249,653	—	—

SOUTH-WESTERN AND LAKE SHEEP DISTRICT, embracing Bothwell, Great Lake, Green Ponds, Hamilton, New Norfolk, Oatlands.

Bothwell	111,911	31,641	143,552	—	—
Great Lake	27,207	8665	35,872	—	—
Green Ponds	74,711	4641	79,352	—	—
Hamilton	135,730	36,514	172,244	—	—
New Norfolk	22,071	6458	28,529	—	—
Oatlands	160,007	37,007	197,014	—	—
	581,637	124,926	656,563	—	—

NORTH-WESTERN SHEEP DISTRICT, embracing Deloraine, Horton, Longford, Port Sorell, Westbury.

<i>District.</i>	<i>Number of Sheep.</i>	<i>Number of Lambs.</i>	<i>TOTAL.</i>	<i>Clean.</i>	<i>In Quarantine.</i>
Deloraine	17,439	9639	27,078	—	—
Horton	10,909	4914	15,823	—	—
Longford	116,175	31,980	148,155	—	—
Port Sorell.....	14,782	6772	21,554	—	—
Westbury	51,746	19,161	70,907	—	—
	211,051	72,466	283,517	—	—

SOUTHERN SHEEP DISTRICT, embracing Brighton, Clarence, Glenorchy, Hobart and Kingborough, Huon, Richmond, Spring Bay, Sorell.

Brighton.....	36,387	10,205	46,592	—	—
Clarence	15,713	5195	20,908	—	—
Glenorchy	3153	794	3947	—	—
Hobart and Kingborough	4907	1494	6401	—	—
Huon	3970	1202	5172	—	—
Richmond	49,391	15,145	64,536	—	—
Spring Bay	42,436	8782	51,218	—	—
Sorell	28,888	8084	36,972	—	—
	184,845	50,901	235,746	—	—
Midland and Eastern Sheep District.....	342,588	77,019	419,607	—	—
North-eastern Sheep District	203,041	46,612	249,653	—	—
South-western and Lake Sheep District	531,637	124,926	656,563	—	—
North-western Sheep District.....	211,051	72,466	283,517	—	—
Southern Sheep District	184,845	50,901	235,746	—	—
	1,473,162	371,924	1,845,086	—	—

RETURN showing the Number of SHEEP and LAMBS in each District in the Colony, and their Condition.

<i>District.</i>	<i>Number of Sheep.</i>	<i>Number of Lambs.</i>	<i>TOTAL.</i>	<i>Clean.</i>	<i>In Quarantine.</i>

APPENDIX A.

MEMO. ON SCAB BILL, 1869, (*when the Bill was passed.*)*Mr. WHYTE's Estimate of the Annual Loss through the existence of Scab.*

	£
1. Increased quantity of wool,—say 500,000 lbs., at 1s. 3d. per lb.....	31,250
2. Increased value of present quantity as shipped in 1864, 1865, 1867, 1868, average of 4 years 5,099,950 lbs. at 2d. per lb.....	42,499
3. Cost of dressing annually for tobacco, drugs, and additional labour in dressing, taking an average of estimates, say £10 per 1000 sheep on 1,736,946, the average number for the years 1864, 1865, 1867, 1868	17,000
4. Smaller amount of labour for the management of sheep generally if they were all clean, say 400 men at £50 per annum.....	20,000
5. Increased number and weight of fat sheep, and increased value of export of Rams	10,000
TOTAL.....	£120,749

Mr. ROBERT CLERK's (of Malahide) Estimate.

	£
1. 850,000 lbs. wool, at 1s. per lb.....	42,500
2. Increased value of wool on quantity shipped in 1867, if sheep were clean.....	68,576
3. Cost of dressing, &c.....	13,600
4. Saving of labour and management.....	21,000
TOTAL.....	£145,676

Mr. Clerk made no definite estimate for increased number of fat sheep and export of Rams, but in his letter states that the latter would be large.

REVISED Estimate in 1872 of probable Annual Gain to be derived from the complete eradication of Scab.

	£
1. Increased quantity of wool, say 562,500 lbs., or 6 ozs. per sheep, at 1s. 4d. per lb.....	37,500
2. Increased value of present quantity, taking 5,000,000 lbs. as an average, at 3d. per lb.....	52,083
3. Cost of dressing annually for tobacco, drugs, and additional labour in dressing under the old system of spotting every few weeks.....	13,500
4. Saving of the labour of 500 men at £50 each.....	25,000
5. Increased number and value of fat sheep, say.....	10,000
6. Increased export of Rams and Ewes to the neighbouring Colonies, say.....	5000
TOTAL.....	£143,083

This calculation is based upon the assumption that when Scab is eradicated in Tasmania dipping sheep will wholly cease, excepting for the destruction of ticks; and that will only be required at intervals of some years. In the neighbouring Colonies where the sheep are clean, they are never dressed unless for ticks at intervals of years, according to circumstances and the opinion of the sheep-owner. I have had sheep myself at Portland Bay, in the Colony of Victoria, that were taken from this country and of course were scabby. After they were cleaned they were never dressed again for 11 years in any form or for any purpose.

JAMES WHYTE.

REVISED Estimate in 1878.

	£
1. Increased quantity of wool, say 2,000,000 lbs., at 1s. 4d. per lb.....	133,333
2. Increased value of quantity (5,000,000 lbs.) produced prior to 1870, at say 3d. per lb.....	62,500
3. Cost of dressing annually for tobacco, drugs, and additional in dressing under the old system of yarding and spotting every few weeks, say as before	13,500
4. Saving of the wasted labour of 1000 men at £50 each	50,000
5. Increased number and value of fat sheep, say at least.....	20,000
6. Increase arising from export of stud sheep to neighbouring Colonies, say	10,000
	£239,333

To some very probably the above may be considered an exaggerated estimate. It is not so, however. It is moderate in every item, and is capable of proof if a number of settlers I could name would show me their books with their incomes from sheep, and their expenditure now as compared with former years anterior to the introduction of the Scab Act.

JAMES WHYTE.

APPENDIX B.

A CALCULATION of the principal material Results which may fairly be credited to the operation of the Scab Act.

THE quantity of wool annually exported prior to the introduction of the Scab Act was, on an average, about 5,000,000 lbs.

1st. Quantity of wool, in excess of 5,000,000 lbs. per annum, exported during the years 1873-4 to 1878-9 inclusive.	10,137,363 lbs.	
Deduct for other causes than Scab Act, say $\frac{1}{3}$	3,379,121	
	<u>6,758,242 lbs., at 1s. 3d. ..</u>	<u>£ 422,390</u>
2nd. Increased value on former annual export of 5,000,000 lbs., from 1872-3 to 1878-9 inclusive, 7 years.....	35,000,000 lbs., at 3d.	437,500
3rd. Increased value of stud sheep exported to the neighbouring Colonies, from 1872 to 1878 inclusive, 7 years, at say £10,000 per annum		70,000
4th. Saving of labour of 1000 men, at £50 per annum, for 6 years		300,000
		<u>£1,229,790</u>
Expenditure under Scab Act from 1st March, 1870, to 30th June, 1879.....		<u>26,583</u>
		<u>£1,203,207</u>

To the above may fairly be added a proportionate increase in value of all pastoral and agricultural lands used for the production of wool and fat sheep to an extent, I may very safely say, of not less than 25 per cent. on the value of property in 1870.

The other causes for which I have deducted one-third from the quantity of wool in excess of former years' exports are—improvement in the quality of some flocks in the Colony, principally in the North; an increase in the number and quality of long-woolled sheep; and an increase in the number of sheep shorn in the grease.

The two first items are the only ones to which any weight can be attached, and much more to the first than the second. To the third I attach little or no importance. The fact is that a very large quantity of wool is passed through the Custom House only by the number of bales, without the exact weights; in such cases the weight is assumed to be 300 lbs. per bale.

Formerly the number of bales of wool shipped varied from 15,000 to 16,000 and 17,000, or about an average of not more than 16,000 bales. In 1878-9 Customs Returns now before me show that 26,316 bales were shipped. It will thus be seen that the 8,022,926 lbs. are very nearly accounted for at 300 lbs. per bale. I am therefore of opinion that for other causes I have deducted about 2,000,000 lbs. too much from No. 1 item.

On the third item, increased value of stud sheep exported, I might have placed £30,000 or £35,000 more.

My returns of value are from the Custom House, and I know that, all round, exported stud sheep have realised 50 per cent. more than the value they were passed at through the Custom House. This is not the fault of the Customs officers, but the fault of the shipper, who sends his sheep to town sometimes without any instructions to his agent as to value; and, consequently, sheep that may sell in New Zealand or elsewhere at from £20 to £150 are put down by the agent at £5, £10, or £20, as the case may be.

No. 4 item, the saving of labour formerly absolutely necessary on account of scab, is much under-estimated. I believe 1200 or 1300 men would be much nearer the mark.

I have taken no account in this calculation of the increased number and value of fat sheep raised and brought to market through the beneficial operation of the Scab Act; but certainly during the last seven years it cannot have been less than £100,000 in the pockets of graziers, while it provided wholesome instead of diseased food to the consumer, as well as a cheaper article; for although meat has been very high for some years past, but for the increased supply produced by the Scab Act it would have been very much higher in price, and diseased food into the bargain.

JAMES WHYTE, *Chief Inspector of Sheep.*

APPENDIX C.

STATEMENT of the Number of Head of Cattle, Sheep, and Pigs received at the Hobart Town Station of the Tasmanian Main Line Railway during the year ending 31st December, 1877.

Cattle.....	1370
Sheep	17,250
Pigs	559
TOTAL.....	19,183

For the Year 1878.

Cattle.....	2042
Sheep.....	26,732
Pigs	1289
TOTAL.....	30,063

Continuation of the above for the Six Months ending 30th June, 1879.

Cattle.....	1232
Sheep.....	15,283
Pigs.....	923
TOTAL.....	17,438

Furnished by C. H. Grant, Esq., General Manager Tasmanian Main Line Railway Company.

JAMES WHYTE, Chief Inspector of Sheep.
