1890.

PARLIAMENT OF TASMANIA.

THE UNIVERSITY OF TASMANIA:

Degree of Associate of Arts, 1890.
Tasmanian Scholarships, 1890.
Examination for Exhibitions, 1890.

Presented to both Houses of Parliament by His Excellency's Command.

THE UNIVERSITY OF TASMANIA.

DEGREE OF ASSOCIATE OF ARTS, 1890.

THE Council of the University has directed the publication of the names of the under-mentioned Candidates who have passed the Examination for the Degree of Associate of Arts to the satisfaction of the Examiners, and upon whom the Degree has been conferred accordingly :—

FIRST CLASS.

DOUGLAS OAKLEY WHITE.
WILFRID WANOSTROCHT GIBLIN.
JOHN HENRY KEATING.
SAMUEL PICKEN.
ANNIE GEORGINA HINDS.
DELESFORD HAROLD CHARLES DELMER.

SECOND CLASS.

ALFRED LESLIE HAWTHORN.

THIRD CLASS.

CAROLINE MARY PITT.

Candidate over 19 years of age.

THIRD CLASS.

BEATRICE HELEN BARNARD.

By Order,

GEO. RICHARDSON, *Registrar.*

Hobart, 25th June, 1890.

EXAMINATION FOR THE DEGREE OF ASSOCIATE OF ARTS, 1890.

EXAMINERS' REPORT.

MR. CHANCELLOR AND MEMBERS OF THE COUNCIL OF THE UNIVERSITY.

WE have the honour to present our Report on the Examination for the Degree of Associate of Arts, which began on Saturday, the 14th, and ended on Monday, the 23rd of June.

Thirteen Candidates presented themselves. One of these was above the prescribed age : she obtained the Degree, and was placed in the Third Class. No account has been taken of her work in the following Reports.

Of the twelve remaining Candidates four were girls. Two of these, and two of the boys, failed. Eight obtained the Degree.

In the Reports of the Examiners on the several subjects, which are subjoined, the average has been taken from the marks of those papers only which entitled to pass in that subject.

I. ENGLISH, HISTORY, AND GEOGRAPHY.—Presented by all the Candidates. All passed, four— Picken, Giblin, Annie Hinds, and White, with credit. Full marks, 1100; highest obtained, 829; average, 611.

(a.) *English.*—The reading aloud was good, the enunciation clear, and the emphasis generally correct; the main defect observed was the common tendency to slur over little words. In the essays the spelling and the grammar were for the most part correct, but the composition and arrangement should have been better. The analysis and parsing were very fair. The Play of Shakspere prescribed had been excellently prepared; all questions bearing upon it were answered fully and correctly. As has generally been found, the weakest part of the answering was to questions involving the derivation and history of English words; but, even in this respect, the Examiner is glad to note some improvement.

(b.) *History.*—The answering was good, being more accurate, and shewing wider knowledge than last year. The general average was nearly 66 per cent., and one candidate, Annie Hinds, obtained 75 per cent.

(c.) *Geography.*—The answering was generally poor, and the mapping, though better than last year's, still requires considerable improvement. The Candidates showed scarcely any acquaintance with the constitution of the Dominion of Canada, the races governed by the House of Austria, the European claims in Africa,—questions of Political Geography which ought to have been known. Two Candidates only, Giblin and Picken, succeeded in obtaining two-thirds marks.

II. LATIN.—Nine Candidates. Six passed, three—White, Picken, and Keating—with credit; three failed. Full marks, 800; highest obtained, 655; average, 511.
The grammar was generally good, and the prescribed books had been well prepared. The translations from them were good, but lacking minute accuracy. In the unprepared work two only attempted an easy piece of translation into Latin verse. Five—Giblin, White, Keating, Picken, and Delmer—translated well at sight from Latin, and also did fairly in their Latin prose. Three only—the same boys who gain credit in Latin—shewed a satisfactory knowledge of Roman History. The answering of the rest was very vague and sketchy.

III. GREEK.—Six Candidates. Five passed, two—White and Picken—with credit; one failed. Full marks, 800; highest obtained, 621; average, 497.
The translations from prescribed books were generally good, as were also the explanations and references to context. The grammar questions were fairly answered, but derivations which might be perfect were only moderately answered. The translation at sight from Homer was poor, but that from Xenophon good. The English into Greek was creditably rendered by White, Delmer, Picken, and Giblin.
The History was not, as a rule, satisfactory. Picken did well, and White fairly.

IV. FRENCH.—Nine Candidates. All passed, three—White, Annie Hinds, and Keating—with credit. Full marks, 550; highest obtained, 445; average, 331.

The Reading aloud was very uneven. A few, specially some of the girls, read really well and with good accent; others were very much "after the schole of Stratford atte Bowe." As a rule the grammar questions were well answered, and the translations from French into English shewed fair knowledge of the vocabulary; those from Prose were all good, but those from Verse shewed little appreciation of the niceties of the language. Exception must be made, however, in favour of the translations sent up by Annie Hinds and White, which were excellent, the former slightly the better. In the severest test of all, the translation from English into French, White was the most successful, and Annie Hinds also did creditably. The rest were only moderate.

On the whole this Examination confirms the favourable opinion expressed last year as to the decided improvement observable in the teaching of French.

V. GERMAN. Three Candidates. All passed, two—Annie Hinds and Delmer—with credit. Full marks, 550; highest obtained, 444; average, 395.

The general results were very satisfactory. The grammatical questions were well answered; the translations from German as good as could fairly be expected where the passages set were unprepared, and the Composition by no means bad. The reading aloud by Annie Hinds was excellent, receiving full marks, and that of Caroline Pitt was very good.

VI. ITALIAN.—Three Candidates. All passed, two—Annie Hinds and Keating—with credit. Full marks, 550; highest obtained, 406; average, 344.

The questions in grammar were very fairly answered, and Annie Hinds and Keating did well in the translations. The reading, however, of passages in Italian shewed that the pronunciation of the language had not received the attention which it deserves.

VII. PURE MATHEMATICS.—Twelve Candidates. Nine passed, four—Picken, White, Keating, and Giblin—with credit. Full marks, 1000; highest obtained, 940; average, 529.

The results in Arithmetic and Euclid were excellent, but in Trigonometry and Algebra very poor. Picken's work, however, was almost perfect, and that of Keating and White very good. Taking the result as a whole, the average marks are unusually high for a mathematical paper.

VIII. NATURAL PHILOSOPHY.—Four Candidates. Three passed—Keating, White, and Giblin—all with credit. Full marks, 250; highest obtained, 206; average, 175.

The answering was very good, and the average marks very high. Keating's work was excellent.

IX. CHEMISTRY.—One Candidate, White, who passed with credit, obtaining 133 marks out of 250.

The more general and popular questions were answered very well, but the answers to the more theoretical questions shewed defective knowledge.

X. ZOOLOGY AND BOTANY.—One Candidate, Caroline Pitt, who passed with credit, obtaining 127 marks out of 250.

The answers on the classification, the commercial value, and the habitats of Plants and Animals were good; those on structure were much inferior.

XI. GEOLOGY AND PHYSICAL GEOGRAPHY.—Eight Candidates. Four passed, two—Picken and Giblin—with credit; four failed. Full marks, 250; highest obtained, 151; average, 128.

There was a marked difference between the results in Geology and in Physical Geography. In the latter all did fairly, Picken, Caroline Pitt, Giblin, and Keating very well; but in the Geology all, except Picken and Giblin, did badly. The questions set this year were more numerous, and such as admitted of short and precise answers only, so that Candidates were deprived of the satisfaction of writing diffusely and indefinitely, and the results shewed that the real geological knowledge of the Candidates was practically nothing, the only two possible exceptions being Picken and Giblin, though they obtained barely one-third of the marks for Geology.

XII. DRAWING.—Seven Candidates. All passed, two—Giblin and Hawthorn—with credit. Full marks, 250; highest obtained, 185; average, 151.

The best work was done in Freehand. Some of the drawing from models was creditable. The elements of Perspective appear to be understood, but much weakness was shewn in the application of its rules.

XIII. MUSIC.—Six Candidates. Three passed, one, White, with credit. Three failed. Full marks, 400; highest obtained, 290; average, 230.

Four years ago, when the same Examiners as this year conducted the Examination, out of 12 Candidates, 10 passed—four firsts, one second, and five thirds. Last year, out of 23, 18 passed—eight firsts, six seconds, and four thirds. This year, out of 12 Candidates, 8 have passed—six firsts, one second, and one third. It is fair to note that but for the illness of one Candidate during the Examination the number of passes would probably have been 9.

But though the proportion of those passing this year to the total number of Candidates is slightly lower than in 1886 and 1889, those who have passed have attained a much higher standard ; 6 of the 8 attaining a first class, as against 4 out of 10 in 1886, and 8 out of 18 in 1889.

The average of those placed in the first class was, in 1886, 2767 ; and in 1889, 3017 ; this year it is 3069, and White, the senior Associate of the year, has compiled a total of 3853 marks, which has only once been beaten—by Allport, the senior in 1880—and he had nine subjects against White's eight.

The Examiners are of opinion that these results are very creditable both to the Candidates and to their teachers.

The Prizes which by the Council's Regulations must be awarded are :—

The Council's Gold Medal	White, Douglas O.
The Council's Silver Medal	Hinds, Annie G.
First Prize for English	Picken, Samuel.
First Prize for Latin...................................	White, Douglas O.
First Prize for Greek	White, Douglas O
First Prize for French..................................	White, Douglas O.
First Prize for German................................	Hinds, Annie G.
First Prize for Italian	Hinds, Annie G.
First Prize for Pure Mathematics	Picken, Samuel.

The following Prizes, which by the Council's Regulations are left to the discretion of the Examiners, are thus awarded—

Second Prize for English	Giblin, Wilfrid W.
Second Prize for Latin	{ Picken, Samuel. Keating, John Henry.
Second Prize for Greek	Picken, Samuel.
Second Prize for French.....................................	Hinds, Annie G.
Second Prize for German	Delmer, Delesford H. C.
Second Prize for Italian.....................................	Keating, John Henry.
Second Prize for Pure Mathematics	{ Keating, John Henry. White, Douglas O.
Prize for Natural Philosophy	Keating, John Henry.
Prize for Zoology and Botany	Pitt, Caroline.
Prize for Geology and Physical Geography	{ Picken, Samuel. Giblin, Wilfrid W.
Prize for Drawing	Giblin, Wilfrid W.
Prize for Music	White, Douglas O.

For the Examiners,

M. H. IRVING, *M.A., Examiner-in-Chief.*

Hobart, 24*th June,* 1890.

TASMANIAN SCHOLARSHIPS, 1890.

THE Council has directed the publication of the names of the under-mentioned Candidates who have passed the Examination for the Tasmanian Scholarships to the satisfaction of the Examiners, and to whom Scholarships of the value of £200 per annum each have been awarded, tenable for four years from the 1st October next, subject to the conditions laid down in the Regulations:—

JAMES BELLORD WALDRON, aged 18 years and 10 months, A.A. Degree, 1888. Pupil of the Church Grammar School, Launceston.

LYNDHURST FALKINER GIBLIN, aged 17 years and 6 months, A.A. Degree, 1889. Pupil of the Hutchins' School, Hobart.

The Report of the Examiners is annexed.

By Order,

GEO. RICHARDSON, *Registrar.*

Hobart, 25th June, 1890.

EXAMINERS' REPORT.

MR. CHANCELLOR AND MEMBERS OF THE COUNCIL OF THE UNIVERSITY.

WE have the honour to report that the Examination for the Tasmanian Scholarships began on Saturday, the 14th, and ended on Monday, the 23rd June.

Four Candidates presented themselves. All qualified in Classics, and three in Mathematics.

Three obtained, in all the work, marks sufficient to qualify or a Scholarship.

The first on the list is James Bellord Waldron, A.A., 1888, with 3621 marks; the second is Lyndhurst Falkiner Giblin, A.A., 1889, with 2915 marks; the third, Cecil John Gorringe, A.A., 1888, with 2353 marks, out of a possible 5700.

Waldron, who presented Higher Classics, stood *facile princeps* in the Lower Mathematics. His work showed careful study throughout, and he has fully redeemed the promise of last year. Giblin's papers displayed very great ability, and he must have studied very diligently and to good purpose to achieve the progress he has made since last year's A.A. Examination. It is unfortunate for Gorringe, who also qualified, that he should have found in his year two such able competitors.

The Examiners have the honour to recommend—

JAMES BELLORD WALDRON, A.A. (1888), and
LYNDHURST FALKINER. GIBLIN, A.A. (1889),

to the Council for election to the Scholarships for 1890.

M. H. IRVING, *M.A.,*

EXAMINATION FOR EXHIBITIONS.

THE Council has directed the publication of the following Report of the Examiners appointed to conduct the Examination for Exhibitions.

The Council has decided, upon the recommendation of the Examiners, to award to—

ERNEST WILLIAM TURNER,
ELIZA O'BRIEN,
HAROLD SPRENT NICHOLAS,
ALFRED JOSEPH KEMP,
CATHERINE CARMEL M'MAHON,

each an Exhibition of the value of £20 per annum, tenable for four years from the 1st proximo, subject to the conditions laid down in the Regulations dated 15th May, 1889.

By Order,

GEO. RICHARDSON, *Registrar.*

Hobart, 25th June, 1890.

REPORT OF THE EXAMINERS.

WE have the honor to present to the Council of the University the Report of the Thirtieth Annual Examination for Exhibitions.

Nineteen candidates, of whom seven were girls, presented themselves for examination. One candidate failed in the preliminary examination. Of the rest, seven were examined in Hobart, the rest in Launceston, where the Rev. D. S. Brunton undertook the supervision.

We lay before the Council the following remarks on the work done in the several subjects.

English.—Very good average work was done by all in this subject, as the average of nearly 65 per cent. obtained by 18 Candidates shows. E. Turner's answers were the best, his work being well expressed and neatly written; he was closely followed by H. S. Nicholas; and Teresa M'Auliffe, N. Douglas, and A. C. Hunt also did very good work.

Geography.—The average work in this subject was very good, only two Candidates failing to get half marks, and the eighteen obtained an average of 65 per cent. E. Turner's work was again admirable, his marks being 138 out of a possible 150; and the work of H. S. Nicholas and Alan V. Giblin calls for especial mention.

History.—In this subject the marks are equally divided between English History and Scripture History. For the latter a text-book was suggested in the published schemes of examination; but the Examiners have always preferred to make that portion of the examination a test of actual acquaintance with the historical portions of the Old and New Testaments, and in future schemes no text-book will be named. E. Turner is head of the list in this subject, while A. Giblin, H. Nicholas, and Catherine M'Mahon have passed good examinations.

Arithmetic.—In this subject there was some excellent work. Although the paper was rather above than below average difficulty, E. Turner gained full marks. His papers were perfect, not merely in correctness of results, but in style of work. Eliza O'Brien obtained nearly full marks, while Kemp, Lavers, Hunt, and Burgess passed good examinations.

French.—In this subject Catherine M'Mahon and E. Turner were very nearly equal, the former obtaining 132 marks, and the latter 131, out of a total of 150. The average was a very high one, being more than three-fifths of full marks. The paper was a rather easier one than usual.

Latin.—An average of 68 per cent. obtained by 18 Candidates shows the general good character of the answers sent up in this subject, and the accurate knowledge of the grammar accounts for it. The attempts at turning easy English sentences into Latin show a marked improvement on those of the two previous years. Catherine M'Mahon, H. S. Nicholas, A. E. Hunt, Eliza O'Brien, and E. Turner did excellent work, all obtaining over five-sixths of the maximum assigned.

Greek.—In this subject there is a marked difference between the Northern and Southern Candidates. Six Northern Candidates obtained not quite 13 per cent., while seven Southern Candidates obtained nearly 54 per cent. H. S. Nicholas and E. Turner did excellent work all round, and gained over four-fifths of the total number of marks given, and R. P. Smith gained nearly three-fourths of full marks. They all showed a very good knowledge of the grammar, and the same may be said in a less degree of the other Southern Candidates except one. I think that a higher total of marks should be assigned to this subject if a classical education is to be encouraged, for the work of teaching and acquiring a knowledge of Greek is harder than that of the other subjects to which a higher total is assigned.

German.—In this subject Catherine M'Mahon heads the list. Teresa M'Auliffe and Eliza O'Brien passed creditable examinations. These three answered the grammatical questions very well. The translations of the long passages were not particularly good.

Algebra.—The results in this paper were disappointing. The knowledge of methods of working out the answers was good, but the work was generally careless and full of inaccuracies. Eliza O'Brien did excellent work, obtaining 90 per cent. of the maximum, and A. T. Kemp obtained over 80 per cent., but of the other sixteen Candidates, only two, E. Turner and H. Lavers, succeeded in obtaining over half marks. The average marks gained were 34 per cent. of the total number given in this subject.

Euclid.—E. Turner, full marks; Kemp, Catherine M'Mahon, Eliza O'Brien, very good marks; Teresa M'Auliffe and A. Hunt also did creditably.

Taking the general results, the chief thing noticeable is the large proportion of Candidates who have attained the number of marks which qualifies for an Exhibition. Out of 18 Candidates, 16 have reached that qualification. Another noticeable fact is the excellence of the work done by many of the female Candidates. Of 5 Exhibitioners two are girls, whiles everal of the unsuccessful female Candidates did excellent work. Turner, who heads the list, is a youth of exceptional promise.

R. D. POULETT-HARRIS, *M.A.*, } *Examiners.*
