Laid upon the Table by the Colonial Secretary, and ordered by the House to be printed, September 9, 1879.

## REPORT of the BOARD OF EDUCATION for the Year 1878.

To His Excellency FREDERICK ALOYSIUS WELD, Esquire, C.M.G., Governor and Commander-in-Chief of the Island of Tasmania and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY.

1. WE, the Members of the Board of Education, Tasmania, have the honor to submit the following Report of our proceedings during the year 1878.

2. During the year 1877 there were 165 Schools in actual operation; the total number of distinct children at any time on the Rolls for that year was 12,557; the average number on the Rolls from month to month was 8222; the average daily attendance was 5973. During the year 1878 there were 164 Schools in operation; the total number of distinct children on the Rolls for the year was 12,453; the average number on the Rolls from month to month was 8297, and the average daily attendance 6032. As compared with the year 1877 the number of Schools has decreased by 1; the total number of children on the Rolls by 103; while the average number on the Rolls has increased by 75, and the average daily attendance by 59.

3. *Progress of Schools.*—The progress of the Schools since the year 1863, when the jurisdiction of the present Board extended over the whole of the Public Schools of the Colony, is shown in the following Table :—

Year.	No. of Schools.	No. of Scholars on Rolls during the year.	Average No. of Scholars on Rolls from month to month.	Average Attendance.	Average No. on Rolls during the year at each School.	Average No. on the Rolls from month to month at each School.	Average Attendance at each School.
1863..	88	7124	4607	3426	80·95	52·34	38·92
1864..	97	7791	4987	3763	80·31	51·41	38·79
1865..	102	8294	5357	4074	81·31	52·42	39·94
1866..	101	8198	5159	3930	81·16	51·08	38·91
1867..	105	8346	5419	4112	79·48	53·14	39·16
1868..	109	8746	5649	4272	80·23	51·46	39·19
1869..	116	9316	5992	4511	80·22	51·66	38·88
1870..	128	9997	6678	5041	78·10	52·17	39·38
1871..	130	10,194	6786	5187	78·41	52·20	39·90
1872..	139	10,491	6921	5209	75·47	49·79	37·47
1873..	141	10,803	7047	5268	76·62	49·98	37·36
1874..	147	12,158	7970	5867	82·70	54·21	39·91
1875..	154	12,271	8145	5703	79·68	52·89	37·03
1876..	158	12,231	8140	5867	77·41	51·52	37·13
1877..	165	12,557	8222	5973	76·10	49·83	36·20
1878..	164	12,453	8297	6032	75·93	50·59	36·79

4. *Attendance.*—The following table exhibits the number of Scholars in average daily attendance from month to month during the year :—

MONTH.	No. of Schools.	Average Daily Attendance.	Average Daily Attendance at each School.
January .....	149	4782	32
February .....	151	5305	35
March .....	152	5843	38
April .....	148	5993	41
May .....	150	6124	41
June .....	150	5571	37
July .....	154	5884	38
August .....	153	5880	38
September .....	154	6225	40
October .....	155	6049	39
November .....	156	6233	40
December .....	155	5751	37

5. *Religious Denominations of Scholars on the Rolls.*—The Returns exhibiting the Religious Denominations of 12,436 Scholars on the Rolls afford the following comparison with the Census Tables of 1870 :—(See Appendix J.)

	Church of England.	Church of Rome.	Presby- terians.	Wesleyans.	Indepen- dents.	Other Deno- minations.
Entire Population as shown by Census taken 7th February, 1870 .....	53,047 or 53·40 per cent.	22,091 or 22·24 per cent.	9064 or 9·13 per cent.	7187 or 7·24 per cent.	3931 or 3·96 per cent.	4008 or 4·03 per cent.
Scholars on Rolls, 1878 ...	5742 or 46·18 per cent.	2697 or 21·69 per cent.	844 or 6·79 per cent.	1797 or 14·44 per cent.	858 or 6·90 per cent.	498 or 4·00 per cent.

6. *Ages and Classification of Scholars.*—We have Returns from 155 Schools of the Ages and Classification of 8128 Scholars on the Rolls at Christmas 1878, which are summarised below :—

	C L A S S .						TOTAL.
	I.	II.	III.	IV.	V.	VI.	
Under Four Years.....	71	—	—	—	—	—	71
Four years .....	189	2	—	—	—	—	191
Five years .....	391	26	—	—	—	—	417
Six years .....	599	117	5	—	—	—	721
Seven years ..	598	299	40	2	—	—	939
Eight years .....	407	464	131	21	4	—	1027
Nine years .....	240	433	256	51	7	1	988
Ten years .....	148	397	359	134	40	1	1079
Eleven years .....	64	248	349	188	75	7	931
Twelve years .....	53	158	272	197	84	17	781
Thirteen years .....	23	83	148	150	81	20	505
Fourteen years and over .....	9	57	113	132	114	53	478
TOTAL .....	2792	2234	1673	875	405	99	8128
Per-centage of Scholars .....	34·35	28·10	20·58	10·77	4·99	1·21	

7. *Building Grants*.—During the year we have appropriated the sum of £1706 1s. 2d. in aid of the erection and improvement of School premises at the following places:—

PARTICULARS.	Amount granted by Board.	Amount raised Locally.	TOTAL.
	£ s. d.	£ s. d.	£ s. d.
Inglewood—Erection of Schoolroom and Teacher's Residence.....	193 13 0	96 16 6	290 9 6
Montos Marsh—Additions to Schoolroom ....	13 6 8	6 13 4	20 0 0
Campbell Town—Erection of Schoolroom and Teacher's Residence, Fencing, &c.....	884 11 8	442 5 10	1326 17 6
Deloraine—Additions to Schoolroom.....	166 13 4	83 6 8	250 0 0
New Ground—Additions to Teacher's Residence	30 0 0	15 0 0	45 0 0
Torquay—Extras.....	24 6 8	12 3 4	36 10 0
Castra Road—Erection of Teacher's Residence..	43 6 8	21 13 4	65 0 0
Waratah—Erection of Schoolroom and Teacher's Residence .....	153 7 2	76 13 8	230 0 10
German Town—Erection of Schoolroom and Teacher's Residence.....	106 13 4	53 6 8	160 0 0
Glengarry—Erection of Teacher's Residence...	26 13 4	13 6 8	40 0 0
Cluan—Erection of School Premises.....	63 9 4	31 14 8	95 4 0
<b>TOTAL .....</b>	<b>1706 1 2</b>	<b>853 0 8</b>	<b>2559 1 10</b>

The amount granted by the Board, as shown above, is chargeable, in accordance with the provisions of "The Public Schools Erection Act," against "Loans Bill." In addition to the sums expended as above, we have paid £683 3s. 1d. out of the "Vote in aid of Public Schools" for repairs and improvements to School-houses.

8. *Schools opened*.—Schools at the following places were established during the year:—Cressy Road, Jetsonville, Lower Jerusalem, Mole Creek, Sulphur Creek, and Waratah. Seven Schools were re-opened after having been temporarily closed, viz.—Antill Ponds, (half-time School,) Black Brush, Falmouth, Jericho, Montos Marsh, Ulverstone, and Wattle Grove.

9. *Schools temporarily closed*.—Schools at Castle Forbes Bay, Constitution Hill, Dulcot, Green Point, Mangana, Newnham, Northdown, Upper Piper's River, and Wynyard were closed temporarily during the year for reasons which are particularised in Appendix G.

10. *Grant for Education*.—The total expenditure in aid of Public Schools amounted to £16,021 18s. 5d. The appropriation of this money is exhibited in detail in Appendices C. and G., and may be briefly recapitulated as follows:—

*Objects of Expenditure.*

	£	s.	d.
Salaries and Allowances of Teachers, Assistant Teachers, Pupil Teachers, and Paid Monitors .....	14,184	8	4
Rent of School Buildings.....	260	3	4
Repairing and improving School Buildings .....	683	3	1
Providing School Furniture and Fittings .....	152	19	0
Providing Books, Maps, and School requisites .....	81	2	8
Salaries of Truant Officers.....	240	0	0
Miscellaneous Expenditure .....	420	2	0
<b>TOTAL.....</b>	<b>£16,021</b>	<b>18</b>	<b>5</b>

In addition to the above amount the sum of £1843 1s. 9d., chargeable against the Establishment, was paid on account of Administration and Inspection.

11. *Cost of Instruction.*—The following table exhibits the cost of instruction for the year 1878:—

	<i>Exclusive of Cost of Administration and Inspection.</i>			<i>Cost of Administration.</i>		<i>Cost of Inspection.</i>	
	£	s.	d.	s.	d.	s.	d.
Scholars on the Rolls for the year, per head	1	5	8½	0	11½	2	0
Average number on the Rolls, per head	1	18	7½	1	5	3	0½
Average daily attendance, per head	2	13	1½	1	11½	4	1½

12. *School Fees.*—The School Fees paid by parents in aid of Teachers' Salaries amounted to £5883 15s. 9d. or £482 7s. 11d. more than last year: dividing this amount by the—

	s.	d.
Number of Scholars on the Rolls for the year, gives .....	9	5½ per head.
Average number on the Rolls, gives .....	14	2½ per head.
Average daily attendance, gives .....	19	1 per head.

13. *Income of Teachers.*—We have received Returns of the emoluments of 185 Teachers who were employed during the year, from which we have compiled the following results:—

	<i>No. upon which the Average is taken.</i>	<i>Average Annual Income.</i>			<i>Maximum Annual Income.</i>			<i>Minimum Annual Income.</i>		
		£	s.	d.	£	s.	d.	£	s.	d.
Schoolmasters and Mistresses conjointly .....	57	172	10	2	672	0	8	90	13	3
Schoolmasters .....	46	143	14	3	458	4	5	53	6	9
Schoolmistresses in sole charge .....	32	75	17	8	183	19	1	47	11	0
Teachers in charge of Provisional Schools .....	13	44	16	11	65	5	9	26	4	6
Female Assistants .....	37	33	0	0	70	0	0	20	0	0

The above statements have reference to the income which is derivable by Teachers in connection with their Schools only, and do not include sums received for private tuition.

14. *Free Scholars.*—We append a Return of the number of children admitted during the year under free certificates. The sum of £519 0s. 3d. has been paid by the Board for their instruction, the average number of Free Scholars under instruction being 1330·75. See Appendix H.

The following statement will show the average number of Scholars receiving their instruction Free, and the amount paid to Teachers by the Board for their instruction for the past sixteen years:—

	<i>Average No. of Free Scholars under Instruction.</i>	<i>Amount paid to Teachers for their Instruction.</i>		
		£	s.	d.
During the year 1863 .....	679·75	380	18	6
Ditto 1864 .....	612·75	354	17	10
Ditto 1865 .....	896·00	359	7	6
Ditto 1866 .....	1027·75	434	17	9
Ditto 1867 .....	1118·00	470	15	9
Ditto 1868 .....	1209·25	497	12	3
Ditto 1869 .....	1438·00	586	4	3
Ditto 1870 .....	1780·75	722	17	3
Ditto 1871 .....	2013·50	850	15	9
Ditto 1872 .....	1886·25	742	5	11
Ditto 1873 .....	1533·50	629	9	5
Ditto 1874 .....	1611·75	620	12	4
Ditto 1875 .....	1603·25	593	16	1
Ditto 1876 .....	1560·75	615	13	1
Ditto 1877 .....	1461·25	558	19	2
Ditto 1878 .....	1330·75	519	0	3

15. *Night Schools for Males.*—We append a Return of the number of scholars admitted into the Night Schools during the year. The sum of £146 9s. 6d. has been paid by the Board for their instruction, the average number of Scholars being 168·25. See Appendix F.

16. *Exhibitions from Public to Superior Schools.*—In the month of June we caused an Examination for Exhibitions from Public to Superior Schools to be held; seventeen male and four female Candidates presented themselves; and on the recommendation of the Examiners, the Rev. Canons Davenport and Bailey, we awarded an Exhibition of the value of £16 13s. 4d. per annum, tenable for four years from the 1st of July, 1878, to each of the under-mentioned Candidates :—

No.	Name.	Date of Birth.	Public School.
<i>Male Candidates.</i>			
1	Robert Henry Crawford .....	25 July, 1866	Hagley.
2	John Henry Campbell .....	22 Nov., 1866	River Don.
3	Charles Corydon Adams .....	14 April, 1867	Evandale.
4	Laurence James Christensen .....	12 August, 1867	River Don.
5	Arthur Augustus Stephens .....	21 March, 1867	New Town.
6	Patrick Daniel Kelly .....	17 March, 1867	Turner's Marsh.
<i>Female Candidates.</i>			
1	Annie Littlejohn .....	23 March, 1867	River Don.
2	Mary Maria Mylan .....	5 July, 1866	Emu Bay.
3	Viola Angelina Carlton Allsopp ....	24 June, 1866	Battery Point.

The Examiners in closing their Report observe—

“We are of opinion that the results of the Examination are very satisfactory, and compare favourably with those of past years. The attainments of many who have failed to win an Exhibition, because they have been outstripped in the race, deserve great praise; while those of their more successful competitors reflect still higher honor on their ability and industry, and not a little credit on the schoolmasters by whom they have been taught.”

A Statement of Expenditure under this head will be found in Appendix E.

17. *General and Local Inspection.*—On summarising Appendix I. it will be seen that 3974 visits have been made to the Public Schools during the year, of which 388 were made by the Inspectors, 1380 by Members of the Local Boards, and 1552 by other persons, and, for the purpose of imparting Religious Instruction, 533 visits were made by Ministers of the Church of England, 82 by Ministers of the Church of Rome, 18 by Ministers of the Church of Scotland, 8 by Wesleyan Ministers, and 13 by Ministers of the Independent Church.

18. *Increased Inspection.*—The Board desires once more to urge upon the Government the necessity for the appointment of a third Inspector of Schools. Since the year 1869, when the Board had the services, as now, of two Inspectors, the number of Schools has increased from 116 to 164, and the average attendance of Scholars from 4511 to 6032. Many of the additional Schools lately established have been opened in wild and remote localities, and the amount of travelling entailed upon the present Inspecting Staff occupies an undue proportion of their time, and interferes seriously with that frequent and thorough inspection of the Schools which is essential to efficiency. We deem it our duty therefore to express our earnest hope that the Government will submit to Parliament in the Estimates for 1880 the necessary provision for the salary and travelling expenses of a third Inspector.

19. The annual Reports, by the Chief Inspector, and by Mr. Inspector Rule, are annexed hereto. See Appendices A. and B.

20. We submit this as our Report on the Public Schools for the year ended 31st December, 1878, and we have caused our corporate Seal to be affixed hereto.

HENRY BUTLER, *Chairman.*

## APPENDIX A.

*GENERAL Report for 1878 by T. STEPHENS, Esq., M.A., Chief Inspector of Schools.*

---

*Hobart Town, 13th May, 1879.*

SIR,

I HAVE the honour to submit my General Report on the condition of the Public Schools which I have visited during the past year.

## INSPECTION, &amp;c.

The number of visits paid to Public Schools in the Southern districts during the year was 176, including visits to six schools which were closed at the time of visit in consequence of the removal of their Teachers. To the inspection and examination of the Ragged Schools in Hobart Town 20 days were devoted, making a total of 196 visits. The number of separate schools visited was 80, including those which were closed as stated above, and the extra schools in Hobart Town. In addition to the above work six days were given to visits of inquiry in connection with the projected establishment of new schools. The business of the general examinations of Pupil Teachers at the beginning and end of the year, and the annual examination of Teachers in the month of January, occupied 19 days, and the other examinations held at intervals for the purpose of testing the qualifications of candidates for the office of Teacher or Pupil Teacher 21 days in all. The preparation of reports and miscellaneous business filled up the rest of the year, leaving little or no time for any work not strictly of a routine description. Much time is necessarily consumed in travelling, the nature of the work requiring it to be done chiefly in the saddle.

The gross attendance at my annual examinations was less than usual, a number of schools having been prevented by accidental circumstances from mustering a fair proportion of their scholars on the appointed day; but the absentees had, for the most part, been examined in a less formal manner at previous visits. The number examined individually in the latter part of the year was 2652, or, including the extra schools in Hobart Town, 3088.

## SCHOOL PREMISES.

Of the 76 Public Schools on the Board's list in the Southern districts 43 are held in buildings vested in the Board for educational purposes, and 33 in buildings which either belong to religious bodies or are private property. To about half of these are attached quarters for Teachers differing in character from the well-built comfortable residence, down to the "skilling" of two rooms which sometimes is the only accommodation available for a Teacher's family. The schoolrooms have even a wider range of variation, and the comfortless condition of some might be fairly pleaded as an excuse for the non-attendance of children. In the character of the schoolhouses erected during the past few years there has been a considerable improvement, and they might have been quite satisfactory but for the difficulty of raising sufficient funds in the first instance, and the greater difficulty of obtaining supplementary contributions for the purpose of remedying original defects. In the remote bush and in sparsely peopled localities, where there is no certain promise of a permanent supply of scholars, it has sometimes been necessary to sanction the occupation of premises which cannot be reported fit for anything but temporary use. The only objection to such a course is that when the school is once established all local interest seems generally to subside, and the difficulty of getting dilapidated buildings made habitable, or replacing them by schoolhouses adapted to their purpose and of a more permanent character, is often greater than that of raising funds where no school has previously been in existence. Where there is a non-resident Teacher the school premises are always more or less neglected and liable to become dilapidated.

I am unable to report any general improvement in the condition of the school out-offices, which are too often regarded by Teachers and the local authorities as a disagreeable subject which it is convenient to ignore. Some of the cases which I have had to report are discreditable to those who are connected with the schools.

The whole question of the erection and maintenance of schoolhouses demands serious consideration. The principle embodied in the Rules and the usual practice of the Board is that of subsidising local effort. The grants of public money are tendered to stimulate and foster the spirit of self-reliance, not to extinguish it; and the large extension of the means of education throughout the rural districts is a sufficient proof that the system has been fairly successful. The chief element of weakness has always been the fact that there is no power to distribute the pressure of the local subsidy by an equitable system of rating, and the consequence is that the burden, which ought to rest on a whole community, is left, if undertaken at all, to a few benevolent persons who perhaps are less directly interested in the school than others with more ample

means. The evils attendant on any scheme which depends for permanent support upon the casual operation of voluntary contribution need not be described; but it is notorious that they have been latterly increased by the prevalence of an impression that the whole of the responsibility for the erection and maintenance of schools is about to be undertaken by the State. So long as this contingency is believed to be even remotely probable, without becoming an accomplished fact, the effect cannot but be very prejudicial to the interests of public education.

### INSTRUCTION, &c.

My separate reports on the inspection and examination of schools have supplied in detail such information respecting their general condition, and the extent to which the teaching and management are satisfactory or the reverse, as is necessary to enable the Board to appreciate them at their true value. Tabulated statements are also embodied in the reports to show the degree of proficiency in the elementary subjects which has been attained by the children present at the annual examinations, and these constitute one of the elements required for properly estimating the efficiency of the Teacher, though they are of little value unless taken in connection with other results of education which cannot be expressed in figures. It is so important to avoid any misconception on this point that I must not omit a word of caution on the subject. The programme of instruction was purposely designed to discourage Teachers from preparing for what is known as "examination by standards." They have plain directions to guide them in classifying the children, and the first duty of the Inspector is to determine whether this work has been faithfully performed. There are certain exceptional cases for which allowance has to be made; as, for instance, the irregular attendance of a child for any lengthened period between the date of last promotion and that of the examination, or the presence of neglected children above the ordinary school-going age whom a Teacher may naturally desire to save from the humiliation of being classed with mere infants; but all such cases should be indicated by a distinguishing mark in the class lists to show that some definite reason can be given to account for their position in the school. If, however, there is in any class a large proportion of failures in one or more of the essential subjects they are generally attributable to one of two causes,—either the Teacher is so unacquainted with the technical part of his business that he cannot really test the proficiency of his scholars, or he has been tempted into direct contravention of his instructions through a desire of getting temporary credit by a good show in the higher classes. Again, children may possibly obtain a "pass" in, say, the Fifth Class in one school who are inferior in general culture to the Fourth Class in another school; and without giving further illustrations it is sufficient to say that a mere numerical statement of the classification and passes at any examination gives little trustworthy evidence as to the real efficiency of a school, or the merits of a Teacher, and is very apt to mislead by suggesting unfair comparisons. This is especially the case where there is no uniform method of testing the results of instruction.

The lower division of the First Class in a Public School is intended to include all children who are unable to read very easy monosyllabic sentences with tolerable fluency. The number not advanced beyond this stage was 512, or 19 per cent. of the total number examined. In the upper division there were present 425, of whom 69 failed. So little is required for advancement to this grade that there ought to be no failures.

In the Second Class there were 767, of whom 553 passed. The Second is usually the largest class in the school, and the future progress of the child depends very much upon the attention received and the habits formed while passing through this stage. The failures were more numerous than usual, and there is no general improvement in the branches of training described in the programme of instruction under the heads "Object Lessons" and "Rhymes."

In the Third Class there were 486, of whom 389 passed, the failures being caused by defective grounding in the simple rules, or bad writing and spelling, in about equal proportions. The rudiments of grammar and geography are required to be taught in this class, though they are not taken into account in determining the question of classification. The results vary widely, but the number of passes amounted collectively to about 70 per cent. in grammar and 50 per cent. in geography. I do not care to lay much stress on the answering in extra subjects where there is a marked deficiency in the more essential work.

In the Fourth Class there were 333 present, of whom 242 passed; the failures resulting from defects similar to those in the Third Class. Twenty schools showed no representatives of the class, and many more failed to produce more than one or two who were sufficiently advanced for this grade of proficiency, though an elementary knowledge of the compound rules, with writing on paper to dictation, and reading, are the only attainments required. In the other schools the general work ranged from indifferent to good, and in the extra subjects the majority gave satisfactory results in grammar, and a fair proportion in geography, a very elementary knowledge of the latter subject being all that is required.

In the Fifth Class there were present 149, of whom 98 established more or less satisfactorily their title to this rank in the school. In the Sixth Class, with 49 present, there were 16 passes. The failures in both cases were caused either by insufficient grounding in elementary arithmetic, or defective spelling. The writing was generally passable, and frequently very good. Reading has to be judged with great leniency in all classes, the subjects and language of many of the lessons being beyond the range of our schools. Of the extra subjects of instruction in the Fifth and Sixth Classes I can only say that in a few exceptional cases out of the 19 schools which profess to teach up to the Fifth Class there was gratifying evidence of sound teaching and steady progress: in the majority the proficiency scarcely extends beyond what one expects to find in a respectable Fourth Class. The probability of weakness in the higher classes was always foreseen, and reference is made to it in a note appended to the programme of instruction, which cautions Teachers against making the higher promotions unless they are able to show "a progressive improvement in intelligence and style of working, as well as in range of subjects."

By summarising the results obtained from individual examination, taking into account only the proficiency shown in the essential subjects of instruction, it will be seen that the number of children who were not fit to be placed higher than the Second Class was 1732, or 65 per cent. of the total. This low standard may be further illustrated by comparing the average age at which children might be expected to have reached the several classes, with the results obtained at the last examinations, both of which are shown in the following table:—

	CLASS I. Div. 2.	CLASS II.	CLASS III.	CLASS IV.	CLASS V.	CLASS VI.

Average age in 1878.....	8	9	11	12 6	13	14

The excellent results shown by some schools tend, of course, to hide the low standard of efficiency in the rest, when the whole are brought together for the purpose of computing the average: but it is sufficiently clear that the large majority of children, who have to begin to help their parents or earn an independent living at an early age, must leave school before attaining the lowest standard of proficiency that can be considered satisfactory, or that can help them to self-improvement in after years.

Of the extra subjects not already mentioned Sacred History calls next for some notice. I have been frequently obliged during the past year to remark on the neglect of the Scripture Lessons prescribed by the programme of instruction. The simple outlines and narratives of Sacred History are easily brought within the range of all children by a Teacher who knows anything of teaching; and it is seldom that there is any valid excuse for the extraordinary ignorance which is often displayed even in the higher classes. General History is at present almost beyond the scope of the Public Schools, and the practice of cramming isolated scraps of English History as a preparation for some examination should receive no countenance from the Inspector. Singing and Drawing as subjects of instruction are chiefly noticeable for their absence from the ordinary school course. These branches appear to have gradually retrograded since the establishment of special classes of instruction, and as the Teachers of these classes cannot be held accountable for results outside their immediate influence, the general falling off is probably an indirect effect of the relief of other Teachers from personal responsibility in the matter. Object Lessons, which are only another name for collective oral teaching, appear more frequently on the time-table than of old; but there is no possibility of much improvement under this head until means are provided for training Teachers for their work. Drill, except class-drill, which is sometimes carried to an excess, is almost unknown.

Some reference has to be made to matters outside the mere rudiments of instruction, because we cannot afford to ignore what is being done in other countries in the improvement of common school education; but the chief object of our Public Schools is at present to teach efficiently the elements of reading, writing, and arithmetic, and the facts disclosed by the examination of schools show that in these branches there are long arrears to be made up without any means being available for remedying the deficiency. The work of the Inspector really begins where that of the training master ends, and it is not good for either Teacher or children that an attempt should be made to train him in his own school.

#### GENERAL.

It is necessary to point out some of the special defects of the working of an educational system, if only to guard against the prevailing tendency to be satisfied with things as they are so long as their shortcomings do not obtrude themselves upon public notice. There will always be found some who will bestow unqualified praise upon the Public Schools, and sometimes, as I may presently show, with very good reason; but the Inspector must deal with broad facts, and with the condition of education as a whole. If I have been unable to show much improvement either in the material condition of schools or in the professional qualifications of the majority of the masters and mistresses, I can at least say that there is every reason to be satisfied with the character, conduct, and general attention to duty of the whole body of Teachers, with very few exceptions; that the number of fairly competent Teachers is increasing steadily, if slowly; and that it is not so much the want of zeal or industry, as the absence of opportunity for improvement, that prevents a large proportion of the rest from being similarly classed.

I have shown in other Reports that the best educational results, or, in other words, the most satisfactory evidence of efficient teaching and general management, are often found where the local obstacles to the success of a school are most formidable. The competent Teachers will always seek appointment to populous districts, and the scanty, if not decreasing, population in some of the older settlements will partly account for the failure of schools which required Teachers of more than average ability to muster the requisite attendance of scholars. How much more the attendance of children depends upon the energy or the ability of the Teacher than upon any enforcement of the compulsory clauses of the Act is clearly shown by the sudden fluctuations which have occurred from time to time after the removal of one Teacher or the appointment of another. In one case the attendance may be doubled, and in another diminished by half, with a corresponding improvement or falling off in regularity, while in both cases the agencies which are supposed to enforce the attendance of children remain inactive and the local circumstances unchanged. The educational progress of whole districts sometimes shows a curious variation. Starting from a given point I can ride fifty miles in one direction and find the character of the

instruction in the different schools ranging from "satisfactory" to "excellent." In another direction, on a tour of equal length, there is not one which comes within such a category, the *maximum* of efficiency in the latter case being inferior to the *minimum* in the former. It is easy to understand how persons who take an interest in popular education, but are only acquainted with their own neighbourhood, may come to quite opposite conclusions as regards the efficiency of the Public Schools.

To what extent the Exhibitions offered by the Board for competition have fulfilled their purpose is a question of considerable interest. That they have been of great benefit to a limited number of scholars, and that the exhibitioners have shown themselves to be deserving of the honour conferred upon them, will be readily admitted: that there has been any healthy stimulus applied to the general work of elementary education is at least doubtful. A Teacher, who has had his share of success, writes:—"I am more than ever convinced that whatever good these Scholarships may do, they are not calculated to improve the general condition of a school," and I know that this is the opinion held by several of the best and most experienced Teachers. It would be exceedingly unjust to assume that the care bestowed by a Teacher upon one or two scholars is necessarily so much time and attention taken away from his proper duty; but the dangerous tendency in this direction, especially where there is no check upon it, is notorious, and it is easy to see how a Teacher may often be tempted to give his special attention to work which will bring him public credit at the expense of the school, and which in itself is much more agreeable than the tedious round of elementary instruction in his junior classes. There are few defects for which some remedy may not be found.

There is so little alteration from year to year in the condition of elementary education, apart from such special changes as have been already mentioned, that it would be difficult to go farther into the question without quoting passages from my reports of the past few years. The measures of reform which have been suggested may or may not commend themselves as worthy of immediate adoption; but it is unnecessary for me to press them upon the consideration of the Board on the present occasion. Practicable reforms divide themselves naturally into two classes,—those which involve the expenditure of money, and therefore require some previous legislation on the subject; and those which may be brought into operation without any radical changes in existing arrangements. Those of the latter class should fall almost entirely within the province of the Inspector, and require little more than the re-assertion of the principle of personal responsibility, and a moderate amount of local co-operation, to enable him to effect a material improvement in the general management of schools.

I have, &c.

T. STEPHENS, *Chief Inspector of Schools*

*The Chairman Board of Education.*

## APPENDIX B.

*GENERAL Report for the Year 1878, by J. RULE, Esq., Inspector of Schools.*

Hobart Town, 17th April, 1879.

SIR,

I HAVE the honor to submit to the Board of Education my general report for the year 1878.

During the whole or some part of the year there were 89 schools in operation in the district under my charge. These received 170 regular visits of inspection, and 55 incidental or special visits. A full examination for results was held in 86 schools; 85 were visited twice or oftener, three once only, and one was not visited at all, having been closed till a few weeks before Christmas. My other work has been:—Nine special visits to districts in want of schools; the usual yearly examinations of teachers; numerous incidental examinations of candidates for employment, &c.; correspondence; miscellaneous office work, and that involved in analysing the examination results of every school, and noting the progress of children individually from year to year. The time spent in travelling was considerable, but not so much as in the year 1877. The distance was—by rail, 2834; by coach, &c., 427; on horseback, 2938: total, 6199 miles.

The following is a summary of the results obtained in school examinations:—

RESULTS ACCORDING TO STANDARDS ATTAINED.*									
	Reading.	Writing.	Arithmetic.	Reading only.	Writing only.	Arithmetic only.	Two subjects only.	All three subjects.	
								No.	Per cent. on Total.
Not up to Standard I.	1023	1101	1057	..	..	..	..	1233	35
Up to Standard... I.	1016	915	1440	104	14	62	190	1342	38
Up to Standard... II.	751	858	517	153	143	34	420	510	14
Up to Standard... III.	458	453	321	124	49	29	176	313	9
Up to Standard... IV.	225	177	175	72	9	30	85	125	4
Up to Standard... V.	64	37	32	32	5	6	18	9	
Up to Standard... VI.	7	3	2	4	..	..	1	2	
TOTALS .....	3544	3544	3544	489	220	161	890	3544	100

## CLASSIFICATION.

NUMBER OF CHILDREN.	CLASS.							TOTALS.
	I.		II.	III.	IV.	V.	VI.	
	Div. 1.	Div. 2.						
Present at Examination .....	632	598	1041	704	367	170	32	3544
Passed, as fit for the class, in all three elementary subjects....	632	590	897	341	206	87	14	2767
Per-centage passed in all three elementary subjects .....	100	99	86	48	56	51	44	73

Comparing these results with those obtained in 1877, I find an increase in the number of schools examined, but a decrease in the total number of children present at the examinations. This has been caused by population moving from old to new centres, and a greater remissness in parents sending their children to school. A rather larger proportion of those examined last year were found up to the higher standards; but it must still be noticed that 87 per cent. were not, in all three elementary subjects, up to Standard III., and 73 per cent. had not fully reached Standard II. It is a little satisfaction to find that in Reading the results were somewhat better; for ability to read with ease and intelligence is, to a child leaving school, the attainment undoubtedly most essential with regard to future self-improvement. In this subject 21 per cent. had reached Standard III. or higher. Still it is obvious that a large number of children pass through their school years rendering only a desultory attendance, and finally leave school without having acquired this most needful power. This remark refers only to those whose names appear on the Public School lists: if with them be reckoned those attending nominally at private schools, or at none, the mass of ignorance maturing year by year must be recognised as really formidable.

\* NOTE.—The term "Standard" is here intended to signify the full amount of instruction in Reading, Writing, and Arithmetic prescribed for the different classes in the Programme of Instruction. Those that have attained Standard I. are fit to be placed in Class II.—*Mutatis mutandis*, the same remark applies to the other Standards up to the Fifth. There is no special class for those that have mastered the work of the Sixth.

As the circumstances of the Public Schools generally have not been materially improved, much that appeared in my report for 1877 might be repeated here; and there is not much to add to it. It cannot be surprising that results in 1878 were found only slightly better.

In addition to what have often been pointed out as flaws in the compulsory Clauses of the Public Schools Act, there is one that has not been sufficiently considered. There are in many places small private schools conducted by teachers whose fitness for their work is either doubtful or well known to be unsatisfactory. Attendance at these schools is, however, sufficient to satisfy the law as it stands at present; and the consequence is that the education of many children, even of those attending regularly, is little better than a pretence: in others attendance is a mere pretence. It is clear that, if compulsory education is to be a reality, the example of the London School Board must be followed, in doubtful private schools being subjected to some satisfactory test, before attendance thereat can be recognised as a passable means of education according to the meaning of the Public Schools Act.

An extended experience has more fully demonstrated to me that the Free-Certificate system is radically bad. It is contagiously pauperising among people far above destitute circumstances, and fails to secure a satisfactory attendance of children. Attempts of Local School Boards to enforce the law result commonly in a large increase in the number of Free Certificates. Some clerical members seem to consider the exercise of this species of patronage in favor of their own flock as the most important, if not the only, function of membership. In connection with this difficult question I beg to observe that the institution of Free Schools, "Ragged" or "Public," side by side with Public Schools in which fees are paid, is no improvement on the Free-Certificate system, but rather the reverse; for while it offers to mean parents that are well off the same opportunity of pauperising themselves by shirking an obligation willingly borne by others, worse off, but more independent in spirit, such schools mass together without sufficient mixture of better elements those unfortunate children who, in addition to the immediate instruction of teachers, need more than others the environment of a wholesome public opinion in the playground strong enough to neutralize that of the slums. This condition is at present afforded in most of the Public Schools, and several teachers, knowing the potency of such public opinion as a moral force, take care to foster and direct it. The pauper difficulty will never be overcome until primary education is made free to all; a change which, to judge from the experience of all countries where it has been fairly tried, would greatly improve the attendance, not only of the very poor, but also of those for whom fees are now paid. A case came directly under my notice very recently, showing how the payment of weekly fees affects regularity of attendance, when bad weather, or an incidental holiday, happens at the beginning of a week. It was at a "half-time" school, open for three days in one week and two in the next, alternately. In one of its weeks of two days the former was rainy, and no children attended the school; the latter, the day of my visit, was fine, but not one child was found present. The teacher assigned, as the cause of this, the unwillingness of parents to pay sixpence for only one day's schooling.

The renting of school-rooms from churches, which reserve the right to use them for Sunday Schools, &c., cannot be too often objected to. There are few instances of such joint occupation working smoothly, except where the teacher manages the Sunday School, and acts as a sort of beadle in arranging the room for divine worship. Such a plurality of functions is not desirable in a Public School teacher, as it gives a sectarian character to the school. In most schools so used there is a very great excess over the ordinary wear and tear of furniture and fittings; and frequently unseemly scribbling, sometimes very gross, is found about the premises on Monday mornings, circumstantial evidence pointing strongly to Sunday scholars as the transgressors. Parents and Sunday School promoters ought to consider well whether the good balances the harm received by children brought together by large Sunday Schools under feeble control. It is only fair to state that in a few schools vested in the Board, and not used for other than Public School purposes, I have noticed teachers remiss in such essential points of discipline as are here indicated. Where there is a tendency to carelessness in this respect, divided responsibility becomes a serious evil.

The unsectarian character of some of our schools is endangered by the teaching of "Rhymes" and "Singing." No song-books or verses in particular are mentioned in the Programme of Instruction; and as the lesson books do not contain a suitable selection, some teachers have recourse to hymns as a vehicle for their music. Most hymns are doctrinal in character, and many decidedly sectarian; and it is therefore undesirable to have them sung in our schools. Devotional exercises are there decidedly out of place, unless conducted by clergymen under the usual conditions and with the Board's permission. Suitable verse and song-books ought to be prescribed, and no others allowed in Public Schools without the Board's express sanction. The teaching of Scripture History also stands in the way of keeping these schools perfectly unsectarian. If this subject were eliminated from the Programme for teachers, and left to the voluntary action of clergymen under the regulations at present in force, the Board would still be acting liberally in the matter; and though complaints against our Public School system on the score of religion would not be thereby silenced, all reasonable cause of complaint would be removed.

I regret to notice that in many buildings recently erected, or now in course of erection, the teachers' quarters are limited to two small rooms.

In reporting on the internal management of schools it is satisfactory to have to mention, with respect to several, that they were found much improved in order and discipline; but too many teachers have still to learn that it is not enough to have quietness without attention; they often show inability, or indifference, in observing whether children intelligently receive, or even notice, the instruction addressed to their eyes and ears. I have noticed this easy indifference in schools where "drill" is almost military in tone and precision. Another serious defect also needs mention with regard to a few schools, viz., the want of adequate arrangements for the supervision of children staying in the school precincts during the mid-day recess. It ought never to be forgotten that, though mixed schools work well under good management, they are

mischievous when that is feeble or otherwise defective. Some teachers seem to think that when they have gone through a "scripture lesson" in a solemn, devotional manner, they have done all that is required of them in the way of moral training. I have seen one, just after such a lesson, fail to notice improper gestures and attitudes in a class of boys directly before him. This is an extreme case; but a want of sufficient quickness of observation is a very prevalent defect among teachers that have not made their work a subject of real thought. It is, perhaps, not too much to say that continual reference to "theological sanctions," however orthodox these may be, is of as small avail in the moral training of children as the insistence on a thorough comprehension of the origin of ideas might be supposed to be in teaching them simple arithmetic.

Most of the vacancies occurring in the management of schools are still filled up by the appointment of untrained teachers, many of whom have had no previous experience in teaching. During last year the attainments of several of the candidates that came under my examination were found below the meagre standard prescribed for probationary teachers, the majority of the others did little more than barely pass, and very few were found well instructed in elementary subjects. Some of these, and others of longer service, are making fair progress in school management. Of the teachers as a body I am glad to be able to state that, while a few are exceedingly zealous workers, the majority are rendering the Board steady, honest work to the best of their ability.

I have the honor to be,

Sir,

Your obedient Servant,

JAMES RULE.

*The Chairman of the Board of Education.*

## APPENDIX C.

*ABSTRACT of RECEIPTS and EXPENDITURE Account "Vote in Aid of Public Schools" for the Year ended 31st December, 1878.*
