[a] The figures for 1841, as published in *Gazette*, are full of errors which cannot now be corrected, and should therefore be used with great caution.

[b] The figures (Persons) for 1847 include 2246 military, women, and children; also 3731 male convicts on public work.

[c] " " 1851 " 953 " " " " 568 convicts, sex not distinguished.

[d] " " 1857 " 630 " " "

[e] The discrepancy in the number of brick and stone houses in 1870 and 1881 arises from a large number of residents in country districts failing to give definite descriptions.

[Compiled by Government Statistician from Returns supplied by the Customs Department.]

* The corresponding numbers to and from, as ascertained by the Customs Departments of the various Colonies, are so utterly irreconcilable that it has been deemed more desirable to take the departures as ascertained by our own Customs Department than to base the statement of migration upon the compilations prepared at Colonial and Foreign ports of arrival or departure. Owing, however, to the completely insular character of Tasmania as a Colony, conclusions drawn in respect of increase or decrease to population are less liable to error than similar conclusions drawn in respect of each Colony of Continental Australia. As regards migration seaward, it must be borne in mind that it is more than probable that the figures given independently by each Colony are equally and indefinitely erroneous within certain limits, and therefore it is unwise to assume that the differences shown between the statements of two Colonies afford any reliable index to either the extent or direction of the divergence from the truth.

† Estimated to be understated by about 7 per cent.

* The maximum rate appears only to have prevailed in Districts chiefly Urban or Pastoral, where it may be supposed there was greater scarcity of agricultural labour. There is sometimes great difficulty in fixing the prevailing rate in Districts where few individuals of the particular class are employed.

With respect to the nominal decrease in Number of Leases in force and acreage, Mr. Belstead gives the following explanation :—Of the mineral and gold leases cancelled during the year 1885, a very large proportion, certainly 80 per cent., had been taken up whilst the scrip-broking mania was in progress, for purely speculative purposes, and in very few cases had any mining been done or attempted to be done upon the ground. Upon the subsidence of the excitement the rents were allowed to fall into arrear, and the leases were consequently forfeited. Much of the same ground is now being retaken up in smaller areas and worked.

[There being no Statistical Staff connected with the Mining Department in Tasmania, as in the neighbouring Colonies the figures have been kindly supplied by the Collectors of Agricultural Statistics. As some of the mines are only partially worked during the year, and many mining companies are unregistered, it is difficult to obtain anything approaching accurate information. Tin is worked alluvially and in lode, so that a correct division cannot be obtained. These figures must therefore be regarded as roughly approximate.]

TRADES, MANUFACTORIES, AND OTHER INDUSTRIES.

With regard to the following industries, the aggregates are alone given, as it would not be desirable to localise information to Districts, thereby in many cases unnecessarily disclosing the extent of the business of private individuals or companies, as the case may be.

Unfortunately, the figures given by some establishments in respect of capital invested vary greatly year by year; such figures can therefore be only regarded as rough approximates.

[a] In making these calculations the following rule has generally been observed:—Fractions of a £ over 10*s.* have been regarded as £1, those under 10*s.* ignored.

[b] Distribution of the proportions charged against each item calculated on the basis of Unredeemed Loans. Specific Rates of Interest against particular works being affected by renewals are ignored: all items are consequently charged at the mean rate, and therefore the same item may show a diminished charge for Interest according as the mean rate of Interest is lowered.

[c] Items of a similar character have in prior to 1892 appeared under "Miscellaneous Receipts." [d] Including £2500 for Streets.

ROBT. M. JOHNSTON, *Government Statistician.*

AUSTRALASIAN STATISTICS, 1893.

THE tables of Australasian Statistics which follow these introductory observations on the Progress of Australasia have been carefully compiled from Returns furnished by the Governments of the various Colonies. The general tables for each Colony contain a large amount of information conveniently arranged for reference and comparison. Additional tables have also been added for the purpose of giving fuller information on the important matters relating to Finance, Public Debt, Railways, and External Trade.

Progress of Australasia since 1830.

The following table has been specially prepared to show the general progress of Australasia over a longer period than that shown in the fuller tables restricted to recent years. The particulars selected are shown, as far as can be obtained, for the year closing each decade since the year 1830, and convey a bird's-eye view of the rapid progress made over the sixty-two years ending with the year 1893. The Annual Rate of Progress since 1850 and during the last decade are given side by side to mark the varying rate of progress in later years as contrasted with that for the greater period.

* NOTE.—As the Loans actually expended on Railways on 31st December, 1893, include a considerable amount for Lines not open for traffic, the percentage proportion to capital will be somewhat less than what it would be if reckoned in relation to *Capital expended on Lines open for traffic* only. The net burden on General Revenue, however, is more correctly indicated by the method adopted.
