Dear Committee. Secretary,
Typical of a Liberal government to be uncaring about the needs and expectations of ordinary Tasmanians...

I can't for the life of me even contemplate why any responsible government would want to spend all that money on this project when there are much more urgent needs for the people of Tasmania. With people living in cars or on the streets, roads and other infrastructure in urgent need of repair and/or upgrade. The need for renewable energy to replace what we have now.

Respectfully

Eric Smart,
