

1873.

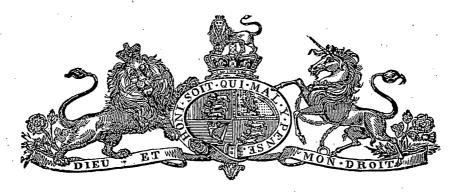

TASMANIA.

HOUSE OF ASSEMBLY.

PORT ARTHUR.

REPORT FOR 1872.

Laid upon the Table by the Colonial Treasurer, and ordered by the House to be printed, June 17, 1873.

Civil Commandant's Office, Port Arthur, 9th April, 1873.

SIR,

I have the honor to submit my Report for the year ending 31st December, 1872.

It will be seen on reference to the accompanying Return, marked A, that the cost of the Establishment for 1872 amounted to £12,598 4s. 6d., being about £300 less than the Estimate.

The amount due by Imperial Government for maintenance of convicts is £8096 19s. 5d., leaving a balance of £4501 5s. 1d. to be paid by the Colony for the maintenance of 239 colonial convicts, or £18 16s. 8d. each man; but by further deducting the value of stores on hand charged in 1872 but not expended, valued at £762 15s., the cost of each colonial convict is brought down to £17 7s. 3d. per head.

CONDUCT OF THE PRISONERS.

I have much pleasure in stating that the prisoners as a body have been well conducted and industrious. The number punished magisterially during the year has been 72, only one of which was for idleness, out of an aggregate strength of 338 men.—Vide Return B, annexed.

LABOUR CLASS OF THE PRISONERS.

I beg to submit a Return, marked C, showing the labour classes of the prisoners for years 1870, 1871, and 1872.

EMPLOYMENT OF PRISONERS.

During the year the prisoners have been principally employed on the new tramway works, in procuring logs for the saw mill, palings, posts and rails, shingles, firewood, &c., and in the clearing and bringing new land under crop; also, in extensive alterations to the main creek in order to prevent the lower settlement buildings being flooded, as was the case shortly after I assumed the command of the establishment. Return D, appended, shows the various descriptions of employment carried on.

The estimated value at contract prices of all agricultural, dairy, and other produce raised during the year, including the amount paid for labour, &c. by stipendiaries, amounted to £1991 5s. 11d. —Vide Return E, annexed.

The estimated value of timber, sawn and split, bricks, firewood, &c. procured during the year amounted to the sum of £2010 4s. $3\frac{1}{4}d$.—Vide Return F, annexed.

Return G gives the number and description of all articles of clothing, &c. made and repaired, the value being charged at prison rates; also, the estimated value of the new tramway, repairs of buildings, land cleared, &c., amounting to the sum of £3082 10s. $4\frac{1}{2}d$.

DEATHS.

Return H, annexed, shows the number of effective convicts, invalids, paupers, and lunatics for the year, the mortality during the period named, and rate per cent.

ESCAPES.

I have much pleasure in stating that during the year no convict has attempted to escape from Tasman's Peninsula.

CONDUCT OF SUBORDINATE OFFICERS.

The conduct of the subordinate officers has, with but few exceptions, been exceedingly satisfactory: the same remark will also apply to the constabulary force. The strength of the staff of the establishment will be seen on reference to Return I, annexed.

Buildings.

I beg to state that nearly all the buildings on the establishment require considerable repair, especially the roofs, which are in a very leaky state.

WHARF.

The settlement wharf requires immediate repair, or a new jetty should be erected; the latter course I strongly recommend, as it can be done at a much less cost.

FARMING.

During the past year 17 acres of new land have been cleared, fenced, and brought under a crop of potatoes.

Farming operations at Long Bay and Garden Point have been discontinued.

64 acres of land, under crop for many years, have been laid down in grass for permanent pasture.

Hops.

Ten acres of hops were planted at Safety Cove in October last; the situation is a good one, and there is every reason to believe the return next year will be a fair average.

MEAT SUPPLY.

The arrangements made for the supply of meat to the establishment has resulted in a clear saving of £1500, and at the same time ensuring to the prisoners a far better description of meat than that usually supplied by contractors.

SOAP.

The manufacture of soap for the use of the establishment, from the refuse fat, was commenced in October—1887 lbs. of which will be found credited in the accounts.

VISITORS.

His Excellency the Governor visited and inspected all departments of the establishment, including the guard at Eagle Hawk Neck, on the 17th April, and was pleased to leave a record of his visit,—a copy of which I annex, with the entries made by other visitors during the year, amongst which will be found the names of the members of the late Government, who made an official inspection of the establishment on the 6th May.

I have the honor to be,

Sir,

Your most obedient Servant,

A. H. BOYD, Civil Commandant.

The Hon, the Colonial Secretary.

EXPENDITURE RETURN, 1872.—No. 1.

RETURN showing the various Heads of Expense incurred in maintaining the Penal, Pauper, and Lunatic Establishments at Port Arthur; the actual Value of Agricultural and Dairy Produce raised and applied in aid of Rations; Amount paid by Stipendiaries and others for Labour, &c. supplied to them; and the Average Daily Number of the several Classes of Inmates, for the Year ending 31st December, 1872.

COPY OF ENTRIES IN THE VISITORS' REGISTER AT PORT ARTHUR.

Official visit of His Excellency the Governor.

HAVING made my annual visit to Port Arthur, seen all the prisoners, and carefully inspected every portion of the Establishment, I am happy to be able to record my entire satisfaction with all I have witnessed. The present Civil Commandant, Mr. A. H. Boyd, appears, so far as I can judge, to maintain everywhere the same cleanliness, good order, and discipline which distinguished his predecessor's management, and to be in every respect well qualified for his office.

CHARLES DU CANE, Governor.

Government Cottage, Port Arthur, April 17, 1872. (Signed)

Official visit of the Members of the late Government.

In recording the visit of the members of the Government to Port Arthur—before we proceed to view the several stations on the other side of the Peninsula—I am enabled to state, with the full and unanimous concurrence of my colleagues, that after a careful and minute inspection and examination into this Department in all its branches during a period of four days, we have arrived at the conclusion that the discipline and working of the establishment is conducted in the most satisfactory manner.

A portion of the available labour at the disposal of the Commandant is most profitably employed in laying down a tramway with iron rails, which already opens up good land for the production of general crops, and at the same time affords an ample quantity of good timber for the saw mill, and also an inexhaustible cheap and ready supply of firewood for the station.

The energy displayed by the Commandant in endeavouring to make the labour at his disposal reproductive has our high approval, and we entertain the belief that this establishment can, at no distant date, be made mainly self-supporting.

(Signed)

J. M. WILSON. THOS. D. CHAPMAN. HENRY BUTLER. W. R. GIBLIN.

Government Cottage, Port Arthur, 6th May, 1872.

THE Civil Commandant, Mr. A. H. Boyd, has kindly afforded me an opportunity of visiting the various departments of the Penal Establishment, and they all appear very well conducted, the buildings being thoroughly clean and well ventilated, and the inmates healthy. Several new undertakings, and more especially the tramway, now in course of construction, give good promise of increasing to a great extent the usefulness of prisoners' labour. I have been pleased with humane system in force, and not less with Mr. Boyd's manner of treating the prisoners, founded on a just appreciation of their varied characters and dispositions than with the orderly management of the whole institution. dispositions, than with the orderly management of the whole institution.

(Signed)

ARTHUR R. BUTTERWORTH.

Port Arthur, January 5, 1872.

WE arrived at Port Arthur on December 29, 1871, viâ Norfolk Bay, and by the courtesy of the Commandant, Mr. A. H. Boyd, had very pleasant and comfortable quarters at the Government Cottage.

Through the Commandant's kindness and attention we have been enabled to inspect the Penal Establishment, to visit various out-stations, and to see all the natural beauties of the Peninsula.

Throughout the settlement a perfect system of order and comfort seems to prevail.

Mr. Boyd has considerably reduced the expenditure without in any way sacrificing the efficiency of the establishment under his control.

The various industries introduced by him, such as utilising the iron turning lathe, the opening up beds of valuable timber by means of his new tramway, and the manufacture of boots and shoes, must necessarily make the establishment considerably more remunerative than it has hitherto been.

(Signed)

THOMAS D. WARNER. ALFRED DOBSON.

Port Arthur, 6th January, 1872.

I have spent two very pleasant days at Port Arthur, and feel very greatly indebted to Mr. Wilson for bringing me here, and to Mr. Boyd, the Civil Commandant, for his courteous attention. I have been greatly interested in the settlement, especially in reference to its work as regards convicts from England. I have seen nothing which does not seem to be admirable. How far the establishment may be open to a charge of extravagance I am unable to say—if it be so, the circumstances of its position, as an establishment daily decreasing in the number of its members, afford the reason.

3rd February, 1872.

(Signed)

ANTHONY TROLLOPE.

THE pleasure of my visit has been greatly enhanced by the fact that the great care and attention to the prisoners, &c. seem to be productive of good. I have to express my indebtedness to the Premier, the Attorney-General, and to the Civil Commandant for their kindness and attention.

(Signed)

3rd February, 1872.

HOWARD SPENSLEY, Solicitor-General, Victoria.

On again visiting Port Arthur I have been pleased to find that the reduction of the staff of officers which has taken place since my former visit has not impaired the efficiency of the establishment, which appears as clean, as orderly, and as well managed as ever.

3rd February, 1872.

(Signed)

W. R. GIBLIN.

HAVING this day visited the prisoners and other inmates of the establishment at Port Arthur, I have to record my satisfaction at the very orderly appearance of these persons, and also my admiration of the cleanliness which is to be found everywhere in and about the buildings. These results, in my opinion, are due to the discipline which is maintained by the Civil Commandant.

(Signed)

J. M. WILSON.

Government Cottage, 3rd February, 1872.

I have visited many establishments similar to the Penal Station at Port Arthur, but I never saw one more conspicuous for cleanliness, or with a system more perfect. The kindness and courtesy which I received from the Civil Commandant and officers at this settlement will ever be remembered by me.

19th February, 1872.

(Signed)

JOHN CLARKSON, Victoria.

I HAVE visited Tasman's Peninsula viâ Wedge Bay. By the kindness of the Commandant, Mr. Boyd, I have been enabled to visit the various places of interest, including the establishment at Port Arthur. In going through the various buildings I was much pleased with the cleanliness and order that prevailed, and with the kind attention which I received from the officers.

(Signed)

THOMAS FRODSHAM, JUNR.

19th February, 1872.

DURING our two days visit at Port Arthur we have been greatly gratified with all we have seen, and have pleasure in expressing the obligations which we are under to the Civil Commandant, A. H. Boyd, Esq., for the kindness and courtesy he has shown us.

The cleanliness, order, and discipline which prevail in all departments have afforded us much satisfaction, and reflect most creditably on the ability of the Civil Commandant.

> JOHN M'INTYRE, J.P., Sandhurst, Victoria. (Signed) JAMES WOODWARD, Victoria. W. MURCOTT, C. G. BALDOCK, "

> > J. HORWOOD, J.P.,

HAVING spent more than a fortnight on Tasman's Peninsula, I cannot but express before leaving the extreme gratification I have experienced from my visit.

The management of the Penal Station at Port Arthur will compare most favourably with similar establishments in England, Germany, France, and the United States of America—in fact it seems, to such an observer as myself, to be as near perfection as possible; and the knowledge of the subject, the tact, energy, and indefatigability displayed by the Commandant (A. H. Boyd, Esq.), is only equalled by his kind and considerate courtesy to a stranger like myself.

CHAS. EDWARD MORTON, London, England.

9th November, 1872.

WE have much pleasure in acknowledging the very great kindness and attention shown to us by the Civil Commandant, and in bearing testimony to the efficient manner in which the whole establishment is conducted. It is most gratifying to see so many manufactures and improvements in course of steady progress, which must ultimately tend to make the settlement to a very great extent self-supporting.

(Signed)

FRED. GEO. HOWELL. HENRY DOBSON. JAMES M'FARLANE. JOHN M'FARLANE.

December 27, 1872.

THE YEARLY RETURN and Report of Sick and Medical Transactions at Port Arthur, during the year ending 31st December, 1872.

THE Yearly Return and Report of Sick and Medical Transactions at Port Arthur, which I am ordered to make out on the 31st of December of each year, can be most clearly furnished by considering separately the different classes of persons who have resided on the Settlement during the year; viz.-

1st.—The Prisoners.

2nd.—The Paupers.
3rd.—The Lunatics.
4th.—Officers, Attendants, and their Families.

PRISONERS.

Two hundred and seventy-nine Prisoners were detained at Port Arthur on the 1st January, 1872; sixty-three were received during the year, making a gross number of three hundred and forty-two. Ten out of this number have been Lunatics, and will be considered with the other inmates of the Asylum, leaving me now to treat of three hundred and thirty-two.

Out of this number some came under my care in the Hospital; others were treated by me as Outents, either at the Penitentiary or at the Separate Prison. I have to consider the two classes Patients, either at the Penitentiary or at the Separate Prison. separately; viz.—

> 1st.—The Hospital Patients. 2nd.—The Out-Patients.

Hospital Patients.

I had under my care in the Hospital on the Number admitted in the course of the year				-	16 165
	TOTAL	.· •	•	-	181

Being at the rate of 545 per thousand on the total number of Prisoners at Port Arthur.

Accidents	- i-	-		-	-		╼,	21
	TOTAL	-	-		-	-		240

Several Patients were treated for more than one complaint.

The one case classed as "Dietic" was a well-marked case of "Scorbutus," with spongy gums and large Hæmorrhagic patches under the skin.

The man thus affected had been a Patient in the Hospital for several years on account of Chronic Dysentery and disease of the Stomach,—the result of privations endured in the bush at a time when he had absconded.

He had been discharged from the Hospital about six months, much improved but not cured. He was discharged in order to try the effect of the fresh air and moderate labour outside the Hospital, and recovered his strength rapidly, still his stomach could not bear any vegetables or fruit. I attribute the scorbutic affection to this and to the damp of the Penitentiary. He remained this time two months in the Hospital, and left quite cured of his scorbutic affection, and much better in every other respect.

In the class of "Miasmatic Diseases" will be found no less than thirty-seven cases of Rheumatism; many of these are repeated attacks in the same individuals.

The diseases of the Respiratory System amount to thirty-three.

The great prevalence of both these classes of disease must be attributed in part to the excessively moist atmosphere of Port Arthur; and in part also to the very bad condition of the roof of the Penitentiary.

Seventeen cases of diseases of the Urinary Organs were treated in the Hospital; several were repeated attacks in the one Patient, still the number of cases of diseased kidney is deserving of notice.

In the diseases of the Integumentary System I have entered three cases of bronzed skin. Two of these cases were accompanied with all the symptoms described by Dr. Addison as belonging to the disease of the "Supra-renal Capsules" which bears his name. The other is in conjunction with a decided case of "Thoracic Aneurism," but without any symptoms of abdominal affection. It is for this reason that I noticed these three cases in this place.

Twenty cases are entered as diseases of the organs of Circulation.

Dr. Dinham in his evidence before the Select Committee of the House of Assembly has noticed the prevalence at Port Arthur of "affections of the heart." I have also met with several cases of "Thoracic" and some of "Abdominal Aneurism."

Thirteen Prisoners remained in the Hospital on the 31st December, 1872.

Prisoners as Out-Patients.

Nine hundred and seventy-one cases have been attended to in the Penitentiary and Separate Prison, being nearly at the rate of three cases for every Prisoner at Port Arthur.

These cases may be classed as follows:-

Miasmatic Diseases	_		-	_	-		_	237
Parasitic ditto	_	-	_		-	-		18
Tubercular ditto	_		_	_	-		-	6
Diseases of the Nervous Syste	em -	_	-		-	-		56
Ditto of the Organs of C	irculatio	n	_	-	-		-	27
Ditto of the Respiratory	System	_	-	• ' '	-	-		243
Ditto of the Digestive O	rgans -		-	-	-		-	153
Ditto of the Urinary Org	rans and	Orga	ins of	Gene	ration	-		24
Ditto of the Locomotive	System	0	_	-	-			15
Ditto of the Integuments	arv Syste	\mathbf{em}			-	-		46
Ditto of Nutrition -			_	_	-		-	43
Ditto of the Eyes -		-			-	-		36
Accidents	-		-	-	-		-	67
	TOTAL	_	_		_	-	٠.	971

In the class of "Miasmatic Diseases" Rheumatism is entered 169 times.

The shattered constitution of a great number of the Prisoners, the damp climate of Port Arthur, and the very bad state of the roof of the Penitentiary and of all other buildings at Port Arthur, will explain the prevalence of this complaint. Many Prisoners have had repeated attacks, all of which are entered as so many separate cases.

Diseases of the Respiratory System have presented themselves 243 times. Here again the climate and the state of the buildings must be taken into account.

Diseases of the Urinary Organs and Organs of Generation amount to 24. This is a large proportion, and to be accounted for by the peculiar class of Patients.

In the diseases of Nutrition "Asthma" is entered 43 times. The Invalids under sentence and many of the Prisoners of 2nd and 3rd Class are men much debilitated by disease, some probably through the effects of their previous bad conduct. I must also consider as a cause of Asthma the very poor quality of the meat which is issued at Port Arthur during four months of the year; viz., from the last week of June to the last week of October. The meat at that period of the year is such as would be accepted from no Contractor for any other public Establishment.

PAUPERS.

The number of Paupers at Port Arthur on the 31st December, 1871, amounted to 153; number admitted during the year, 60; total 213.

Out of these I had under my c	are	in t	he E	Iosp	ital	on i	Janu	ıary	1st,	, 18	7 2		-	. 53

The four latter had been received into the Asylum merely "under observation."

One Patient was transferred to New Norfolk after a sojourn in the Asylum of 8 months and 24 days. His sentence had expired, and he was in a position to contribute something towards his maintenance.

Two of the Patients discharged have returned to the Asylum; one will remain probably a permanent inmate, the other confessed at the end of 5 days that he was malingering, and was discharged at once to the Penitentiary.

Seven Patients have died during the year. They had been inmates of the Asylum for the periods mentioned below:---

		•		-	Years.	Mths.	Days.						Years.	Mths.	Days.

The ages of these Patients at death were 19, 45, 53, 53, 60, 60, and 66 years.

The causes of death were—Diseases of the Nervous System, 5; diseases of the Organs of Circulation, 2; total, 7.

The Diseases of the Mind affecting the Patients in the Asylum were—Dementia, 64; Mania, 40; Melancholia, 7. In many of these cases "Mania" was verging on "Dementia," in others combined with "Melancholia." "Dementia" was in some cases combined with "Epilepsy."

Twenty-three have been received into this Asylum from New Norfolk. I have only been able to trace the dates of admission to New Norfolk of seven of these Patients; viz.—

							• • • • • • • • • • • • • • • • • • • •		
One admitted	d in	- ··	-:	-	1840	One admitted in		-	1851

Ditto	_	_	_		1850	251000			1001

Three Patients are now in the Asylum for the sixth time, one for the fourth time, six for the third time, and nine for the second time.

The general health of the Asylum has been good; very few Patients have been confined to bed. The following cases have been prescribed for:—

Miasmatic Diseases		13 1	Diseases of the Locomotive System -	Î
Diseases of the Nervous System -		16	Ditto of the Integumentary System	4
Ditto of the Organs of Circulation	-	3	Ditto of the Eyes	6
Ditto of the Respiratory Organs -		11	Ditto of Nutrition	7
	-	7	Accidents 4	14
Ditto of the Urinary Organs -		2		

403

Total - - 114.

The number of accidents will appear at first sight very great, but it must be remembered that in conformity with the provisions of the "Lunacy Act" everything, even to the slightest abrasion or contusion, has been noted down. Thus a great proportion of the cases which are entered here as accidents would never have been seen by the Medical Attendant of free people, or even by the Medical Officer at the Penitentiary.

Nine Patients have been subject to Epileptic Fits during the year.

[&]quot;Bromide of Potassium" has been administered in large doses, and with apparently considerable effect. No Patient has been cured by it; all those to whom it has been administered have much improved.

Thirty Patients have been subjected to seclusion during the year; some for simple excitement, some for different degrees of misconduct. The total number of hours of seclusion amounts to 843—giving an average of about 28 hours for each of the thirty Patients.

The amount has varied from 1 to 425 hours. No Patient has been kept in seclusion without being allowed some hours' exercise in the day, generally in the evening after the other Patients have retired. The seclusion yards of the Asylum have not been used, not being at all adapted for the purpose for which they were intended.

They are separated from the yard in which the more violent class of Patients take air and exercise merely by an open fence. They are exposed to all the noise and all the causes of provocation and excitement which such a position must produce.

I have therefore thought it better to keep the Patients subjected to seclusion simply in their cells.

No other form of restraint or punishment except seclusion has been used in this Asylum during the year 1872.

Ninety-five Patients remained in the Asylum on the 31st December, 1872.

In conclusion, I beg leave to bring very urgently under the notice of the Government the recommendation made by the late Civil Commandant (Mr. James Boyd) in his Report dated 8th April, 1871, viz., that the Commissioners of Hospitals for Insane should visit Port Arthur at least three times a year. I have felt very often the want of their experience and their countenance.

OFFICERS AND ATTENDANTS AT PORT ARTHUR, AND THEIR FAMILIES.

Three hundred and ninety-eight cases have been attended out of this class of the inhabitants of Port Arthur; viz.—

Miasmatic Diseases	69	Diseases of the Organs of Generation -	1
Parasitic ditto	15	Ditto of the Urinary Organs -	2
Diathetic ditto	3	Ditto of the Integumentary System	16
Tubercular ditto	$\cdot 2$	Developmental Diseases of Children -	31
Diseases of the Nervous System -	6	Diseases of the Eyes	4
Ditto of the Respiratory System	100	Ditto of Nutrition	20
Ditto of the Digestive Organs -	125	Accidents	4

Rheumatism and Affections of the Respiratory System were here as everywhere the prevalent complaints,—the damp climate of Port Arthur, and the state of disrepair of nearly all the buildings (private as well as public), being the cause.

Two deaths occurred in this class; viz.—"Cerebral Hæmorrhage," 1, aged 61 years; Metria, 1, aged 20 years.

All children above three months old were vaccinated (with one exception). The vaccination succeeded in every case.

E. C. M'CARTHY, Medical Officer.

Port Arthur, 26th February, 1873.
