

(No. 36.)

1882.

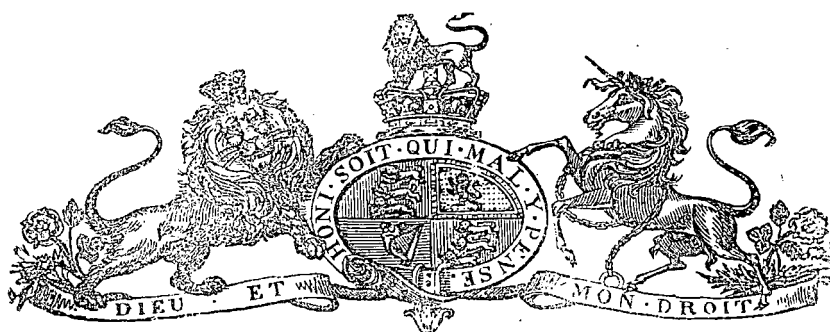

TASMANIA.

HOUSE OF ASSEMBLY.

BOARD OF EDUCATION:

REPORT FOR 1881.

Laid upon the Table by the Attorney General, and ordered by the House to be
printed, July 12, 1882.

REPORT of the BOARD OF EDUCATION for the Year 1881.

To His Excellency SIR GEORGE CUMINE STRAHAN, Knight Commander of the Most Distinguished Order of St. Michael and St. George, &c., Administrator of the Government of the Colony of Tasmania and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY.

1. WE, the Members of the Board of Education, Tasmania, have the honor to submit the following Report of our proceedings during the year 1881.

2. *Attendance.*—During the year 1881 there were 175 Schools in operation; the total number of distinct children on the Rolls for the year was 13,644; the average number on the Rolls from month to month was 9258, and the average daily attendance 6701. As compared with the previous year the number of Schools has increased by 4, the total number of children on the Rolls by 1358, the average number on the Rolls by 906, and the average daily attendance by 699.

3. *Progress of Schools.*—The progress of the Schools since the year 1863, when the jurisdiction of the present Board was extended over the whole of the Public Schools of the Colony, is shown in the following Table :—

Year.	No. of Schools.	No. of Scholars on Rolls during the year.	Average No. of Scholars on Rolls from month to month.	Average Attendance.	Average No. on Rolls during the year at each School.	Average No. on the Rolls from month to month at each School.	Average Attendance at each School.
1863..	88	7124	4607	3426	80·95	52·34	38·92
1864..	97	7791	4987	3763	80·31	51·41	38·79
1865..	102	8294	5357	4074	81·31	52·42	39·94
1866..	101	8198	5159	3930	81·16	51·08	38·91
1867..	105	8346	5419	4112	79·48	53·14	39·16
1868..	109	8746	5649	4272	80·23	51·46	39·19
1869..	116	9316	5992	4511	80·22	51·66	38·88
1870..	128	9997	6678	5041	78·10	52·17	39·38
1871..	130	10,194	6786	5187	78·41	52·20	39·90
1872..	139	10,491	6921	5209	75·47	49·79	37·47
1873..	141	10,803	7047	5268	76·62	49·98	37·36
1874..	147	12,158	7970	5867	82·70	54·21	39·91
1875..	154	12,271	8145	5703	79·68	52·89	37·03
1876..	158	12,231	8140	5867	77·41	51·52	37·13
1877..	165	12,557	8222	5973	76·10	49·83	36·20
1878..	164	12,453	8297	6032	75·93	50·59	36·79
1879..	171	12,652	8520	6203	73·98	49·82	36·27
1880..	171	12,286	8352	6002	71·85	48·84	35·10
1881..	175	13,644	9258	6701	77·96	52·90	38·29

4. *Monthly Attendance.*—The following table exhibits the comparative number of Scholars in average daily attendance from month to month during the years 1881 and 1882:—

MONTH.	No. of Schools.		Average Daily Attendance.		Average Daily Attendance at each School.	
	1881.	1882.	1881.	1882.	1881.	1882.
January.....	157	158	5044	5510	32	35
February	161	161	5502	6275	34	39
March	157	161	5488	6245	35	38
April	163	167	5728	6499	36	39
May	164	167	5687	6156	35	37
June	162	168	5673	6266	35	37
July	165	167	5792	6492	35	39
August	164	168	5559	6704	34	40
September.....	162	171	6114	7043	38	41
October.....	162	172	6303	7182	39	42
November.....	161	172	6185	6834	38	40
December	160	172	6072	6540	38	38

5. *Ages and Classification of Scholars.*—We have Returns from Teachers of 174 Schools of the Ages and Classification of 9266 Scholars on the Rolls at Christmas 1881, which are summarised below:—

	C L A S S.						TOTAL.
	I.	II.	III.	IV.	V.	VI.	
Under Four years	88	—	—	—	—	—	88
Four years	249	2	—	—	—	—	251
Five years	467	29	—	—	—	—	496
Six years.....	648	132	5	—	—	—	785
Seven years ..	637	348	29	2	—	—	1016
Eight years	428	529	166	19	—	—	1142
Nine years	273	513	304	61	8	1	1160
Ten years	150	422	426	184	46	4	1232
Eleven years	86	269	345	251	78	20	1049

Thirteen years	22	77	166	237	113	53	668
Fourteen years and over	16	61	102	167	111	78	535
TOTAL	3096	2560	1794	1158	468	190	9266
Per-centage of Scholars	33·42	27·63	19·36	12·49	5·05	2·05	—

6. *Religious Denominations of Scholars on the Rolls.*—The Returns exhibiting the Religious Denominations of 13,644 Scholars on the Rolls afford the following comparison with the previous year:—(See Appendix J.)

	Church of England.	Church of Rome.	Presbyterians.	Wesleyans.	Independents.	Other Denominations.
Scholars on Rolls, 1880 ...	5820	2253	901	1810	914	588
	or	or	or	or	or	or
	47·37 per cent.	18·34 per cent.	7·34 per cent.	14·73 per cent.	7·43 per cent.	4·79 per cent.
Scholars on Rolls, 1881....	6469	2350	880	2360	997	588
	or	or	or	or	or	or
	47·41 per cent.	17·22 per cent.	6·45 per cent.	17·30 per cent.	7·31 per cent.	4·31 per cent.

7. *Grant for Education.*—The total expenditure in aid of Public Schools amounted to £18,191 7s. 7d. The appropriation of this money is exhibited in detail in Appendices C. and G., and may be briefly recapitulated as follows:—

Objects of Expenditure.

	£	s.	d.
Salaries and Allowances of Teachers, Assistant Teachers, Pupil Teachers, and Paid Monitors	15,542	17	3
Rent of School Buildings.....	208	16	3
Repairing and improving School Buildings	1496	1	5
Providing School Furniture and Fittings	193	11	3
Providing Books, Maps, and School requisites	108	19	4
Salaries of Truant Officers	240	0	0
Miscellaneous Expenditure	401	2	1
TOTAL.....	£18,191	7	7

In addition to the above amount the sum of £2035 8s., chargeable against the Establishment, was paid on account of Administration and Inspection.

8. *Cost of Instruction.*—The following statement exhibits the comparative cost of instruction for the year 1881 with the previous year :—

Average amount of Government Aid, exclusive of the cost of Administration and Inspection.

	1880.			1881.		
	£	s.	d.	£	s.	d.
Number of Scholars on Rolls	1	6	10½	1	6	8
Average Number of Scholars on Rolls	1	19	6½	1	19	3½
Average Daily Attendance	2	15	0½	2	14	3½

Cost of Administration.

Number of Scholars on Rolls	0	1	1½	0	1	0½
Average Number of Scholars on Rolls	0	1	7½	0	1	6½
Average Daily Attendance	0	2	3½	0	2	1½

Cost of Inspection.

Number of Scholars on Rolls	0	2	1½	0	1	11
Average Number of Scholars on Rolls	0	3	1½	0	2	10
Average Daily Attendance	0	4	3½	0	3	9½

9. *Building Grants.*—During the year we have appropriated, under the provisions of “The Public Schools Erection Act, 1874,” the sum of £486 6s. 8d. in aid of the erection or purchase of School premises at the following places :—

PARTICULARS.	Amount granted by Board.	Amount raised Locally.	TOTAL.
	£ s. d.	£ s. d.	£ s. d.
Golden Valley—Erection of Teacher's Residence	69 13 4	34 16 8	104 10 0
Nugent—Erection of School-room and Teacher's Residence	66 13 4	33 6 8	100 0 0
Latrobe—Purchase of Teacher's Residence ..	350 0 0	..	350 0 0
TOTAL	486 6 8	68 3 4	554 10 0

We have also expended a sum of £609 in the purchase of a site for a Public School at Battery Point, which amount is provided for by a special Supplementary Vote.

These sums are not taken into account in calculating the cost of instruction.

10. *School Fees.*—The School Fees paid by parents in aid of Teachers' Salaries during the year amounted to £7026 7s. 2d., or £772 5s. 11d. more than in 1880: dividing this amount by the—

Number on the Rolls, gives, per head, 10s. 3½d., or 1½d. more than the previous year:

Average number on the Rolls, gives, per head, 15s. 2½d., or 2½d. more than the previous year:

Average daily attendance, gives, per head, £1 0s. 11½d., or 1½d. more than the previous year.

11. *Income of Teachers.*—We have received Returns of the emoluments of 214 Teachers who were employed during the year, from which we have compiled the following results:—

	<i>No. upon which the Average is taken.</i>	<i>Average Annual Income.</i>	<i>Maximum Annual Income.</i>	<i>Minimum Annual Income.</i>
		£ s. d.	£ s. d.	£ s. d.
Schoolmasters and Mistresses con- jointly	63	172 14 9	794 17 11	78 19 9
Schoolmasters	54	137 2 5	591 12 7	63 11 0
Schoolmistresses in sole charge	39	75 7 6	167 16 4	48 10 9
Teachers in charge of Provisional Schools	12	43 18 11	54 1 0	33 8 3
Female Assistants	46	31 0 0	60 0 0	20 0 0

The above statements have reference to the income which is derivable by Teachers in connection with their Schools only, and do not include sums received for private tuition.

12. *Free Scholars.*—We append a Return of the number of children admitted during the year under free certificates. The sum of £475 7s. 6d. has been paid by the Board for their instruction, the average number of Free Scholars under instruction being 1249·75. (See Appendix H.)

The following statement will show the average number of Scholars receiving their instruction free, and the amount paid to Teachers by the Board for their instruction for the past nineteen years:—

	<i>Average No. of Free Scholars under Instruction.</i>	<i>Amount paid to Teachers for their Instruction.</i>
		£ s. d.
During the year 1863	679·75	380 18 6
Ditto 1864	612·75	354 17 10
Ditto 1865	896·00	359 7 6
Ditto 1866	1027·75	434 17 9
Ditto 1867	1118·00	470 15 9
Ditto 1868	1209·25	497 12 3
Ditto 1869	1438·00	586 4 3
Ditto 1870	1780·75	722 17 3
Ditto 1871	2013·50	850 15 9
Ditto 1872	1886·25	742 5 11
Ditto 1873	1533·50	629 9 5
Ditto 1874	1611·75	620 12 4
Ditto 1875	1603·25	593 16 1
Ditto 1876	1560·75	615 13 1
Ditto 1877	1461·25	558 19 2
Ditto 1878	1330·75	519 0 3
Ditto 1879	1219·75	473 14 3
Ditto 1880	1232·75	459 14 7
Ditto 1881	1249·75	475 7 6

13. *Night Schools for Males.*—We append a Return of the number of scholars admitted into the Night Schools for Males during the year. The sum of £48 13s. has been paid by the Board for their instruction. (See Appendix F.)

14. *Schools established.*—Schools at the following places were established during the year:—Beaconsfield, Garden Island Creek, Macquarie Plains, Molesworth, Moorina, Nicholls' Rivulet, and Springfield.

15. *Schools closed.*—Aid was withdrawn from the School at Saundridge on account of the small number of children in attendance; and the School at Margaret-street, Launceston, was closed in consequence of the building not being available after the end of the year. The School at Prosser's Bay was also temporarily closed in December.

16. *Exhibitions from Public to Superior Schools.*—In the month of June we caused an Examination for Exhibitions from Public to Superior Schools to be held; twenty-four male and seven female Candidates presented themselves; and on the recommendation of the Examiners, we awarded an Exhibition of the value of £16 13s. 4d. per annum, tenable for four years from the 1st of July, 1881, to each of the under-mentioned Candidates :—

No.	Name.	Date of Birth.	Public School.
<i>Male Candidates.</i>			
1	Harris, Alfred Thomas.....	21 September, 1869	New Town
2	Wilson, Joseph.....	27 September, 1870	Queenstown
3	Reid, Ernest Edward.....	16 March, 1870	Battery Point
4	Stubbs, Thomas James.....	19 August, 1870	Dover (Port Esperance)
5	Boyes, Henry.....	8 June, 1869	Trinity Hill
6	Oldmeadow, Lloyd John Hollis....	31 August, 1869	Evandale
<i>Female Candidates.</i>			
1	Roper, Mary Teresa.....	7 August, 1869	Battery Point
2	Allsop, Clotilde E. L.	8 July, 1869	Battery Point
3	Clemons, Marion F.....	31 January, 1870	Evandale

A Statement of the Expenditure under this head will be found in Appendix E.

17. *General and Local Inspection.*—On summarising Appendix I. it will be seen that 3715 visits have been made to the Public Schools during the year, of which 415 were made by the Inspectors, 1452 by Members of the Local Boards, and 1387 by other persons; and, for the purpose of imparting Religious Instruction, 366 visits were made by Ministers of the Church of England, 61 by Ministers of the Church of Rome, 6 by Ministers of the Church of Scotland, 10 by Wesleyan Ministers, 10 by Ministers of the Independent Church, and 8 by Ministers of other Denominations.

18. *Rules and Regulations.*—During the year we have made the following alterations in our Rules, which have received the sanction of Your Excellency in Council, and been published in the *Gazette* in accordance with the terms of the 8th Section of “The Public Schools Act,” 32 Vict. No. 14 :—

FORMER RULES.

Rule 21.—Pupil Teachers will be employed in such of the larger Schools as may appear to the Board to offer special advantages for training them to the profession of Education. Paid Monitors may be appointed in other Schools which are under efficient management, but no such appointment shall be made where the average daily attendance for a period of six months is less than Fifty.

Rule 23.—The Local School Boards will take measures to compel the attendance of children between the age of 7 and 14 years, living within a radius of two miles from the Public School, in accordance with the provisions of “The Public Schools Amendment Act,” and shall regularly visit and report upon the School placed under their supervision; and shall also exercise the following functions :—

Rule 76.—The classification of Teachers who have passed the Examination will be determined (a) by their competency as Teachers, and (b) by the result of the Examination. Teachers whose qualifications under the former head are inferior to those under the latter may, at any future time, be advanced to their Examination rank upon giving satisfactory evidence of increased efficiency. After the expiration of three years from the date of promotion, or of passing an Examination, Teachers may be again examined for any class to which the condition of their School entitles them under the Regulations to be admitted.

REVISED RULES.

Rule 21.—Pupil Teachers will be employed in such of the larger Schools as may appear to the Board to offer special advantages for training them to the profession of Education. Paid Monitors may be appointed in other Schools which are under efficient management; but no such appointment shall be made where the average daily attendance for a period of six months is less than Forty-five.

Rule 23.—The Local School Boards will take measures to compel the attendance of children between the age of 7 and 14 years, living within the distance of two miles from the Public School, in accordance with the provisions of “The Public Schools Amendment Act,” and shall regularly visit and report upon the School placed under their supervision, and shall also exercise the following functions :—

Rule 76.—The classification of Teachers who have passed the Examination will be determined (a) by their competency as Teachers, and (b) by the result of the Examination. Teachers whose qualifications under the former head are inferior to those under the latter may, at any future time, be advanced to their Examination rank upon giving satisfactory evidence of efficiency.

The following sections have been rescinded :—

Rule 35.—Grants will be made in aid of the erection, extension, or repair of School-rooms and Teachers’ Dwellings, to an extent not exceeding two-thirds of the total sum required.

Rule 39.—Wherever buildings are rented for school purposes, the Board will require that at least one-third of the rent shall be defrayed from local sources.

19. *Erection of School Buildings.*—The Legislature, in October, 1880, passed an Act enabling School Buildings to be erected at the sole expense of the State; but during the year 1881 no buildings were erected under it, as the provisions of such Act precluded the building of any school-house until the plans and specifications, together with an estimate of the cost of the works, should be laid before and approved of by Parliament.

An Act was subsequently passed in November, 1881, modifying these provisions so as to enable the Board to erect School Buildings, not exceeding a cost of £500, without waiting for Parliamentary sanction.

20. The Annual Reports by the Chief Inspector, and by Mr. Inspector Rule, are annexed hereto. (See Appendices A. and B.)

21. We submit this as our Report on the Public Schools for the year ended 31st December, 1881, and we have caused our corporate Seal to be affixed hereto.

APPENDIX A.

GENERAL Report for 1881 by T. STEPHENS, Esq., M.A., Chief Inspector of Schools.

Hobart, 27th May, 1882.

SIR,

I HAVE the honor to furnish my annual statement of the work of the past year, with general remarks on matters which have already been recorded in my separate reports.

The Schools in the Southern Districts were all in operation, with five exceptions, during the whole or the greater part of the year. The total number of visits of inspection and examination was 202, each day of an examination, in cases where it extended over two or more days, being counted as a separate visit. The number of children in ordinary attendance in Hobart alone, including the Ragged Schools, whose attainments and progress from year to year I endeavour to test by individual examination, has largely increased, and, if full justice were done to this part of my work, the time left for the discharge of similar duties in the country schools would have been altogether insufficient for the purpose. Under these circumstances it has seemed to me that the schools remote from observation had the strongest claims upon my time and attention until further provision could be made for school inspection, and this has now been done by the recent increase in the inspectorial staff.

The work connected with the annual Examinations of Teachers and Pupil Teachers, and other examinations of candidates for employment in various capacities; the visits of inquiry in localities unprovided with the means of education; the special reports required from time to time; and the correspondence with Teachers upon matters which have come under notice during the inspection of schools, together with the ordinary miscellaneous duties of my office, have been steadily increasing of late years. There are many questions of importance for which I have not hitherto been able to find leisure, but which I hope, under the new arrangements, to submit to the consideration of the Board during the current year.

SCHOOL-HOUSES.

It is gratifying to note that the very grave defects and inconvenience resulting from the want of any satisfactory provision for the erection, repair, and maintenance of school-houses, which I have had to report annually for many years past, are now in a fair way of being remedied. Considering that the arrears of needful repairs and other important works have been accumulating for a length of time, it is not to be expected that arrangements can be made for giving immediate attention to all the claims at once, or that mistakes will not be made in the execution of works requiring experience which is only to be gained

through personal acquaintance with the special requirements of Schools. The cost of the service will probably exceed the estimate for the first year or two, but it is bad economy to defer action in matters of urgency, and it should be remembered that some of the most serious dilapidations have resulted from the want of prompt attention at a time when only trivial repairs were required. It is necessary to remark that some teachers do not appear to have a sufficient sense of personal responsibility for the care of the school premises, furniture, and apparatus, and it will be advisable to take measures to discourage the existence or growth of the habit of looking to "Government" to remedy every little defect which might have been prevented by good management and ordinary care.

SCHOOL MANAGEMENT.

Many of the deficiencies which have been reported under this head are connected with a want of orderly arrangement of school-rooms with regard to furniture, apparatus, books, slates, hats, etc., and the improved provision for school requirements which may be looked for under the new system will remove some of the obstacles which have impeded even the best teachers in their endeavours to train children in habits of neatness and order. It will then be easier to deal with the cases in which no such excuse exists.

The discipline of schools, so far as regards the subordination of the scholars to their teachers, is generally satisfactory, and in some the entire management in all that concerns the control and training of children is as good as can be reasonably expected, allowance being of course made for defects arising from the inexperience of young assistants. Some teachers are singularly unobservant of irregularities which in one shape or another are continually going on under their eyes, such as conversation, or general disorder in the desks; the formation or growth of bad habits in the way of slovenliness, lounging attitudes in class, and other details of daily conduct which it is especially the province of the elementary teacher to regulate and control; and in such matters as these the want of proper training is first seen. There is no immediate remedy available, but it cannot be too strongly impressed upon teachers that the work of the instructor does not properly begin until the discipline of the school has been raised to a standard which can be fairly described as satisfactory.

INSTRUCTION.

Although, for reasons stated above, it has not always been possible to thoroughly test the efficiency of school teaching and training in all their details, there has been no point of importance left doubtful, and the degree of faithfulness with which the leading principles of the programme of instruction have been carried into effect is shown in my separate reports on the schools. Without going minutely into the calculation and statement of results, which often lead to erroneous conclusions and unfair comparisons, I may cite some leading facts which will throw light upon the average standard of proficiency. All exceptional cases, as, for instance, where a considerable proportion of the scholars were unavoidably absent on the only day available for the examination, are omitted from consideration.

Taking the three classes which represent the upper half of the Public School course, I find the following results of classification, which is the Teacher's statement of the proficiency of his scholars as estimated under the guidance of his printed instructions. The per-centage upon the total number examined in the schools is appended:—

Classes IV., V., and VI.	564, or 19·61 per cent.
Classes V. and VI.	218, or 7·57 per cent.
Classes VI. alone.....	54, or 1·87 per cent.

Tested by examination in the essential subjects of elementary instruction, this classification showed a considerable falling off from the true standard of minimum proficiency. In Class IV., out of 346 examined, 234 passed as being qualified for that grade; in Class V., out of 164 examined, 112 passed; and in Class VI., out of 54 examined, 35 passed. There are circumstances in which a teacher may be justified in classifying particular children in a higher grade than their attainments warrant; but after allowing an ample margin for such cases, there is still far too great a discrepancy between the classification and the actual proficiency of the children. This is only to be accounted for on one of three grounds,—that the teacher has forgotten the plain instructions of the programme; that he does not know what the children's educational condition really is; or that he has purposely classified them above their true position in the hope that the deficiency may be made up before the Inspector comes to examine them. In contrast to such irregularities it is very gratifying to note the good work done in some schools, the number of which is steadily though slowly increasing, and which not only show a fair proportion of children placed and passing satisfactorily in the higher classes in the essential subjects, but also furnish evidence which proves that the cultivation of intelligence has progressed side by side with that of rote instruction and mechanical proficiency.

Attention has been called in former reports to the common defects in Reading, and to the obstacles with which teachers have had to contend in dealing with the subject. These are now in a fair way of being remedied by the adoption of a new series of reading books, and though some time will elapse before full effect can be given to the alteration, the chief difficulty which has impeded the efforts of both Inspectors and Teachers is now removed.

Of other subjects of elementary instruction I have nothing new to report. The Writing and Spelling continue to be most satisfactory under those teachers who give attention to the subject in its earliest stages, and who lay stress upon the habit of transcribing from books, with careful correction of errors, after the first principles of a bold style of handwriting have been mastered.

The principles of Arithmetic are still imperfectly taught in a large proportion of the schools. The use of arithmetic cards is becoming more general, and will give aid materially in securing independent work, and checking the habit of copying, which is a common cause of failure in this subject.

Though too great reliance upon text books in elementary schools is much to be deprecated, especially in the teaching of such subjects as Grammar, Geography, and History, the want of simple and satisfactory manuals in these subjects is much felt. With the present wide range of choice it requires much more than the average amount of skill and judgment possessed by teachers to ensure a knowledge of what is really essential, and to avoid directing attention to unnecessary or useless matter.

Oral teaching, as a special branch of instruction, almost necessarily implies a certain extent of previous careful training, and unless this has been available to the teacher it is seldom that he can introduce what are known as Object Lessons with any good result.

No general rule appears to be followed in connection with Home Lessons. For children in the lower portion of the school course they should be very simple, and consist chiefly of memory exercises which cannot be conveniently learnt during school hours. In the higher classes, while it is an advantage to the children to have to reproduce or learn thoroughly portions of subjects which they have previously been taught in class, it is important that they shall have no tasks set them in which extraneous help is required, that their home lessons shall be carefully revised by the teacher, and that they shall not be expected to give up too much time to their preparation,—an hour in the evening ought to be quite sufficient if the work is properly regulated by the teacher. Parents naturally object to have their homes turned into schoolrooms, or to undertake what is properly the function of the regular instructor.

GENERAL.

The Exhibitions which are annually awarded to scholars from the Public Schools to enable them to prosecute their studies, appear generally to have been won by the steady and industrious, and in several instances have admirably vindicated the object of their establishment. That they should have had any general influence for good upon the school system was not to be expected; indeed the problem of the present day is how to counteract the injurious effects almost inseparable from all schemes of competitive examination, the prizes in which are obtained by scholars set apart and specially prepared, and sometimes so prepared by sacrificing the interests of their fellows. Much, however, depends on the scheme of competition, and on the examiners. The Examinations for the Public School Exhibitions should promote, as far as is possible, faithful and efficient teaching during a series of years, and discourage 'cramming,' or special preparation for a short period of time.

As the question of providing some means of regular training is now under the consideration of the Board, I need not reiterate the arguments which I have used in favour of such a measure for many years past. There is a fair supply of candidates who are personally eligible for employment, but quite unacquainted with the principles and practice of teaching and school-management, and more would apply but for their sense of their own failings in this respect. The most striking deficiency is, perhaps, the want of one or more good Infant Schools; by attending which the female assistants in large schools, and the female teachers in charge of the small provisional schools which are annually increasing in number, might in a short time become qualified for the very elementary duties which most of them are called upon to discharge.

I have, &c.

T. STEPHENS, *Chief Inspector of Schools.*

The Chairman Board of Education.

APPENDIX B.

GENERAL Report for the Year 1881, by JAMES RULE, Esq., Inspector of Schools.

Hobart, 28th June, 1882.

SIR,

I HAVE the honor to submit to the Board of Education my General Report for the year 1881.

1. The districts under my supervision during the last five years extend northward from Ross and Lisdillon to the Straits, and westward from George's Bay to the River Montagu. There were in all ninety-nine schools open during the whole or a part of last year. Of these three received only one visit of inspection, being closed when one or other of my regular tours was made in their respective districts; seventy were visited twice; twenty, thrice; three, four times; one received six, and two seven visits. The average duration of these 235 visits was one hour and fifty-eight minutes. The amount of travelling involved in this and other work was rather less than that of former years. In addition to the inspection of schools and the reporting and correspondence therewith connected, the year's work included seven special visits to districts requiring schools, the examination, at irregular intervals, of twenty-nine candidates for employment or promotion, and the work devolving on me as a member of the Board of Examiners in the regular Annual Examinations of Teachers and others.

2. The following figures will help towards a rough estimate of the work done by the Public Schools in the North during the last quinquennium :—

YEAR.	1877.	1878.	1879.	1880.	1881.
Number of Schools	88	90	94	95	99
Average number of children on the Rolls.....	4184	4367	4550	4550	5209
Average Attendance.....	3175	3216	3484	3273	3771
Number examined	3656	3544	3704	3823	4524
Reached or passed the full work of } No.....	411	449	419	660	824
Class III. in the three essential } Per-centage.....	11	13	11	17	18

3. The results of last year's Examinations are summarised in the following Tables : but I must here explain that, in estimating the work of the schools individually from year to year, it is not enough to take as criteria only the classification, the average age of scholars, and the per-centage of "passes." These would be sufficient if children at all the schools began their education at the same age, and were kept with uniformly regular attendance during the same periods, without moving from school to school. But these conditions are never met with even approximately. It is therefore necessary to note the attainments of children individually at every annual examination and to compare these attainments with those noted for them in former years, helping and hindering circumstances being carefully taken into account :—

CLASSIFICATION.

Up to full work of Class VI....	27	12	12	14	...	3	6	6	0.13

PROGRESS of 2266 Pupils present at former Examinations.

The progress made by 399 was good.
The progress made by 535 was fair.
The progress made by 637 was moderate.
The progress made by 621 was very slow.
The progress made by 74 was nothing appreciable.

4. In the comparison of last year's results with those of former years, it may be noticed that there has been an increase in the number of schools, the attendance, the numbers present at the examinations, and the per-centage found instructed up to the lowest standard that can be considered passable for those (of whom there are many) leaving school before advancing further. This standard implies ability to read ordinary narrative with fluency and intelligence, to write on paper from copy and on slate from dictation, and to work sums in the first four arithmetical rules and the addition of money. It is obvious that these attainments can be of little permanent value to children, if their instruction is not continued after they leave school; for by most of those who do not use them they will be forgotten, long before social and business requirements act as inducements to self-improvement. As a foundation for the knowledge of human affairs required by every citizen, the instruction prescribed for the sixth or highest class is insufficient; and it would be well to supplement the programme by adding a seventh standard, to give direction to the instruction of scholars attending school after having reached the highest at present recognised. The adoption of a new series of books for the various classes has relatively changed the standards of reading, and a re-adjustment of the other subjects is thus rendered necessary. I would advise that an amended programme provide for instruction in elementary science and such results of scientific research as have relation to human welfare.

5. In close connection with the instruction prescribed for scholars stands the scale of qualifications for probationary teachers, and applicants for classification as certificated teachers. There are several points in which this is susceptible of improvement. One defect has long been felt as a hindrance to education,—it is the fact that the attainments prescribed for a probationary teacher are lower than those of scholars fit to pass into the Sixth Class. The result of this anomaly is that in many schools there is no Sixth Class, and in a considerable number no Fifth or Fourth.

6. The same result (low classification) is too often found in schools conducted by teachers of undoubted ability, and is attributable to the irregularity of the children's attendance, and the shortness of their school life. The Public Schools Act has, by its compulsory clause, helped, but in a small measure, to remedy this evil. It is only in extreme cases that coercion can be recommended as salutary. A too ready recourse to threats begets a spirit of antagonism to the school and all connected with it; and on that account it is a mistake for teachers to act as accusers, or even to mention the law by way of threat. It is gratifying to find here and there an enthusiastic teacher, supported by the sympathy of influential members of the community, who actively encourage a healthy public opinion as to the duty of parents in the education of their children, securing a very satisfactory attendance without a hint at penalties from any quarter.

7. Local School Boards have often been blamed for taking little or no interest in their schools; and it is not to be denied that in some cases the reproach is merited. But it is a mistake to consider that the interest felt by the individual members, or the assistance they render to the schools, is correctly indicated by the number of their meetings. Many districts could be mentioned where very few Board meetings have been held, while both the Chairman and the Members generally have given valuable assistance in administration and inspection, and to the utmost of their power supported the teachers in their work. A judicious increase to the authority with which the Boards are invested is advisable.

8. It is gratifying to notice a gradual increase in the number of school buildings of a superior class; though there is still much to be done in this direction. In point of hygiene some of the old buildings are very unsatisfactory. The use of cesspits in connection with schools ought to be discontinued: there are strong reasons for believing that infectious diseases are propagated by this means. Another danger of infection arises from a deficiency in the supply of pegs for hats and cloaks; which are too often seen heaped together on spare desks, window-sills, or the floor. A few teachers are still found forgetting how important to themselves and their scholars is the necessity for taking every opportunity to renew the air of the school-room. This alone is a sufficient reason for making a short adjournment to the play-ground in the middle of each half day's work.

9. In the face of many hindrances there has been, on the whole, a slow but marked improvement in the general management of the schools. The number of teachers that make their work a subject of real thought is increasing. The establishment of a good training school, to which promising untrained teachers may be admitted, will be found a valuable means to further and quicker improvement.

The Chairman Board of Education:

I have, &c.

J. RULE.

APPENDIX C.

ABSTRACT of RECEIPTS and EXPENDITURE Account Vote "In aid of Public Schools," for the Year ending 31st December, 1881.

PARLIAMENTARY VOTE, AND RECEIPTS.			DISBURSEMENTS.
