Submission to Legislative Council Sessional Committee Government Administration A -Sub-Committee - Fin Fish Farming in Tasmania Inquiry

Dear Mr Wright

As a resident of the south arm peninsula and a commercial fisherman, I strongly oppose fish farm expansions in storm bay. This directly affects a public resource, commercial fishing resources and people's livelihoods! There has been lack of public consultation and a deep culture of backhanded deals and bribery.

I endorse the following recommendations by the Tasmanian Conservation Trust 1. Complete independent water quality and environmental studies, before any environmental licences are issued (not an "adaptive management" approach)., 2. Environmental licences must set a hard cap on biomass and dissolved nitrogen and other pollutants emitted into our waterways from pens, hatcheries and other infrastructure., 3. Require all licences and licence amendments (marine and land based) to be referred to the EPA board so that the community can have a say., 4. Commission an independent review of the Marine Farming Planning Review Panel, focusing on its membership, governance and ties to industry., 7. Amend the Marine Farming Planning Act to require valuation and protection of social, recreational and visual amenity; and consideration of noise impacts on surrounding residents.

Thank you for reviewing my submission

Yours Sincerely
Hamish Renwick
