

Hotel Occupancy

Mr WOOD question to MINISTER for BUSINESS, INDUSTRY and RESOURCES

I note the Tasmanian Hospitality Association's 'Hotel Occupancy Report' for March showed robust occupancy for the accommodation sector right across the state. The high rates of occupancy are terrifically good news for Tasmania's economy, and reflect the efforts that have been put into encouraging people to visit our great state and in supporting the sector.

In March 2025, almost 90 per cent of all hotel rooms across Tasmania were full. This is a fantastic result. Do you have any further information about this occupancy data, and are you able to provide further information about how the hospitality industry is doing in my electorate of Bass?
