

To Whom it may concern.

I am writing to submit my opinion on the railway corridor between Scarsdale and Launceston. I ~~but~~ believe the push-bike fraternity has been given more than enough in the Northeast. As a community is finished it is now a non-paying playground for our Council General Manager and his mates. Please consider the train option as at least this is user-pay and not a constant drain on the rate- and tax payer. Also if the train option does not work I am sure Mister Watson & Co will jump in and destroy the last of "our train history". I am a long time resident of our corner of the state who does not believe tourism works here - surely is a multi million dollar non returning joke that needs to be stopped - i.e. no more spending. Please at least try the train option as this is user pay.

Yours sincerely
Stuart E Bruntton
