To the select committee,

Attached is a press release about the current state of the housing market and the lack of confidence of the present government.

While this debate of the TFA has been going on by people we did not elect to do it, the confidence in this state has dropped to an all time low and the unemployment has risen.

How in gods name will this agreement if passed address these issues. I have sat opposite people who have to sell their home because the bank is calling in the loan and seen first hand what this current government has done to the people of Tasmania.

How can locking up a renewable resource that would generate income for the state as well as employment be good. If people protest, bring in laws to stop it. We need to protect and encourage all industries to operate at worlds best standards and we must support them, not tear them down.

I applaud you for taking this decision to look carefully at something which could be detrimental for Tasmania for years to come and gives the minority of people in Tasmania what they want for nothing in return. It can not be called negotiations when only 1 side has something to trade.

Kindest Regards
James Bird
