

1884.

# PARLIAMENT OF TASMANIA.

# LAUNCESTON AND WESTERN RAILWAY: REPORT FOR 1883.

Presented to both Houses of Parliament by His Excellency's Command.

# LAUNCESTON AND WESTERN RAILWAY.

Manager's Office, Launceston, May 13th, 1884.

STR

I HAVE the honor to report upon the result of the working of the Launceston and Western Railway for the year ending December 31st, 1883.

## Capital Account.

The amount expended under this head of Account during the year 1883 has been £5939 2s. 8d., the details of which will be found in Table 5.

Up to this date the total capital expenditure amounts to £445,322 4s. 1d.

### Revenue Account.

The Revenue from all sources for the year 1883 amounts to £29,522 8s. 1d., which is an increase compared with the preceding year of £1836 15s. 8d.

This is the largest Revenue obtained since the opening of the Line in 1871, showing an increase over the first year's traffic of £16,893 13s. 6d.

The increase for the year 1883 over 1882 is at the rate of 6.6 per cent., as shown in the following Table. Under each head of Revenue there has been an increase.

|            |  | REC                  | EIPTS.  | INCREASE.  |           |  |  |  |

# Passenger Traffic.

The increase in the total number of passengers travelling in 1883 was 12,170; there was, however, a slight falling off in the number of season ticket holders during the year, amounting to about 85 journeys. In the average distance travelled there was also a slight falling off, the average distance travelled per passenger being represented by a journey of 18.77 miles, as compared with 18.83 miles in the year 1882. There has, consequently, been a corresponding falling off in the average fare per passenger of .35d.; but the larger number of passengers travelling—viz., 12,170—resulted in an increase in the receipts of £1130 12s. 6d.

| • .  |                                    | 1882.   | 1883.   | Increase.                                     | Decrease.         |
|--|------------------------------------|---|---|---|-------------------|
| Total miles travelled Average distance travelled per passsenger. First class journeys Second class ditto Season tickets, &c., ditto Total number of ditto Average rate per passenger per mile Average rate per passenger | No.<br>No.<br>No.<br>No.<br>Pence. | 2,095,408<br>18·83<br>32,575<br>73,553<br>5143<br>111,271<br>1·37<br>2 1·82 | 2,818,015<br>18·77<br>37,245<br>81,138<br>5058<br>123,441<br>1·39<br>2 1·47 | 222,607<br>4670<br>7585<br>—<br>12,170<br>·02 | •0 <b>6</b><br>85 |

The number of passengers travelling the different distances, as shown in the following Table, indicates a very large increase in each distance, with the exception of the two last,—namely, 26 to 30 miles and 36 to 40 miles. In the case of these there has been a falling off of 646 and 522 passengers respectively. To this cause is ascribable the reduction in the average distance travelled by each passenger, and likewise the smaller amount received from each passenger.

This falling-off in the larger distance journeys, such as from Evandale Junction to Deloraine, is attributable to the failure of the mining interests between Mount Bischoff and the West Coast, which during the year 1882 attracted considerable interest both to speculators in Launceston and Hobart.

| 29,285     | passengers, or | 24 per   | cent. of        | total, trävelled  | . 1 | to 5  | miles. |

The passenger traffic to and from Evandale Junction shows a decrease of 7865 passengers, or 30.9 per cent., on the year 1876, when the Main Line Railway opened; and Perth shows a falling-off of 684 passengers, or about 5 per cent. on the figures for 1876, notwithstanding the large increase during 1883 over the year 1882. Thus it is proved, as anticipated in previous reports, that the Main Line Railway still diverts traffic from Evandale and Perth stations.

| Co   | No. of P   | assengers.   | Increase.  |
|--|--|--|--|

| - <del></del>  | 111,271  | 123,441  | 12,170   |

<sup>\*</sup> Included in other Stations.

The total number of passengers conveyed to the end of 1883 was 1,236,665, who travelled an aggregate distance of 22,100,478 miles.

# Goods Traffic.

The goods tomage carried in the year gives an increase of 562 over the year 1882, and is the largest tonage,—viz., 25,528,—ever carried, with the exception of the year 1875, when there was an exceptionally good harvest, and the total tonage reached 25,837. The increase in goods receipts over 1882 is £416 17s. 1d., and over the first year the line was opened, 7417 tons, and £4037 13s. 4d. Taking into consideration that the acreage under cultivation has not very largely increased, this may be deemed a very satisfactory development of traffic in twelve years.

|   | 1882.                       | 1883.                   | INCREASE.          | DECREASE.       |
|---|-----------------------------|-------------------------|--------------------|-----------------|
| Grain Fencing, Bark, Wool, Firewood, Bricks, &c Artificial Manure | 11,072<br>12,915<br>··· 979 | 10,365<br>14,285<br>878 | 1370               | 707<br>—<br>101 |
|   | 24,966                      | 25,528                  | 1370<br>808<br>562 | 808             |

It will be observed there has been a slight increase in the average distance each ton was carried over 1882, that is, from 27:77 miles in 1882 to 31:4 in 1883; but, on the other hand, there

has been a small decrease in the average receipt per ton per mile, which in 1882 was 3.02d., and in 1883, 2.72d. This is caused by the increase in the lower classes of traffic, which are carried at reduced rates. The falling off in goods traffic at Evandale and Perth stations still continues, due to the completion of the Main Line Railway. As previously pointed out, there is no compensating traffic to place against this loss; that is, there is little, if any, traffic interchanged with the Main Line from points south of Evandale Junction to points upon the Launceston and Western Railway west of that station.

|   | )   | 1875.   | 1882.  | 1883,  |
|---|---|---|--|--|

## Working Expenses.

The working expenses amounted to £22,567 19s. 3d., as compared with £17,808 0s. 8d. in 1882. The cost per train mile was 4s.  $2\cdot 4d$ ., and per mile open, £428.9, as compared with the previous years, 3s.  $5\cdot 6d$ ., and per mile open, £341.5.

This large increase in the working expenses is caused, first, by the revenue of the year being debited with the purchase of 200 tons of steel rails and fastenings amounting to £2250, and secondly by the advance in all classes of wages which it was found necessary to make. Extensive renewals to the timber bridges and flood openings have also been carried out, which has been quite an exceptional expenditure.

The works of all description have been maintained in a satisfactory condition, as will be observed by reference to the Annual Report of the Inspecting Surveyor, which I have the honor to attach.

The working expenses of the Launceston and Western Railway Department compare very favourably with other Colonial railways. This is shown by the tabulated statement below:—

| ·  | Year.  | Per Mile open.  | Per Train Mile,  | Per-centage of Working Expenses to Gross Earnings. |
|--|--|---|--|--|
| England and Wales Cape of Good Hope Victoria New South Wales Queensland South Australia New Zealand Tasmanian Main Line Railway Launceston and Western Railway | 1881<br>1882<br>1882<br>1881<br>1882<br>1882–3<br>1882–3<br>1883<br>1883 | £ 2294.7 775.4 845.7 772. 269.6 350 436.5 514.1 428.9 | s. d.<br>2 983<br>4 11.8<br>4 4.01<br>3 9:60<br>4 8:12<br>4 3:07<br>4 5:2<br>4 2:4 | 52· 77·02 61·68 51·12 52·17 68·73 62·18 99 76·4    |

#### Train Service.

| Train mileage                                   | 107,466     |
|---|-------------|
| Ditto, per mile open                            | <b>2388</b> |
| Engine mileage, Launceston and Western Railway. | 109,495     |

#### Net Earnings.

The net earnings amount to £6954 8s. 10d., returning a per-centage of 1.7 upon the original Debenture Capital of £400,000, and of 1.5 upon the amount expended to date in works of construction, £445,322 4s. 1d.

The net earnings now aggregate to £52,207 16s. 1d., a return to the Government of £20,590 0s. 11d. over the sum advanced to complete equipment, namely, £31,617 15s. 9d.

#### General.

A large amount of new works have been carried out during the year.

The passenger station at Launceston has been removed to another site so as to admit of its original position being utilised for a large goods-shed to accommodate the grain traffic. All this work has been carried out under Mr. Batchelor's supervision.

The system of abolishing carting to the stores in town and simply delivering goods to the consignees at the goods-sheds, is found to be working most satisfactorily. Having the advantage of goods-shed accommodation, trucks are now immediately unloaded upon arrival and returned without delay to country stations. This has enabled the Department to supply all trucks applied for, for all descriptions of traffic such as timber, bark, &c., which hitherto could not be done. No inconvenience has therefore arisen to any industry during the height of the grain season, which has been a great boon to traders generally.

The third rail, which was sanctioned during the last Session of Parliament, will be laid during the year 1884, and thus the break of gauge from the Mersey extension will be avoided.

I have once more to remark upon the entire immunity from accident of any kind since the opening of this Railway in February, 1871.

I have the honor to be, Sir,

Your obedient Servant,

R. W. LORD, Manager.

The Hon. N. J. Brown, Minister of Lands and Works.

Launceston and Western Railway, Locomotive Department, Launceston, January, 1884.

DEAR SIR,

I have the honor to report that the locomotives, rolling stock, machinery, pumps, water supply, signals, and buildings in connection with this Department have been well maintained during the past year, and are now in good order.

The engine mileage, including shunting, for the year 1883, was 109,495 miles, being an increase of 6320 miles over 1882.

Owing to the increase of traffic, and also having to reduce the boiler pressure of the engines, I have great difficulty in providing sufficient locomotive power.

As the gauge adopted for Tasmanian railways is 3 feet 6 inches, it will be necessary to procure a quantity of narrow-gauge wheels, springs, &c., to enable me to convert worn out broad-gauge stock to the narrow gauge.

The following works of construction have been performed by this Department during the year:—Erection of weigh-bridge, Deloraine, removal of passenger station, Launceston, and the construction of new platform, Station Master's office in the vestibule, erection of goods-shed, engine steam shed, crane, &c., and the building of two timber trucks.

The diamond drills for the mines, and stone-crushers and engines for the Public Works Department, have been kept in repair during the year by this Department.

I am Sir, Your obedient Servant,

W. E. BATCHELOR.

R. W. LORD, Esq., Manager.

Launceston and Western Railway, Permanent Way Department, Launceston, January, 1884.

DEAR SIR,

HEREWITH I have the honor to forward Report for 1883.

I regret that the demand for heavy renewals, and necessary attendant expenditure for extra labour, has considerably increased the cost of maintenance this year.

The wooden bridges have demanded very extensive renewals, and must for some time receive constant attention.

I will again take the opportunity of suggesting the substitution of stone or concrete piers and light iron girders for these comparatively short level timber structures, which demand a daily and anxious inspection, besides costly repairs.

It has been necessary during the year to relay many of the curves, more especially on the Evandale and-Launceston section, which bears the strain of both Launceston and Western and Tasmanian Main Line Railway services. This must be liberally extended during the next 12 months, and the lowest estimate I can give for the requirements of 1884 is 100 tons of steel rails in addition to the 200 tons lately received from England. The order for 20 sets of steel points and crossings to arrive early will not permit of any encroachment for the extensive alterations and additions proposed and now being carried out in the terminal yards in connection with the authorised extensions. A supplementary order will therefore be required early for a further supply, and a tew tons of fastenings.

The necessary additions that will be required to the workshops and machinery should enable us to manufacture these, as required, for the future.

The annual supply of sleepers will be slightly on the increase for a year or two, as the original ones are very much decayed. This remark will also apply to all descriptions of timber work,—fences, platforms, telegraph poles, &c. I would again draw your attention to the now more apparent (by the increase of traffic) necessity of lengthening station platforms, and, I would suggest, with stone and earthwork. The outlay would be well repaid by avoiding the necessity, as at present, of backing and drawing up the train to the miserable little stages in existence.

During the latter part of the year a heavy demand upon the time of the repairing gangs was made to procure material for the alterations and additions authorised in Launceston and other yards. Labour was very scarce and high priced, and to retain the services of good men able to compete with the increased duties a slight increase upon the daily estimate for 1883 was granted. The weight and strength of the broad-gauge roads require more able-bodied men than lighter roads. The station buildings, sheds, &c. have been maintained in fair condition, but require painting, for the preservation of the timber as well as general appearance.

A substantial goods-shed has been erected at Bishopsbourne, and another is proposed at Little Hampton. It was decided to build these of iron with stone foundations, which will be appreciated at a future period by their cost of maintenance.

On some outlying sections, at some miles distant from the townships, quarters for the platelayers is a very much felt want. The presence of the men at all times on the road would be secured, more of their time would be available, and the rent they would willingly pay would return a high rate of interest on the cost. I therefore trust to receive at an early date authority to erect a few cottages for this purpose.

The proposed third rail to Deloraine, when laid, will slightly increase cost of present maintenance, as it will be necessary to supplement some of the gangs, that are even now under-manned.

During the year the iron overbridge ordered for Longford has been received and erected. It is a substantial and handsome structure, and prevents any risk of accident by passengers crossing the lines of traffic when trains are present.

Notwithstanding the increased age of the way and works, a fair condition has been preserved at a very reasonable cost.

I have the honor to be, Sir,

Your obedient Servant,

LEONARD DOWLING.

R. W. LORD, Esq., Launceston.
