### *ANNUAL REPORT for Year 1891.*

---

SIR,

In accordance with the Rules of the Hobart General Hospital, I have the honor to lay before you the following Report, containing such tabulated and other information as will, I trust, fully exhibit the working of that Institution during the past year.

2. Seventeen Board and ninety-nine Committee meetings were held during the year, at all of which the attendance of Members was, without exception, good; while during the same period the Honorary Medical Officers were regular in their visits to the Hospital, and in the performance of their gratuitous professional duties to the sick. The following alterations in the *personnel* of the Board during the year were W. F. Brownell, Esq., and J. W. Syme, Esq., retired, and Messrs. D. R. Dossetor and T. T. Watt elected in their places.

3. The net annual average cost of each occupied bed in 1890 was £74 17s. 1½d., and for the past year, £60 16s. 8½d.

4. It is satisfactory to note that during the past few years the amount of money received from patients who were able either in whole or in part to pay for their maintenance in Hospital has shown a steady upward tendency, having increased from £222 16s. 11d. in 1882 to £2116 2s. 4d. during the year 1891.

5. The following improvements in connection with the Hospital have been effected during the year:—Firstly, by the thorough renovation and equipment of the kitchen, ample means have been provided for carrying out every branch of cookery required for the inmates of the Institution; while, by the erection of a system of separate compartments for the care and control of persons suffering from mental derangement, every comfort and precaution compatible with the restraint of such patients have been provided.

6. During the year 1890 various plans and specifications for a Nurses' Home were submitted to the Board for approval; and towards the end of the past year the building now in course of erection, fronting on Argyle-street, was commenced. This building will be completed in the course of the current year, when ample and superior accommodation will be afforded to the entire nursing staff in close proximity to the sphere of their duties.

7. The washing from the Hospital during the last few years having become a very heavy item of expenditure (about £500 per annum) the Board has had repeatedly under consideration the desirability of establishing a Steam Laundry for the sole use of the Hospital, with the view of effecting a material saving under the head "Washing;" and, after full consideration, proposals have been submitted to the Government urging the adoption of this measure, the result being that the sum of £1500 was placed on the Estimates for this year, which Estimates were passed by both Houses of Parliament; but afterwards it was agreed that this, together with other important public works should not be commenced until the loan was floated, hence the reasons why nothing has been done.

8. In the beginning of 1891 proposals were made to the Government, pointing out the desirability of escapes or safeguards in case of fire; and, with this view, it was agreed that, by adding a balcony to the front of the main building, and by converting several of the present ordinary windows into French windows or doors, so as to afford an immediate escape on to the balconies, these (the balconies) being provided with ample outside stairs, would prove not only an efficient and ready means of escape in the event of fire, but also an ornament and improvement to the Hospital. A sum of money was placed on the Estimates (£1000) for the purpose of carrying out this work; but, owing to the reasons already stated with regard to the Steam Laundry, this important work has been delayed.

9. An efficient and well-disciplined nursing staff has been maintained throughout the year, under the able management of the Lady Superintendent, Miss H. F. Munro; and it is gratifying to know that this important branch of the Hospital service has been highly appreciated both by the patients and the public.

10. The number of Indoor patients treated during the year is in excess of that of the preceding year. In 1890, 1166; in 1891, 1454,—being an increase of 288.

11. The Outdoor patient department shows an increase in number of attendances compared with the preceding year, in which it amounted to 3811, the number of attendances for 1891 being 4459.

12. The following is a comparative statement of certain statistics of 1890 and 1891:—
