

## **Salamanca Arts Centre - 2021 Lift Maintenance Report**

### **Mr BAYLEY question to MINISTER for PARKS and ENVIRONMENT**

My question comes from disability advocate Kate Kelly. The 2021 maintenance report into the Salamanca Arts Centre lift was tabled last night and it raises significant questions. Three years ago, the report outlined the need for urgent repairs to make the lift safe for use and to avoid eventual failure, given the evidence of ongoing water ingress. As the lift remained operational for public use for almost three years, the report was done in early 2021 and the lift failed in November 2023, were any of the safety repairs outlined in the report as vital to make it fit for use completed? If so, what repairs were carried out, when were they completed and how much did they cost? If not, why not?
