Subject: Inquiry on AI data Centres in Tasmania
Date: Tuesday, 15 September 2026 1:55:22 PM

You don't often get email from [redacted] Learn why this is important

To Whom it may concern,

I am unfamiliar with the process of providing submissions, but my key objective for this contact is to express my opposition to the progress of the proposed data centres planned for Tasmanian. I have read through the terms of reference provided online and agree with these as starting points and expect there may be further investigation into the background of those applying for these developments.

I would like to also know how what the long term returns to Tasmanians will be for these developments commitment to these returns. Is there revenue other than the sale of power? How the tangible benefits will be identified and measured against the cost of these benefits.

I would like to know the time frame for this inquiry and when the report will be completed and details around opportunity to question the findings of the report.

I hope that it is thorough and inclusive of independent assessment.

Regards

Peter Caldwell
