

(No. 5.)

1877.

SESSION II.

T A S M A N I A.

LEGISLATIVE COUNCIL.

HOSPITAL FOR INSANE, NEW NORFOLK.

REPORT FOR 1876.

Laid upon the Table by Mr. Crowther, and ordered by the Council to be printed,
April 24, 1877.

Hospital for the Insane, New Norfolk, 1st January, 1877.

To His Excellency FREDERICK ALOYSIUS WELD, Esquire, Commander of the Most Distinguished Order of Saint Michael and St. George, Governor-in-Chief of Tasmania and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY.

THERE is little in the history of the Hospital for the Insane for the past year requiring special notice or comment.

An unusually large number of Patients have been admitted during the year, but, as the deaths also have been abnormally numerous, these, with the Patients discharged during the same period, left the total number of inmates nearly the same as at the date of the last Report of the Commissioners.

But, although the mortality has exceeded the usual average, the general health of the inmates has been very satisfactory, and no epidemic of any kind has made its appearance in the Institution.

A considerable proportion of the deaths that have taken place has occurred among Patients varying in age from 60 to 80 years, three of them being the subjects of senile dementia when received into the Hospital, and beyond all hope or possibility of cure. That the mortality should be considerable among persons so many of whom had previously led very irregular lives should not cause surprise.

The two separate Cottages for male and female Patients continue to be a pleasing feature of the Establishment, and fully to meet the cost of their maintenance.

In their last Report the Commissioners referred to the increasing difficulty of obtaining suitable male and female Attendants for the service of the Hospital, arising chiefly from the deficiency of labour general throughout the Colony, and to which they had previously strongly called the attention of the Government, recommending that, as a means of at least lessening this source of embarrassment, a moderate increase of remuneration should be granted to all persons thus employed in the Establishment. This recommendation, having been at length complied with, came into operation on the 1st August, 1876, and its beneficial influence has been felt to a considerable extent, especially with regard to the female Attendants, and in inducing those of both sexes who have been in the service of the Hospital for lengthened periods to continue their services.

The attraction of the Tin Mines, however, will probably continue to exert its influence on young able-bodied men, these qualifications being not less desirable in the Hospital than in the mines.

The Commissioners believe that nothing has been omitted in the management of the Hospital which the comfort and general well-being of the Inmates or their restoration to mental health required.

Although the Hospital Buildings have generally been kept in a good state of repair, so long a time has elapsed since anything has been done to remedy dilapidation that could not be undertaken by the Inmates that considerable repairs have now become pressingly necessary. The roofing has in many places become very leaky from the decay of the shingles, and much damage will be caused to the buildings unless it is promptly repaired.

This very serious defect has been repeatedly brought under the notice of the Department of Public Works, but has not hitherto been remedied.

The usual Returns are hereto appended:—

- No. 1. Return of Admissions, Discharges, and Deaths of Patients.
 No. 2. Return of the duration of disease in Patients on admission, and the result, for the year 1876.
 No. 3. Return of Patients who died in the Hospital, with period of detention, during the year 1876.
 No. 4. Return of Articles of Clothing made and repaired by Patients.
 No. 5. Return of Mechanical Work performed by Patients.
 No. 6. Return of the Cost of the Hospital for the Insane.

We have the honor to be,

Your Excellency's obedient and humble Servants,

R. OFFICER, *President*.
 W. TARLETON.
