Laid upon the Table by the Colonial Secretary, and ordered by the House to be printed, September 12, 1876.

REPORT of the BOARD OF EDUCATION for the Year 1875.

To His Excellency FREDERICK ALOYSIUS WELD, Esquire, C.M.G., Governor and Commander-in-Chief of the Island of Tasmania and its Dependencies.

MAY IT PLEASE YOUR EXCELLENCY.

1. WE, the Members of the Board of Education, Tasmania, have the honor to submit the following Report of our proceedings during the year 1875.

2. During the year 1874 there were 147 Schools in actual operation. The total number of distinct children at any time on the Rolls for that year was 12,158; the average number on the Rolls from month to month was 7970; the average daily attendance was 5867. During the year 1875 there were 154 Schools in operation; the total number of distinct children on the Rolls for the year was 12,271; the average number on the Rolls from month to month was 8145, and the average daily attendance 5703. As compared with the year 1874 the number of Schools has increased by seven; the total number of children on the Rolls by 113; the average number on the Rolls by 175; but the average daily attendance has decreased 164. This reduction is owing in a great measure to the increased demand for juvenile labour during the fruit and hop-picking seasons. Scarlet fever and measles, which raged throughout the Colony during the year, also materially reduced the average attendance.

3. *Progress of Schools.*—The progress of the Schools conducted in connection with the Board since the establishment of the present system of Public Instruction is shown in the following Table :—

Year.	No. of Schools.	No. of Scholars on Rolls during the year.	Average No. of Scholars on Rolls from month to month.	Average Attendance.	Average No. on Rolls during the year at each School.	Average No. on the Rolls from month to month at each School.	Average Attendance at each School.	Per-centage of Attendance to the average No. on Rolls.

4. *Attendance.*—The following table exhibits the number of Scholars in attendance from month to month during the year :—

MONTH.	No. of Schools.	No. of Scholars on Rolls.	No. present at all.	Average Daily Attendance.	Average at each School.		
					No. on Rolls.	No. present at all.	Average Daily Attendance.
January	139	7135	5867	5083	51	42	37
February	139	7777	6393	5504	56	46	40
March	140	7843	6180	5229	56	44	37
April	141	7744	6163	5217	55	44	37
May	142	7903	6529	5467	56	46	39
June	141	7860	6574	5508	56	47	39
July	144	7883	6564	5619	55	46	39
August	144	7952	6543	5577	55	45	39
September	143	7861	6556	5481	55	46	38
October	143	7987	6846	5771	56	48	40
November	139	8009	6635	5611	58	48	40
December	139	7786	6563	5327	56	47	38

5. *Religious Denominations of Scholars on the Rolls.*—The Returns exhibiting the Religious Denominations of 12,169 Scholars on the Rolls afford the following comparison with the Census Tables of 1870 :—(See Appendix H.)

	Church of England.	Church of Rome.	Presby- terians.	Wesleyans.	Indepen- dents.	Other Deno- minations.
Entire Population as shown by Census taken 7th February, 1870	53,047 or 53·40 per cent.	22,091 or 22·24 per cent.	9064 or 9·13 per cent.	7187 or 7·24 per cent.	3931 or 3·96 per cent.	4008 or 4·03 per cent.
Scholars on Rolls	5764 or 47·36 per cent.	3154 or 25·92 per cent.	793 or 6·52 per cent.	1308 or 10·75 per cent.	798 or 6·56 per cent.	352 or 2·89 per cent.

6. *Ages and Classification of Scholars.*—We have Returns from 142 Schools of the Ages and Classification of 7748 Scholars on the Rolls at Christmas 1875, which are summarised below :—

	CLASS.						TOTAL.
	I.	II.	III.	IV.	V.	VI.	
Under Four Years	44	—	—	—	—	—	44
Four years	186	—	—	—	—	—	186
Five years	339	21	—	—	—	—	360
Six years	493	91	3	—	—	—	587
Seven years	530	269	32	1	—	—	832
Eight years	412	436	129	7	—	—	984
Nine years	249	495	227	34	5	—	1010
Ten years	147	405	332	122	21	2	1029
Eleven years	96	270	318	165	51	4	904
Twelve years	48	159	274	190	80	11	762
Thirteen years	29	83	170	160	98	15	555
Fourteen years and over	14	61	130	152	94	44	495
TOTAL	2587	2290	1615	831	349	76	7748
Per-centage of Scholars	33·39	29·56	20·84	10·73	4·50	0·98	

7. *Building Grants*.—We have expended the sum of £514 13s. 4d. in aid of the erection and improvement of School premises at the following places:—

PARTICULARS.	Amount granted by Board.	Amount raised Locally.	TOTAL.
	£ s. d.	£ s. d.	£ s. d.
River Don—Erection of Teacher's Residence ..	161 13 4	80 16 8	242 10 0
River Plenty—Additions to Teacher's Residence	35 16 8	17 18 4	53 15 0
Bracknell—Verandah and Fencing	14 10 0	7 5 0	21 15 0
Wynyard—Erection of Schoolroom	81 6 8	40 13 4	122 0 0
Montos Marsh—Erection of Schoolroom	61 6 8	30 13 4	92 0 0
Bishopsbourne—Erection of Schoolroom and Teacher's Residence.....	160 0 0	80 0 0	240 0 0
TOTAL.....	514 13 4	257 6 8	772 0 0

The amount granted by the Board, as shown above, is chargeable against "Loans Bill." In addition to the sums expended as above, we have paid £356 5s. 9d. out of the "Vote in aid of Public Schools" for repairs and improvements to School-houses.

8. *Schools opened*.—Schools at the following places were established during the year:—Abbotsham (half-time School), Dunorlan, Falls, Falmouth, Hastings, and Leslie and Longley (half-time Schools). Four Schools were re-opened after having been temporarily closed; viz., Constitution Hill, Long Bay, Oatlands, Oyster Cove; and one School, Orielson, re-opened after having been closed since 1868.

9. *Schools closed*.—Schools at North Bruni Island, Fenton Forest, and Gould's Country were closed; and Schools at Bishopsbourne, Breadalbane, Calton Hill and Hollow Tree, Emu Bay, George's Bay, Margate, Rose Vale, and Wattle Hill were closed temporarily during the year for reasons that are particularised in Appendix E.

10. *Grant for Education*.—The total expenditure in aid of Public Schools amounted to £14,598 3s. 1d. The appropriation of this money is exhibited in detail in Appendices A. and E., and may be briefly recapitulated as follows:—

Objects of Expenditure.

	£	s.	d.
Salaries and Allowances of Teachers, Assistant Teachers, Pupil Teachers and Paid Monitors	13,082	7	7
Rent of School Buildings.....	200	16	8
Repairing and improving School Buildings	356	5	9
Providing School Furniture and Fittings	62	14	4
Providing Books, Maps, and School requisites	362	2	7
Salaries of Visiting Officers.....	220	0	0
Miscellaneous Expenditure	313	16	2
TOTAL.....	£14,598	3	1

In addition to the above amount the sum of £1068 12s. 6d., chargeable against the Establishment, was paid on account of Administration and Inspection.

11. *Cost of Instruction*.—The following table exhibits the cost of instruction for the year 1875:—

	Exclusive of Cost of Administration and Inspection.	Inclusive of Cost of Administration and Inspection.
Scholars on the Rolls for the year, per head	£1 3s. 9½d., or 2s. 0½d. more than the previous year	£1 5s. 6½d., or 2s. 1d. more than the previous year.
Average number on the Rolls, per head	£1 15s. 10d., or 2s. 7½d. more than the previous year	£1 18s. 5½d., or 2s. 8½d. more than the previous year.
Average daily attendance, per head	£2 11s. 2¼d., or 6s. 1¼d. more than the previous year	£2 14s. 11½d., or 6s. 4½d. more than the previous year.

The increase in cost of instruction for the year is caused by an alteration in the Classification Regulations, whereby the salaries of the Teachers in the IV. Class have been augmented.

12. *School Fees*.—The School Fees paid by parents in aid of Teachers' Salaries amounted to £4797 5s. 6d.: dividing this amount by the—

	<i>s.</i>	<i>d.</i>
Number of Scholars on the Rolls for the year, gives	7	9 $\frac{3}{4}$ per head.
Average number on the Rolls, gives	11	9 $\frac{1}{4}$ per head.
Average daily attendance, gives	16	9 $\frac{1}{4}$ per head.

13. *Income of Teachers*.—We have received Returns of the emoluments of 161 Teachers who were employed during the year, from which we have compiled the following results:—

	<i>No. upon which the Average is taken.</i>	<i>Average Annual Income.</i>	<i>Maximum Annual Income.</i>	<i>Minimum Annual Income.</i>
		<i>£ s. d.</i>	<i>£ s. d.</i>	<i>£ s. d.</i>
Schoolmasters	44	136 2 9	425 10 2	39 13 6
Schoolmasters and Mistresses con- jointly	56	159 3 5	461 17 2	68 0 6
Schoolmistresses in sole charge	36	64 9 1	165 4 1	20 0 0
Female Assistants and Teachers of Needlework	25	34 3 9	60 0 0	20 0 0

The above statements have reference to the income which is derivable by Teachers in connection with their Schools only, and do not include sums received for private tuition.

14. *Free Scholars*.—We append a Return of the number of children admitted during the year under free certificates. The sum of £593 16s. 1d. has been paid by the Board for their instruction, the average number of Free Scholars under instruction being 1603·25. See Appendix F.

The following statement will show the average number of Scholars receiving their instruction Free, and the amount paid to Teachers by the Board for their instruction for the past thirteen years:—

	<i>Average No. of Free Scholars under Instruction.</i>	<i>Amount paid to Teachers for their Instruction.</i>
		<i>£ s. d.</i>
During the year 1863	679·75	380 18 6
Ditto 1864	612·75	354 17 10
Ditto 1865	896·00	359 7 6
Ditto 1866	1027·75	434 17 9
Ditto 1867	1118·00	470 15 9
Ditto 1868	1209·25	497 12 3
Ditto 1869	1438·00	586 4 3
Ditto 1870	1780·75	722 17 3
Ditto 1871	2013·50	850 15 9
Ditto 1872	1886·25	742 5 11
Ditto 1873	1533·50	629 9 5
Ditto 1874	1611·75	620 12 4
Ditto 1875	1603·25	593 16 1

15. *Night Schools for Males*.—We append a Return of the number of scholars admitted into the Night Schools under the Regulations dated 1st April, 1875, sanctioned by Your Excellency and published in the *Gazette* of the 6th April, 1875. The sum of £95 19s. 9d. has been paid by the Board for their instruction, the average number of Scholars being 171. See Appendix D.

16. *General and Local Inspection*.—On summarising Appendix G. it will be seen that 3879 visits have been made to the Public Schools during the year, of which 153 were made by the Inspector; 1442 by Members of the Local Boards, and 1302 by other persons; and, for the purpose of imparting Religious Instruction, 734 visits were made by Ministers of the Church of England, 170 by Ministers of the Church of Rome, 29 by Ministers of the Church of Scotland, 5 by Wesleyan Ministers, 12 by Ministers of the Independent Church, and 32 by Ministers of other Denominations.

17. *Exhibitions from Public to Superior Schools.*—In the month of June we caused an Examination for Exhibitions from Public to Superior Schools to be held; eight Candidates presented themselves; and on the recommendation of the Examiners, the Rev. Canon Davenport, B.A., and the Rev. Canon Hudspeth, M.A., we awarded an exhibition of the value of £16 13s. 4d. per annum, tenable for four years from the 1st July, 1875, to each of the under-mentioned Candidates:—

No.	Name.	Age.	Public School.
		Yrs. Mnths.	
1	Percy Leslie Waterhouse.....	11 5	Bathurst-street, Hobart Town.
2	Frank Walter Hewitt.....	11 5	Macquarie-street, Hobart Town.
3	Shadrach Hertel.....	11 11	Perth.
4	Edward Rippon Shield.....	11 11	Trinity Hill, Hobart Town.
5	Michael Andrew O. Kelly.....	11 9	Turner's Marsh.

The Examiners in closing their Report observe—

“Until last year boys under thirteen years were admitted to the Examination, and the Exhibitions were generally won by boys above twelve years of age. Only boys under twelve years are now allowed to compete. Chiefly, it is believed, for this reason the number of Candidates was reduced last year, and has been still further lessened at this Examination. Therefore, considering the ages of the boys, and the fact that the papers set in the various subjects were not less difficult than formerly, their work is very creditable to them, though it does not compare favourably with that of last year and of some previous years. The attainments of the foremost in the list, and of several others, are greatly above the level ordinarily reached by boys of the same age, and reflect honour on the Schools which they represent.”

A Statement of the Expenditure under this head will be found in Appendix C.

18. The Report of the Chief Inspector of Schools is annexed. See Appendix I.

19. We wish to bring under Your Excellency's notice the great obstacle to the efficiency of the system we administer, which arises from the inadequate means of inspection at our disposal, both at the present time and during the period to which this Report has especial reference.

20. We submit this as our Report on the Public Schools for the year ending 31st December, 1875, and we have caused our corporate Seal to be affixed hereto.

GEORGE RICHARDSON, *Secretary.*

APPENDIX I.

*GENERAL Report for the Year ended 31st December, 1875, by T. STEPHENS, Esq., M.A.,
Chief Inspector of Schools.*

Hobart Town, 29th April, 1876.

GENTLEMEN,

I HAVE the honour to present my General Report for the year ended 31st December, 1875.

INSPECTION.

The earlier part of the year was occupied with the annual examinations of Teachers and Pupils; Teachers, the preparation of Reports, the collation of notes on School examinations, and a variety of other business for which the continuous travelling of the latter part of the previous year had left no available leisure. Much of this work had, as heretofore, to be performed in my private time. Between the 8th February and the 31st December 147 visits of inspection were paid, and 101 separate Schools inspected, my tours embracing nearly the whole of the Island, the exceptions being the extreme portion of the North West Coast, the Sorell district, and the southern half of the East Coast. Besides the Schools inspected, there were 13 which I found closed at the time of my visit to their neighbourhood, leaving 37 Schools not visited, all of which, however, will probably have been inspected before this Report is published. In addition to the annual examinations previously mentioned, I held 15 examinations of candidates for employment in various capacities, occupying from one to three days each, and paid 8 special visits to localities where efforts were being made to establish Public Schools. The rest of my time was occupied in the transaction of routine business of the ordinary miscellaneous character.

The results of my year's work, so far as they are apparent to myself, are still very discouraging. The knowledge that many Teachers in remote districts could not qualify themselves for promotion, or receive information of which they stood in need, without a visit from the Inspector, compelled me to devote most of my time to the rural Schools, giving less attention than usual to the large town Schools, and other important objects. Very little leisure was available for conference with local authorities, or for anything more than mere inspection and examination of the Schools; but they have now drifted so entirely beyond my control that the limits of useful interference with the details of management are soon reached. I have been much gratified by a renewed assurance that the great majority of the Teachers are earnestly devoting themselves to the discharge of their duty according to their several abilities, and with many of them it is a very up-hill task that they have undertaken. There are unsatisfactory exceptions, and cases will occur to the recollection of the Board in which there are grounds for suspecting the existence of grave irregularities; and it is evident that such evils must continually increase, and that their extent cannot even be ascertained, until the discipline of the Department is placed upon a footing of efficiency. The peculiar position of Teachers, the nature of their work, their knowledge that most duties within the School-room walls may be neglected without attracting the notice of any one but an Inspector, and that so long as they keep on good terms with their neighbours no complaints will be made, expose them to temptations from which other classes are free. It is casting no slur upon the profession to insist on the necessity of supervision of school management as well as of instruction, both for the public interest and for that of the Teachers themselves. This necessary superintendence is, of course, out of the question while there is only one Inspector, whose time is chiefly occupied in business that, though taking up much time and attention, is of a simple character, and might easily be performed by young subordinates. I cannot suggest any better plan for securing the requisite agency than that which obtains in similar circumstances elsewhere—the appointment of district or assistant Inspectors, each residing in some convenient centre where he would be accessible to Teachers and others interested in Schools, when not actually engaged in travelling. An intimate and personal knowledge of the Schools and Teachers is the first thing to be acquired. Every case requires a separate diagnosis and special treatment, and it may be necessary to pay four or five visits to one School while another requires only one or two during the same period. Inspectors in these Colonies exercise, or ought to exercise, the double functions which are separately performed by the Government Inspectors and those of the School Boards, or other local bodies, in the Mother Country. They ought not only to inspect and examine, but to supervise the working of the Schools within their own jurisdiction, the customary provision being made for superintendence in order to secure uniformity in practice. An Inspector's profession is chiefly to be learned by experience, and personal qualifications are those which are most required. He ought to have a practical knowledge of teaching and school management, but above all things it is essential that he shall have had such a liberal up-bringing as will enable him to judge fairly and treat with respect the views which may happen to differ from his own, and to understand that all Teachers are not intended to work exactly in the same groove. An aptitude for bush travelling, and an unlimited capacity for roughing it, are very necessary qualifications for Inspectors, though the facilities for travelling are much improved, and they will be exempt from the necessity of swimming unfordable rivers, which used formerly to be a common incident of my North Coast journeys.

SCHOOL INSTRUCTION AND MANAGEMENT.

My separate Reports on the Schools have been sufficiently full to give a general idea of the extent to which the instruction is carried in each, and of the character of the teaching. As to the more prominent defects there is nothing to add to the remarks made last year, but I may give an outline of some of the principal causes to which they owe their existence. An unsatisfactory standard in Reading may often be fairly attributed to the use of the books of the Irish Series. They contain materials which may be turned to good account by competent Teachers, but in other hands they have nothing to recommend them, and a great many of the lessons have literally to be translated into English before they can be made intelligible to the children. Here is a specimen from a lesson in the Fourth Book:—

“Pearl consists of concentric coats of the same substance as that which forms the mother-of-pearl of the shell; they are produced by the extravasation of a lapidifying fluid, secreted in (?) the organs of the animal, and filtered by its glands.”

And the meanings which are given to many of the words in the earlier books are more difficult than the words which they profess to explain. An excellent opportunity was afforded during the past year of uniting with some of the neighbouring Colonies in the preparation of a series of properly graduated Reading Books adapted to the special wants of Australian and Tasmanian Schools; but the time is going by, and I fear that it is now almost too late for us to receive any direct benefit from the proposed scheme. The last supply of Reading Books shows an alteration in their arrangement and numbering, without any improvement; and as these have unfortunately been issued without a caution to prevent Teachers from being misled by the change of title, the classes in many Schools have been thrown into some confusion. Without entering into the details of this subject I may say that a Teacher who only secures deliberate and distinct articulation, with a fair amount of intelligence, will always obtain high credit. The old adage is worth remembering:—

“Learn to read slow: all other graces
Will follow in their proper places.”

The defects noted under the heads of Writing and Arithmetic are chiefly traceable to negligent supervision, or want of skill in dealing with the rudimentary stages. In the latter subject the standard attained in the majority of Schools is so low that there is the less excuse for an absence of thoroughness. Black-board instruction, dictation exercises, and printed cards, are the best means to employ, and frequent recapitulation will prevent the disappointment which a Teacher experiences when children whom he supposes to be making rapid progress are proved to him to be ignorant of elementary principles, and to have forgotten processes which they were supposed to have mastered long before. Some subjects of instruction are chiefly useful in an indirect way. Grammar, in most Schools, seldom means anything more than very simple parsing, and though it certainly does not teach the children “to speak and write the English language correctly,” it aids in cultivating habits of perception, thought, and reasoning from analogy, and, as a change in the routine of lessons, is a useful exercise even in the junior classes. More attention should be given to practical Composition, which is seldom introduced below the 5th Class, a stage which very few children even approach during the whole of their school life. A School Map of Tasmania is much wanted; and I should have myself supplied this defect long ago if I could have found any leisure for such work. A few teachers have constructed very useful maps for their own use, but considerable personal knowledge of the country is required to enable one to distinguish between what is right and wrong in the publications from which the necessary information has to be collected. The elementary subjects of instruction would exhibit immensely higher results if it were possible, and it ought to be possible, to require that proper attention should be given to the cultivation of intelligence in every stage of the educational process; but the principles of oral teaching are still very imperfectly recognised, and the few excellent Schools in which they are understood and inculcated only throw the rest into a deeper shade. I have a high respect for rote and memory work in their proper place, but I have not much hope for a School when I find a boy learning Euclid by heart, and unable to follow two consecutive steps in a problem if the letters of his diagram are changed; or when another is paraded as “in Discount,” and tells me that “5 per cent.” means “five years,” with other equally lucid answers. Exercises on the plan of Mangnall’s Questions, with formal answers to set questions, belong to the same class. As a specimen of answering of another kind I am tempted to quote an abstract of a subject selected by choice from his Reading Book by a boy in the highest class in one of the leading Schools:—

“*History of Warren Hastings.*—Warren Hastings sprang from an illustrious race. When he was eighteen years old his uncle Howard determined to take care of him. At ten he was removed at Westminster School. He was born on the 6th December. He lives in a constant vapour bath. His mind bears a singular analogy boy-like. He was contained in easy confinement during many months. The office of Ministry was abolished. More than a hundred thousand people fled from their homes to pestilential jungles preferring famine and fever.”

The process employed in the construction of this specimen of “original” composition may perhaps be a mystery to those who are not familiar with the ways of schoolboys; but it is cited chiefly as an instance of wrong classification, the boy in question having been placed at least two classes above his proper position, as was shown by his other work. It is right to add that in this particular school such cases are of rare occurrence.

While such long intervals necessarily occur between visits of inspection it is not always possible to decide whether a low standard of efficiency in those matters for which a Teacher should be held responsible is a consequence of negligence, or want of skill. Sometimes he has evidently failed through teaching over the children’s heads, or attempting to introduce methods which he has seen used by an experienced Teacher in another School, without understanding their proper application; sometimes through defective discipline and the idleness and inattention consequent thereon; and sometimes through the premature promotion, under parental pressure, of children who have not yet mastered the work of their class. The Programme or Standard of Instruction is simplicity itself as compared with those of other countries, and yet a large percentage of the failures at a School Examination are clearly traceable to a misconception or careless reading of its plain directions, or to the diversity of interpretation and practice which necessarily obtained while there were two Inspectors acting independently of each other. I have no sympathy with

the French Minister of Instruction who exulted in the knowledge that when the clock indicated a certain hour every School within the bounds of the Empire was engaged in studying the history of the Napoleonic dynasty, and so on through the official time table for the day; but I strongly contend for the establishment and maintenance of such uniformity of practice as will prevent the classification and management of our Schools from being thrown into confusion with every change of Teachers, and this is only to be secured by such means as I have previously described. When the means shall have been provided for attaining a higher standard of general efficiency in the A B C of instruction, it will not be difficult to cultivate attention to other important branches with which the majority of our Schools have little useful acquaintance. Singing as a branch of instruction is efficient in a very few instances. Singing by ear is pretty generally practised, and with some good results; but, as Mr. Hullah remarks in one of his late reports, "whatever its value as a means of moral discipline, singing 'by ear,' regarded from a musical point of view, is simply worthless." Drawing, as a regular element in the School course, I do not mean the instruction of a few select pupils, is still less common. Drill might be made a feature in the routine of every School with great advantage, both as an adjunct to discipline, and a means of physical training, not, as we sometimes find it, an instrument for extinguishing all individuality in children and converting them into so many parts of a great machine. When the theory and practice of Object Lessons, which is only another name for collective oral teaching, is better understood, it will be possible to give some prominence to subjects that are not formally recognised in the official programme. The instruction in the outlines of physical geography, the science of common things and natural phenomena, in the details of various trades and manufacturing processes, in the principles of domestic and social economy, and even in the simpler elements of natural history and physical science, might find its place in the teaching of an efficient Common School without any interference with what we term the "essential" subjects. That such teaching has been successfully introduced here and there, under the most diverse conditions, is a proof that it is not unattainable on a more extended scale. Among other necessary reforms which I cannot effect without assistance, is the establishment of that regular system of review of past work for which no satisfactory substitute can be supplied by any agency from without. I have also long wished to initiate a sort of registration scheme under which every child who had "satisfied" the Inspector in any class above the Third should receive a certificate to that effect. Into the details of such a scheme I need not now enter. If there were the means of carrying it into effect I am confident that the certificate would eventually be more valued than any prize, and that a powerful stimulus would be given to local interest in the Public Schools, and to the work of the Teachers themselves.

TEACHERS AND TRAINING.

When I drew up the scheme of classification of Teachers, which received the sanction of the Board in 1869, I was well aware that it had one grave defect, the absence of any sufficient provision against the appointment of incompetent or unsuitable persons to the charge of Schools; but it was not possible to supply this omission without the introduction of the means of training, and the employment of an adequate staff of Inspectors. Of the high character and respectability of the Public Teachers, speaking of them as a class, the Colony has good reason to be proud. Some are highly competent, some are approaching this standard, and many are only prevented from doing the same by the want of suitable opportunities. But so long as candidates need only pass a very simple examination in the elementary subjects, and require no further certificate of fitness, it is obvious that in the majority of cases a long time must elapse before they can become even moderately qualified for the proper discharge of their duties, and that some will never reach even that standard. I have always desired to see the Teacher's profession made an object in itself,—neither a refuge for the destitute, nor a stepping stone to something else and only taken up for a time; and I am confident that there would be a sufficient supply of suitable candidates who would willingly accept low salaries at the outset, if they could see a prospect of learning their business within a reasonable time, and rising to a respectable standing in the profession. It seems at last to be generally admitted that the establishment of a Model or Training School is an imperative necessity, and I have shown in other reports that there need be no objection raised on the score of expense, when the character of the particular institution which we require is properly understood. It will, however, take years to provide a supply of regularly trained Teachers, and some subsidiary agency should be organised without loss of time. Much may be effected by systematic inspection under such arrangements as I have previously described, but it is now pretty well understood that when a Teacher requires instruction, which cannot be imparted in the ordinary course of inspection, he ought to receive it anywhere rather than in his own School. The plan of employing what were termed "organising masters" has been tried and found wanting. I have already submitted, in a letter dated July, 1872, a scheme which I believed would effect the object in view; and I find now that, about the same time, or shortly afterwards, a precisely similar proposal was made to the Council of Education in New South Wales, and carried into effect in the following year. As the results of actual experiments are worth more than any amount of theory, I make no apology for quoting an outline of this scheme from the Council's Report for 1873:—

"I. Inspectors were authorised (1) to invite applications from persons resident in country districts, and accustomed to the usual mode of living in the bush; (2) to direct suitable applicants, after the necessary inquiries had been made, to attend some good school conveniently situated, for the purpose of receiving instruction of an elementary kind and acquiring some practical knowledge of School-keeping.

II. Applicants so admitted were to be paid £4 monthly during such attendance, subject to the Inspector's certificate that their conduct, attention, and progress were satisfactory.

III. A small bonus was to be awarded to the master or mistress of the school in which such persons were trained.

IV. In filling up vacancies in small schools of every kind preference was to be given to persons who had undergone the course of instruction herein indicated, and the prospect of admission to the Training School was held out as a reward for successful teaching for three years in a bush school.

So far as carried out this experiment has proved highly successful."

It will be observed that this scheme embraces all the elements essential to success—the mutual responsibility of the Teacher and the candidate, and the supervision of an Inspector over the whole process. Here in Tasmania a wider field is open, for there are many Teachers already in charge of Schools who only want an opportunity of this kind to give them a fair start.

GENERAL.

Other matters requiring attention, such as defective School accommodation, insufficient provision of out-offices, and other details of School organisation, I have noted from time to time in my separate reports. The public are, I think, fully aware of the Board's desire to encourage the widest possible extension of the means of instruction, but it is not sufficiently understood how the efforts of the Board are hampered, and the progress of education retarded by local obstacles which they have no power to remove, and which will continue to exist so long as the local subsidies required to meet grants of public money are dependent upon voluntary and spasmodic efforts.

I have, &c.

T. STEPHENS.

The Chairman and Members of the Board of Education.
