

## Tasman Highway – Hobart Airport to Midway Point causeway

Submission on behalf of Barilla Bay Seafoods

Additional comments on the above development and the  
impact on our operations at 1388 Tasman Highway.

- Loss of the left-hand access from Hobart. Maintaining easy access to a tourist business is imperative to its long term survival.
- Bike lane moved to our side of the highway, with no evidence as to why and no assessment of numbers/ users in terms of a report. Extensive statistics on motor use but no commentary on bike use.
- Reorientation of highway and the impact on our signage.
- Stormwater management – inundation effects of increased surface area of roads and drains entering the bay. Impacts on oyster farms not even considered.
- Lack of biodiversity protection – particularly marine life in terms of increased stormwater inundation in the area.

Signed

Justin Goc
