Whilst I don't oppose the stadium completely I do oppose the site as there must be far better uses for Macquarie point. As well free and easy access must be one of the first requirements. The state should not put any funds into the project at all but if they do then the political party approving the project should foot the bill of the overrun costs, not the taxpayer regardless of where it is built. If the stadium is a requirement for a Tasmanian team then stay out of the AFL.
