Submission to Legislative Council Sessional Committee Government Administration A -Sub-Committee - Fin Fish Farming in Tasmania Inquiry

Dear Mr Wright

The rubbish that is left washed up around our beaches , but more importantly the environmental impact in our oceans .

No fish farming would be my preference.

I endorse the following recommendations by the Tasmanian Conservation Trust 1. Complete independent water quality and environmental studies, before any environmental licences are issued (not an “adaptive management” approach)., 2. Environmental licences must set a hard cap on biomass and dissolved nitrogen and other pollutants emitted into our waterways from pens, hatcheries and other infrastructure., 3. Require all licences and licence amendments (marine and land based) to be referred to the EPA board so that the community can have a say., 4. Commission an independent review of the Marine Farming Planning Review Panel, focusing on its membership, governance and ties to industry., 5. Improve transparency and enforcement by prosecuting fish escapes, fish kills, marine debris and seal and cetacean interactions., 6. Mandate public reporting for disease outbreaks and other bio-security incidents., 7. Amend the Marine Farming Planning Act to require valuation and protection of social, recreational and visual amenity; and consideration of noise impacts on surrounding residents.

Regarding public hearings, I would like more information from the secretary about opportunities to present to the committee with my preference being that I make a private presentation to the committee.

Thank you for reviewing my submission

Yours Sincerely  
Brett Lawrance
