The Glenorchy Sports Centre Project Team  
Infrastructure Tasmania  
Department of State Growth

To Whom It May Concern,

On behalf of Netball Tasmania, I am writing a letter of support regarding the Glenorchy Sports Centre project.

From a netball perspective, this project is needed to address the critical shortage of indoor courts across not only the netball community in Southern Tasmania, but other sports as well.

This project is needed to ensure Tasmania's number one team sport for females can continue to keep pace with the growth in participation with currently approximately 9,000 participants registered across the state with Netball Tasmania.

The proposed project with four indoor courts, including a show court will help alleviate some pressure on finding suitable venues to not only play our Tasmanian Netball League matches as well as State Team and High Performance programs, as well as community netball, in both junior and senior age groups.

If there is further information we can give to strengthen this Letter of Support, please do not hesitate to contact me.

Kind Regards,

Tracy Jones  
Interim CEO  
Netball Tasmania
