

(No. 23)

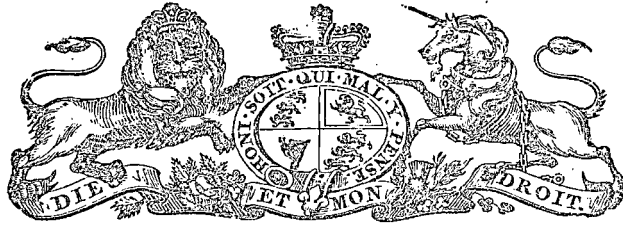

1857.

T A S M A N I A.

P E T I T I O N

FROM COLONISTS RESIDING IN THE NORTHERN DISTRICTS OF TASMANIA
IN FAVOUR OF A RAILWAY FROM DELORAINÉ TO LAUNCESTON AS A
PUBLIC WORK, AND OF A GENERAL PLAN FOR THE EXTENSION OF
A SERIES OF IRON ROADS WITHIN THIS COLONY.

Presented by Mr. Button, and ordered by the Council to be printed, 1 December,
1857.

To the Honourable the Legislative Council of Tasmania, in Parliament assembled.

The Memorial of the undersigned Colonists residing in the Northern Districts of Tasmania.

RESPECTFULLY SHOWETH :

THAT the interests of the Colony, and of this division thereof especially, require those increased facilities of transport which are afforded by Railways, by which alone the Colony can sustain a competition with the adjacent countries where this improvement has been introduced.

That the construction of a Railroad through the Districts of Deloraine, Westbury, Carrick, Longford, and Morven to Launceston is urgently required, inasmuch as the present mode of transit is so tedious and expensive, and at certain seasons, from the absence of ordinary roads, so impracticable, as to limit production and retard the development of the fertile Western Country.

That the population of the Districts referred to amounts to 24,970; the number of acres of land under cultivation being 68,296; that the Colonists in the said Districts possess 36,000 horned cattle, 5600 horses, 9227 pigs, and 214,699 sheep; and that the cultivated lands produce annually of grain 963,221 bushels; of potatoes 2994 tons; of hay 7911 tons; of wool 1000 tons; and of firewood 11,150 tons; and that the cost of transit of these products, at the present rates, amounts to £81,500 annually.

That barely one-sixth of the Districts have yet been brought under cultivation; and that it is reasonable to infer that, with the advantage of cheaper transit, a greatly increased area would be rendered productive in these Districts, and in the large tracts of agricultural country beyond them.

That, in addition to the agricultural produce which these Districts are capable of raising, there are large deposits of limestone, freestone, marble, and slate, and inexhaustible forests of the finest timber, which would supply immediate profitable employment to a Railway.

That the public lands of these several Districts (which contain 1,449,000 acres) would be greatly enhanced in value by the construction of Railways.

That Memorialists are, however, satisfied that, if this project devolved entirely on private enterprise, the sudden withdrawal of the necessary capital from the channels in which it is now employed in the Colony would interfere prejudicially with the industrial pursuits, and the improvement, of the Colony.

That the Executive Government, with the sanction of Parliament, can more advantageously negotiate terms of the contemplated work than any private Company; can more readily command the necessary funds, by the offer of guarantees for the payment of interest; and that the control and management of the Railroad might vest in the State with advantage to the general interests of the community.

Memorialists therefore pray that your Honorable House will take such steps as to your wisdom may seem meet to secure the early construction of the said Railway as a public work of this Colony, and the adoption of a general plan for the extension of a series of Iron Roads within this Colony.

And your Memorialists will ever pray, &c.
