(No. 1.)

1883.

TASMANIA.

HOUSE OF ASSEMBLY.

STATISTICS FOR 1882.

Laid upon the Table by the Premier, and ordered by the House to be printed, July 24, 1883.

STATISTICS

OF

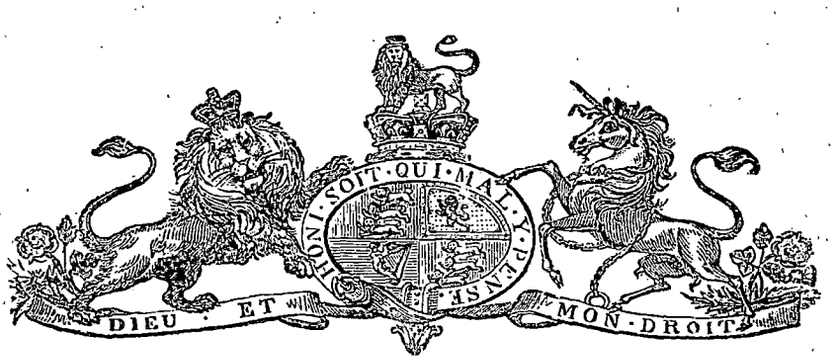

THE COLONY OF TASMANIA

FOR THE YEAR

1882.

COMPILED IN THE OFFICE OF THE GOVERNMENT STATISTICIAN FROM OFFICIAL RECORDS.

PRESENTED TO BOTH HOUSES OF PARLIAMENT BY HIS EXCELLENCY'S COMMAND.

By Authority:

WILLIAM THOMAS STRUTT, GOVERNMENT PRINTER, TASMANIA.

1883.

CONTENTS.

	PAGE
INTRODUCTION	vii
PART I.—BLUE BOOK.	
Alphabetical Index to Contents :—	
Governors, Parliaments, Departments, &c.	5
Official List of Officers of Civil and Military Establishments	6-8
Governors, Parliaments, Foreign Consuls, &c.	9-22
Executive and Legislative	23-25
Departments under the supervision and control of the Chief Secretary	27-34
Ditto Treasurer	35-40
Ditto Attorney-General	41-45
Ditto Minister of Lands and Works	47-51
PART II.—POPULATION.	
Census of 1881 :—	
Population	56
Dwellings	56
Population and Dwellings—General Summary	56
Ditto, 1841-1881	57
Ditto, ditto, Increase	57
Proportion of the Sexes, Density of Population, and Houses	57
Distribution—By Districts	58
Ditto, Towns	60
Ditto, Mining Districts	60
Ditto, Islands	60
Education of the People	61
Birth-places of the People	61
Occupations of the People	62

Ditto, Receipts and Expenditure 316
Out-door Charitable Relief 317
Friendly Societies 318
Ditto, Decennial Return 319
Life Assurance 319
STATISTICAL SUMMARY—1816 to 1882 323
APPENDIX—AUSTRALASIAN STATISTICS, 1882.

TO THE HONORABLE THE CHIEF SECRETARY.

General Register Office, Hobart, 10th December, **1883.**

Sir,

I HAVE the honor to present you with the completed volume of the General Statistics of this Colony for the year 1882. Following the excellent plan instituted and so ably carried out for many years by my predecessor, Mr. Nowell, I have in the following introductory pages summarised the prominent features of the various classified Parts into which the Statistical volume has been divided. By this method the Statistician is enabled by comparisons and observations to mark the present condition and general progress of the Colony, and to throw light upon facts and tendencies which, without such guidance, might be apt to escape the notice of, or perhaps mislead, the casual observer.

PART I.

BLUE BOOK.

The Blue Book, as it is called, is still preserved almost in its original form. The principal modifications introduced to facilitate reference consists of grouping together in separate Sections the several Departments under the supervision and control of each Responsible Minister. A Section giving full information regarding the Magistracy of the Island and its Dependencies has also been added. The various Sections referred to are arranged as follows :—

I. Governors; Parliaments; Foreign Consuls.
II. Executive and Legislative.
III. Departments under the supervision or control of the Chief Secretary.
IV. Ditto, Treasurer.
V. Ditto, Attorney-General.
VI. Ditto, Minister of Lands and Works.

PART II.

POPULATION.

Natural Increase, Migration, and Density.

The Population on 31st December, 1882, is estimated as follows :—

	Males.	*Females.*	TOTAL.
Population 31st December.....	65,131	57,348	122,479
Per-centage.....	53·18	46·82	100·

There is an increase of 3556 persons—1897 males and 1659 females—as compared with the previous year. Of this increase, 60·09 per cent. (2137) is due to excess of births over deaths, and the remaining 29·91 per cent. (1419) is due to excess of immigration over emigration. This now makes up the seventh year in which the balance of migration has been continuously in favour of Tasmania. During the five years prior to 1876 the balance of migration was continuously in favour of other countries, and this Colony suffered a loss to her population thereby of 4381 persons, equal to 60·4 per cent. of the natural increase during the same period. Since the year 1876, when tin and gold first assumed importance as products of Tasmania, immigration has added 5757 to our population, equal to 46·2 per cent. of the natural increase during the same period. Elsewhere it will be shown how greatly the mining industries have added to the material welfare of Tasmania within the period,

as indicated by exported and imported merchandise. In this place it may be of additional interest to note how far this prosperity affects the factors of population. This is best realised by contrasting the average results per year of migration and natural increase of the five-yearly period ending 31st December, 1875, with the same for the seven-yearly period ending 31st December, 1882:—

	Period **1871-5.**	*Period* **1876-82.**
Average increase to population per year, persons, No.	579	2688
Average ditto per 1000 square miles, No.	22	102
Average birth-rate per 1000 persons per year	29·72	32·06
Average result of migration per year, persons, No...	−876	+822

The total number of persons who travelled to and from Tasmania during the year 1882 amounts to 24,225. This exceeds the corresponding number in 1872 by 12,433, or 105·4 per cent. increase. The immediate direction and the extent of this movement is indicated by the following figures:—

	No. of Persons.	*Per cent. to Total.*
Tasmania and Victoria direct.....	22,027	90·93
Ditto New South Wales ditto	1712	7·07
Ditto New Zealand ditto	438	1·80
Ditto all other countries	48	0.20
Ditto all countries	24,225	100·00
Ditto, ditto, males	16,711	68·98
Ditto, ditto, females.....	7514	31·02

Thus it would appear that 90·93 per cent. of the whole travel immediately between Tasmania and Victoria. This in itself, however, is no true indication of ultimate direction, as Port Phillip is the great transhipping centre for the principal European and other steamers which do not touch at any Tasmanian port. Fully two-thirds of those who travel are males.

Bounty Immigration and Naturalization.

The number of assisted immigrants introduced into the Colony during the year 1882 is 141,—63 males and 78 females,—and exceeds the corresponding figures in 1881 by 82, or an increase of 138·98 per cent. Of these, England furnished 125, Ireland 42, Scotland 25, and other countries 8. The emigration from the United Kingdom during the same period represented 228,767 persons, the greater part of whom (187,779) went to America; only 31,465 persons proceeded to the Colonies of Australasia, of which latter number the Tasmanian assisted immigrants only represent 0·4 per cent.

Of the 17 persons naturalized during the year, 8 are Germans, and the remaining 9 are Chinese.

The density of the population on 31st December is, on the average, equal to 467 persons per 100 square miles. This is high as compared with the average density of the population of Australasia as a whole, which is now estimated at 95 persons per 100 square miles.

Tasmania still maintains her position as the third in rank in density of population as compared with the individual Colonies:—

(1.) Victoria, 1031 per 100 square miles.
(2.) New Zealand, 495 per 100 ditto.
(3.) Tasmania, 467 per 100 ditto.
(4.) New South Wales, 263 per 100 ditto.
(5.) South Australia, 32 per 100 square miles.
(6.) Queensland, 37 ditto.
(7.) Western Australia, 3 per 100 ditto.

Political Franchise.

The following are the numbers of those Electors whose names were on the Electoral Roll on 31st December, 1882:—

	No.	*Estimated per-centage to Males over 21 years of Age.*
Legislative Council.....	3379	9·7
House of Assembly	16,419	47·4

PART III.

VITAL AND METEOROLOGICAL.

BIRTHS.

DURING the year 1882 the number of Births registered was 4043, of which 2069, or 51·17 per cent., were males, and 1974, or 48·83 per cent., females. Thus the males were in excess of females by 95, or 4·81 per cent.

The following abstract shows the comparison with the nine years previous in the districts forming the various divisions:—

No. OF BIRTHS.

	1873.	1874.	1875.	1876.	1877.	1878.	1879.	1880.	1881.	1882.	Average per Year.
Urban Districts—											
Hobart	725	783	755	761	809	844	858	900	887	917	823·90
Launceston	395	374	390	406	408	457	436	491	533	582	447·20
Total Urban Districts	1120	1157	1145	1167	1217	1301	1294	1391	1420	1499	1271·10
Country Districts	1928	1940	1960	1982	1994	2201	2270	2348	2498	2544	2166·50
Total for Tasmania	3048	3097	3105	3149	3211	3502	3564	3739	3918	4043	3437·60
Birth-rate per 1000 of Mean Population	29·43	29·72	29·88	30·11	30·21	32·27	32·04	32·90	33·40	33·50	31·42

The above table, upon the whole, shows that there has been a gradual increase during the decade both in the actual number of births registered and in the birth-rate per 1000 of mean population of each year. The birth-rate for 1882, 33·50, is the highest upon record since the year 1862, exceeding the birth-rate for the year 1881 by ·10, and the average birth-rate of the decade, 31·42, by 2·08. This gradual increase of the birth-rate is most satisfactory, as, in the opinion of the Registrar-General of England, Mr. Hayter of Victoria, and other eminent authorities, it is also a valuable index of the material prosperity of the country. Increased prosperity in material welfare is invariably associated with an increase of marriages and births. It is true the birth-rate in Tasmania is still below the average of the neighbouring Colonies, but this is not due to a lower rate of fertility in mothers, but rather to the relatively fewer mothers at the fertile ages—say 15 to 45. Mr. Hayter has very clearly shown this to be the case as regards Victoria (Year Book, 1881, p. 186).

The following table further demonstrates the truth of Mr. Hayter's conclusions, so far as Tasmania, New Zealand, and Victoria are concerned; thus:—

Country.	Year of Census.	Enumerated Population.	Per-centage of all ages over 60.	Married Women under 45 years.	Births.	Proportion of Births.	
						Per 1000 of Population.	Per 1000 Married Women under 45 years.
Victoria	1871	731,528	2·76	88,561	27,382	37·15	309·17
Ditto	1881	862,346	4·65	84,831	27,145	31·24	319·98
New Zealand	1881	489,933	2·71	57,464	18,732	37·95	325·97
Tasmania	1881	115,705	8·04	11,302	3918	33·40	346·66

The inclusion of illegitimate births does not materially affect the value of this table, and it conclusively proves that the fertility of mothers may be greatest while the birth-rate index is comparatively low, and *vice versâ*.

The birth-rate in young communities is invariably high, because, as the major proportion of immigrants is composed of young and vigorous persons, the proportion of old people living is much less than in older countries where the proportions of persons living at various ages are in a normal condition. Thus, as a young colony advances towards a settled state the per-centage proportion of the living population over 60 years of age increases as the birth-rate diminishes. If we compare the present condition of the more settled Colonies with their earlier stages, or with other Colonies more recently settled, we will find this law so truly demonstrated, that in nearly every case it conceals other important influences, such as the relative proportion of sexes, conjugal relation, &c.

The following table shows the relation between the per-centages of old age and its effect upon the birth-rate in different Colonies, and in the earlier and later stages of their settlement:—

Colony.	Year of Census.	Per-centage of Ages over 60 to Total Population.	Birth-rate.
Victoria	1871	2·76	37·15
Ditto	1881	4·65	31·24
New South Wales	1871	3·98	39·42
Ditto	1881	4·31	37·99
South Australia	1881	4·13	37·11
Tasmania	1857	2·77	39·83
Ditto	1881	8·04	33·40
Queensland	1881	1·87	37·19
New Zealand	1881	2·71	37·95

It will be observed where the per-centage of ages over 60 is under 3 per cent., that the birth-rate is exceedingly high, as at present in Queensland and New Zealand; and that in cases where the per-centage of living persons over 60 exceeds 3 per cent., the birth-rate is relatively low, as in the case of Victoria and Tasmania.

These observations are also of value in explaining the differences between the birth-rates of the different divisions within the Colony of Tasmania for the year 1882. Thus wherever the birth-rate is above the average for all districts, it is chiefly because under a normal health condition the per-centage of old people is lower than in the divisions where the birth-rate is under the average.

Districts.	Percentage of Ages of living Population over 60.	Birth-rate per 1000 Persons.
North-Eastern Division	5·99	36·17
North-Western Division	6·03	35·13
South-Western Division	7·05	34·33
Midland Division	8·66	32·35
South-Eastern Division	8·90	31·11
Urban Districts	9·19	33·03
Average for Tasmania	8·04	33·50

The reason why the Urban Districts disturb the sequence of order of the group under the average is no doubt due to the circumstance that many pregnant mothers are compelled to live in towns on account of the lack of skilled medical attendants in some Country Districts.

DEATHS.

The deaths registered during the year 1882 numbered 1906, of which 1101, or 57·76 per cent., were males, and 805, or 42·24 per cent., were females. With the exception of the years 1875 and 1877, when epidemics of measles and scarlatina prevailed, the actual number of deaths greatly exceeds that of any other year during the last decade. The absolute number of deaths for the year exceeds that of the previous year by 173, and is in excess of the average of the last decade by 116·20. It does not follow, however, that the year *per se* has been unusually unfavourable to health, for the absolute number of deaths must naturally increase with the yearly increasing population.

Death-rate.

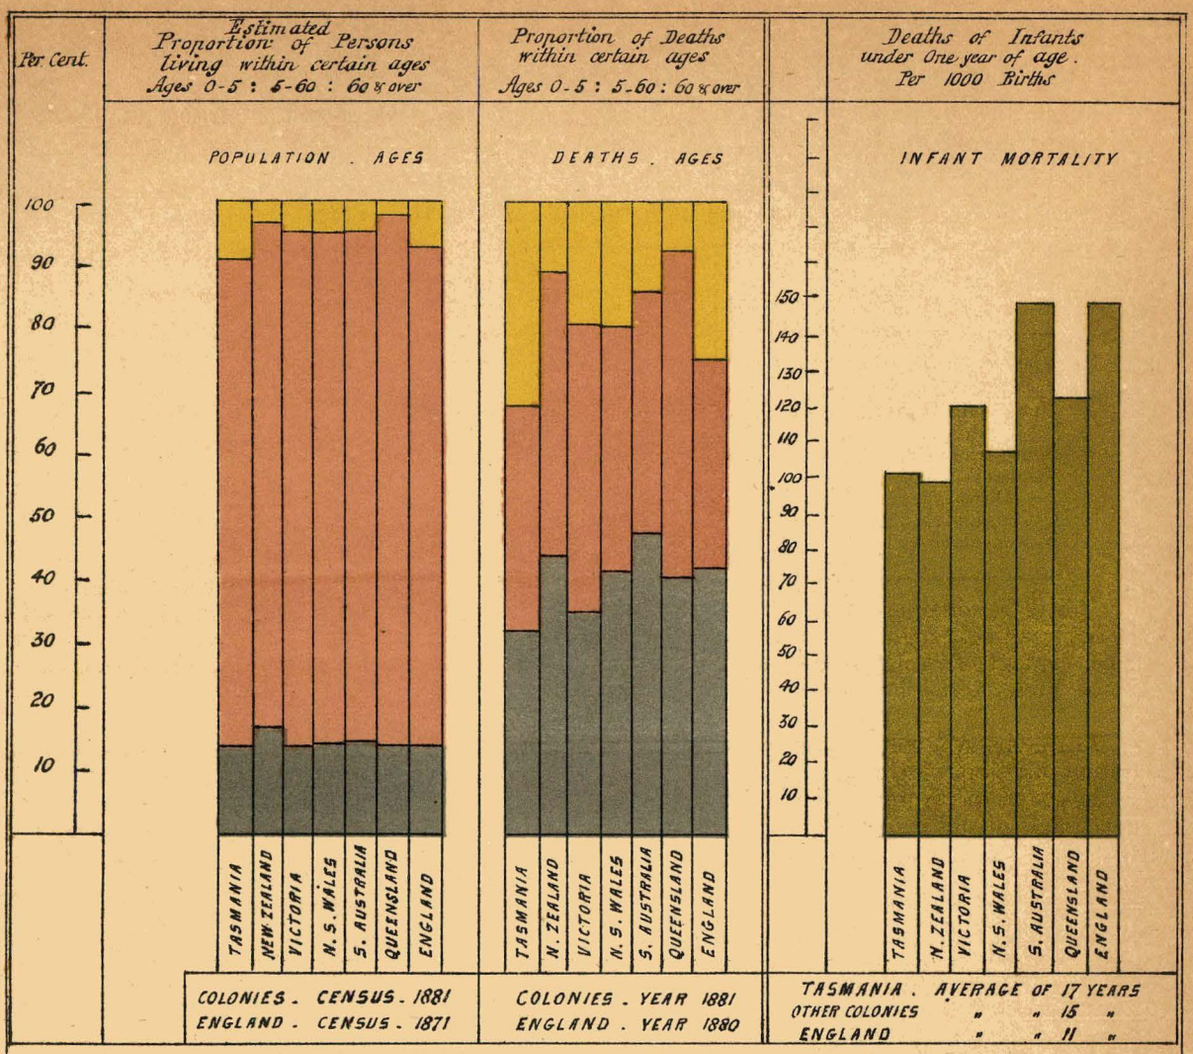

The normal death-rate,—*i.e.*, the proportion which the actual deaths bears to the mean population,—is, under ordinary circumstances, a better index of the relative healthiness of each year.

The following table gives the death-rates for the last decade:—

Year.	Deaths.		Year.	Deaths.	
	No.	Rate per 1000 of Population.		No.	Rate per 1000 of Population.
1873	1512	14·60	1878	1701	15·67
1874	1690	16·22	1879	1688	15·18
1875	2079	20·01	1880	1832	16·17
1876	1733	16·57	1881	1733	14·77
1877	2040	19·19	1882	1909	15·82

Thus it would appear that although the death-rate for 1882 was only exceeded during the second quinquenniad of the decade by the year 1880, it is lower than any year of the first quinquenniad with the exception of the very favourable year 1873.

COMPARATIVE VITAL STATISTICS

All ages | 0-5 years | 5-60 years | 60 years & over | Under 1 year | Under 60 years

Although extreme variations in the death-rate of one place may as a rule be depended upon as a test of sanitary condition, it does not always follow that the minor fluctuations under 17 per 1000 of the population are good indices of improved or defective sanitation.

Where, as in Tasmania, the ages above "three score years and ten"—the allotted span of human life—contribute 22·93 per cent. of the total deaths, it is evident that the death-rate which includes this element must in itself be unsatisfactory as a test of sanitary condition. This is apparent when we come to consider the broad proportional differences which certain groups of ages of the living population yield to the yearly number of deaths.

The following table shows the vast difference between the numbers which certain groups of ages yield to the yearly number of deaths in England, and in the principal Colonies of Australasia :—

Country.	Period.	Per-centage of Ages—Living Population.				Period.	Per-centage of Deaths to Total Deaths.			
		0—5.	5—60.	60 & over.	All ages.		0—5.	5—60.	60 & over.	All ages.
England	1880	13·5	79·0	7·5	100	1880	42·47	33·34	24·19	100
Queensland	1881	14·95	83·18	1·87	100	1881	41·40	51·34	7·26	100
South Australia	1881	14·89	80·98	4·13	100	1881	48·21	37·92	13·87	100
New South Wales	1881	14·84	80·85	4·31	100	1881	42·05	38·87	19·08	100
Victoria	1881	13·22	82·13	4·65	100	1881	35·87	45·62	18·51	100
Tasmania	1881	14·03	77·93	8·04	100	1881	32·91	32·79	34·30	100
						1882	30·14	33·56	36·30	100
New Zealand	1881	17·01	80·27	2·72	100	1881	44·52	44·98	10·50	100

The above table not only shows the great disparity in the proportions of certain groups of ages to the total population in the several countries, but also the great difference which each age-group yields to the total number of deaths in each country per year. Thus, while the living persons in the Australasian Colonies under 5 years only represent from 13·22 to 17·01 of the total population, the same age-group contributes from 32·90 to 44·52 of the total deaths; and while the ages of persons over 60 only represent from 1·87 to 8·04 per cent. of the living population, the same age-group contributes proportionately from 7·26 to 36·30 per cent. of the total deaths. It must therefore be obvious that, while the respective age-groups contribute in such different proportions to the yearly number of deaths, that any disturbance of the living groups of ages of different countries caused by migration or otherwise must so greatly affect the normal or natural death-rates for all ages, that comparisons between different countries, based solely upon their indications, must be widely misleading as tests of health or sanitary condition. This specially applies to the unstable age relations of the newly settled Colonies of Australasia; *e.g.*, who could imagine from the annual death-rates of Queensland—16·17, and Tasmania—15·41, that the deaths over 60 years of the former only comprised 7·26 per cent. of total deaths, while the latter, with its lower general indication, embraced deaths of over 60 years comprising 36·30 of the total deaths!

Moreover, under any circumstance it would seem to be most desirable to separate the deaths from extreme old age from other causes in analyses of matters bearing upon health or sanitary condition; for although in imagination we could, with Dr. Richardson, conceive of the future *Hygeia* as perfectly freed from preventible causes of death, yet if it be admitted that the fully ripe aged must die, we must also conceive that as we approach the ideal City of Health the proportions of deaths in childhood, youth, and middle age can only diminish as the proportion of old age increases. Thus, when the future Registrar-General can record deaths from extreme old age "100 per cent.," there will be perfect health, and the only value of the annual death-rate for all ages, now generally used with so much advantage in older countries as a test of sanitary condition, will be merely as a measure of the natural increase or decrease of population. From these considerations it is clear that the ordinary death-rate index for Tasmania is not a fair test of her sanitary condition as compared with the neighbouring Colonies, for by it alone she ranks next to Queensland with the highest death-rate; thus—

1. Queensland	1881	16·17	4. Victoria	1881	14·71
2. Tasmania.....	1882	15·41	5. South Australia	1881	14·52
3. New South Wales	1881	15·12	6. New Zealand	1881	11·49

If we now eliminate from the calculation all deaths of persons over 60 years of age, we have a much truer standard of the comparative health and sanitary condition of the respective Colonies; thus—

Proportion of Deaths under 60 *years of Age relative to* 1000 *persons of the Total living Population.*

Countries.	Year 1881.	5 Years' average, 1877—1881.
1. Tasmania	9·70	10·16
2. New Zealand	9·96	10·35
3. Victoria	11·54	12·35
4. New South Wales	12·14	12·39
5. South Australia	12·25	12·61
6. Queensland	13·95	15·31
7. England (1880)	15·47	—

This method places Tasmania in the first position as regards health and sanitary condition; the other Colonies in the following order,—viz., New Zealand, Victoria, New South Wales, South Australia, Queensland.

It must be borne in mind, however, that this method, though a much more accurate index to sanitary condition than the national or normal death-rate for all ages, also involves a certain percentage of error, inasmuch as the countries having the largest proportion of old age have now, by an increased standard of comparison (the total population) a slight advantage over those with a smaller proportion. The correction, if made, would place New Zealand in the first position, Tasmania second, the rest in nearly the same order as already given.

Nothing short of an actual comparison of deaths at certain ages with persons living at corresponding ages can be of a satisfactory character, although in the latter case, as usually given by Statisticians, there are complications arising from the indications in different age-groups ranking in different degrees of order; *e.g.*, in the following table, based upon the method indicated, Victoria stands third in rank for the lowest number of deaths under 5 years of age, whereas for age-group, 5-60, it occupies the sixth position in this respect :—

Deaths at various Ages computed independently in relation to Persons living at corresponding Ages.

Average of Quinquennium, 1877—81.

Country.	Deaths per 1000 Persons living at corresponding Ages.			
	0-5.	5-60.	60 and over.	All Ages.
New Zealand	31·01	6·29	42·11	11·49
Tasmania	34·51	6·80	66·24	15·41
Victoria	41·12	8·38	50·68	14·71
New South Wales	44·37	7·08	62·80	15·12
South Australia	47·05	6·87	42·97	14·52
Queensland	46·77	8·37	56·01	16·17
England, 1880	64·35	8·68	66·30	20·50

Thus the difficulty of comparison would be increased indefinitely if the age-groups were further subdivided; and the inconvenience of dealing with such indices, no doubt, has in some measure brought the general national standard more fixedly into use as a test of sanitary condition.

If the deaths at ages under 60 be calculated as a whole in relation to persons actually living under the same age-limit, we would obtain, undisturbed by the important old-age element, a truer relative standard of health between different times and differently constituted communities. Thus, for the Census year 1881 we obtain the following results, which place the respective Countries, as regards health and sanitary condition, in truer relation to each other than by the "national" standard :—

1881.

Country.	Deaths under 60, per 1000 Persons living under the same Age limit.
1. New Zealand, 1881	10·40
2. Tasmania, 1881	11·40
3. Victoria, 1881	12·22
4. New South Wales, 1881	12·87
5. South Australia, 1881	13·06
6. Queensland, 1881	14·36
7. England, 1880	16·85

This I conceive to be by far the truer general "health measure" in comparisons made between different places differently constituted in respect of the proportion of persons living at different age groups, and as such I submit it with due deference to those of wider experience in matters pertaining to Vital Statistics. The national and the normal death-rates for all ages may of course be used with advantage in countries where the age relation is comparatively stable, but in the Colonies, where the age relations are continually disturbed by migration, the "health measure" as already defined is more reliable, quite as convenient, and, moreover, has the advantage of relieving Health Officers from the unmerited opprobrium of local high death-rates arising purely from excess of old age, as is the case at present in Tasmania.

In one of the tables already given, it will be observed that Tasmania, although ranking second in the order of least number of deaths under 60 years of age, nevertheless ranks last in order in deaths over that limit. This arises, however, from the fact that in Tasmania a greater number of old persons have reached the final natural limit of a healthy human life—*i.e.*, extreme old age—than in the rest of the Colonies compared.

This may be conceded when we consider the following comparison of the average age at death in Tasmania, Victoria, New Zealand, and England:—

All Ages—Average Age at Death—Persons.

	YEARS.
Tasmania, 1881	36·87
Victoria, 1881	30·21
New Zealand, 1881	23·15
England, 1880	30·57

Ages over Sixty—Average Age at Death—Persons.

	YEARS.
Tasmania, 1881	72·90
New Zealand, 1881	70·82

The true test of the general healthiness of any locality for ages over 60 should not be based upon any relation to the living population, but rather upon the average age at death.

Extreme old age is, *per se*, an infallible index of health, whether due to the life or its environment. Therefore, to mingle deaths from extreme old age with deaths from the more or less preventible causes in any common rate used as a test of sanitary condition, must in my opinion frequently result in anomalies and confusion.

Little value can be placed upon the alleged preventible causes of death in ages over 70 years. They indicate more the season of the year than the real cause of death in such cases: *e.g.*, recently a person died in Tasmania 90 years of age; the cause of death assigned was Influenza. Clearly such cases should be assigned to old age alone.

It is quite possible, however, that other causes may be acting concurrently with extreme old age in producing a higher rate of mortality in Tasmania among the ages over 60, but it is clear that they are unimportant when considered in relation with the cause assigned, viz., the extreme limit of a healthy human life.

Upon the whole, it has been clearly demonstrated that the influence of the age element in a rate based upon *total* population is not to be depended upon in comparisons between widely different times or places. The extremely high rate of births, and the low annual rate of deaths, in the Colonies are in no small measure due to immigration largely swelling the age-group 5-to-60 years, while the converse of this is true in respect of old countries, such as England, where emigration reduces the natural proportion of this important age-group. It is true, the birth-rate index in the older countries is not lowered, nor the death-rate increased, by emigration to such an extent as these same indices are affected conversely in the younger Colonies, but this is solely due to the circumstance that the same number of emigrants would represent to the larger population of the older country a very small proportion, while the addition to the smaller population would represent a very large proportion indeed; *e.g.*, assuming for the purpose of illustration that the bulk of emigrants are between the ages of 5 - 60 years, and that the whole of the deaths are reckoned in the particular year against the country to which the emigrants have proceeded, then, in the year 1874 New Zealand and England had their respective populations, deaths, and death-rates affected nearly in the following manner:—

1874.

Population of United Kingdom prior to Emigration, say 23,723,017. Population of New Zealand prior to Emigration, say 284,687.

	Effect as regards England.		Effect as regards New Zealand.	
	Increase.	*Decrease.*	*Increase.*	*Decrease.*
Population	..	36,000	36,000	
Number of Deaths	..	269	269	
Average of Deaths in New Zealand between 5 - 60 *per* 1000 *persons* .. 6·29				
Average of Deaths in England between 5 - 60 *per* 1000 *persons* .. 8·68				
Mean .....7·48				
Death-rate per 1000 of the total population	0·04	..	..	0·70

Thus it is shown that in one year the same influence which increases the actual number of deaths in the smaller community by 269 has, by its increase of 36,000 vigorous lives to the population, actually lowered the death-rate to a considerable extent,—viz., 0·70 per 1000 of total living persons; while the larger population by the same influence has its death-rate increased only to the extent of 0·04 per 1000 of total living persons.

It is easy therefore to conceive that a tide of immigration into a small colony over, say a period of 12 years, may have the effect of reducing its annual death-rate in this way by 3 to 4 deaths per 1000 of the total living population, while the death-rate of the larger population, although really increased thereby, is still scarcely appreciable.

These considerations are sufficient to account for the remarkably low death-rate in New Zealand as compared with Tasmania, the former having largely added to its population by immigration during the last 12 years, while the latter has had very little addition to its population due to this source, and has moreover a much larger proportion of persons living over 60 years of age than any other Australian Colony, and exceeding even the average of the United Kingdom of Great Britain.

If we now turn our attention to the various divisions into which the Registration Districts within Tasmania are grouped, we will find that they, too, are also very differently constituted as regards the proportion of persons living at ages over 60 years. This is also indicated by the average age at death in Town and Country Registration Districts calculated for the Census year 1881; thus—

District.	Average Age at Death, Year 1881.
	Years.
Hobart	42·00
Launceston	39·39
Country Districts	31·11
Tasmania	36·87

This is in accord with a former statement where it was shown that the per-centages of persons living at ages over 60 during Census year 1881 were in Country Districts much lower than in the two Urban Districts, the former ranging from 5·99 to 8·90 per cent. and the latter being 9·19 per cent.

It is necessary, therefore, that the old age element should be eliminated in comparisons between the different districts within Tasmania. As aged paupers, criminals, and hospitals are centred in the two principal towns, it is necessary that deaths in these places, being 19·20 per cent. of the whole, should also be separated from the deaths in Urban Districts before satisfactory comparisons can be made.

The following table compares the Urban and Country Districts for the year 1882 :—

District or Division.	Per cent. of Persons over 60 living.[a]	Deaths at all Ages per 1000 Persons.[a]	Deaths under 60 years per 1000 Persons living under same Age limit.
		No.	No.
Urban Districts—			
Hobart	9·83	24·31	11·41 [b]
Launceston	8·16	24·76	15·74 [b]
Average, Urban Districts	9·19	24·48	13·25 [b]
Country Districts—			
North-Eastern Division	5·99	10·71	9·19
North-Western Division	6·03	9·78	7·72
Midland Division	8·66	10·34	7·31
South-Eastern Division	8·90	11·60	9·10
South-Western Division	7·05	9·41	6·85
Average, Country Districts	7·33	10·56	8·59
All Districts	8·04	15·79	11·40

[a] Including Deaths in Hospitals, Gaols, &c. [b] Excluding Deaths in Hospitals, Gaols, &c.

By the first method, including deaths in Hospitals, Gaols, Pauper Establishments, and ages over 60 years, the Divisions stand in the following order :—

1. South-Western Division.
2. North-Western Division.
3. Midland Division.
4. North-Eastern Division.
5. South-Eastern Division.
6. Hobart.
7. Launceston.

By the second method the sanitary condition of the respective Divisions is more correctly determined, and the order of Divisions stands thus :—

1. South-Western Division.
2. Midland Division.
3. North-Western Division.
4. South-Eastern Division.
5. North-Eastern Division.
6. Hobart.
7. Launceston.

Thus, by either method, the District of Launceston for the year 1882 compares very unfavourably with Hobart and with the Country Districts as regards health and sanitary condition. This conclusion is also borne out by an examination of the infant rate of mortality, which is based upon the comparison of the number of deaths under one year with the number of births.

The following table shows the various Districts or Divisions in the order of fewest deaths for infants under one year :—

Infantile Mortality.

District or Division.	Deaths under one Year per 1000 Births.
Country Districts—	
1. South-Western Division	56·4
2. Midland Division	58·6
3. South-Eastern Division	60·9
4. North-Western Division	86·8
5. North-Eastern Division	87·2
Urban Districts—	
6. Hobart	142·8
7. Launceston	171·8
All Districts	103·6

With these it may be useful to compare the rates of infant mortality elsewhere, as in following table :—

Infantile Mortality in England and in the Australasian Colonies.

Country.	Death of Infants under 1 Year per 1000 Births.
England—average 11 years, 1869-79	150
South Australia	150
Queensland	129
Victoria	124
New South Wales.	108
New Zealand	99
Average of 15 years, 1866-1880, taken from Mr. Hayter's table, Victorian Year Book, 1881, p. 215.	Average 119.
Tasmania—average of 17 years, 1866-1882	103

Although Tasmania as a whole compares very favourably with other Countries in respect of infant mortality, it is evident that the comparison is made less favourable by the relative high rate of infant mortality in Launceston District for the year 1882, which again takes up the lowest position in the order. Of course it must be taken into account that the infantile mortality of towns always compares unfavourably with that of country districts; but even this consideration does not place Launceston in a less favourable aspect when we compare it with the District of Hobart, which is more densely populated. It must be stated, however, that the number of deaths in Launceston District for 1882, viz., 428, is unusually high, being 20·5 per cent. above the previous year, and 24·4 per cent. above the average of the last decade.

Causes of Death.

In reviewing the causes of death we are at once impressed by the extreme healthiness of the Colonies as contrasted with older countries, and we are again arrested by the prominent position which "old age" in Tasmania occupies among the specified causes of death. This is best realised by making a comparison of twenty of the principal specific causes in England, Scotland, Victoria, and Tasmania :—

Comparison showing Twenty of the specific Causes of Death, in the order of their fatality, in England, Scotland, Victoria, and Tasmania.

No.	England, 1879.		Scotland, 1879.		Victoria, 1881.		Tasmania, 1881-82.		
	Cause of Death.	Deaths per 100,000 living.	Cause of Death.	Deaths per 100,000 living.	Cause of Death.	Deaths per 100,000 living.	Cause of Death.	Deaths per 100,000 living.

							{ Measles*	38	*Nil.*

* Zymotic.

It will be observed, in the foregoing comparative table, that the year 1882 in Tasmania compares unfavourably with the preceding year. There has been an increase in the number of deaths from the principal specific causes as follows :—

Increases as compared with 1881.			Increases as compared with 1881.		
Old Age	52	deaths per 100,000.	Paralysis	7	deaths per 100,000.
Convulsions.....	31	ditto.	Apoplexy	3	ditto.
Phthisis	6	ditto.	Congestion of Lungs..	10	ditto.
Atrophy and Debility .	11	ditto.	Dropsy	11	ditto.
Pneumonia	3	ditto.	Typhoid	1	ditto.
Diarrhœa.....	7	ditto.	Cephalitis	17	ditto.
Cancer.....	2	ditto.	Premature Birth	2	ditto.
Brain Disease.....	13	ditto.	Scarlatina	10	ditto.

Among some of the principal causes there has been a decrease as compared with the previous year, as follows :—

Heart Disease	1	death per 100,000.	Fractures, Contusions, &c.	5	deaths per 100,000.
Bronchitis	14	deaths per 100,000.	Measles	38	ditto.
Liver Disease	4	ditto.			

DEATHS AS AFFECTED BY AGE AND SEASON.

Analysis of the principal causes of Death affecting Children, Middle Age, and Old Age during the Year 1882.

					1906				

The above is a synopsis of the various extended tables appended, pp. 78 - 81, 86 - 89—and it sufficiently conveys to the mind the nature of the principal causes of death, and also shows how far the latter are determined by age and season in Tasmania.

Thus the diseases affecting principally the extremes of youth and age, Group I., cause 524 deaths, or 27·69 per cent. of the deaths from all causes (specified) for the year 1882, of which age-groups 0 - 5, and 60 and over, contribute respectively 219 and 149 deaths. The months during which the diseases in this group were most prevalent were, February to September—convulsions, brain disease, &c.; December and July—bronchitis, pneumonia, lung disease, &c.

In the next group—II. Principal Diseases chiefly affecting Children—there are 342 deaths, or 18·08 per cent. of the whole, 269 of which occur in age-group 0 - 5. The Miasmatic diseases—croup, diarrhœa, cholera, scarlatina, &c.—cause 178 deaths, or 9·41 per cent. of the whole. The warm portion of the year—December to May—as usual, appears to favour the development of the Miasmatic diseases, the deaths within these six months representing 68 per cent. of the whole Miasmatic order

for the year. Atrophy and debility come next in rank, represented by 112 deaths; the season during which deaths most prevail being from November to March, *i.e.*, the warm months of the year. The Developmental diseases—premature birth, teething, &c.—cause 52 deaths, or 2·75 per cent. of deaths from all causes.

In Group III.,—Principal Diseases chiefly affecting Youth and Middle Age,—typhoid, prevailing from February to April, causes 32 deaths, or 1·69 per cent. of deaths from all causes. The tubercular diseases, however, (phthisis, &c.) cause a greater number of deaths within this group, being represented by 144 deaths, the most of which—123—occur in the age-group 5 - 60 years. Paramenia and childbirth, and violence rank next in order, and are represented respectively by 15 and 87 deaths. Of course there is a much larger proportion of persons (77·93 per cent. of the whole) in this group exposed to risk of accident, and this accounts for the greater number of deaths from 'violence.'

In Group IV.,—Principal Causes of Death affecting Old Age,—'Old Age' alone represents 308, or 16·28 per cent. of deaths from all causes. This is the highest proportion due to 'the final limit of a healthy human life' that I can find in the statistics of former periods in Tasmania or in any other country. The other principal causes affecting old age—dropsy, cancer, heart disease, &c.—are represented by 288 deaths. These, together with the minor causes and diseases affecting other age-groups, make a total of 36·58 per cent. of deaths from all causes for ages over 60 years. This is a very extraordinary proportion, and is best realised by again contrasting it with deaths in the same age-group in England, Scotland, and the neighbouring Colonies:—

Deaths over 60 *Years of Age.*

		Per-centage of Total Deaths.	Average.			Per-centage of Total Deaths.	Average.
1. Queensland	1881	7·26		6. England	1880	24·19	26·24
2. New Zealand	1881	10·50		7. Scotland	1879	28·3	
3. South Australia ..	1881	13·87	13·84				
4. Victoria.....	1881	18·51		8. Tasmania	1881	34·31	
5. New South Wales .	1881	19·08		Ditto	1882	36·58	

Thus the total ages over 60 years in Tasmania is, proportionally, 164·3 per cent. above the average of the neighbouring Colonies, and even exceeds the average of England and Scotland for the years stated by 39·4 per cent.

In this division it may be interesting to note the principal specific causes of deaths in respect of infants under one year of age in greater detail. During the year 1882, 419 infants—231 males and 188 females—died, chiefly from the following specific causes, which are arranged in the order of fatality:—

	Deaths per 10,000 Births.		Deaths per 10,000 Births.
Atrophy and Debility..	230	Bronchitis	47
Convulsions	205	Teething	34
Diarrhœa	108	Want of Breast-milk	20
Premature Birth	74	Dysentery	20
Pneumonia	57	All other Causes	247
Congestion of Lungs, &c.	49		

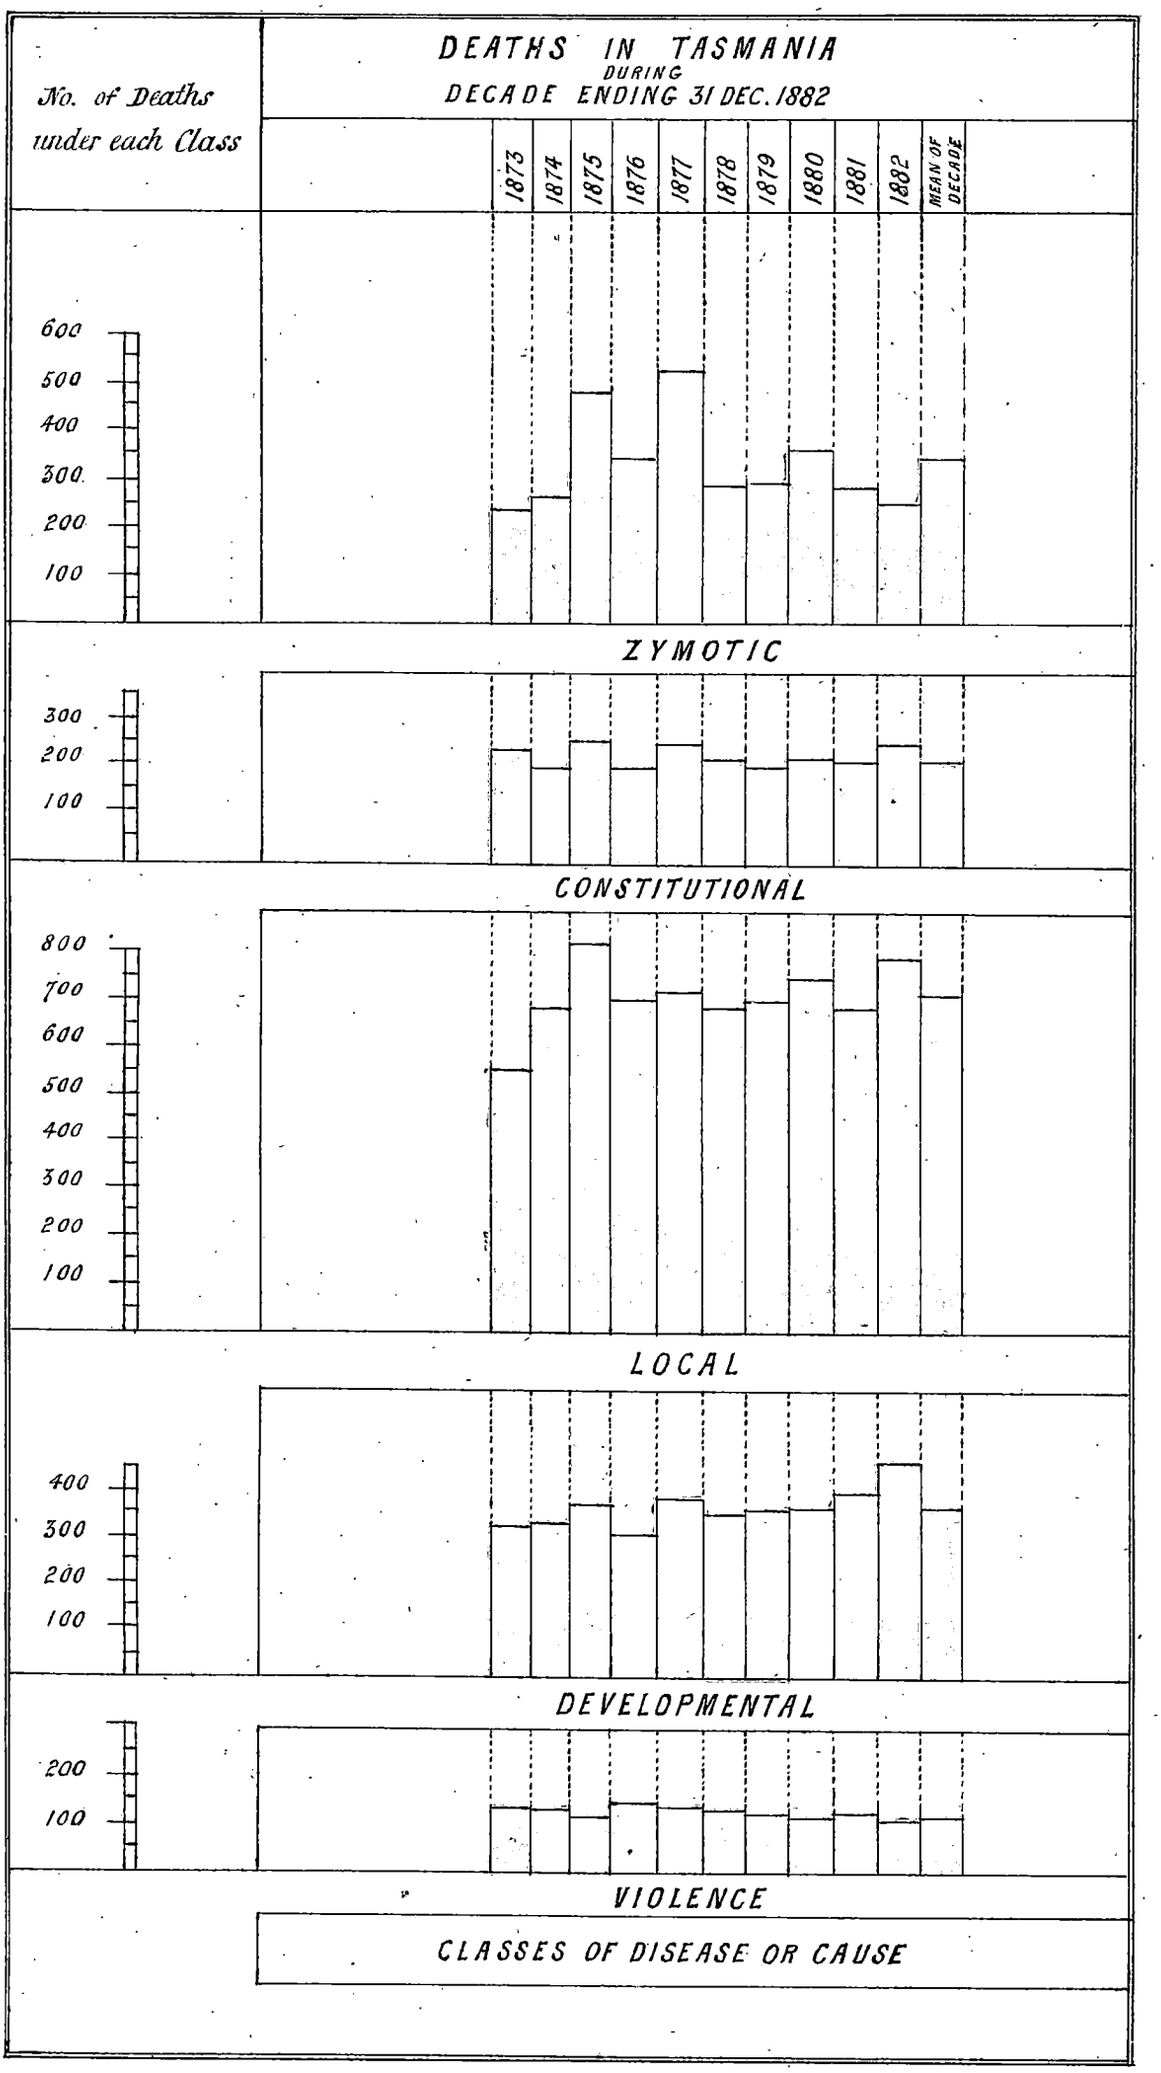

The following is an abstract taken from the Decennial Return of Deaths under the principal classes, p. 93, which gives a general view of the fluctuations which have taken place in particular groups of diseases within the ten years, 1873 - 1882.

Mortality from the various Classes of Diseases.

	Rate per 1000 Persons.			Increase or Decrease, 1882, compared with—	
	1882.	1881.	Average of last Decade.	1881.	Average of last Decade.
Zymotic Diseases	2·13	2·45	3·12	— 0·32	— 0·99
Constitutional Diseases	2·17	1·91	2·11	+ 0·26	+ 0·06
Local Diseases.....	6·63	5·95	6·63	+ 0·68	
Developmental Diseases, including Deaths from "Old Age"	4·03	3·44	3·39	+ 0·59	+ 0·64
Violent Deaths	·73	·89	·97	— 0·16	— 0·24
Unspecified	·13	·13	·15	...	— .02
	15·82	14·77	16·37	+ 1·05	— 0·55

The increases as compared with the previous year and with the average of last decade, are chiefly due to the gradual increase in the number of deaths from old age.

COMPARATIVE VITAL STATISTICS

It is satisfactory to note that deaths from Zymotic diseases have been gradually decreasing during the last few years. There have been less deaths in 1882 from this class than in any former year of the last decade.

That Tasmania occupies a most satisfactory position in respect of conditions favourable to a healthy life, may be seen from comparisons made with other countries in the following table, especially so with regard to deaths from Zymotic causes, which are more particularly associated with defects in the sanitary condition of all countries.

Mortality from the various classes of Diseases in England and in the Australasian Colonies compared.

Number of Deaths per 100,000 living.

	Zymotic Diseases.	Constitutional Diseases.	Local Diseases.	Developmental Diseases.	Violent Deaths.	Unspecified.
England, 1880	413	344	931	284	68	8
Victoria, 1881	280	224	608	201	97	—
New South Wales, 1881	283	208	621	271	118	8
South Australia, 1882	360	200	550	280	70	—
Queensland, 1881	412	214	483	235	143	13
New Zealand, 1881	249	174	434	156	96	5
Tasmania, 1882	213	217	663	403*	73	13

* Of this class in Tasmania, 63 per cent. of the Deaths are due to "old age" alone.

Thus Tasmania stands in the peculiar position of having the lowest rate of deaths from Zymotic diseases, and the highest in respect of deaths from Developmental causes. As 63 per cent. of the latter, however, in Tasmania is composed of deaths from 'old age' alone, the higher rate for Developmental diseases in this case, and the lower rate for Zymotic diseases, are both good indices of the noted salubrity of our climate.

Deaths and Diseases in Hospitals.

The following is an abstract showing the number of deaths which occurred in the various Hospitals during the year 1882, together with the number of cases treated as in-patients and out-patients (see also table, pp. 94 - 96.)

Deaths and Diseases in Hospitals, 1882.

	Zymotic Diseases.	Constitutional Diseases.	Local Diseases.	Developmental Diseases.	Violence.	Undefined.	Total.
Cases treated—							
In-Patients, No.	597	148	868	86	320	17	2036
Out-Patients, No.	482	128	1051	244	449	10	2364
Total	1079	276	1919	330	769	27	4400
Per cent. to Total	24·5	6·3	43·6	7·5	17·5	0·6	100
Deaths—							
In Hospitals, No.	21	41	113	16	21	—	212
Per cent. to Total	9·9	19·3	53·3	7·6	9·9	—	100·
Per cent. to cases treated as In-Patients	3·5	27·7	13·0	18·6	6·5	—	10·4

Thus it would appear that out of 2036 cases treated as in-patients during the year, 212 persons died, being 10·4 per cent. of the total number of cases. Cases of Constitutional diseases, although only representing 6·3 per cent. of the whole, contribute the highest per-centage of deaths, viz., 27·7 per cent.

Deaths in Public Institutions in Hobart and Launceston.

There were 366 deaths registered as occurring in the General Hospitals, Gaols, Invalid and Pauper Establishments centred in Hobart and Launceston, of which 287 are registered in the District of Hobart and 79 in the District of Launceston. As the criminals and paupers of the whole island are centred in certain of these institutions, and as the number of deaths comprise 32·9 per cent. of the whole of the deaths in the two urban districts, it is necessary to keep them separate in making comparisons with death-rates in other districts the death-rates of which are proportionally reduced by the transfer of aged and diseased persons to such centres. The following table gives further particulars regarding the proportion of deaths under the various age-groups:—

Deaths in the Public Institutions situated in the Districts of Hobart and Launceston, 1882.

Number of Deaths under each Age Group—

District.	0 – 5 years.	5 - 60 years.	60 years and over.	Ages not defined.	All Ages.
	No.	No.	No.	No.	No.
Deaths in Public Institutions—					
Hobart	3	74	210	...	287
Launceston	1	35	40	3	79
Total	4	109	250	3	366
Per cent. to Total Deaths..	1·1	29·9	68·3	0·7	100

Thus it is shown that aged people contribute 68·3 of the total number of deaths in these public institutions. This is largely due to the deaths occurring in the Invalid Establishments for aged and infirm persons, which represent 48·6 per cent. of the total deaths in all the Public Institutions, specified as follows :—

	No. of Inmates on 31st Dec.	No. of Deaths, 1882.
Hobart—		
New Town Pauper Establishment	590	135
Brickfields ditto	*	28
Hospital for Insane	63	7
General Hospital	59	112
Gaol for Males	135	3
Ditto for Females	29	2
Total Hobart	876	287

	No. of Inmates on 31st Dec.	No. of Deaths, 1882.
Launceston—		
Gaol	84	2
Hospital	41	62
Invalid Depôt, Males	133	15
Ditto, Females	19	—
Total Launceston	277	79
Grand Total	1153	366

* Transferred to New Town Pauper Establishment before the close of the year 1882.

MARRIAGES.

The number of marriages celebrated in Tasmania during the year 1882—969—is the highest upon record, relatively and absolutely, since the prosperous Victorian gold-rush years, 1852 - 55, being 172 above the average of the last decade, and 113 above the preceding year. This is in accord with all other indices pointing to a gradual improvement in the material welfare of the Colony. That the marriage rate is an index of considerable value in this respect is testified to by the Registrar-General of England in the following terms :—" For that the marriage-rate does really reflect with very considerable accuracy the condition of the public welfare is not a mere *à priori* assumption, but a conclusion founded on the observed correspondence of its fluctuations with those of indisputable measures of commercial activity, such as the total value of imported and exported merchandize." —p. vi., *Annual Report*, 1880.

In a general way it is interesting to note how faithfully, notwithstanding difference in degree, our own marriage-rate corresponds with the variations of our export and import trade during the last 32 years.

Period.	Marriages per 1000 Persons.	Total Value Export and Import Trade per head. £
Average of Five years, 1851 - 55*	18·85	44·17
Ditto, 1856 - 60	9·40	28·51
Ditto, 1861 - 65	7·24	19·66
Ditto, 1866 - 70	6·30	16·78
Ditto, 1871 - 75	6·37	18·78
Ditto, 1876 - 80	7·51	24·01
Year 1881 7·29 / Year 1882 8·03 } Mean—	7·66	26·22

* The period when, owing to the discovery of gold in Victoria, an extraordinary development of trade in Tasmania took place.

Thus there is a broad agreement between the marriage-rate and the total value of import and export trade in Tasmania when taken for periods of two or more years. There are other influences which produce minor conflicting variations when lesser periods are compared, but it is clear, upon the whole, as indicated by the Registrar-General of England, that improvement in trade and material welfare is at once marked by an increase in the marriage rate.

Of course, as clearly demonstrated by Mr. Hayter (Year Book, 1881-2; pp. 165 - 166), the marriage-rate, *per se*, based as it is upon the total population, is not always a reliable index in comparisons with different times or countries, " especially in young communities, in the composition of which great and sudden changes sometimes take place in consequence of accessions of population from without, followed by periods in which immigration is at a standstill." Mr. Hayter further

states, that the more correct method for calculating the marriage-rate under such circumstances would be "to compare the marriages with the number of marriageable males." By this method he has eliminated various disturbing influences which often caused conflicting results when used as an index of prosperity.

The following table illustrates the value of his observations:—

	Population.	Unmarried Males over 20.	Marriages.	Proportion of Marriages—	
				Per 1000 Population.	Per 1000 Unmarried Males.
Victoria, 1854	234,361	70,865	3696	15·77	52·16
Ditto, 1857	383,668	95,427	4465	11·64	46·79
Ditto, 1861	513,896	106,940	4528	8·81	42·34
Ditto, 1871	712,263	89,921	4715	6·62	52·43
Ditto, 1881	849,438	99,824	5732	6·75	57·42
New Zealand, 1874	320,687	43,853	2828	8·81	64·48
Ditto, 1881	..	60,123	3281	6·65	54·57
Tasmania, 1881	117,314	11,889	856	7·29	71·99
Ditto, 1882	120,701	* 12,222	969	8·03	79·28

* Estimated.

It may still be matter open for consideration, however, whether the presence of marriageable males in large numbers in any locality may not in itself indicate more than usual activity in local industries, causing prosperity and its usual concomitants.

It will be seen from the comparison that during the years 1881 and 1882 the marriage-rate in Tasmania is higher than in Victoria or New Zealand, whether calculated in relation to "marriageable males" or to "total population."

The following table shows in the order of the higher marriage-rate the principal Districts and Divisions in Tasmania for the year 1882; viz.—

	Marriages.		Marriages per 1000 persons.
Urban Districts—			
Launceston	218	...	12·61
Hobart	298	...	10·60
Total Urban Districts	516	...	11·37
Country Districts—			
North-Western Division	136	...	7·15
South-Western Division	24	...	6·62
North-Eastern Division	106	...	5·76
South-Eastern Division	102	...	5·52
Midland Division	85	...	5·36
Total Country Districts	453	...	6·01
Total for Tasmania	969	...	8·03

Thus the marriage-rate in the two Urban Districts exceeds that in the Country Districts by 89·2 per cent. No doubt the absence of officiating clergymen in many country districts cause a higher rate in the urban districts than would otherwise occur. On closer examination it will also be observed that upon the whole the Northern districts show a higher marriage-rate than the Southern, the Midland district taking up the lowest position. If the conclusions indicated by the Registrar-General of England be of value as regards the subdivisions of a country, it would indicate that the mining centres of the North have locally, by their greater prosperity, influenced the marriage rate.

The following is the order of Religious Denominations, &c., in relation to the number of Marriages celebrated by each:—

	No.		Per cent. to Total.
Church of England	309	...	31·90
Congregationalists	170	...	17·54
Wesleyan Methodist Church	130	...	13·42
Church of Rome	129	...	13·33
Free Church of Scotland	74	...	7·63
Church of Scotland	59	...	6·10
Baptist Church	37	...	3·81
Primitive Methodist Church	36	...	3·71
United Methodist Free Church	9	...	·92
Christian Mission	7	...	·72
Wesleyan Free Church	4	...	·41
By Deputy Registrars	2	...	·21
Jewish Church, 1; Society of Friends, 1; Church of Christ, 1	3	...	·30
	969		100·00

VACCINATION.

The number of persons vaccinated during the year is 1718—1674 being successful. The number vaccinated during 1881 is 12,870. This shows a great falling off, and proves the value of the remarks made by my worthy predecessor, Mr. Nowell, in last year's report, where he states (p. 6, Vital Statistics): "When the fears of the people are strongly excited by the near approach of small-pox, and the danger of its actual coming to their homes, they will be eager to rush to the vaccinator, but when the panic is over they at once relapse into their usual state of apathetic indifference." It is to be hoped that the better provisions of the new Act, which came practically into force in the beginning of this year, will produce better results in the future.

REGISTRATION.

During the year 1882 there have been added to the Tasmanian Registers 7987 names, as follows:—

	No.
Persons married	1938
Births	4043
Deaths	1906
	7987

There were issued during the year 289 certificates of births and deaths, and the searches made number 226. The fees collected amounted to £66 8*s*.

PART IV.

INTERCHANGE.

Exports and Imports, (pp. 104-145.)

The total colonial and foreign trade of Tasmania for 1882, as represented by imports and exports, is shown as follows:—

	£	*Per head.* £ *s.* *d.*
Imports	1,670,872	13 16 10
Exports	1,587,389	13 3 0
Total	3,258,261	26 19 10

Taken together, the imports and exports for 1882 greatly exceed in value those for any previous year, if we exclude the two exceptional years 1853 and 1854, when, from adventitious circumstances, Tasmania became the emporium of Australian trade. As compared with the year 1881 the imports show an increase of £239,728, or 16·75 per cent.; and the exports an increase of £31,813, or 2·04 per cent.

There are various disturbing influences in making comparisons between any two particular years; and the only satisfactory mode of measuring the tendencies of trade by the means of export and import values is to compare the means of successive periods of greater duration than one year. The following table has been prepared upon this method. The extent and general tendency of our export and import trade of Tasmania during the last sixty-one years, with the exception of the first and last broken periods, is based upon the mean yearly value of each succeeding quinquennial period; thus:—

MEAN Yearly Value of successive Quinquennial or lesser periods since 1822.

	Mean Yearly Value.			*Mean Yearly Value of both Imports and Exports per square mile.*
	Imports.	*Exports.*	*Both.*	
	£	£	£	£
Years 1822-25 inclusive	47,029	30,249	77,278	2·94
Years 1826-30 ditto	204,248	93,805	298,153	11·37
Years 1831-35 ditto	421,913	195,364	617,277	23·54
Years 1836-40 ditto	711,916	616,798	1,328,714	50·68
Years 1841-45 ditto	621,649	496,783	1,118,432	42·66
Years 1846-50 ditto	622,451	569,255	1,191,706	45·45
Years 1851-55 ditto	1,587,994	1,358,728	2,946,722	112·41
Years 1856-60 ditto	1,254,824	1,174,027	2,428,951	92·65
Years 1861-65 ditto	876,902	936,263	1,813,165	69·16
Years 1866-70 ditto	870,387	804,312	1,674,699	63·88
Years 1871-75 ditto	1,027,232	913,231	1,940,463	74·01
Years 1876-80 ditto	1,280,637	1,355,336	2,635,973	100·57
Year 1881	1,431,144	1,555,576	2,986,720	113·91
Year 1882	1,670,872	1,587,389	3,258,261	124·29

From the above table we can readily recognise five distinct periods marking the upward and downward tendency of the colonial and foreign trade of Tasmania.

The first period had a duration of 16 years (1825—1840) in which the combined values of imports and exports increased at an average rate of £2·98 *per square mile per year;* the second period, from 1841 to 1850 inclusive (10 years), when the values gently declined at the average rate of £0·52 *per square mile per year;* the third period, from 1851 to 1855 inclusive (5 years), when, owing to the gold discovery in Victoria, the values suddenly increased at an average rate of £13·39 *per square mile per year;* the fourth period, from 1856 to 1870 (15 years), marks an interval covering many important changes in the internal and external affairs of the Colony; among which may be noticed the withdrawal of English troops, and the consequent lessening of Imperial expenditure and local consumption. At the same time the temporary advantage gained during the former period (the third) was gradually passing away owing to the rapid development of Victoria. This Colony during the early part of the fourth period was largely dependent upon Tasmania for agricultural products, but notwithstanding its increasing population agriculture made progress in Victoria at a greater proportionate rate, and the effect of which was, ere the fourth period closed, to convert the principal consumer of our surplus agricultural products into one of our most formidable rivals in the grain markets of Australia.

It is not surprising, therefore, to find that during the interval of the fourth period the value of our export and import trade gradually declined at an average rate of £3·23 *per square mile per year;* and that the close of it was marked by general depression, financial difficulties, and even (1870) a decline in population.

From 1870 we enter upon the fifth period, when, owing to the introduction of railways, the eradication of scab in sheep, but principally to the discovery and development of our tin and gold resources, there has been a continuous upward tendency, at an average rate of £5·03 *per square mile per year.*

Although the total nominal value of imports and exports during the years 1853-4 respectively exceeds even the nominal value of imports and exports during 1882, it must not be inferred that the greater value is a fair index of the relative productiveness of the two periods so far as Tasmania is concerned; for if we analyse the exports during 1854, we will find that of the £1,428,629 total exports there was only a sum of about £838,000, or about 58 per cent. of the whole, representing the actual manufactures or produce of Tasmania; the remainder, equal to 42 per cent. of total exports, being re-exports the produce of manufactures of other countries. It is also important in making comparisons to note that the effect of enhanced prices during the gold-rush period, was such that the quantities then exported at a nominal value of £838,000 would only represent about £555,580 of the same class of goods exported during the year 1882. From these considerations, notwithstanding the larger nominal values of 1853-4, it is clear that Tasmania, in the year 1882, not only supplies locally a population of double the number, but, in addition, she exports in the same year goods (the produce of the Colony) which, though only of the nominal value of £1,578,517, actually represents about three times the extent of the produce of the Colony exported in 1854.

Thus it is shown that mere references to figures, without careful analysis and qualification, are apt to lead to very erroneous conclusions. Before satisfactory comparisons can be made as regards production and balance of trade, it is necessary among other things to study the approximate effects produced by—

1. The various methods employed by importers, exporters, and Customs authorities in declaring nominal values.
2. The effect of different tariffs and prices, and the local effects of seasons or unusual disturbances.
3. The stimulating effects of foreign loans for the construction of public works such as railways, roads, and bridges,—first upon imports during construction, and afterwards upon exports, which are gradually augmented by returns from the newly created centres of production, in which of course are included exports representing the interest upon foreign loans so expended.
4. The relative proportion of goods imported for home consumption and goods destined for re-export in the same or in a different form, and in regard to the latter to note the probable increase in value due to the employment of local capital and labour, and local products.
5. The relative proportion of local and foreign products and manufactures in total exports.
6. The allocation and distribution of the values due to shipping and commercial transit agencies.
7. The effects of natural resources; and in ratios, the effects of density of population and the extent of area.

These observations are sufficient to show that the interpretation of what may be considered the simple figures of ordinary statistical tables require some degree of care and skill. No table, however apparently simple, can be properly interpreted without qualification and discretion.

The nature and value of imports for the year 1882 are shown in the following table; and in order that the tendency of the last decade may be more comprehensively manifested, the various items are contrasted not only with the previous year 1881, but also with the first year of the decade 1873: thus—

CLASS.	1882.	1881.	1873.	1882, *Increase or Decrease, compared with*			
				1881.		1873.	
				Increase.	*Decrease.*	*Increase.*	*Decrease.*

As might be expected, the principal increase, nearly 170 per cent., within the decade, is in the imports of Art and Mechanic Productions, which largely consist of machinery, tools, and implements. The following is the order of the classes of imports in regard to the greatest increase within the last decade:—

1. Art and Mechanic Productions.
2. Animal and Vegetable Substances (chiefly timber and paper).
3. Textile Fabrics and Dress.
4. Minerals and Metals.
5. Food, Drinks, and Stimulants.

There has been a considerable decrease in the importation of Live Animals and Plants, which, together with Stock Returns, indicate that the local sources of production have more adequately met the demands of an increasing population.

Upon the whole, the value of imports during 1882 exceeds that of 1881 by £239,728, or 16·75 per cent.; that of 1873 by £563,705, or 50·91 per cent.; and that of the average of the decade 1873-82, by £365,262, or 27·98 per cent. This continuous upward tendency within the decade is most gratifying, and the period may well be termed that of the renascence of the commercial history of Tasmania.

Direction of Imports.

It is difficult to arrive at the value of the import trade in respect of any particular country, the custom being to refer all imports, whether transhipments or re-exports, to the last port of clearance. Owing to the increasing facilities offered by steam communication, direct trade with Tasmania is falling off in favour of indirect trade, principally through Victoria, which, from its geographical position, is our nearest point of junction with the great oceanic lines of steamers with Europe. The per-centage proportion of imports received through the last port of clearance is given as follows:—

Imports—Direction.

	1882.	1881.	Average of Decade, 1873—1882.
United Kingdom	22·69	23·77	30·05
Victoria	60·98	60·05	54·37
New South Wales	6·42	7·52	6·42
Other British Colonies	8·65	8·12	8·64
Foreign Countries	1·26	0·54	0·52
Total Imports.....	100·00	100·00	100·00

Thus, so far as imports are concerned, there has been a decided falling off proportionally in the direct trade with England, which has been diverted by the agencies already referred to in favour of indirect steam communication, principally *viâ* Victoria. It is estimated that of the £1,018,865 which is nominally set down as imports from Victoria, only about 24 per cent. is the actual produce of that Colony. The remainder—76 per cent.—being somewhat as follows:—

Re-exports, the produce of Great Britain and other Countries	39 per cent.
Transhipment, ditto.....	37 ditto
	76 ditto

Exports—Direction and Extent.

The nature and value of Exports for the year 1882, together with comparisons with the years 1873 and 1881, are given as follows:—

CLASS.	1882.	1881.	1873.	1882, Increase or Decrease, compared with 1881.		1882, Increase or Decrease, compared with 1873.

The following table gives the per cent. proportion of Exports to various countries, so far as the Customs return "Entered out for" gives indication of the ultimate destination of the various articles.

Gold, Tin, and Wool alone make up fifty per cent. of our export trade, and the greater portion of the articles named, although ultimately shipped for the United Kingdom, are in the following table referred to the immediate ports for which the vessels were "cleared."

Exports—Direction.

	1882.	1881.	Average of Decade. 1873–1882.
United Kingdom	24·95	32·92	41·98
Victoria	32·79	30·20	27·38
New South Wales	35·40	28·82	21·15
Other British Colonies.....	6·83	8·01	9·40
Foreign Countries	0·03	0·05	0·09
Total Exports.....	100·00	100·00	100·00

It will be observed, in comparing the relative figures of the average of the decade with those of 1882, that direct trade with England has greatly fallen off in favour of indirect trade *viâ* New South Wales and Victoria. The former Colony's trade with Tasmania has wonderfully expanded within the decade. During the earlier part the order of importance of the principal countries was as follows:—1. United Kingdom; 2. Victoria; 3. New South Wales. In 1882 this order was completely inverted, New South Wales taking up the first position. No doubt the New South Wales tariff favours the export thither of our jams, fruit, and other natural products, and our tin trade, which ultimately is destined for the English market, naturally follows the general trade.

From the foregoing tables it will be perceived that the value of exports during 1882 exceeds that of 1881 by £31,813, or 2·04 per cent., and exceeds the first year of the decade (1873) by £693,833, which represents an increase of 77·65 per cent. This remarkable expansion within the decade is clearly shown to be the result of the discovery and development of our mineral resources (tin and gold), which began to assume importance as an export in the year 1876. No better index of the effect of this new industry upon our export trade can be got than that of the comparison of its per-centage to total exports in the years 1873 and 1882 respectively. In the former year Class V.—Minerals and Metals,—only represented 1·74 per cent. of total exports (£893,556), while in 1882 the same class actually represents 32·94 per cent., or nearly a third of the total exports, which amounted to £1,587,389. In relation to area within the same period, the total imports increased from £34·08 per square mile to £60·55 per square mile; and in relation to population, the increase is equal to £4 10*s.* 5*d.* per head of the mean population of Tasmania in the year 1882.

While, for the purpose of measuring the progress of external trade, it is necessary to employ some common standard,—such as "per head of population," or "per square mile,"—it cannot be too strongly impressed that inferences as regards the internal progress of a country, based upon the extent of our external trade, as indicated by the ratios "per head," are often widely erroneous. The extent of an external trade depends, primarily, as much upon the number of our own wants as upon the extent of our powers locally to provide for them. Thus it is conceivable that the most savage and the most civilised countries might equally have a very small external trade as indicated by "per head" of population or otherwise. In the savage state this result would be chiefly due to the lack of knowledge and paucity of wants. In the other, the like result would be chiefly due to the perfection of powers within its own borders to supply nearly all local wants.

If this be conceded, we are also better enabled to understand how it is that, in the earlier stages of a colony's history, the "rate per head" of external trade is invariably higher than in its later and more developed stage, even although upon the whole there was a steady progress in the absolute values of Imports and Exports. In truth, under such circumstances, the test of the progress of external trade by "rate per head," unless taken into consideration with the "extent of territory per head," is utterly fallacious. As a general rule, the larger the extent of territory per head,—*i.e.*, the less dense the population,—the greater will the rate "per head" be as regards the value of Exports when reckoned per square mile of territory. It will be seen that those countries which are most densely populated have also the greatest relative value of Exports when reckoned per square mile of territory, and this mode of comparison, taken by itself, is not so apt to mislead as when measured by the factor "per head."

The following Tables, I., II., III., and IV., show more significantly the effect of making comparisons between different places; *e.g.*, Western Australia, with 31,798 square miles of territory for every 1000 persons, exports, in the year 1882, produce of the Colony to the extent of £19 2*s.* 2*d.* per head of its population; while Victoria, with 97 square miles of territory to every 1000 persons, only exports produce of the Colony to the extent of £14 2*s.* 4*d.* per head. It is also true, however, that Victoria has the premier position, and with 10·31 persons per square mile, exports produce of the Colony during the year 1882 to the extent of £143·03 per square mile; while Western Australia, with 0·03 persons per square mile, only exports during the same year to the extent of £0·59 per square mile of territory.

It is gratifying to note that Tasmania, in reference to exports of local produce and manufactures, stands second among the group of Australasian Colonies (£60·21) in respect of value *per square mile of territory*, and a good third (£4·67) in respect of density of population, being only less dense than the second in order of density (New Zealand) by 0·28 persons per square mile.

Carriages, waggons, &c. .....No.	141	232	373	142	247	389

* Also includes the cost of third rail Evandale to Launceston.

It is reported that no serious casualty has occurred during the year, and that no passenger has been killed by any accident since the lines were opened for traffic. This is surprising, seeing that in the year 1882 alone it is estimated that the distance travelled on rail by passengers is equivalent to 5,893,810 miles travelled by one person.

Tramways—(p. 160.)

Besides the Railways there are also two important horse tramways, belonging to private companies, open to the public for traffic, one of which, the Emu Bay Tramway, is about to be converted into a 3ft. 6in. railway, suited for ordinary steam locomotives. No particulars have been furnished with reference to former periods, and consequently comparisons cannot be made. The following particulars are given, which may be studied with much advantage by all who are interested in opening up mining or thinly-populated districts where it might be considered premature to maintain a regular train service, with the more costly gradients, curves, and rails suited for steam motors:—

1882.

	Don Tramway.	*Emu Bay Tramway.*	*All Tramways.*

Ditto, per mile	2400	1871	1983

[b] Passengers carried free by the Don Company.

Maintenance of Roads—(p. 160.)

There are 4538 miles of Road maintained throughout the Island, 3834 of which are under the control of local Road Trusts, while 704 miles, principally macadamised, constitute the Main Road connections, which are maintained and controlled by Main Road Boards working directly under the regulations of the General Government.

The cost of maintaining the roads under the Road Trusts during the year 1882 was £15,228, or £3·97 per mile. Towards this expenditure, £6885, equal to 45·2 per cent. of the total expenditure, was advanced during the year by the General Government as a grant in aid; the remainder is provided for by the levy of a local road rate, which on the average amounted to a collection of 6·31 per £ of the value of the property within the various Road Districts, which is estimated at £423,520 for 1882.

The cost of maintaining the Main Roads during the year was £11,297, or £16·04 per mile. Thus about 68 per cent. of the whole maintenance of Roads throughout the Island falls upon the General Government.

Post Office—(pp. 161-163.)

During the year 1882, the business of the Post Office, as indicated by the numbers of letters, packets, and newspapers, &c. received and dispatched, and the extent of service, has increased very

materially as compared with previous years. This is shown in the following table, which gives also, for purposes of comparison, the figures relating to 1881 and 1873:—

	1882.	1881.	1873.	Increase 1882 as compared with 1881.	Increase 1882 as compared with 1873.
Business.					
Letters received and despatched ... No.	3,363,331	2,994,148	1,397,011	369,183	1,966,320
Packets ..... No.	227,156	187,555	44,913	39,601	182,243
Newspapers ..... No.	2,257,018	2,049,949	1,204,292	207,069	1,052,726
TOTAL	5,847,505	5,231,652	2,646,226	615,853	3,201,279
Service.					
Post Offices ..... No.	209	206	154	3	45
Miles travelled by Mail Conveyance, No.	692,970	689,100	371,000	3870	321,970
Receipts and Expenditure.					
Receipts	22,917	20,143	11,500	2774	11,417
Expenditure	32,095	29,613	16,792	2482	15,303

Thus the letters, packets, and newspapers have increased 11·77 per cent. as compared with 1881, and 120·97 per cent. as compared with 1873, the first year of the decade just ended; while the service during 1882, as indicated by miles travelled by mail conveyances, has increased 8·38 per cent. as compared with the previous year, and 91·13 per cent. as compared with 1873.

The receipts, £22,917, for 1882 fall short of expenditure by £9178, but exceed the receipts of the previous year by £2774, or 13·77 per cent., and exceed the receipts of 1873 by £11,417, or 99·28 per cent.

The expenditure, £32,095, has also increased correspondingly with the increase in business and the extended mail service. It exceeds 1881 by £2482, or 8·38 per cent., and the year 1873 by £15,303, or 91·13 per cent.

The following comparison shows the expenditure for the three years referred to, as reckoned by the extent of miles travelled by mail conveyance:—

	1882.	1881.	1873.
	d.	*d.*	*d.*
Expenditure per mile travelled by mail conveyance	11·11	7·01	7·44

The relative increase of 4·01*d.* per mile as compared with 1881, and 3·67*d.* per mile as compared with 1873, may in part be accounted for by the fact that the expense of the new Post Office Savings Bank system has been included for the first time in the year 1882.

Post Office Money Orders—(pp. 162-3).

The Money Order branch for the year 1882 shows still more remarkably the wonderful growth in the transactions of the Post Office during the decade.

Money Orders issued and paid, and Total Amount of Transactions, 1873 *and* 1882.

		1882.	1873.	Increase.	Decrease.
Orders	No.	51,743	12,106	39,637	
Transactions	Amount £	168,087	45,301	122,786	
Average Amount per Order ...	„ £	3·24	3·74	..	0·50

Thus it will be seen that since the year 1873 the number of Orders has increased as much as 327 per cent, and the gross amount of transactions has increased 271 per cent. This is a wonderful expansion within ten years. The value of each Order on the average, as might be anticipated, is slightly lower in 1882.

Telegraph System—(p. 164.)

The Tasmanian Telegraph System is rapidly extending year by year. In 1873 there were only 481 miles of line, including the Cable between Tasmania and Victoria. In 1882 the number

of miles of wire, including Cable, was 1497; that is an increase of 211 per cent. within the decade. The following table gives full particulars of the various systems of Telegraph in abstract form, for the year 1882:—

Particulars regarding the Tasmanian Telegraph System for the Year 1882.

	Government Telegraphs.		*Main Line Railway Telegraphs.*	*Cable Company.*	*Total Tasmania.*

* Includes one Office open for the transaction of Railway Telegraph business solely. † Includes 10,000 Shipping Messages (estimated).

It is satisfactory to note, notwithstanding that about 23 per cent. of the business consists of "free messages," the profit on working, upon the whole, represents 4·25 per cent. of the capital expended in construction and equipment.

Rates of Provisions, Wages, &c.—(pp. 165—168.)

It is difficult to compare the rates and prices of different years. The Tables referred to show a very inconsiderable variation from the prices and rates of the previous year.

PART V.

FINANCE.

The tables, as grouped under this Part, are intended to give a clear and comprehensive view of the Finances of the Government of the Colony, whether General or Local, and for convenience they have also been arranged according to the following subdivisions:—

I. Finances relating to General Government.
II. Finances relating to Local Government.
III. Finances relating to General, Local, and Imperial Government.

The first subdivision relates chiefly to Treasury and Departmental receipts and expenditure in connection with general purposes; the second subdivision relates to the revenue and expenditure of local bodies such as Road Trusts, Municipalities, Marine Boards, and such like which have the power to levy taxes for local purposes; and the third subdivision deals with the aggregates of such matters as are common to both General and Local Government. It is requisite that the matters relating to General and Local Government should be studied together, inasmuch as certain functions of the State are at one time placed under the control of the General Government, and at another time these same functions may be distributed under the control of several local bodies. In the

Australasian Colonies too, for the most part, certain functions, such as the construction and maintenance of railways, are managed by the State. In other countries these functions are carried out only to a limited extent by the General Government, or they may be left altogether to private enterprise, as is the case in England. In comparisons made at different times and with different countries it is necessary to have these considerations exactly determined. For example,—in comparing the Public Debt of the Australasian Colonies with England, it should be considered that of the £99,219,682 stated as the Public Debt of the former on 31st December, 1882, nearly the whole of £63,138,617 should be eliminated as representing the cost of railway construction, now yielding a yearly profit of about four per cent. (3·62 per cent. during 1882) on cost of construction; and the prospective value of the railway lines alone, regarded as an asset, may fairly be considered to cover the whole of the Public Debt of the Australasian Colonies.

These, and somewhat analogous considerations, also justify the course adopted in classifying the various sub-groups.

I.—Finances relating to General Government.

As pointed out by Mr. Nowell, p. xxi. Statistics of Tasmania, 1881, there is considerable difficulty in dealing with the financial statement in respect of any one year until a period of one clear year has elapsed after the close of the nominal period. This is especially the case in respect of expenditure, because the law determines that all moneys provided and authorised to be expended in respect of any one year may be actually drawn upon up to the 31st December of the following year; and charged to the account of the year in which the particular expenditure was authorised, and not against the year in which they were disbursed by Treasury. The Treasury Statement of General Expenditure made up to the 31st March of the following year is only approximately correct, because an estimate has to be made of all outstanding accounts chargeable against the year which may be passed for payment during the following nine months. The Statement of General Revenue is not thus affected, and in nearly all cases may be taken as final. Receipts and expenditure in connection with Loans Account are final, as the moneys are taken to account according to the actual date of Treasury receipts and disbursements.

General Revenue—(pp. 176-180).

The General Revenue for the year 1882 amounts to £551,215 15*s.*, and greatly surpasses that of any previous year, exceeding the Revenue of the previous year by £46,205 8*s.* 10*d.*, or 9·15 per cent., and that of the year 1873 by £226,955 7*s.* 6*d.*, or 69·99 per cent.

The following table shows the extent of the increase under the principal divisions as compared with the years 1873 and 1881 :—

SOURCE OF REVENUE.	1882.	1881.	1873.	*Year* 1882 *compared with*			
				1881.		1873.	
				Increase.	Decrease.	Increase.	Decrease.
	£	£	£	£	£	£	£
Taxation.			Numerical.				
Customs	288,523	254,591	167,996	33,932	...	120,527	
Beer, Land, and Dividend Taxes	33,094	49,086	...	...	15,972	33,094	
Other Taxes	49,239	41,046	24,233	8193	...	25,006	
Total Taxation	370,856	344,723	192,229	26,133	...	178,627	
Special Public Services. Railways, Post Office, Telegraphs, &c.	81,220	70,776	43,566	10,444	...	37,654	
From Buildings, Land, and Public Investments. Rents, Sales, &c.	80,643	71,588	65,731	9055	...	14,912	
From other sources—Miscellaneous	18,494	17,919	22,731	575	...	....	4237
Total Revenue	551,213	505,006	324,257	46,207	...	226,956	
			Centesimal.				
Taxation	67·28	68·26	59·28	7·58	...	92·92	
Special Public Services	14·74	14·01	13·44	14·76	...	86·43	
From Buildings, Land, and Public Investments	14·63	14·18	20·27	12·65	...	22·69	
From other sources	3·35	3·55	7·01	3·21	...	...	18·63
	100·00	100·00	100·00	9·15	...	69·99	

Thus of the £551,213 General Revenue collected on account of the year 1882, taxation contributed 67·28 per cent.; special public services, such as railways, telegraphs, postal, &c., contributed 14·74 per cent.; buildings, land, and other public investments, 14·63 per cent.; and other sources of revenue, 3·35 per cent.

Upon the whole it will also be observed that there is an increase of 9·15 per cent. (£46,207) as compared with the previous year, and as compared with the first year of the decade there is an increase nearly equal to 70 per cent. (£226,956). Since 1873 the revenue from taxation has nearly doubled itself (92·92 per cent. increase); revenue from public services has increased 86·43 per cent.; and the revenue from buildings, lands, &c. has increased 22·69 per cent. The only decrease within the decade is trifling—£4237—confined to miscellaneous items, such as reimbursements, &c., which, upon the whole, only represent 3·35 per cent. of the total General Revenue.

It would also appear that the first two sources of revenue have within the decade increased their relative contributions to the total revenue from 72·72 per cent. to 82·02 per cent. of the total revenue, the revenue derived from the last two sources not having increased during the period at a corresponding rate. It might be considered, however, that the increase within the decade, viz., £226,956, is not wholly due to improvement in trade, because certain taxes (Beer, Land, and Dividend Tax, £33,094), representing 7·82 per cent. of the total revenue of 1882, only came into force in the year 1880, and at least to that extent the total increase is indebted to the creation of a new source of taxation; but notwithstanding this, the per-centage increase stated can be shown to be fairly due to the improvement in trade, for in the year 1873 there was a special item of £27,000, representing 8·3 per cent. of the revenue of that year.

In this Colony the revenue from Customs alone, for the year 1882, contributed £288,523, or 52·35 per cent. of the total General Revenue, equal to £2 7*s.* 8*d.* per head, and it is therefore interesting to note more particularly to what extent certain imports contribute to this important branch of revenue. The following table shows to what extent the various classes of goods contributed in this respect:—

Customs.

Per-centage revenue contributed by the various classes of goods during 1882:—

	Per cent. to Total Customs.
Class I. Art and Mechanic Productions.....	10·62
Class II. Textile Fabrics and Dress.....	18·91
Class III. Food, Drinks, &c.....	59·57
Class IV. Animal and Vegetable Substances	5·75
Class V. Minerals and Metals	2·84
Class VI. Live Animals and Plants	0·60
Class VII. Miscellaneous and indefinite	1·71
Total Customs Revenue	100·00

Thus Food, Drinks, and Textile Fabrics together contribute more than three-fourths (78·48 per cent.) of the whole revenue from Customs.

If we examine more closely the orders or subdivisions of classes of goods according to their importance as sources of revenue, we obtain the following results:—

Order of Subdivisions of Classes according to their importance as sources of Revenue.

	Per cent, to Total Customs Revenue.
1. Drink.....	23·78
2. Textile Fabrics and Dress.....	18·91
3. Vegetable Food, including Sugar	13·62
4. Tobacco	12·71
5. Stimulants not otherwise mentioned	9·15
6. Machines, Tools, Implements, &c.	5·92
7. Vegetable Substances—raw materials.....	2·53
8. Oils.....	2·18
9. Chemicals, (includes Matches, Paints, &c.)....	1·66
10. Metals other than Gold and Silver	1·40
11. All other articles each of which contributes less than one per cent. to total Customs Revenue	8·14
	100·00

Thus drink alone contributes most largely (23·78 per cent.) to the Customs Revenue, although its total amount only represented 4·3 per cent. of total value of the imports, and notwithstanding that the tax is equal to 96·45 per cent. of the actual value of the article.

The order of the greatest tax, relative to value, of 20 of the most highly taxed articles, is given below, as regards the year 1882:—

	Tax per-centage to Import Value.
1. Tobacco	157·09
2. Drink	96·45
3. Arms, Ammunition	51·22
4. Various Stimulants, including Tea	37·07
5. Oils	35·33
6. Building Materials	20·01
7. Vegetable Food, including Sugar	19·79
8. Animal Substances not Food	17·98
9. Mean Value of all articles	17·55
10. Vegetable Substances not Food	10·76
11. Carriages, Harness, &c.	10·23
12. Live Animals and Plants	10·11
13. Musical Instruments	10·04
14. Furniture	10·00
15. Tackle for Sports and Games	10·00
16. Prints and Pictures	9·96
17. Textile Fabrics and Dress	9·50
18. Stone, Clay, and Earthenware	9·27
19. Machines, Tools, and Implements	8·91
20. Chemicals	7·70

The inclusion of articles free of duty in the value of imports explains the variations from nominal rates of duty within each division.

General Expenditure.

The General Expenditure on account of the year 1882, made up to 31st March, 1883, including Interest on Loans, amounts to £502,770 14*s.* 1*d.*,* or a sum equal to £4 3*s.* 4*d.* per head of population. In order that the proportion of the expense of each separate function, discharged by the General Government should be properly estimated, it is necessary to distribute the yearly interest paid on Loans against each function according to the extent and the direction in which the proceeds of the various Loans were applied. This has been carried out in Abstract of Expenditure, p. 176, a synopsis of which is given below.

General Expenditure, 1882—pp. 176-182).

	Expenditure.		*Total.*	*Per cent. to Total.*	*Amount per Head.*
	Direct Charges.	*Interest on Loan.*			
	£	£	£		s.
General Administration	57,514	—	57,514	11·44	9·53
Law and Protection	54,066	2102	56,168	11·17	9·31
Religion, Science, and Education	28,997	6509	35,506	7·06	5·88
Charities	46,270	—	46,270	9·20	7·67
Special Public Works and Services—					
Railways (construction & maintenance)	67,194	28,805	95,999	19·09	15·91
Post Office (ditto)	31,992	—	31,992	10·21	8·51
Telegraphs (ditto)	15,614	3753	19,367		
Scab Inspection	2322	—	2322	0·46	0·38
Lands, Mines, and Works control	28,846	—	28,846	5·74	4·78
Roads, Bridges, Buildings construction	48,393	41,337	89,730	17·85	14·87
Immigration	—	10,102	10,102	2·01	1·67
Various special Services	1276	12,679	13,955	2·78	2·31
Total Special Public Works and Services	195,637	96,676	292,313	58·14	48·43
Estimated Outstanding Expenditure	15,000	—	15,000	2·99	2·48
Grand Total	397,484	105,287	502,771	100·00	83·30

* £15,000 of this sum, or 2·99 per cent., is estimated outstanding expenditure, and may be slightly under or over-stated, but in any case its inclusion does not materially affect comparisons.

It would appear from this Table that the order of the more costly functions of the General Government are as follows:—

	Per cent. to Total Expenditure.
1. Special Public Works and Services	58·14
2. General Administration	11·44
3. Law and Protection	11·17
4. Charities	9·20
5. Religion, Science, and Education	7·06
6. Outstanding Expenditure	2·99

With regard to the first item, however, it is desirable to point out that the revenue derived from Public Services should be placed as a set-off against it, the amount of which,—£81,220,—would materially reduce the relative cost of Special Public Works and services. For example,—although the service for Railways, Telegraphs, and Post Offices for the year costs a sum equal to £1 4*s.* 4*d.* per head of population, or 29·30 per cent. of the total expenditure for the year, yet the revenue from these sources is gradually increasing, and for the year 1882 represented 10*s.* per head of the population,—*i.e.*, already it amounts to 40·9 per cent. of the total expenditure in connection with such services.

The information necessary for distributing the interest on loans is not available, so far as past years are concerned, and the comparison with former years is based upon the classification which regards interest as a separate item of expenditure, irrespective of the functions or service against which it more properly belongs as a charge.

The following synopsis shows the expenditure for the year 1882 (*see* Table, p. 182), under various heads, in comparison with the year 1873 and the year 1881:—

Expenditure, 1873, 1881, *and* 1882 *compared*—(p. 182).

NUMERICAL.

	Expenditure.			1882. † *Increase or Decrease as compared with*

TOTAL	100·00	100·00	100·00	8·49	65·41
General Expenditure per head	...	...	...	5·37	41·44

† Where the sign − is placed, it indicates a decrease; where there is no sign, an increase is implied.

* Owing to the distribution of miscellaneous items of expense in 1882, formerly included in one item under Special Public Works and Services, the nominal increases as shown against particular heads should be modified as follows:—

				Per cent.
[d] General Administration, 1882, increase as compared with			1873	21 49
[a] Ditto	"	"	1881	8·53
[e] Law and Protection	"	"	1873	6·08
[b] Ditto	"	"	1881	1·12
[f] Special Public Works and Services	"	"	1873	209·41
[c] Ditto	"	"	1881	9·76

Briefly, therefore, we perceive that the General Expenditure of 1882 exceeds that of the previous year by £39,087, or 8·49 per cent., and exceeds that of 1873, the first year of decade, by £198,824, or 65·41 per cent. Of the latter increase nearly 80 per cent. is due entirely to the construction and maintenance of Railways, Roads, Bridges, and other necessary Public Works.

Balance of Revenue and Expenditure.

The total General Revenue for the year 1882, as estimated on 31st March, exceeds the total General Expenditure by £48,442 0*s.* 11*d.*,—a sum equivalent to 9·64 per cent. of the total expenditure, or 8*s.* per head of population. The following Table shows the relation of General Revenue to General Expenditure during the last decade :—

	Revenue.	Expenditure.	Net excess of Revenue above Expenditure.	Net excess of Expenditure above Revenue.
	£	£	£	£
1873....	324,257	303,947	20,310	..
1874....	333,732	325,195	8537	..
1875....	342,606	336,090	6516	..
1876....	327,017	341,889	..	14,872
1877....	366,118	352,461	13,657	..
1878....	385,936	379,232	6704	..
1879....	375,570	481,215	..	105,645
1880....	442,158	415,196	26,962	..
1881....	505,006	463,684	41,322	..
1882....	551,213	502,771	48,442	..
	£3,953,613	£3,901,680	£51,933	

Thus the aggregate Revenue for the last decade exceeds the aggregate Expenditure by £51,933.

The Expenditure exceeded Revenue only twice in this time, viz., 1876 and 1879. On the latter occasion, however, it was due entirely to the payment of the arrears of the guaranteed Interest to the Tasmanian Main Line Railway Company on the friendly termination of disputed claims covering the years 1876-7-8-9. The deficiency in 1876 is accounted for by the sudden cessation of the Launceston and Western Railway Districts' contribution towards payment of the Interest upon Railway Loan. It is satisfactory to note, as marking the buoyancy of sources of Revenue during the last three years of the decade, that the Revenue has exceeded the Expenditure by a sum of £116,726.

Loans Account.—Public Debt—(p. 178).

At page 178 will be found a Table giving a statement relating to Loans authorised, issued, and of the moneys raised, expended, and unexpended in connection with them. The following are some of the more important particulars :—

Loans authorised, 1882—	£
For the redemption of Loans falling due, 1883-4	181,300
Various Public Works	335,000
Immigration	30,000
Total	£546,000

	£
Total Loans authorised to 31st December 1882, less Loans redeemed...	2,050,600
Total Loans authorised to 31st December, 1882, not issued	435,750
Moneys raised on Loans to 31st December, 1882	2,024,533

	1882.	Aggregate to 31st Dec. 1882.	Per cent. to Total.
Loans actually expended—	£	£	£
Public Works :—			
Railways	167	553,743	29·36
Telegraphs	5452	70,223	3·72
Roads, Bridges, Jetties, and Harbours	69,845	476,519	25·26
Public Buildings	17,944	241,164	12·79
Defences	7052	35,896	1·90
Other Public Works	2194	32,429	1·72
Total Public Works	£102,654	£1,409,975	74·75
Other Public Purposes—			
Commutation of State Aid to Religion ..	..	100,000	5·30
Immigration	1870	198,800	10·55
Miscellaneous	..	..	9·40
Total other Public Purposes ...	£1870	£476,172	25·25
Total Loans actually expended	£104,524	£1,886,147	100
Balance of Loans Moneys raised, unexpended on 31st December, 1882	..	£138,386	..

The moneys expended from Loans in 1882 is equal to 20·79 per cent. of the moneys disbursed under General Expenditure for the same period.

The Public Debt on the 31st December, 1882, £2,050,600, although showing an increase of £47,600 as compared with previous year, is nevertheless 2*s.* less per head, owing to the greater rate of increase in population as compared with indebtedness.

Public Debt.

	Population on 31st Dec., 1882.		Debt.		Debt per Head.
1881	118,923	..	£2,003,000	..	£16 16*s.* 10*d.*
1882	122,479	..	£2,050,600	..	£16 14*s.* 10*d.*

II.—Finances relating to Local Government—(pp. 204-210.

Statistical Tables, pp. 204 to 210, deal with the finances of Local Bodies. The following gives a synopsis of the receipts and expenditure of each group for the year 1882 :—

	No.	Value of Rateable Property.	Revenue.				Expenditure.	Rates levied per £ on Rateable Property.
			From Rates' &c.	Government Aid.	Other sources.	Total.		
		£	£	£	£	£	£	
Marine Boards[a]	5	...	22,477	Nil.	5182[b]	27,659	26,022	...
Municipalities[d]	21	586,588	48,013	4949	42,153[c]	95,115[e]	103,217[f]	1*s.* 7*d.*[e]
Road & Bridge Trusts	76	423,530	11,139	6885	839	18,863	15,223	6·3*d.*
Rabbit Trusts.....	7	...	Nil.	Nil.	46	46	212	...
Public Cemeteries.....	7	...	Nil.	200	58	258	248	...
	116	[g]	81,629	12,034	48,278	141,941	144,927	...

[a] Includes Light-houses. [b] Receipts from other Governments. [c] Includes Water Rates. [d] Does not include Building Fund. [e] Includes receipts from Loans. [f] Includes repayments of Loans. [g] The same property may be rated both for Municipal and Road Trust purposes.

Thus the revenue of 116 Local Bodies during 1882 amounted to £141,941 from all sources, of which £12,034, or 8·47 per cent., was contributed by the General Government as grant in aid. The rates levied in Municipalities were equal to an average 1*s.* 7*d.* in the £ of the rateable property, and the Road Trust rate on the average only amounted to 6·3*d.* of the rateable property included within the boundaries of the various Trusts. This low average of Road Trust rate when compared with nominal rates, ranging from 3*d.* to 1*s.* per £, is no doubt due to the circumstance that certain Trusts do not levy a rate each year, although the collection in respect of the same seems to be distributed over more than one yearly period.

Of the £81,629 mentioned above, only £67,998, raised as rates and dues, can be legitimately included as taxation. The following is a summary of the same :—

	Taxation Local Government, 1882.		Per head.
			s.
Municipalities	£41,968	..	6·95
Marine Boards	14,891	..	2·47
Road Trusts	11,139	..	1·85
Total Taxation Local Government	£67,998	..	11·27

The Revenue and Expenditure for 1882, less Government aid, as compared with the previous year and with the first year of decade, is shown as follows :—

	1882.	1881.	1873.	Increase 1882 as compared with— 1881. Amount.	1873. Amount.
Revenue	£129,736	£124,812	£81,438	£4924	£48,298
Expenditure.....	116,798	110,254	76,387	6544	40,411
Municipal value Rateable Property	586,588	573,314	500,856	13,274	85,732

Thus Revenue has increased 3·95 per cent. as compared with 1881, and 59·31 as compared with 1873. Expenditure has increased 5·94 per cent. as compared with 1881, and 52·90 per cent. as compared with 1873; and value of Municipal rateable property has at the same time increased 2·31 per cent. as compared with 1881, and 17·12 per cent. as compared with 1873.

Finances relating to Government—General, Local, and Imperial.

Revenue and Expenditure—General and Local.

Taken together, and excluding the moneys transferred from General to Local Government, the total Revenue of General and Local Government for the year 1882 amounts to £680,949, being an increase over 1881 of £51,131, or 8·09 per cent., and an increase over 1873 of £275,254, or 67·85 per cent. The Expenditure for 1882 amounts to £635,569, exceeding 1881 by £61,631, or 10·74 per cent., and exceeding 1873 by £258,235, or 68·44 per cent. The Revenue for 1882 exceeded Expenditure by £45,370, equal to 7·13 per cent of total Expenditure.

Taxation—General and Local.

The total Taxation of the Colony, General and Local, for the year 1882 amounts to £438,854, equal to £3 12*s.* 9*d.* per head, or 64·45 per cent. of the whole Revenue for the same year. Of this sum £370,856, or £3 1*s.* 5*d.* per head, was raised by General Government, and £67,998, or 11*s.* 4*d.* per head, was raised by Local Government, as follows :—

	General Government. £	*Per cent. to Total.*	*Per head.* *s.*
Customs	288,523	65·75	47·81
Beer Duty	14,432	3·28	2·39
Land Tax	18,628	4·25	3·09
Dividend Tax.....	10,034	2·29	1·66
Rural Police Rate	4825	1·10	0·80
Licences	12,499	2·85	2·07
Stamp & Probate Duty.....	21,915	4·99	3·63
Total General Government	370,856	84·51	61·45

	Local Government. £	*Per cent. to Total.*	*Per head.* *s.*
Municipalities—Police and General Rate, &c..... ...	41,968	9·56	6·95
Marine Boards.....	14,891	3·39	2·47
Road Trusts	11,139	2·54	1·85
Total Local Government	67,998	15·49	11·27
Total Taxation—General & Local	438,854	100·00	72·72

The following is an abstract showing the gradual increase per head in Taxation since the year 1876:—General and Local Government, taxation per head—1876, 52*s.* 3*d.*; 1877, 55*s.* 2*d.*; 1878, 56*s.* 10*d.*; 1879, 53*s.* 7*d.*; 1880, 63*s.* 9*d.*; 1881, 69*s.* 6*d.*; 1882, 72*s.* 9*d.*

Since 1876 the taxes levied by General Government have increased £1 1*s.* 2*d.* per head, or 52·59 per cent., while the taxes levied by Local Government during 1882, although more than 1876 by £5324, have not increased at the same rate as population, as the rate is reduced to the extent of 8*d.* per head of population.

Such are the complexities introduced by the alteration in the tariff in 1880, and by the different mode of dealing with stamp duty, that it it is extremely difficult to estimate what proportion of increase is due to fresh taxation, and what proportion is due to the natural increase arising from increase in population and the more prosperous state of trade in 1882; but a rough analysis shows that of the increase in total taxation, (£160,245 in 1882, as compared with 1876,) about 30 per cent. is due to the former cause, and the remaining 70 per cent. to the latter.

PART VI.

ACCUMULATION.

Coinage and Accounts.

THERE is no Mint in Tasmania; and the coinage is that of the United Kingdom, which in all respects is similar to that used in the neighbouring Colonies. The accounts are accordingly kept in sterling money (£ *s.* *d.*) The limit of legal tender for silver is forty shillings; bronze pence, twelve (1*s.*); and bronze half-pence twelve (6*d.*) During the year 1882 our currency has been improved by the introduction of £16,000 worth of new silver coin. An additional £14,000 has been introduced during the current year, 1883; while £10,000 worth of silver coin has been withdrawn from circulation, and forwarded to the English Mint, for which the full nominal value has been received and paid into our Treasury.

Rates of Exchange.

The rates of exchange for Bank or mercantile bills is the same as in former years; viz.—

	London.	Victoria.	New South Wales.	South Australia.	Queensland.	New Zealand.
Average purchasing rate at sight or on demand—						
Discount, per cent.	—	¼	⅛	⅛	½	¾
Average purchasing rate at 60 days' sight	¼	—	—	—	—	—
Average selling rate at 60 days' sight ..	1	—	—	—	—	—
Ditto, at sight or on demand	—	½	⅛	1	1	¾

Rates of Discount.

The average rates of discount were the same as previous years; viz.—for bills having a currency of under 95 days, 6 per cent; for bills having a currency beyond 95 days, 7 per cent.

Interest on Fixed Deposits.

The Interest allowed during 1882 on Fixed Deposits was as follows:—From 1st January to 15th August, deposited for three months, 2 per cent.; for six months, 3 per cent.; for twelve months, 4 per cent. From 15th August to 31st December, for three months, 3 per cent; for six months, 4 per cent.; for twelve months, 5 per cent.

Banks.

There are five Banks of Issue in Tasmania during the year 1882, possessing 20 branches or agencies within the Colony. On the 31st December the total liabilities amount to £3,097,319 2*s.* 5*d.*, and the total assets amount to £2,989,928 4*s.* 11*d.* The liabilities thus exceeded assets by £107,390 17*s.* 6*d.* It should be stated here that the reason why liabilities exceed deposits is because a part only of the accounts of English Banks is related to Tasmania. The actual relation of liabilities to assets, so far as the English and local Banks are concerned, is shown as follows:—

1882.	*English Banks.*	*Local Banks.*
Assets in excess of liabilities.....	— ..	£346,381 7*s.* 9*d.*
Liabilities in excess of assets.....	£453,772 5*s.* 3*d.*	—

The following is a synopsis showing full particulars regarding assets and liabilities, together with comparisons with the former year 1881 and with the first year of the decade 1873:—

ASSETS.—NUMERICAL.

	1882.	1881.	1873.	1882			
				Compared with 1881.		*Compared with* 1873.	
				Increase.	*Decrease.*	*Increase.*	*Decrease.*
	£	£	£	£	£	£	
Specie and Bullion	505,836	516,515	251,134	...	10,679	254,702	—

	100·00	100·00	100·00	10·08	...	128·55	—
LIABILITIES.—NUMERICAL.							
Notes in circulation	162,265	139,458	101,851	22,807	...	60,414	—
Bills in circulation	46,047	4926	2282	41,121	...	43,765	—
Balance due to other Banks	24,710	11,271	4342	13,439	...	20,368	—
Deposits	2,864,297	2,600,112	858,785	264,185	...	2,005,502	—
	3,097,319	2,755,767	967,260	241,552	...	2,130,059	—
CENTESIMAL.							
Notes in circulation	5·24	5·06	10·53	16·35	...	59·32	—
Bills in circulation	1·49	0·18	0·23	834·77	...	1917·84	—
Balance due to other Banks	0·80	0·41	0·45	119·24	...	469·09	—
Deposits	92·47	94·35	88·79	10·16	...	233·53	—
	100·00	100·00	100·00	8·77	...	220·22	—

Thus, as regards assets in 1882, it is shown that there is an increase of £273,901, or 10·08 per cent., as compared with the previous year; and an increase of £1,681,694, or 128·55 per cent., as compared with the first year of decade 1873.

Compared also with the latter year, the following show large increases; viz.—Specie and bullion, 101·42 per cent.; landed property, 48·93 per cent.; balance due from other Banks, 518·33 per cent.; and debts due to Banks, 124·44 per cent.

As regards liabilities, it would also appear that, upon the whole, they have increased within the decade to a greater extent than the assets: for, while assets in 1882 have increased 128·55 per cent. since 1873, liabilities have increased 220·22 per cent. The following is a statement of the increases, in the order of the greater relative increase, as compared with 1873:—

Increases in Liabilities, 1882, *as compared with* 1873.

1. Bills in circulation ..... 1917·84 per cent. increase.
2. Balance due to other Banks ..... 469·09 „ „ „
3. Deposits ..... 233·53 „ „ „
4. Notes in circulation ..... 59·32 „ „ „

The following shows the relative value of the various items of assets for 1882 in the order of their importance:—

Assets, 1882.

1. Debts due to Banks..... 74·03 per cent. to total assets.
2. Specie and bullion ..... 16·89 „ „ „ „
3. Balance due from other Banks ..... 7·29 „ „ „ „
4. Landed property ..... 1·79 „ „ „ „

The Liabilities are also similarly compared as follows:—

Liabilities, 1882.

1. Deposits	92·47 per cent. to total liabilities.
2. Notes in circulation	5·24 „ „ „ „
3. Bills in circulation	1·49 „ „ „ „
4. Balance due to other Banks	0·80 „ „ „ „

Savings Banks.

The following is a statement with respect to the various Savings Banks in Tasmania during 1882, together with comparisons with the years 1873 and 1881 respectively:—

Savings Banks, 1873, 1881, 1882.

	Hobart Savings Bank.	*Launceston Savings Bank.*	*Post Office Savings Bank.*	ALL.
Number of Depositors, 1873 ..... No.	5746	3945	—	9691
Ditto, 1881 ..... No.	8064	6664	—	14,728
Ditto, 1882 ..... No.	8451	7042	874	16,367
Depositors' balances, 1873 ..... £	189,699	79,908	—	269,607
Ditto, 1881 ..... £	245,459	123,819	—	369,278
Ditto, 1882 ..... £	251,688	126,385	10,654	388,727
Average amount of each depositor's balance, 1873 ..... £	33 0 3	20 5 1	—	27 16 5
Ditto, 1881 ..... £	30 8 9	18 11 7	—	25 1 5
Ditto, 1882 ..... £	29 15 7	17 18 11	12 4 0	23 15 0

As compared with 1873, the year 1882, in respect of number of depositors, shows an increase of 6676, or 68·88 per cent., and in respect of deposits, an increase of £119,120, or 44·18 per cent.

Similarly compared with the previous year 1881, in respect of numbers of depositors there is an increase of 1639, or 11·13 per cent., and in respect of deposits, an increase of £19,449, or 5·15 per cent. The average amount to credit of each depositor has slightly declined, and the number of depositors increased. The Post Office Savings Bank system was only initiated during the latter portion of the year, and therefore it is premature to criticise results. There is every promise, however, of success, as its branches take up a wide field not occupied by any Savings Bank system hitherto.

Property Valuation.

The following abstract gives particulars of the steadily increasing value of property during the last ten years:—

Property Valuation.—Decennial Return.

Year.	*Municipalities, Hobart and Launceston.*	*Rural Municipalities.*	*Police Districts.*	TOTALS.
	£	£	£	£
1873	160,376	340,480	100,682	601,538
1874	161,559	341,541	95,687	598,787
1875	162,629	343,840	97,878	604,347
1876	170,105	356,058	121,159	647,322
1877	174,679	340,688	121,024	636,391
1878	180,336	366,613	129,314	665,689
1879	184,300	368,565	130,212	683,077
1880	195,484	373,312	136,236	705,032
1881	199,738	373,576	140,798	714,112
1882	211,389	375,199	158,832	745,420

Thus, of property in Tasmania during 1882, 28·36 per cent. of the value was situated in the Municipalities of Hobart and Launceston; 50·33 per cent. in the Rural Municipalities,—*i.e.*, nearly one half; and 21·31 per cent. was situated in the Police Districts.

Since the year 1873 the valuation of property has increased 23·91 per cent. The order of the three sub-divisions as regards the largest relative increase, is given as follows :—

Per-centage increase since 1873.

1. Police Districts..... 57·76 per cent. increase.
2. Municipalities Hobart and Launceston.. 31·88 „ „
3. Rural Municipalities..... 10·20 „ „

Mortgages, &c.—(p. 225.)

The mortgages registered during 1882, though fewer in number, greatly exceed in amount those of any former year of the decade.

Mortgages registered.

	1882.		Average of Decade, 1873-82.	
	No.	Per cent. to Total.	No.	Per cent. to Total.
Under the old system	445	60·54	360	61·96
Under Real Property Act	290	39·46	221	38·04
Total	735	100·00	581	100·00
	£	Per cent. to Total.	£	Per cent. to Total.
Under the old system	503,585	71·39	248,541	71·49
Under Real Property Act	201,818	28·61	99,110	28·51
Total	705,403	100·00	347,651	100·00

The increase in 1882 as compared with the average registrations per year during the last decade is, as regards number, 154; as regards amount, £357,752. The per-centage relation of the transactions under the old system and under the Real Property Act remains fairly constant. The various transactions connected with Lands' Titles Office, other than registration of mortgages, during 1882, also show a very large increase as compared with former years.

Grant Deeds.—(p. 226.)

The number of grant deeds enrolled in the Supreme Court for the year 1882 is 496,—a number which has only been exceeded during the decade by the years 1873 and 1874. It exceeds the number of the previous year by 119 per cent.

Part VII.

PRODUCTION.

Ordinary Crown Lands leased (p. 231.)

During the year 1882 the extent of ordinary Crown lands leased was 1,951,507 acres, equal to 11·6 per cent. of the whole area of the Colony, and 63,454 acres above that of the acreage leased during 1882. The rental was £9161 9*s.* (equal to 1·12*d.** per acre per year), which is in excess of the rental of the previous year by £706 10*s.*

Of the lands leased during 1882 only 57·2 per cent. of the acreage belonged to the mainland, for which an average rental of 1·70*d.* per acre was obtained; the remaining 42·8 per cent. relates to islands leased, which only yielded an average rental of 0·36*d.* per acre.

The total average acreage leased per year during the last decade was 1,022,329 acres, and the average rental per year amounted to £7683, or 1·084*d.* per acre per year.

* This appears to be lower than the rental per acre in Victoria to the extent of from 14 to 22 per cent. (see par. 970, p. 410, Victorian Year Book, 1881-2.

Ordinary Crown Lands sold.

The following is a synopsis of the particulars relating to the lands sales during the year 1882, together with comparison in relation to the previous year and to the average of the last decade:—

Crown Land Sales.

	1882.	1881.	Average of last Decade.	Increase or Decrease as compared with	
				1881.	Average of last Decade.
Number of Lots—					
Country	335	362	378	− 27	− 43
Town and Suburban	308	313	210	− 5	+ 98
TOTAL	643	675	588	− 32	+ 55
Area, Acres—					
Country	26,274	30,795	41,312	− 4521	− 15,038
Town and Suburban	893	540	779	+ 353	+ 114
TOTAL	27,167	31,335	42,091	− 4168	− 14,924
Amount—					
Country £	36,028	41,241	51,449	− 5213	− 15,421
Town and Suburban £	8678	9824	6315	− 1146	+ 2363
TOTAL £	44,706	51,065	57,764	− 6359	− 13,058
Amount per Acre—	£ s. d.	£ s. d.	£ s. d.	£ s. d.	£ s. d.
Country	1 7 5	1 6 9	1 4 11	+ 0 0 8	+ 0 2 6
Town and Suburban	9 14 4	18 3 9	8 2 2	− 8 9 5	+ 1 12 2
Mean	1 12 1	1 12 7	1 7 5	+ 0 0 4	+ 0 5 6

Thus the area sold during 1882 (27,167 acres) is less by 4168 acres as compared with 1881, and less by 14,824 acres as compared with the average of decade. The amount for which the land was sold during 1882,—viz. £44,706,—is less than sales of previous year by £6359, and lower than the average of decade by £13,058. Although the average amount per acre received for town and suburban lots is considerably lower than that received during 1881, the total sales per acre for 1882 are higher than for 1881 by 4*d.* per acre, and above the average of decade by 5*s.* 6*d.* per acre. A larger extent of gold-field allotments was sold during 1881, and this is sufficient to account for the lesser average per acre in town and suburban allotments sold during 1882.

Mineral Lands.

With respect to Mineral Lands the following is a general summary for the year ending 31st December, 1882:—

	1878.	1879.	1880.	1881.	1882.
Gold—					
Number of Leases in force on 31st December	104	77	101	181	362
Area No. acres	1070	758	999	1781	3627
Rental and other fees £	2351	2070	4355	9352	5683
Tin—					
Number of Leases in force on 31st December	286	354	407	576	932
Area No. acres	24,298	21,216	18,976	28,653	42,982
Rental £	6075	5304	4744	7163	10,746
Other Minerals—					
Number of Leases in force on 31st December	44	38	25	19	40
Area No. of acres	4076	3928	2624	1624	3006
Rental £	752	794	470	267	624
TOTAL—					
Number of Leases in force	434	469	533	776	1334
Area No. of acres	29,444	25,892	22,599	32,058	49,615
Rental and fees £	9178	8168	9569	16,782	17,053

It would appear from the above summary that although there has been a considerable decrease in the receipts from Gold Mining Leases, &c. during 1882, the total amount received from all Mineral Leases exceeds that of 1881 by £271; while the comparison with the same year, the actual number

of leases in force has increased 71·91 per cent., and the acreage under lease has increased 54·77 per cent. This result is chiefly due to the greater extent of land taken up during the year under Tin-mining. Of the total area of lands secured under Mining leases during 1882, fully 86 per cent. was secured in respect of tin.

Agriculture.

The whole of the Statistics relating to Agriculture and Live Stock up to 31st March, 1883, have been published in the *Gazette* in five separate sheets, the last of which was issued on 26th May, 1883. By this method the earlier information collected respecting the more advanced districts was not hindered by the delays caused by the later harvests in some districts, and the publication of the results of diligent Collectors was not, as heretofore, delayed until the returns of all districts were lodged in the office of the Statistician.

Acreage.

The total land in cultivation (377,486 acres), which in Tasmania includes land in permanent artificial grasses, was greater by 3112 acres as compared with the previous year. The land under tillage or in crop (147,555 acres), however, was less by 939 acres, while the land under permanent artificial grasses (148,291 acres) has increased 11,970 acres.

The following table gives a more detailed statement of the general results and of the extent of Agriculture and Horticulture in Tasmania during the year 1882-3, together with comparisons with the preceding year and with the first year of the decade:—

Agriculture, 1873-4, 1881-2, 1882-3.

	1882-3.	1881-2.	1873-4.	1882 as compared with 1881-2.		1882 as compared with 1873-4.	
				Increase.	Decrease.	Increase.	Decrease.
Wheat—

Total Lands in Cultivation, acres	377,486	374,374	324,105	3112	...	53,381	

Altogether the yields per acre during the season 1882-3 have been exceptionally good, more especially as regards potatoes and other root crops, hops, apples, and hay. The yield of hops and apples is by far the largest upon record; and the average yield per acre of wheat and barley has only been once exceeded during the last decade, viz., in the season 1879-80.

The total acreage under crop, however, has considerably diminished, whether compared with the preceding year or with the first year of the decade. It would also appear, from a closer examination of the results of the last ten years, that the yield of cereals, which ought to constitute the foundation of our agricultural industry, seems rather to decline than to advance. On the other hand, all matters relating to the pastoral industry seem to show a continuous progress. This is strikingly borne out by the fact that, while in 1873-4 land in crop represented 44·62 per cent. of the total land in

cultivation, and exceeded land in permanent artificial grasses by 54·55 per cent., yet in 1882-3 land in crop only represents 39·09 per cent. of the total cultivation, and lands in permanent artificial grasses have increased to such an extent that it now exceeds the land in crop by 736 acres. The tendency of agriculture to remain almost in a stationary condition, while all other industries, including the pastoral, are showing a healthy advance, is difficult to account for satisfactorily. In productiveness, as indicated by yield per acre, Tasmania surpasses every other Colony with the exception of New Zealand; yet, notwithstanding this advantage, Tasmania in respect of breadstuffs barely supplies her own immediate wants.

Local Supply of Breadstuffs.—Averages per Year for Decade* 1873-82.

(Flour, &c., reduced to equivalent of Wheat, bushels.)

	bushels.	per head.
Average produce of wheat per year, locally, during decade 1873-82	880,952	8·05
Less average balance of exports in excess of imports, in respect of flour and wheat.....	105,354	0·96
Average local consumption per year for food and seed.....	..	7·09

The following Table shows in respect of wheat, oats, barley, and potatoes, the absolute and relative produce for each Colony for the year 1882:—

Yield of Wheat, Barley, Oats, and Potatoes in the Australasian Colonies during Season 1882-3.

	No. of bushels.	Per cent. to Total.	Per acre.	Per head.

* Exclusive of imported biscuits, &c., the quantity of which cannot be exactly ascertained, but which may be estimated to raise the total local consumption of wheaten breadstuffs to 7·5 bushels per head per year.

The following series of Tables, in respect of wheat, show still more clearly the comparative producing powers of each Colony :—

Relative order of Colonies as regards yield of Wheat per acre, 1882.

	Bushels per acre.
1. New Zealand	26·28
2. Tasmania	20·27
3. New South Wales	16·35
4. Queensland	13·89
5. Western Australia	11 00
6. Victoria	9·03
7. South Australia	4·21

Relative order of Colonies as regards yield of Wheat per head of Population, 1882.

	Bushels per head.
1. South Australia	25.40
2. New Zealand	20·17
3. Victoria	9·83
4. Western Australia	8·22
5. Tasmania	7·84
6. New South Wales	5·07
7. Queensland	0·61

Relative order of Colonies as regards absolute yield of Wheat, 1882

	Bushels.	Relative area.
1. New Zealand	10,270,591	3·39
2. Victoria	8,751,454	2·86
3. South Australia	7,356,117	29·34
4. New South Wales	4,042,395	10·09
5. Tasmania	946,889	0·85
6. Western Australia	249,900	31·77
7. Queensland	145,752	21·70
	31,763,098	100·00

Relative order of Colonies as regards yield of Wheat per square mile of Territory.

	Bushels per square mile.
1. Victoria	99·57
2. New Zealand	98·37
3. Tasmania	36·12
4. New South Wales	13·01
5. South Australia	8·14
6. Western Australia	0·25
7. Queensland	0·21
All	10·31

Thus, as regards Wheat, it is apparent that although Tasmania stands second among the Australian Colonies as regards yield per acre, she only holds the fifth position as regards yield per head, fifth position as regards absolute yield, and third position as regards yield per square mile of territory. In Oats and other crops her position is more creditable ; but upon the whole it is somewhat discouraging to find from the following table, based upon the mean of five-yearly periods, that the yields of two out of the three principal cereals have gradually declined since 1856–60, and that the third, Oats, has remained almost in stationary condition.

Average yield of Wheat, Oats, Barley, and Potatoes in Tasmania during each quinquennial period, 1856–80, *and during the two years* 1881–2.

	Wheat.	*Oats.*	*Barley.*	*Potatoes.*
	Bushels.	Bushels.	Bushels.	Tons.
1856-60	175,082	792,241	160,719	34,298
1861-63	1,091,200	819,467	159,073	39,127
1866-70	1,040,761	703,291	156,801	35,183
1871-73	944,917	713,354	124,699	35,529
1876-80	834,101	656,023	136,826	29,061
1881-2	962,127	785,921	96,102	35,545

It is true that the Tasmanian cereals are to a great extent excluded from Australian markets, but it must be borne in mind that the larger proportion of the surplus produced by New Zealand, Victoria, and South Australia is destined for ex-Australian markets. Australasia as a whole is now producing about 3½ bushels of Wheat per head above its own local requirements for food and seed.

Yet, although in a backward condition, agriculture in Tasmania is by far the most important industry. If we reckon the produce of 1882 at the mean rates recorded for each article in Hobart and Launceston, it represents a sum equal to £1,033,197, exclusive of the soft fruits used in jam manufacture,—*i.e.*, the nominal value exceeds the estimated value of Wool, Gold, and Tin together for the same year by a sum of £78,473.

Live Stock.

The number of horses, cattle, sheep, &c. returned on 31st March, 1882, and comparisons with the first and last year of the decade 1873-82, and with the average of decade 1851-60, are given in the following Table :—

	1882.	1881.	1873.	Mean of Decade 1851-60.	1882. Per-centage Increase or Decrease as compared with—		
					1881.	1873.	Mean of Decade 1851-60.
Horses	25,857	25,607	22,612	18,820	+ 1·07	+ 14·35	+ 37·39
Cattle	122,504	130,526	106,308	86,625	— 6·15	+ 15·24	+ 41·42
Sheep	1,845,455	1,861,857	1,501,531	1,851,444	— 0·88	+ 22·90	— 0·32
Pigs	47,826	49,660	59,628	29,053	— 3·70	— 19·80	+ 64·62

As compared with the previous year, there has been a decrease in cattle, sheep, and pigs. The largest decrease, 6·15 per cent., is in respect of cattle. There has been a slight increase in the number of horses, viz., 1·07 per cent.

The decrease in sheep and cattle, 16,402 and 8022 respectively, has already been referred to the following causes :—1. A decline in the imports of live stock for slaughtering purposes from New South Wales and Victoria. 2. As regards sheep, snowfall in the month of June caused a great destruction of the lambs in some places. Mr. Grueber, of Fingal, also informs me that, in his opinion, the decrease arises chiefly from the high prices of meat and the greater local consumption during 1882,—the effect of which upon stock-owners has been to cause them to increase the production of fat stock for market in the place of lambs.

As compared with 1873, horses have increased 14·35 per cent. ; cattle, 15·24 per cent. ; and sheep, 22·90 per cent. The number of pigs has declined 19·80 per cent. within the same period. As compared with the mean of decade 1851-60, horses have increased 37·39 per cent. ; cattle, 41·42 per cent., and pigs 64 per cent ; but it is remarkable that the number of sheep should at the present time be 0·32 per cent. less than the number returned for Tasmania thirty years ago.

Having submitted this matter to one of our leading sheep breeders (Mr. David Taylor, of St. Johnstone), I obtained valuable information ; and the following extract, respecting the stock carrying capacity of the land and the decrease in number of sheep since 1851, is most interesting :—

"I believe that Tasmania, in its present state, is fully stocked ; though, no doubt, by clearing, draining, and destruction of rabbits, its sheep carrying capacity could be enormously increased. The decline in number of sheep since 1851 is almost entirely due to two causes, viz., fluke and rabbits,—extra consumption having had little influence. Fluke has operated chiefly by causiug the lands not easily drained to be given up to cattle ; while the rabbit plague (by far the most potent cause) has interfered with the increase of lambs. The best sheep-breeding runs were those where the rabbits have been most destructive."

Mr. Taylor's opinions are confirmed by the various Collectors of Statistics, whose valuable general reports I regret having been obliged to exclude from the present volume on account of lack of space.

When we compare the Sheep-carrying capacity of Tasmania with that of the neighbouring Colonies, it is clear that we labour under some serious disadvantage ; for, notwithstanding our favourable climate, richly-watered lands and most fertile soil, we stand far behind Victoria, New South

Wales, and New Zealand in the average number of Horses, Cattle, and Sheep per square mile of territory, as shown in the following comparative Table :—

Live Stock per Square Mile, 1882.

	Horses.	Cattle.	Sheep.
Victoria	3·19	14·65	115·77
New South Wales	1·06	5·99	102·25
Queensland	0·34	6·12	18·02
South Australia	0·18	0·81	16·80
Western Australia	0·03	0·07	1·29
New Zealand	1·55	6·69	124·37
Tasmania	0·99	4·67	70·40
TOTAL	0·48	3·30	29·92

Live Stock imported and slaughtered.

With such comparative and absolute scarcity of stock locally, it is only natural to expect that Tasmania, for slaughtering purposes, should during the last decade have imported in excess of export 111,402 sheep and 11,998 cattle.

The quantity imported during 1882—4795 sheep and 927 cattle—is less than half the usual quantity imported. The number of animals recorded as slaughtered in Hobart and Launceston is as follows :—

	1882.	1881.	1882.	
			Increase.	Decrease.
Sheep	89,890	87,473	2417	—
Cattle	9610	9131	479	—
Pigs	5476	5054	422	—

Wool.

The clip of Wool for the year 1881, as ascertained by Exports during the 12 months ending 30th November, 1882, is estimated to be 8,116,026 lbs., and the declared value is stated to be £448,209, equal to 1*s.* 1·40*d.* per lb. I have reason, however, to doubt whether the same mode of declaring values is observed by all exporters, and therefore too great reliance should not be placed upon the varying rate as deduced from total weights and values of any single year. The wool actually exported during the year 1882, irrespective of the clip of any particular season, was 7,748,542 lbs., and the nominal export value is stated to be £432,768. The following Table gives the yearly average for each quinquennial from 1851 to 1880, inclusive, and the actual for the year 1881 and 1882, in respect of the number of sheep, the quantity of wool exported, the average quantity of wool exported per sheep, and the average value of wool exported per sheep.

Yield of Wool, 1851-1882—*Average per Year.*

Period.	No. of Sheep.	Wool exported, lbs.	Value, £.	Wool exported per Sheep, lbs.	Nominal Value of Wool exported.	
					Per Sheep.	Per lb.
					£ *s.* *d.*	£ *s.* *d.*

1882	1,845,455	7,748,500	432,768	4·19	0 4 8·28	0 1 1·40

MINES AND QUARRIES.—*Gold-Mining.*

The following is an abstract of the results of gold-mining during last decade :—

	1873.	1874	1875.	1876.	1877.	1878.	1879.	1880.	1881.	1882.
Average number of persons employed..... No.	230	185	101	129	354	1050	2060	1653	1286	1591
Approximate value of mining plant.....£	10,550	10,265	15,660	14,800	17,600	46,000	60,200	67,200	84,600	110,600
Gold produced { Quantity, ozs.	4661	4651	3010	11,107	5777	25,249	60,155	52,595	56,693	49,122
Gold produced { Value, £.....	18,390	18,491	11,982	44,923	23,289	100,000	230,895	201,297	216,901	187,337

* I think the number of sheep during these years must have been over-estimated. The quantity of wool, and the price *per sheep*, favour this view.

Compared with the previous year it would appear that, although the number of persons employed in gold-mining during 1882 is greater by 305, and the approximate value of mining plant greater by £26,000, yet the yield has declined 7571 ounces, and the estimated value has declined £29,564. Mr. A. W. Glover, Commissioner of Gold Fields, in his Report, however, draws particular attention to the impossibility of obtaining anything approaching a complete account of the produce of gold from the alluvial workings. Miners in isolated good paying workings have many reasons for withholding information respecting their earnings or the real value of their claims, and a reference to the nominal exports is not of much value in arriving at an exact estimate of the gold produce, as it is stated that a considerable quantity in the possession of travelling miners and others finds its way to other places without being recorded in any way. The following is a comparative statement of the yield of gold per man for the years 1881 and 1882, and also for the last decade :—

	1882.	1881.	*Decade* 1873-82.
Gold produced ..... £	187,337	216,901	1,053,505
Average of men employed per day ..... No.	1591	1286	864
Average value of gold produced per man per year, £	117·74	168·66	121·94

Tin Mining.

The results of Tin-mining for the year 1882 are as follows :—

	Alluvial Claims.	*Lode Mines.*	*Total.*
Persons employed ..... No.	2022	289	2311
Mines or Claims..... No.	187	22	209
Tin Ore produced { Tons	5330	265	5595
Tin Ore produced { Value.....£	339,794	16,919	356,713
Tin Ore produced { Value per man ...£	168·05	58·54	154·35

There is no record of certain particulars for previous years, and many interesting comparisons cannot therefore now be established ; but the objection stated respecting the nominal quantity and values of exported gold cannot seriously affect the nominal quantity and values of the tin exported during each, which are given as follows :—

Tin exported from Tasmania, 1873-82.

	Slag.	*Ore.*	*Metal.*	*Value.*
	Tons.	Tons.	Tons.	£
1873.....	...	4	...	220
1874.....	...	142	...	7318
1875.....	...	...	366	31,325
1876.....	...	544	1072	99,605
1877.....	...	3526	2221	296,941
1878.....	110	1691	4146	316,311
1879.....	172	75	4316	303,203
1880.....	...	3	3951	341,736
1881.....	...	4	4120	375,775
1882.....	...	81	3589	361,046
Total for Decade....	282	6070	23,781	2,133,480

Thus the nominal value of Tin exported during the last decade exceeds the Public Debt of Tasmania, on 31st December, 1882, by £82,880.

The following particulars regarding this important industry will also be of considerable interest :—

		1882. £ s. d.	1881. £ s. d.
Yearly mean price (English quotation) per ton	max.	105 15 5	94 10 10
	min.	98 5 5	90 6 8
Local quotation per unit*	max.	0 18 5	0 16 0
	min.	0 17 0	0 15 6
Average per cent of assay of dressed tin ore	per cent.	72·00	..
Average yield at smelting works.....	per cent.	70·21	..
Mean assay of Mount Bischoff metallic tin	per cent.	99·87	..

* The unit of tin is equivalent to $\frac{1}{100}$th of the ton of metallic tin.

There is always a considerable difference between Tin Ore produced and Metallic Tin exported during any one year, owing to the fact that large quantities of ore and metal in transit or in stock belonging to one year are exported during the following year.

Of the total Tin produced during 1882, the following is a statement of the relative importance of the various Tin-producing centres of Tasmania:—

	Value. £	*Per cent. to Total.*
North-Eastern Division	169,339	47·47
North-Western Division	185,474	52·00
South-Eastern Division	265	0·07
Western and South-Western Division	1635	0·46
TOTAL	£356,713	100·00

Coal Mines.

Of Coal Mines there were nine in operation during the year 1882, which, in all, only produced 8803 tons, valued at £6228. This is below the yield of 1881 by 2360 tons, and below the average yield of the last decade by 869 tons. The number of men employed upon the Coal Mines during the year is stated to be 56.

Stone Quarries.

During the year 1882 there were 29 quarries stated by collectors to be in operation, employing on an average 140 men.

The following is a statement of the Stone Quarries for lime and building purposes:—

	Tons.	*Value.* £
Blue-stone	6552	1638
Lime-stone	24,700	1080
Flag-stone and Free-stone	114,550	8144

This account, however, is probably much under the mark, as there is a considerable quantity of stone quarried which cannot be ascertained by collectors in some districts.

TRADES AND MANUFACTORIES.

The number of Trades and Manufactories enumerated for the year 1882 is 3521. It exceeds the number for the previous year by 84. The following is an abstract of the principal groups:—

	No.
Trades relating to, and manufacture of, Machine Tools and Instruments	285
Building Houses	537
Drinks and Stimulants	467
General Dealers	468
Supply of Food	618
Dress	381
Miscellaneous	765
Total	3521

Jam Manufactories.

Special information has been obtained for the year 1882 with respect to the manufacture of Jam and Beer. In the Jam manufacture, which is wholly confined to Hobart and its vicinity, there are 320 persons engaged—202 males and 118 females. The capital invested is estimated to be £56,000. The quantity of Jam manufactured during the year 1882 is stated to be 4,455,981 lbs. valued at £106,256; and the estimated quantity of Raspberry and other fruit used in the manufacture of Jam, 3,063,838 lbs. Nearly all the Jam manufactured is exported; only 87,640 lbs., valued at £2090, have been sold for local consumption.

The following is a statement of the direction of the Jam exported for 1882:—

	lbs.	Value—£.
United Kingdom	8310	230
Victoria	160,538	3883
New South Wales	3,474,203	83,381
South Australia	216	6
Western Australia	200	10
New Zealand	430,328	9879
Queensland	294,546	6777
Total	4,368,341	£104,166

Thus by far the greater part of our Jam manufactured is directly exported to New South Wales.

Breweries.

Of the 12 Breweries in operation in Tasmania, 4 are situated in Hobart, 4 in Launceston, and 4 in the Country Districts. In all there are 104 persons employed, and the capital invested in buildings and equipment is stated to be £72,587. The quantity of Beer brewed during the year 1882 is 1,211,264 gallons, equal to 10·03 galls. per head of the population, and the duty paid upon 1,155,599 gallons is stated to be, in round numbers, £14,445. There appears to be only 1387 gallons exported.

The total quantity of Malt Liquor imported during the year is stated to be 55,595 gallons. Thus the total amount of Malt Liquor available for consumption for Tasmania during the year 1882 appears to be 1,209,807 gallons, equal to 10·03 galls. per head, of which 95·42 per cent. was of local manufacture.

Waterworks.

The several systems for the storage and supply of water in Tasmania have been constructed at a cost of £174,000, of which the following is an abstract of the particulars:—

	Storage capacity.	*Length of Aqueduct and reticulation.*		*Cost.*
	galls.	m.	ch.	£
Hobart	40,000,000	73	55	100,000
Launceston	1,050,000	36	41	65,000
Campbell Town	6,040,000,000	5	0	7000
New Norfolk	..	4	40	2000
Total	6,081,050,000	119	56	174,000

Salmon and Trout Breeding Establishment.

During the year 1882 there were distributed the following Ova and Fry,—viz., 27,000 Ova and 3950 Fry,—in the following manner:—

For	*Ova.*	*Fry.*
South Australia	5000	—
Victoria	14,000	—
New South Wales	5000	—
Hamilton-on-Forth	3000	—
Rivers Northern Tasmania	—	1950
River Plenty	—	2000
	27,000	3950

The Receipts were—For sale of Ova, £120; Licences, £176 10*s.* 0*d.*; Total Receipts, £296 10*s.* 0*d.* The net Expenditure, including expenses incurred in connection with importation of Ova from England, appears to have been £377 5*s.* 0*d.*

PART VIII.

LAW, CRIME, AND PROTECTION.

LEGISLATION.

There was only one Session of Parliament during the year 1882 (46 Vict.), which opened on the 11th July and closed on the 1st November, covering a space of 119 days.

During the Session there were introduced 67 Bills, of which 53 passed into law, 6 were lost or laid aside in the House of Assembly, and 6 were lost or lapsed in the Legislative Council. Full particulars regarding the nature and of the passage of the Bills in Parliament are to be found in Summaries (pp. 274-277).

LITIGATION—(pp. 278-279.)

Civil Causes and other Cases tried.

The following is an Abstract of the Civil Causes tried in the various Courts during the year 1881, together with comparisons with the former year and with the average of the last decade.

	1882.	1881.	Average of last Decade. 1873-82.	1882. Increase or Decrease as compared with— 1881.	Average of Decade.
Supreme Court, Ordinary Jurisdiction—					
Summonses issued ..... No.	235	372	299	— 137	— 64
Causes tried ..... No.	6	16	14	— 10	— 4
Claimed ..... £	...	...	...	...	...
Awarded ..... £	344	451	806	— 107	— 462
Supreme Court, under Small Debts Act—					
Summonses issued ..... No.	92	95	83	— 3	+ 9
Causes tried ..... No.	62	63	56	— 1	+ 6
Claimed ..... £	2181	1928	2010	+ 253	+ 171
Awarded ..... £	894	937	811	— 43	+ 83
Court of Requests—					
Summonses issued ..... No.	3842	3990	3012	— 148	+ 830
Causes tried ..... No.	2248	2387	1816	— 139	+ 432
Claimed ..... £	21,872	21,697	17,627	+ 175	+ 4245
Awarded ..... £	12,427	13,348	9490	— 921	+ 2937
All Courts—					
Summonses issued ..... No.	4169	4457	3394	— 288	+ 775
Causes and Cases tried ..... No.	2316	2466	1886	— 150	+ 430
Claimed ..... £	24,053	23,625	19,637	+ 428	+ 4416
Awarded ..... £	13,665	14,736	11,007	— 1071	+ 2658

Thus, upon the whole, the number of cases issued and tried, and the amounts awarded, were considerably under corresponding numbers and amounts for 1881. On the other hand, there is generally a very large increase as compared with the average of the decade, with the exception of the causes tried under ordinary jurisdiction of the Supreme Court, the number of which is lower in 1882 than during any former year of the decade.

Probates and Letters of Administration.

In 1882, as compared with previous year, although the number of Probates and Letters of Administration was slightly increased, the value of property sworn under was less by £131,609. The average value of each estate in 1881 was £1741, and in 1882 £942, *i.e.*, a decrease of 45·90 per cent. The following table gives fuller information respecting the years 1881 and 1882:—

Probates and Letters of Administration.

	Probates.		Letters of Administration.		Both.		*Average value of each estate.*
	Number.	*Property sworn under.*	*Number.*	*Property sworn under.*	*Number.*	*Property sworn under.*	
		£		£		£	£
1881	124	267,973	50	35,011	174	302,984	1741
1882	131	142,191	51	29,184	182	171,375	942
Increase	7	...	1	...	8	...	...
Decrease	...	125,782	...	5827	...	131,609	799

During the last decade, 1873-82, the number of Probates and Letters of Administration was 1430, and the value of property sworn under amounted to £2,103,328. The average value of each property was, in round numbers, £1471.

Bankruptcies.

There were only 19 cases of bankruptcy during the year, that is, just about half the average per year of the last ten years. Of these 15 were voluntary, and 4 compulsory. The number of bankruptcies has not been so low since the year 1873. This is a most healthy sign, and corroborates other evidences indicating the prosperous condition of the country during the year 1882. So far as a return of the assets and liabilities of bankrupts are given, the former bear the relation to the latter of 57·34 : 100.

Divorce—(p. 280.)

Three Petitions for dissolution of Marriage were presented to the Supreme Court during the year 1882, two of which were granted. There were also two Protection Orders granted by the Court. The numbers differ little with those for the three previous years.

OFFENCES—(pp. 281-88.)

The following is a comparative statement of the offences in respect of which persons were brought before Magistrates during the years 1881 and 1882 :—

Number of Cases brought before Magistrates.

	1882.	1881.	*Increase.*
1. For offences against the person	646	541	105
2. For offences against property	869	708	161
3. Other offences	7305	6317	988
	8820	7566	1254

Thus the total number of cases brought before Magistrates during 1882 exceeds that of the former year by 1254, or 16·5 per cent.

The mode in which the cases were dealt with during 1882 is as follows :—

		Per cent. to total.	*Per 10,000 Persons.*
Summarily convicted or held to bail*	5837	66·18	483·60
Order for payment of money†	1107	12·15	91·71
Committed for trial in Supreme Court‡	93	1·05	7·71
Cases withdrawn or dismissed	1783	20·22	147·72
TOTAL	8820	100·00	730·74

It would appear from this that only 1·05 per cent. of the offences were deemed to be sufficiently serious to commit for trial in the Supreme Courts. 78·73 per cent. of the whole were minor offences, which were dealt with summarily; and 20·22 per cent. of the cases were withdrawn or otherwise dismissed.

As regards the Minor Offences summarily dealt with, the following analysis is most significant :—

Minor Offences summarily dealt with.

	1882.		*Average of Decade,* 1873-82.	
	No. of Cases.	*Per cent. to Total.*	*No.*	*Per cent.*
Drunkenness	1787	30·61	1484	29·38
Other Minor Offences	4050	69·39	3567	70·62
TOTAL	5837	100·00	5051	100·00

Thus, relatively to other minor offences, the number of cases of drunkenness is higher in 1882 than the average number per year of the decade. The actual number of convictions (1787) for drunkenness is also higher during 1882 than in any year of the decade, there being one case of drunkenness per year to every 67 of the population. There was only 1 case per year to every 74 of the population

*Includes 32 cases of lunacy. † Principally composed of persons summoned before Magistrates for non-payment of rates. ‡ Differs slightly from figures given by Registrar of Supreme Court.

for the decade as a whole. It must not be inferred, however, that each case within the year represents a separate individual, for it often happens, in respect of the minor offences especially, that the same individual is convicted over and over again. Nevertheless, as regards drunkenness, I quite agree with Mr. Hayter in the statement (p. 353, Year Book, 1881-2), "that vigorous efforts on the part of those who are seeking to suppress or mitigate the evil is not uncalled for, especially when it is remembered that large as is the number of persons taken into custody each year for this offence, arrests therefor are very seldom made unless it is accompanied with disorderly conduct."

Comparisons with other countries cannot be satisfactorily established in respect of minor offences brought before Magistrates. In Tasmania non-payment of rates and taxes is included among offences relating to Revenue, and constitute, during 1882, 27·43 per cent. of the total number of cases which appeared on summons. It does not appear that such cases are so dealt with elsewhere, and consequently in comparisons the number of minor offences in Tasmania is made to appear higher than would be the case if the classification of minor offences was in every respect the same.

Crimes of a serious nature—(pp. 282-283.)

Although drunkenness and other minor offences during 1882 compare unfavourably with the immediately preceding years, it is somewhat singular to find that the crimes of a serious nature actually and relatively are much lower than during any former year.

Persons committed, tried, and convicted in Supreme Courts (p. 283), 1881, 1882, *and yearly average* 1873-82.

	1882.	**1881.**	*Yearly average of decade,* **1873-82.**
Committed for trial	90	99	108
Found insane, remanded, or not prosecuted	36	35	29
Tried	54	64	79
Convicted	36	51	57
Per-centage tried to persons committed	60·00	64·64	73·15
Per-centage convicted to persons tried	66·66	79·68	72·15
Ditto ditto to persons committed	49·00	51·51	52·78

Thus, as regards commitments, the number in 1882 is lower than that of the yearly average of decade by 16·66 per cent., and lower than that of 1881 by 9·10 per cent. As regards cases tried, the number in 1882 is lower than that of the yearly average of decade by 31·65 per cent. and lower than that of 1881 by 15·63 per cent. As regards persons convicted, the number in 1882 is lower than that of the yearly average of decade by 36·84 per cent., and lower than that of 1881 by 29·41 per cent. Taken in any way there is a great reduction during 1882 in respect of crimes of a serious nature, notwithstanding the increase in cases of drunkenness and the increase in population.

It is also most gratifying to note the position which Tasmania takes in comparison with other countries :—

Crimes in various Countries compared.

	Proportion of		
	Commitments to 10,000 *persons.*	*Convictions to* 10,000 *persons.*	*Convictions to Commitments.*
England and Wales,* average of 5 years 1876-80	6·40	4·86	75·90
Scotland,* ditto, 1876-80	7·57	5·82	76·96
Ireland,* ditto, 1876-80	7·97	4·31	54·29
Australasian Colonies—			
Victoria,* average of 5 years, 1876-80	7·88	5·81	61·01
New South Wales,* ditto, 1876-80	24·06	14·29	59·55
Queensland,* ditto, 1876-80	15·98	8·41	52·64
South Australia,* ditto, 1876-80	13·01	7·19	55·25
West Australia,* ditto, 1876-80	29·78	14·11	47·69
New Zealand,* ditto, 1876-80	11·86	6·77	59·01
Tasmania, ditto, 1876-80	9·85	5·38	54·45
Ditto, ditto, 1878-82	9·42	4·88	51·85
Ditto, year 1881	8·44	4·35	51·51
Ditto, year 1882	7·46	2·98	40·00

* Average of five years for these countries calculated from Mr. Hayter's Table, p. 372, Year Book, 1881-2.

Thus, for the mean of five years, Tasmania, Victoria, and New Zealand take up the first position among the Australian Colonies as regards the lowest number of commitments and convictions in the

Superior Courts. For 1882, Tasmania takes up a position relatively still more favorable in this respect. Altogether, allowing that convictions in relation to commitments seem to be exceedingly low, Tasmania compares most favourably with other countries in freedom from those crimes of a serious character which were dealt with in the Superior Courts.

Crimes undergoing punishment in Gaols and Penal Establishments.

During 1882 there were altogether 1960 prisoners confined at various times, and for different periods, in the various Gaols and Penal Establishments, of which 1305, or 66·58 per cent., were males, and 655, or 33·42 per cent., were females.

On the average there were only 220 males and 66 females (*i.e.* 66·58 and 33·42 per cent. respectively) confined per day during the whole year, and the average duration of confinement per individual prisoner was equal to 53 days for the year 1882.

The following abstract gives the proportion as regards the frequency of crime in respect of the individual prisoners for the year 1882, together with a comparison with the figures of the previous year:—

Order of frequency of Crime.

	1882.			1881.		
	M.	*F.*	*Total.*	*M.*	*F.*	*Total.*
	NUMERICAL.					
1. Convicted three or four times before.	580	393	973	565	343	908
2. Ditto once before, including last conviction	574	174	748	590	139	729
3. Ditto twice before	140	80	220	183	36	219
4. Unspecified	11	8	19	...	...	...
TOTAL	1305	655	1960	1338	518	1856
	CENTESIMAL.					
1. Convicted three or more times before	44·45	60·00	49·64	42·23	66·86	48·92
2. Ditto once before, including last conviction	43·98	26·57	38·16	44·10	26·12	39·28
3. Ditto twice before	10·73	12·21	11·23	13·67	7·02	11·80
4. Unspecified	0·84	1·22	0·97	...	...	...
TOTAL	100·00	100·00	100·00	100·00	100·00	100·00

No information is afforded to enable me to ascertain the actual number of distinct individuals confined during the year 1882; but, when we consider that during this period 72·21 per cent. of the women and 55·18 per cent. of the men are declared to have received not less than three sentences, and that the classes of offences such as drunkenness and other offences against good order are repeated and punished at short intervals in respect of the same person, we may be sure that a considerable number of the cases making up the total of 1960 would be represented by a few individuals.

In pp. 44 and 45 of Report of Commissioners on Penal Discipline in Tasmania, it appears that, in a period of seven years, 95 distinct individual females represent no less than 1272 cases, or each individual female 13·38 cases; and 71 distinct individual males represent 589 cases, or one individual male 8·29 cases.

If the prisoners undergoing sentences of more than one year were eliminated the average of 53 days for 1882 for each case would be very much reduced; for example: if 50 persons of the daily average represented sentences of longer duration than one year, which is not improbable, then the remaining cases (1817) would, on the average, only have been confined 28·17 days in prison.

CRIME AND EDUCATION.

Tables p. 293 give particulars regarding the education of the 1960 cases already dealt with in respect of frequency of crime. The following is an Abstract:—

Education of Prisoners in Gaols, 1882.

	NUMERICAL.			CENTESIMAL.		
	M.	F.	Total.	M.	F.	Total.
Unable to read	357	269	626	27·35	41·07	31·94
Able to read only	92	101	193	7·05	15·42	9·94
Able to read and write	856	285	1141	65·60	43·51	58·22
TOTAL	1305	655	1960	100·00	100·00	100·00

At first sight it would seem that education had little influence as a protection from crime generally; but, although the larger number of offences (58·22 per cent.) has been committed by persons who could both read and write, it must be remembered that a very much larger proportion of the population over 15 years of age is composed of persons who can read and write; and if the per-centage proportion of the various classes in prison be compared with the ascertained per-centage of the same classes in the general population over 15 years of age, it will at once be seen that the per-centage of those who are unable to read (especially as regards women) is greatly in excess of the proportion of the same class in the general population over 15 years of age; and, conversely, the per-centage of those in prison who are able to read and write is very much lower than the proportion of the same class in the general population over 15 years of age.

Education of Prisoners and Population over 15 years of age compared, 1882.

	Per-centage Prisoners.			Estimated Per-centage of Population over 15 years of age.		
	M.	F.	Total.	M.	F.	Total. *
1. Able to read and write	65·60	43·51	58·22	79·70	81·76	80·61
2. Unable to read	27·35	41·07	31·94	13·70	10·05	12·02
3. Able to read only	7·05	15·42	9·84	6·60	8·19	7·37
	100·00	100·00	100·00	100·00	100·00	100·00

Thus compared, it is clear that the section of the population over 15 years of age which cannot read or write yields proportionally 3·7 times more criminals than the section which can both read and write. How far education is in itself a protection, or how far lack of the same is a result of other conditions directly leading to the perpetration of certain offences, it is difficult to say; † but it is most probable from the foregoing analysis that the state of ignorance in itself is responsible for a considerable number of the offences against society.

Ages of Prisoners.

The following table shows to what extent certain groups of ages contribute to the criminal list for the year 1882:—

	No.	*Per cent. to Total.*
Under 15 years of age	63	3·21
15 to 25 years of age	383	19·54
25 to 65 ditto	1270	64·80
65 and over	244	12·45
Total	1960	100·00

Birth-places.

The following is a statement showing the per-centage for 1882 of prisoners born in different countries; viz.—Australasian Colonies, including Tasmania, 38·93 per cent. England and Wales, 28·11 per cent. Ireland, 23·06 per cent. Scotland, 8·27 per cent. Other British Colonies, 0·56 per cent.; and Foreign Countries, 1·07 per cent.

Protection—Civil and Military Forces.

The following is a brief statement of the strength of the Civil and Military Forces for the year 1882:—

Police Force—	
Municipality of Hobart, No.	44
Ditto Launceston, No.	33
Rural Municipalities, No.	120
Territorial Police Force, No.	104
Total Police Force	301
Volunteer Force—	
Southern Division, No.	399
Northern Division, No.	197
Total Volunteers, No.	596
Grand Total, No.	897

* Based upon the per-centages of the last Census (1881). Ages under 15 years only contribute 3 per cent. of the criminals in prison.

† Mr. Herbert Spencer, in commenting upon "Education and Crime" (p. 379, Social Statics), states: "Before any inference can be drawn, it must be shown that these instructed and uninstructed convicts come from two *equal* sections of society *alike in all other respects* but that of knowledge." * * Ignorance and crime are not cause and effect; they are coincident results of the same cause."

It would appear, therefore, that in relation to every 1000 of the population there are 2·45 Police and 4·86 Volunteers. In relation to area there are for each 100 square miles 1·15 Police and 2·27 Volunteers.

The cost of maintaining the Police Force for the year 1882 was, Territorial, £13,592; Municipal, £24,267; Total, £37,859,—equal to 6*s.* 3·29*d.* per head of population. Of this sum £18,819 (nearly 50 per cent.) was contributed by the General Government, and £19,040 by Local Government.

Elsewhere (p. 176) the cost of maintaining the Defence Forces (Volunteers) during 1882 was shown to be £5709, representing 1·14 per cent. of total General Expenditure, or 0·95*s.* per head of the population. These figures show a slight increase over those for the previous year.

Part IX.

INTELLECTUAL, MORAL, AND SOCIAL PROVISION.

Education.

Statistics regarding the education of children at the school age (7 to 14 years) must necessarily be imperfect so long as it is not made compulsory to register all private schools, together with the names of professional or paid private instructors. If this were done, it would be an easy matter to make a yearly census on a well chosen school day, which would enable us to gain more satisfactory information with respect to the working of the Act which provides for the compulsory education of all children within the limits of the ages 7 to 14.

In the Census year 1881 the following results were obtained, which enable us to some extent to gauge the value of our systems of education in respect of children:—

Number of Persons at various Ages.

	Persons.		Per cent. to Total.
Under 5 years	16,192		13·99
5 and under 7 years	5866	5·07	
7 „ „ 14* „	19,322	16·70	
14 „ „ 20 „	16,080	13·90	
	41,268		35·67
Total under 20 years.....	57,460		49·66
All other ages	58,245		50·34
Total Population	115,705		100·00

Thus compulsory education only affects 19,322 persons, or 16·70 per cent. of the total population. If we now attempt to gauge the immediate results of school training, we must, for all practical purposes, exclude ages under 5, and 20 and over. The remainder (5 years of age and under 20) number 41,268 persons, or 35·67 of the total population. In respect of these latter, the analysis of the census table gives the following result:—

Education of Persons 5 years of age and under 20.

Read and write	70·14
Read only	12·11
Could not read	17·75
	100·00

As regards school attendance, of the 19,322 children living at the school age (7-14), the following Table shows the numbers, proportionately, of scholars trained under the various Private and State schools, and the numbers which failed to comply with the compulsory provisions of the Act :—

School Attendance, 1881.

Ages 7-14.		Per cent. to Total.
Attending schools receiving Government aid....	7545	39·05
Ditto private schools	4521	23·40
Receiving instruction at home	3075	15·91
Children not at school	1984	10·22
Unspecified	2197	12·42
Total persons 7 and under 14	19,322	100·00

The per-centages of all ages receiving instruction were as follows:—Public schools, 44·08 per cent.; private schools and home instruction, 55·92 per cent.

It is somewhat unsatisfactory to find so large a number as 12·42 per cent. unspecified in ages 7-14; but, from comparisons made with the yearly statistics furnished by the Secretary of the Board of Education, it is evident that the numbers returned in the census table correspond more closely with the average number registered on the school rolls than with the average actual attendance; and, therefore, it is clear that at least 10 per cent. of the children at school age failed to comply with the compulsory provisions of "The Education Act." This is in accord with the general results of education in ages of 5 and under 20, where it has already been shown that the proportion of persons who could not read was equal to 17·75 per cent. of the total number of persons living within this age group.

With respect to the year 1882, the following Table gives full particulars regarding Public Schools:—

	1882.	1881.
Estimated number of children living in Tasmania between the ages of 7 and 14 years	No. 20,157	No. 19,322
Public Schools—		
Schools	181	175
Instructors	351	356
Ditto per 100 scholars on Roll	3·76	3·84
Scholars—		
Distinct individuals on the Roll	13,775	13,644
Ditto per 100 of the estimated number of children living between the ages of 7 and 14 years	68·38	70·61
Average on roll	9302	9258
Ditto per 100 of the estimated number of children living between the ages of 7 and 14 years	46·15	47·91
Average attendance	6711	6701
Ditto per 100 of the estimated number of children living between the ages of 7 and 14 years	33·29	34·68
	£ s. d.	£ s. d.
Expenditure from public and private sources	28,354 3 0	26,674 0 0
Ditto from public sources, per each child in average daily attendance	3 3 1	2 18 7½
Ditto from private sources, ditto	1 1 5	1 0 11½
Ditto from both sources, ditto	4 4 6	3 19 7

As the ages of children attending school have not been furnished, it is impossible to compare results closely with those of the Census year. Of the children attending the Public Schools during the year 1881 only about three-fourths were of the school age—7-14. If we apply this proportion to the year 1882, the estimated number of children between 7 and 14 attending State Schools would be nearly as follows :—

Estimated Attendance at State Schools at Ages between 7 and 14 years.

	No.	Per cent. to children living between 7 and 14.
Distinct individuals on the roll	10,330	51·25
Average number of scholars ditto	6976	34·61
Average ditto in attendance	5033	24·97

Principal Grammar Schools and Colleges—(p. 304).

Of the principal Grammar Schools and Colleges, eight have furnished returns for the year 1882. Five of these are described as denominational, viz., Church of England, 3; Roman Catholic, 1; Wesleyan, 1; and three undenominational. None of the Superior Schools or Colleges receive Government aid directly, although in practice and design it is evident that the Degree of Associate of Arts, the Minor Scholarships, and the chief prize, the Tasmanian Scholarships, under the control of the Tasmanian Council of Education, are intended to bring the superior instruction afforded by these institutions into harmonious and systematic relation with the various sources of primary education. The following is a statement regarding accommodation, average attendance, &c., in respect of the institutions referred to :—

Accommodation, Attendance, &c.

Accommodation available for 920 Students.

Average attendance :—	No.
Under 6 years	30
6 years under 15	471
15 years and upwards	272
Total	773

There are 23 bursaries or scholarships, ranging generally between £10 and £20 each, immediately in the gift of six out of the eight principal Grammar Schools. On the average there is about one instructor to twenty scholars.

Industrial and Ragged Schools.

In connection with the various Ragged Schools there was an average daily attendance during the year 1882 of 363 children (183 boys and 180 girls); the average number on the rolls was 541. The cost of maintenance was £745, equal to £1 7*s.* 10*d.* per scholar per year, of which Government contributed 67·11 per cent. As compared with the previous year the average attendance of children was less by 30, and the expenditure shows an increase of £158.

In the various Industrial Schools there were maintained during the year on an average 85 children (25 males and 60 females), at a cost of £1730, or £20·35 per head. Of the total subscriptions the General Government subscribed about 54·47 per cent.

Public Libraries.

So far as information can be obtained, there were 17 Public Libraries open to the public during the year 1882. In all they contain 37,138 volumes. The receipts for the year amount to £2155, of which £310 is subscribed by the Government. These libraries are open at convenient hours during working days, and appear to be well attended.

Royal Society.

During 1882 the Royal Society's Museum was visited by 21,649 persons. Nearly the half of this number visited the Museum on Sundays. The number of visitors to the Gardens during the year was 59,792. There is a very valuable scientific library attached to the Museum, and the "Papers and Proceedings" of the Society published during the year contain valuable contributions to the natural history of the Island. Receipts, from Government, £800; from subscriptions and other sources, £311; total receipts, £1111. Total expenditure, £1099.

Hospitals.

The following statement contains some of the more interesting particulars regarding the various General Hospitals and Hospitals for the Insane, for the year 1882:—

	1882.
Institutions.....No.	7
Accommodation for.....No.	654
Individual cases treated.....No.	2195*
Persons died .....No.	212
Per-centage of deaths to cases treated..No.	9·61
Daily average in Hospitals .....No.	486
Total cost .....£	21,628
Cost per case per year .....£	9 17*s.* 1*d.*
Proportion of Government aid to total contribution	85·59

* Besides these there were 2556 cases of out-patients treated. Of the 2195 cases referred to, 400, or 18·63 per cent., were treated as insane in the Asylums at New Norfolk and Cascades.

Particulars regarding the Hospitals at Waratah and Campbell Town were not furnished prior to 1882, and consequently comparisons in the aggregate between 1881 and 1882 are of little value.

As regards the cost per head, and per case, of the various Hospitals, the following is a comparative statement regarding the various Institutions, according to the order of least cost :—

Cost per Head of Hospital Inmates.

	Cost per Head per Year. £ s. d.
1. Hospital for Insane, New Norfolk	27 14 3
2. Ditto, Cascades	34 15 3
3. Ditto for Contagious Diseases, Cascades	52 9 4
4. General Hospital, Hobart	74 16 6
5. Ditto, Launceston	83 2 9

Cost per head of Hospitals, Waratah and Campbell Town, cannot be accurately ascertained.

Cost per Case.

	Cost per Case. £ s. d.
1. Hospital for Contagious Diseases, Cascades	3 19 2
2. General Hospital, Hobart	5 6 7
3. Campbell Town Hospital	6 17 7
4. General Hospital, Launceston	7 12 2
5. Hospital for Insane, New Norfolk	23 4 11
6. Waratah Hospital	23 11 9
7. Hospital for Insane, Cascades	34 5 0

It should be stated, however, that the greater average permanency in some cases disturbs the comparative value of the factor *per case ;* and the cost of general expenditure *per head* is greatly lowered where the number of cases and absolute expenditure are largest. Thus, although the total expenditure of the Campbell Town Hospital is only £613, the cost *per case* is £23 11*s.* 9*d.*, while the expenditure of the General Hospital, Hobart, although £5612, only represents £5 6*s.* 7*d.* *per case.*

CHARITIES.

The following is a general statement regarding the persons maintained in the Pauper Establishments in Hobart and Launceston during the years 1881 and 1882 :—

Pauper Establishments.

	1882.	1881.	Increase or Decrease.
Accommodation for Inmates, No.	965	952	+13
Individual cases maintained, No.	1843	..	..
Average number of persons maintained—			
Male, No.	635	701	−66
Female, No.	192	194	− 2
TOTAL	827	895	−68
Persons maintained per 10,000 of the population	68	76	− 8

As regards age of Paupers, it is interesting to note that 87·30 per cent. of the whole were over 55 years of age. As regards education, 45·63 per cent. could read and write ; 15·41 per cent. could read only ; and 38·96 per cent. could neither read nor write. Although there is a greater percentage of Paupers who can read and write as compared with those who cannot, it is somewhat surprising to find that their educational standard is considerably below that of the imprisoned criminals for the same year. The result cannot even be attributed to the extreme age of the former, for the Census of 1881 shows that, of the persons at ages 55 and upwards of the general population, 63·6 per cent. could read and write. Absolutely and relatively to population, the number of paupers has decreased as compared with the previous year. In 1881 there was 1 pauper to every 132 persons ; in 1882 there was only 1 pauper to every 147 persons.

The total expenditure for the year was £10,545, or £12 15*s. per head* average of daily inmates. Nearly the whole of the cost of the Pauper Institution is provided for by the General Government.

Benevolent Societies.

Besides the work of regular Pauper Establishments, the Benevolent Societies in Hobart and Launceston afforded relief to 655 persons, and the Administrator of Charitable Grants relieved 619 cases of distress throughout the Island.

The amount expended by the Benevolent Societies during the year 1882 was £1907, equal to a sum of £2 18*s.* 2¾*d.* for each case relieved. The amount expended by the Administrator of Charitable Grants for the same year was £4968, equal to a sum of £3 15*s.* 2*d.* for each case relieved.

Public Charities generally.

Exclusive of the large expenditure in connection with Hospitals, Ragged and Industrial Schools, it would appear from Tables pp. 312-317, that the Pauper and Benevolent Institutions alone expended a sum of £17,420 in the relief of 3117 distinct individual cases, equal to a sum of £5 11*s.* 9·28*d.* per case, or 2*s.* 10·63*d.* per head of population, of which the General Government contributes £16,371, or 93·97 per cent.

The total amount expended by the General Government upon Charities of all descriptions, including Hospitals, for the year 1882 is £46,270, equal to 9·20 per cent. of the total general expenditure for the year, and representing 7·67*s.* per head of the population.

Friendly Societies.

The returns furnished by the Friendly Societies are still far from being satisfactory, although the list has been greatly improved. During 1882 there were 50 Lodges or District Lodges which filed returns.

The number of members is stated to be 4815. Receipts, £15,258; Expenditure, £12,639, or £2 12*s.* 5·98*d.* per member. The capital is stated to be £34,346, equal to £7 2*s.* 7·95*d.* per member. No information has been received as regards the direction in which the moneys have been expended.

Life Assurance.

The following information with respect to Life Assurance is of considerable interest:—

Societies, No.	8
Policies in force, No.	4881
Ditto, Amount	£1,560,188
Average amount assured per Policy-holder	£320
Ditto, per Society	£195,023
Ditto, per head of Population	£12 14*s.* 10*d.*
Policies secured per 100 of Population	3·97
Estimated ditto per 100 of adult ditto	8·01

It is a somewhat curious coincidence that the number of policies assured—4881—should be nearly equal to the number of members who are returned as belonging to the various Friendly Societies for the same year.

GENERAL.

Great difficulty has always been experienced in securing the early publication of the Statistics collected in respect of each year. In the first place, the information necessary to complete any one of the various tables or sections has to be collected from many sources, and, unfortunately, the hour when the *most dilatory collector furnishes the last* item of necessity determines the time when the *first* statistical sheet can be placed in the hands of the printer. The power placed in the hands of the Statistician is at present insufficient to command greater promptitude on the part of some officers, who, I am sure, do not consider that by delay on their part they hinder the publication of the work of the greater number who have rendered their returns with zeal and promptitude. In the next place, the information relating to such subjects as "Finance and Agriculture" can only be furnished late in the next year, as the term covering the financial year and the harvest embraces several months of the year succeeding that for which the volume as a whole is nominally related. Lastly, the period of the year when the greater portion of the statistical matter is placed in the hands of the printer is one in which the whole strength of the printing department is required to supply the ever-increasing needs of Parliament. Thus the Government Printer, with every desire to forward the publication of the Statistical volume, finds it impossible, with the existing arrangements, to satisfactorily overtake all the work pressed upon him at one time. Perhaps an authoritative classification of the matters to be printed, as regards priority of publication, would greatly improve this state of affairs, and strengthen the hands of the Government Printer. I am convinced that the early publication of important statistical information cannot be secured until some such arrangement has been introduced.

To obviate to some extent the evil of delay, it was deemed desirable, in addition to the usual advance sheets, to publish a limited number of each Part as soon as it was completed, without waiting for the completion of the volume as a whole. This plan has been followed generally in the

neighbouring Colonies, where it appears those responsible for the publication of the yearly Statistics find even greater difficulties in this respect than we do in Tasmania. In order to work this plan more effectually, it was necessary to re-arrange the classification of some of the Parts so that all matters naturally allied should, as far as possible, appear together in the same Part. In the classification adopted this object was ever kept in view, and the modification of the previous valuable arrangements was only undertaken where it was absolutely necessary to that end. In this direction I was greatly aided by the admirably arranged Statistics prepared by the Statisticians of the neighbouring Colonies, and particularly by those prepared under the direction of Mr. Hayter, the accomplished Statist of Victoria. I also had the great advantage of being able to consult with my friend and predecessor, Mr. Nowell, whose experience and advice has been of the greatest benefit to me in undertaking a new work of such magnitude.

Besides the great enlargement of the yearly volume, I have been enabled to initiate and carry on the publication of special monthly Reports with respect to the Vital Statistics of the Town and Country District of Tasmania.

The various separate Parts of the General Statistics for Tasmania for the year 1882 were published according to the following dates; viz.—

		1883.
Part	I.—Blue Book	April 25th.
„	II.—Population	May 2nd.
„	III.—Vital and Meteorological	June 23rd.
„	IV.—Interchange	Sept. 20th.
„	V.—Finance	Oct. 17th.
„	VI.—Accumulation	Oct. 30th.
„	VII.—Production	Nov. 23rd.
„	VIII.—Law, Crime, and Protection	Dec. 6th.
„	IX.—Intellectual, Moral, and Social Provision ..	Dec. 18th.
„	Australasian Statistics	Oct. 30th.

In conclusion, while I have earnestly endeavoured to make the General Statistics for the year 1882 as complete as the very limited means at my disposal would admit, I regret to state that the necessity of attending personally to other important duties made it utterly impossible for me to devote to the details of statistical matters that constant and close supervision which their importance demands.

I take this opportunity of gratefully acknowledging the valuable assistance I have constantly received from the Government Printer and his officers in the preparation of matters for publication.

I have the honor to be,
Sir,
Your obedient Servant,

ROBT. M. JOHNSTON, *Government Statistician and General Registrar.*

The Hon. Wm. Moore, *Chief Secretary, Hobart.*

POPULATION.

THE first 16 Tables are derived from the Returns of the last Census.

ROBT. M. JOHNSTON, *Government Statistician.*

CENSUS 1881.—POPULATION.

POPULATION of Tasmania and its Dependencies on 3rd April, 1881.

	Persons.	Males.	Females.
TOTAL POPULATION enumerated	115,705	61,162	54,543
Tasmania	115,078	60,810	54,268
Islands in Tasmanian Waters	627	352	275

CENSUS 1881.—DWELLINGS.—GENERAL SUMMARY.

HABITATIONS in Tasmania on the 3rd April, 1881.

Total Number of Dwellings.	Description.					Materials.				
	Dwellings (exclusive of Stores, Tents, &c.)			Inhabited Stores, Offices, and Public Buildings.	Tents.	Brick or Stone.	Wood, Iron, and Lath and Plaster.	Slab, Bark, Mud, &c.	Canvas, Linen, Calico, &c.	Materials unspecified.
	Occupied.	Unoccupied.	Building.							
23,529	21,670	1533	138	27	161	7672	14,041	996	181	639

Classification according to Number of Rooms.						
Dwellings of One Room.		Dwellings of Two Rooms.	Dwellings of Three and Four Rooms.	Dwellings of Five and Six Rooms.	Dwellings containing more than Six Rooms.	Dwellings in which the Number of Rooms was not specified.
Brick, Stone, Wood, Iron, &c.	Huts, Tents, &c.					
681	809	4674	8431	3981	3954	999

CENSUS 1881.—POPULATION AND DWELLINGS.—GENERAL SUMMARY.

INHABITANTS and Dwellings in Tasmania on the 3rd April, 1881.

Dwellers in—				Travellers, and Persons sleeping under Drays, and camping out.	Persons in Ships.	Migratory Population (estimated).	TOTAL.
Brick, Stone, Wood, Iron, or Lath and Plaster Buildings.	Slab, Bark, or Mud Huts.	Tents and Dwellings with Canvas Roofs.	Habitations of unstated Materials.				
110,368	2405	484	1670	81	697	—	115,705

Census 1881—Population and Dwellings, 1841—1881.

POPULATION and Habitations of Tasmania at the period of each Enumeration from 1841 *to* 1881.

Date of Enumeration.	Persons.	Males.	Females.	Buildings.							
				Total Number of Buildings.	Occupied.	Unoccupied.	Building.	Constructed of—			
								Brick and Stone.	Wood, Iron, &c.	Canvas, Bark Huts, &c.	Unspecified Material.
27 Sept. 1841[a]	50,216	34,504	15,712	7758	6859	297	602	3459	3489	Not stated.	810
31 Dec. 1847[b]	70,164	47,828	22,336	10,187	9519	95	573	4963	5224	,,	Not stated.
1 Mar. 1851[c] ...	70,130	43,127	25,482	11,844	11,245	38	561	5723	6121	,,	,,
31 Mar. 1857[d] ...	81,492	45,916	34,886	15,018	14,273	122	623	6760	8258	,,	,,
7 April, 1861 ...	89,977	49,593	40,384	18,593	17,566	944	83	7417	11,176	,,	,,
7 Feb. 1870	99,328	52,853	46,475	20,364	18,048	2146	170	7844	12,421	99	,,
3 April, 1881[e] ...	115,705	61,162	54,543	23,529	21,858	1533	138	7672	14,041	1177	639

[a] The figures for 1841 as published in the *Gazette* are full of errors, which cannot now be corrected; and they should therefore be used with great caution.
[b] The figures (Persons) for 1847 include 2246 Military, Women, and Children; also 3739 Male Convicts on Public Works.
[c] ,, ,, 1851 ,, 953 ,, ,, ,, (sex not distinguished); also 568 Convicts on Public Works.
[d] ,, ,, 1857 ,, 690 ,, ,, ,, ,, ,,
[e] The discrepancy in the number of Brick and Stone Houses in 1881 and 1870 arises from a large number of country residents in 1881 not giving the description of their dwellings, which are consequently placed under "Unspecified Material."

Census, 1881—Population and Dwellings.—Increase.

INCREASE of Inhabited Houses, also Increase and Decrease of Population of Tasmania, in the intervals between the Censuses of 1841—1881.

Interval between the Enumerations.	Increase of Inhabited Houses.	Increase or Decrease of Population.	Decennial Rate of Increase per cent. of Inhabited Houses.	Decennial Rate of Increase or Decrease per cent. of Population.
1841—1847 = 6·260 years	2660	19,948	61·95	63·46
1847—1851 = 3·137 ,, ...	1726	— 34	57·80	—·15
1851—1857 = 6·082 ,, ...	3028	11,362	44·27	26·64
1857—1861 = 4·019 ,, ...	3293	8485	54·71	25·91
1861—1870 = 8·838 ,, ...	482	9351	3·11	11·76
1870—1881 = 11·153 ,, ...	3810	16,377	18·34	14·32
Total Increase in 39·49 years	14,999	65,489	218·68	Total Increase per cent. in 39·489 years ..... 130·41 Annual Increase per cent. ..... 2·1368

NOTE.—The sign *minus* (—) denotes a decrease.
The rates of increase per cent. have been calculated for equal periods of ten years.

Census 1881—Proportion of the Sexes, Density of Population and Houses.

NUMBER of Females to 100 *Males, and Number of Persons to the Square Mile, at the period of each Enumeration from* 1841 *to* 1881; *also Number of Persons to the Inhabited House, and of Inhabited Houses to the Square Mile.*

Date of Enumeration.	Number of Females to 100 Males.	Number of Persons to the Square Mile.	Number of Persons to the Inhabited Dwelling.	Number of Inhabited Dwellings to the Square Mile.
27 September, 1841	45·54	1·915	7·32	·262
31 December, 1847	46·70	2·676	7·37	·363
1 March, 1851	59·06	2·675	6·25	·429

[Groups re-arranged and re-calculated in the Office of the Government Statistician.]

ROBT. M. JOHNSTON, *Government Statistician.*

Census 1881.—Sickness and Infirmity.

NUMBER of Sick and Infirm, and Proportion per 10,000, *of the living Population of each Sex at the Census* 1881, *under each description of Infirmity.*

	Number of Sick and Infirm.			Proportion per 10,000 living.		
	Persons.	Males.	Females.	Persons.	Males.	Females.
Totals	2646	1491	1155	228·68	243·77	211·75
Nature of Infirmity.						
Sickness	1751	913	838	151·33	149·28	153·64
Accident (suffering from)	225	179	46	19·44	29·27	8·43
Deaf and Dumb	63	31	32	5·44	5·06	5·87
Blindness	185	131	54	16·00	21·42	9·90
Lunacy	346	206	140	29·90	33·68	25·66
Idiotcy	76	31	45	6·57	5·06	8·25

Total Population of Colony per Census 1881—Persons, 115,705 : Males, 61,162 ; Females, 54,543.

Note.—No account of Sickness and Infirmity was taken before 1881. At the time of the Census of that year Measles were very prevalent throughout the Colony.

Religions of the People.

ESTIMATE of the Number of Persons belonging to the various Religious Denominations on 31st December, 1882, based upon the relative proportions ascertained by the Census of 7th February, 1870.

Denomination.	Per-centage as per Census 1870.	Estimated No. of Persons, 31st December, 1882.*
Church of England	53·41	65,417
Church of Rome	22·24	27,239
Church of Scotland	6·69	8194
Free Church of Scotland	2·43	2976
Independents	3·96	4850
Baptists	0·94	1151
Wesleyan Methodists	7·23	8855
Society of Friends	0·08	98
Jews	0·23	282
Mahommedans or Pagans Other Sects	2·79	3417
Total	100	122,479

* No account was taken of the religious denominations in the Census of 3rd April, 1881. As important changes may have taken place in the relative growth of the various bodies since the Census of 1870, these figures can only be regarded as rough approximates.

ROBT. M. JOHNSTON, *Government Statistician.*

Migration.

RETURN showing the Direction and Extent of Migration of Persons to and from Tasmania during the Year 1882.

	Total number.	Males.	Females.	Adults.	Children.	Numbers to and from—* Victoria.	New South Wales.	Queensland.	South Australia.	Western Australia.	New Zealand.	Total to and from neighbouring Colonies.	United Kingdom.	Foreign Ports.
Immigration	12,822	8820	4002	11,579	1243	11,542	983	9	7	—	264	12,805	11	6
Emigration	11,403	7891	3512	10,587	816	10,485	729	4	9	—	174	11,401	2	—
Immigration in excess of Emigration	1419	929	490	992	427	1057	254	5	—	—	90	1404	9	6
Emigration in excess of Immigration	—	—	—	—	—	—	—	—	2	—	—	—	—	—

[Compiled from Returns supplied by the Customs Department.]

* The corresponding numbers, to and from, as ascertained by the Customs Departments of the various Colonies, are so utterly irreconcilable for the year 1882, that it has been deemed more desirable to take the departures as ascertained by our own Customs Department than to base the statement of Emigration upon the compilations prepared at Colonial and Foreign ports of arrival.

ROBT. M. JOHNSTON, *Government Statistician.*

IMPORTS AND EXPORTS.

THE names of articles imported and exported are arranged in the following Returns as nearly as possible in accordance with a natural system of classification recommended by the Intercolonial Statistical Conference held in Tasmania in January, 1875.

Formerly articles were arranged alphabetically, without regard to natural alliance. In the classification now adopted alphabetical order is made subordinate to the natural relationship of the various articles.

ROBT. M. JOHNSTON, *Government Statistician.*

CLASSIFICATION OF ENTRIES OF ARTICLES IMPORTED AND EXPORTED.

CLASS I.—ART AND MECHANIC PRODUCTIONS (SPECIFIC), OTHER THAN TEXTILE FABRICS AND DRESS.

Order 1. Books, &c.
„ 2. Musical instruments.
„ 3. Prints, pictures, &c.
„ 4. Carving, figures, &c.
„ 5. Tackle for sports and games.
„ 6. Watches, philosophical instruments, &c.
„ 7. Surgical instruments.
„ 8. Arms, ammunition, &c.
„ 9. Machines, tools, implements, &c.
„ 10. Carriages, harness, &c.
„ 11. Ships and boats, and matters connected therewith.
„ 12. Building materials.
„ 13. Furniture.
„ 14. Chemicals.

CLASS II.—TEXTILE FABRICS AND DRESS.

Order 15. Wool and worsted manufactures.
„ 16. Silk manufactures.
„ 17. Cotton and flax manufactures.
„ 18. Manufactures of mixed materials.
„ 19. Dress.
„ 20. Manufactures of fibrous materials.

CLASS III.—FOOD, DRINKS, &c.

Order 21. Animal food.
„ 22. Vegetable food.
„ 23. Drinks and stimulants.

CLASS IV.—ANIMAL AND VEGETABLE SUBSTANCES.*

Order 24. Animal substances.
„ 25. Vegetable substances.
„ 26. Oils.†

CLASS V.—MINERALS AND METALS.

Order 27. Articles connected with mining.
„ 28. Coal, &c.
„ 29. Stone, clay, earthenware, and glass.
„ 30. Water.
„ 31. Gold, silver, specie, and precious stones.
„ 32. Metals other than gold and silver not included in Class I.*

CLASS VI.—LIVE ANIMALS AND PLANTS.

Order 33. Animals and birds.
„ 34. Plants.

CLASS VII.—MISCELLANOUS MATTERS.

Order 35. Miscellaneous articles of trade, &c.
„ 36. Indefinite articles.

* Only raw materials or substances, undetermined as regards final specific use, classed within this division. † Mineral oils included.

As the various Orders are numbered consecutively, the position of any article will be readily found by means of the following Index:—

INDEX TO ARTICLES IMPORTED AND EXPORTED.

* The maximum rate appears only to have prevailed in Districts chiefly Urban or Pastoral, where it may be supposed there was greater scarcity of agricultural labor. There is sometimes great difficulty in fixing the prevailing rate in Districts where few individuals of the particular class are employed.

* In making these calculations the following rule has generally been observed :—Fractions of a £ over 10*s.* have been regarded as £1, those under 10*s.* ignored.

† Distribution of the proportions charged against each item calculated on the basis of Unredeemed Loans. Specific Rates of Interest against particular works being affected by renewals are ignored : all items are consequently charged at the mean rate.

‡ Estimated.

‖ Includes cost of Diamond Drills, &c.,—viz., £7800 12*s.* 2*d.*

¶ Includes Scab Act Moneys,—viz., Receipts, £1917 4*s.* 11*d.*; Expenditure, £2321 12*s.* 4*d.*

ROBT. M. JOHNSTON, *Government Statistician.*

[a] Including detail of balances at the beginning of the year. [b] Including detail of balances at the close of the year.

* By Act 33 Victoria, No. 8, Sect. 89, the amount of Rates in the £ on Crown Land is fixed at one-half of that on Private Property.

† The Road Trusts marked thus have failed to supply the necessary information in respect of the character of the roads. The mileage stated is taken from last year's returns, but it is possible in some cases that sufficient care has not been taken to exclude mileage of Main Roads, &c. not under the charge of particular Road Trusts.

(The sign *minus* (—) shows that the balances were against the Trusts.)

[Compiled from Returns furnished by the respective Trusts, and from the audited accounts as published in the *Gazette*.]

ROBT. M. JOHNSTON, *Government Statistician*

MEMO.—The Returns hitherto furnished of the Area of Crown Land under Rental have, for many years past,* shown a considerable excess beyond the actual quantity under lease. It is difficult now to account for the very great discrepancy; but it may have arisen, in some measure, from the fact that, *after* the annual Returns are made up, lists of persons who have failed to pay rent are received from the Colonial Treasury, and they have not been taken into consideration when the Returns for the following year have been prepared.

* Up to, and including, 1866.

ROBT. M. JOHNSTON, *Government Statistician.*

[a] The definition of lands sold as pastoral and agricultural has now been discontinued, as the basis of classification was deemed unsatisfactory and misleading.

ROBT. M. JOHNSTON, *Government Statistician.*

MINERAL LANDS.

RETURN showing the Number of Gold Mining Leases applied for and executed during the Year 1882, *and in force on the* 31*st December,* 1882.

Number applied for	310
Area in Acres	2698
Number executed	305
Area in Acres	2930A. 0R. 15P.
Number in force at the end of the year	362
Area in Acres	3627A. 2R. 7P.

RETURN showing the Number of Registered Claims under Miners' Rights and Business Licences applied, for during the Year 1882.

Ordinary Mining Claims	194
Business Areas	2
Residence Areas	3
Machinery Sites	2
Water Rights	22
Prospectors' Areas	72

NOTE.—The great majority of Business and Residence Areas and ordinary Mining Claims are taken up without reference to the Department, registration not being compulsory.

RETURN showing the Number of Business Licences and Miners' Rights issued during the Year 1882.

Business Licences.—In force from date of issue until 31 December, 1882, and apply to any part of the Colony	61
Business Licences.—Issued in December, 1882, for the year 1883, under Sect. 26 of 44 Vict. No. 16	*Nil.*
Miners' Rights.—In force until the 31st December, 1882, and apply to any part of the Colony	1804
Miners' Rights.—Issued in December, 1882, for the year 1883, under Sect. 19 of 44 Vict. No. 16	82

RETURN showing the Amount of Fees, &c. received during the Year 1882.

TRADES, MANUFACTORIES, AND OTHER INDUSTRIES—*continued.*

PATENTS.

RETURN of Letters Patent for Inventions issued or applied for during the Year 1882, *under "The Patent Law Act," 22 Victoria, No.* 22.

No. on Register.	Name and Address of Patentee.	Date of Issue.	Nature of Invention.
	ISSUED.	1882.	
204	Samuel Henry Crocker, of 95, Collins-street, West, Melbourne, Victoria.	10 January	An improved process of engraving on glass or glassy surfaces.
205	Almerin Hubbell Lighthall, of San Francisco, County of San Francisco and State of California, United States of America.	4 January	Improvements in heading and harvesting machine combined for heading thrashing grain.
206	Frederick Charles Rowan, of 29, Queen-street, City of Melbourne, Victoria.	4 January	For an improved method of constructing tramways and light lines of railway.
207	John Naylor and Robert Thornton, both of Stawell, Victoria.	18 March	Improvements in rock-drills.
208	Robert Holden Stone, of New-street, Brighton, Victoria.	10 January	For an improved process of manufacturing artificial stone.
209	Claude Theodore James Vautin, of Rae-street, North Fitzroy, near Melbourne, Victoria.	13 January	Improvements in the refining of impure commercial copper.
210	Thomas Martin, of Bethanga, Victoria.	7 March	An improvement in the construction of blast furnaces.
211	Alexander Richard Mackenzie and John Frederick Maclaren, both of Mackay, Queensland.	17 March	Improvements in the construction of vacuum pans.
213	John Mitchell, of Eagle Hawk, near Sandhurst, Victoria.	18 April	Improvements in air compressors.
214	John Mitchell, of Eagle Hawk, near Sandhurst, Victoria.	18 April	Improvements in rock-drills.
215	Joseph Walker Oakman, of Collins-street East, City of Melbourne, Victoria.	14 July	For improved concave vehicle springs.
216	John Henry Seymour, of Launceston, Tasmania.	31 July	An invention for a patent safety appliance.
217	Edward Waters, of No. 87, Bourke-street West, City of Melbourne, Victoria.	29 April	For improvements in and relating to dynamo-electric machines.
218	Edward Waters, of No. 87, Bourke-street West, City of Melbourne, Victoria.	2 May	For improvements in electric lamps or lighting apparatus.
219	Heinrich Wilhelm Ferdinand Kayser, of Waratah, Tasmania.	29 April	For improvements in machinery or apparatus for classifying, dressing, and concentrating ores and other metalliferous material.
220	Edward Waters, of No. 87, Bourke-street, West, City of Melbourne, Victoria.	2 May	For improvements in and relating to electric lighting apparatus, and the manufacture of carbonised material to form conductors for the same, and for other purposes.
221	Richard Bowyer Smith, of St. Margaret's Hill, Tipara, South Australia.	4 May	For improvements in ploughs and cultivators.
222	George Westinghouse, junior, of Pittsburg, Pennsylvania, United States of America.	9 May	For improved apparatus employed in working railway brakes by fluid pressure.
223	James Morrow, of the Firm of Joseph Nicholson and Company, of Bouverie-street, Carlton, near Melbourne, Victoria.	9 May	For an improvement in the construction of grain-stripping machines.
224	Edward Waters, of No. 87, Bourke-street West, City of Melbourne, Victoria.	12 June	For improvements in apparatus for generating electric currents and for producing electric light.
225	Ebenezer Farie Macgeorge, of St. James' Park, Hawthorn, near Melbourne, Victoria.	2 June	For an improved method of, and apparatus for, ascertaining the gradient of any internal or external surface, together with the magnetic bearing of such gradient.
226	Alexander Binnie, of Maori Hill, near Dunedin, Provincial District of Otago, New Zealand.	23 September	For an improved process of, and apparatus for the manufacture of Gas for illuminating and other purposes.
227	Augustus Frederick Nagle, of Providence, United States of America.	19 June	For improvements in presses for pressing bricks and concrete blocks.
228	Camille Alphonse Faure, of 22, Boulevard Voltaire, Paris, Republic of France.	19 June	For improvements in galvanic batteries.
229	Alfred Charles Brown and Henry Alfred Charles Saunders, both of 66, Old Broad-street, City of London, England.	19 June	For improvements in telephonic and telegraphic signalling apparatus.
230	John Ambrose Fleming, of University College, Nottingham, County of Nottingham, England.	14 July	For improvements in the preparation of materials to be employed for the purposes of electric insulation.
231	Frederick Sheppard Grimwade, of No. 31, Flinders' Lane West, City of Melbourne, Victoria.	14 July	For improvements in the preparation of phosphorised material for the destruction of vermin.
232	Wilkinson Wayman and George Kay, both of Stawell, Victoria.	26 July	For an improved method of constructing engines and machines in which the motive power is applied to either side of the piston alternately.
233	Thomas Theophilus Draper, of Chancery Lane, City of Melbourne, Victoria.	26 July	For improvements in contrivances used in telephony and telegraphy.

TRADES, MANUFACTORIES, AND OTHER INDUSTRIES—*continued.*

PATENTS—*continued.*

No. on Register.	Name and Address of Patentee.	Date of Issue.	Nature of Invention.
		1882.	
234	Edward Waters, of No. 87, Bourke-street, West, City of Melbourne, Victoria.	26 July	For an improved composition for unhairing and preserving hides and skins.
235	William Henry Harrison and John Cornelius Craigie Halkett, both of Sydney, New South Wales.	23 August	Invention for reducing and smelting ores to a metallic state by an improved process to be designated "Harrison's Oxy-hydrogen process."
236	David Anderson, of Fairview, Stawell, Victoria.	15 September	For improvements in contrivances for varying the gauge of the wheels of rolling-stock for rail and other permanent ways.
237	Gustaf Liedman and Carl Beger, both of Berlin, in the German Empire.	15 September	For an improved apparatus for giving motion to carriages, vessels, machines, and other moveable bodies.
238	John Jeyes, of Plaistow, County of Essex, England.	5 October	For improved antiseptic preservative curative and cleansing compounds for sanitary and other purposes.
239	George Westinghouse, junior, of Canal Road, King's Cross, County of Middlesex, England.	5 October	For improvements in pneumatic brake apparatus for railway trains.
240	St. George Lane Fox, of Queen Anne's Gate, London, England.	31 October	For improvements in and connected with the distribution and application of energy by electricity for lighting or other purposes, and in the means or apparatus employed therein.
241	Edward Waters, of No. 87, Bourke-street West, City of Melbourne, Victoria. (Charles F. Brush, of Cleveland, State of Ohio, United States of America.)	31 October	For improvements in electric lighting and in apparatus to be used therewith.
242	James Cosmo Newbery, John Lister Morley, and Barry Cleveland, all of Melbourne, Victoria.	31 October	For improvements in furnaces for reducing and smelting certain descriptions of ores.
243	Henry Richard Hancock, of the Moonta Mines, Province of South Australia.	8 November	For improvements in jigging-machines.
244	Fritz Kœnemann, of Kelso Cottage, Dawson-street, Ballarat, Victoria.	8 November	For improvements in blasting-cartridges.
245	Thomas Kennedy Park, of Sydney, New South Wales.	11 November	For improvements in the concentration of dry metalliferous material.
246	Antonio Buzolich, of Nicholson-street, North Carlton, Victoria, and Thomas King Smith, of Hoddle-street, Prahran, Victoria.	11 November	For an improved composition to be used as a paint either with or without the ordinary pigments.
247	Nicholas Belfield Dennys, of Singapore, in the Straits Settlement.	19 December	For a composition for protecting the bottoms of iron vessels, metals, and wood from the action of sea water, fouling, damp, and atmospheric influence.
248	John Alves, of George-street, Dunedin, New Zealand.	19 December	For improvements in apparatus for the extraction of gold and the concentration of gold-bearing material, such as pyrites, from finely divided auriferous material.
	APPLIED FOR BUT NOT ISSUED.		
249	Frederick Allen Gower, of Paris, in the Republic of France.	...	For improvements in telephones or telephonic apparatus.
250	John Evelyn Liardet, of Brockley, County of Kent, England, and Thomas Donnithorne, of 30, Gracechurch-street, City of London, England.	...	For improvements in the means of, and in the apparatus for, storing electrical energy, and in the preparation of the materials to be employed.
251	Francis Edward de Lacye Richards, R.N., of Saint Leonards, North Shore, New South Wales.	...	For an improved liquid for producing gas and an improved burner for burning it, known as a portable pantascope gas light.
252	Robert Jacob Gülcher, of Bielitz Biala, Empire of Austria.	...	For improvements in Dynamo-electric machines or magneto-electric machines.
253	Robert Jacob Gülcher, of Bielitz Biala, Empire of Austria.	...	For improvements in electric lamps.
254	John Lewis, of Launceston, Tasmania.	...	For the improvement of machinery and apparatus for classifying, dressing, and concentrating ores and other metalliferous material.
255	Thomas Alva Edison, of Menlo Park, State of New Jersey, United States of America.	...	For improvements in and relating to electric lamps.
256	Louis Mallac, of Little Raglan-street, Albert Park, near Melbourne, Victoria.	...	For improvements in galvanic batteries.
257	Raphael Josia, of Certaldo, Kingdom of Italy.	...	For improvements in the manufacture of artificial stone and marble, and in colouring the same.
258	George Dalton, of Leeds, County of York, England.	...	For improvements in and connected with machinery or apparatus for crushing or reducing gold quartz, ores, coprolites, cement, clinker, or other like substances.
259	Francis Blundell Warre Malet, of Christchurch, Provincial District of Canterbury, New Zealand, now at Sydney, New South Wales.	...	For an improved fencing wire.

TRADES, MANUFACTORIES, AND OTHER INDUSTRIES—*continued.*

PATENTS—*continued.*

No. on Register.	Name and Address of Patentee.	Date of Issue.	Nature of Invention.
260	David Dally, of Launceston, Tasmania.	...	For a medicine for the cure of rheumatism, gout, bronchitis, and all diseases of secretion and excretion.
261	Henry Beger, of No. 190, Westminster Bridge Road, Surrey, England.	...	For improved means of locking nuts.
262	Frank Wright and Matthew William Wallbank Mackie, both of No. 80, Gray's Inn Road, County of Middlesex, England.	...	For a new or improved apparatus for blowing and shaping glass.
263	Alfred Gilsenan, of Bung-Bong, near Maryborough, Victoria.	...	For improvements in implements for harrowing, cultivating, or grubbing.
264	Sir Julius Vogel, of Melbourne, Victoria, (John Hopkinson, of 4, Westminster Chambers, City of Westminster, in England, Civil Engineer.)	...	For improvements in dynamo-electric machines.
265	Joshua Hersey Cushing, of No. 124, Collins-street, West, City of Melbourne, Victoria. (John Campbell, of City and County of San Francisco, State of California, United States of America, M.D.)	...	For improvements in ore furnaces.
266	Richard Matthew Howling, of Ballarat, Victoria.	...	For improvements in apparatus for arresting sparks from funnels, flues, and chimneys.
267	Richard Barker, of London, England.	..	For a new or improved method of, and means or apparatus for, extracting gold and silver from their ores by the combined action of electricity and mercury.
268	William Crookes, F.R.S., of Boy Court, Ludgate Hill, City of London, England.	...	For improvements in the construction and manufacture of electric lamps.
269	John Chambers, of Te Mata, Napier, New Zealand, now of Manchester, County of Lancaster, England.	...	For improvements in refrigerating and freezing, and in apparatus employed for such purposes.

CRIME.—*QUINQUENNIAL RETURN.*

COMPARATIVE Table showing the Number of Offences,[a] Apprehensions, Convictions, and Acquittals, for the last Five Years.

	1878.	1879.	1880.	1881.	1882.
I. The Number of Persons reported to the Police:—					
1. Against the person	769	698	707	561	663
2. Against property	1290	1427	1253	1110	1277
3. Others	6351	7220[b]	6901	6421	6386
II. The Number of Persons brought before the Magistrates:—					
1. For offences against the person	729	672	667	541	646
2. For offences against property	917	1033	863	708	869
3. On other grounds	6255	7004	6806	6317	7305
III. The Number of Persons summarily convicted:—					
1. For offences against the person	411	387	394	294	332
2. For offences against property	598	679	566	384	555
3. For other offences	5251	5995	5725	5272	6057
IV. The Number of Persons convicted in the Superior Courts:—					
1. For offences against the person	20	21[c]	13	18	5
2. For offences against property	28	26[c]	42	24	29
3. For other offences	6	20	18	9	2
V. The Number of Persons discharged or acquitted:—					
1. In Magistrates' Courts[d]	1528	1538	1534	1526	1783
2. In Superior Courts	23	29	25	13	18

[a] Including charges of lunacy and those which resulted in Orders for the Payment of Money. [b] Corrected. [c] Corrected—typographical error. [d] Including cases withdrawn.

ROBT. M. JOHNSTON, *Government Statistician.*

CRIME.—*DECENNIAL RETURN.*

Years.	*Commitments.*	*Persons dealt with by Superior Courts.*								*Persons (including Lunatics) dealt with by Magistrates.*	
		Number tried.						Convicted.	Executed.		
		TOTAL.	Offences against—		Miscellaneous Offences.	Felonies.	Misdemeanors.			Number dealt with.	Convicted.[a]
			Person.	Property.							
1873	125	101	40	61	—	81	20	75	—	7308[b]	4641
1874	120	81	27	54	—	65	16	63	—	6513[c]	4433
1875	108	78	35	37	6	61	17	49	1	9088[d]	4438
1876	94	71	26	43	2	44	27	51	—	9207	5567
1877	93	74	20	46	8	67	7	49	1	7619	5082
1878	109	77	25	41	11	60	17	54	1	7901	4965
1879	114	96	35	37	24	75	21	67	—	8709	5556
1880	129	98	24	54	20	81	17	73	—	8336	5308
1881	99	64	28	29	7	31	33	51	—	7566	4685
1882	90	54	13	39	2	47	7	36	1	8820	5837

[a] Not including those cases in which Orders were made for the Payment of Money. [b] Increase probably caused by influx of Railway Navvies. [c] Not including 2389 cases arising out of the collection of the Launceston and Western Railway Rate. [d] The increase over previous years is caused by the number of cases (2681) heard at the Mayors' Courts in Hobart and Launceston having been here included for the first time. Cases (247) arising out of the collection of the Launceston and Western Railway Rate not included.

ROBT. M. JOHNSTON, *Government Statistician.*

APPENDIX TO STATISTICS OF TASMANIA FOR 1882.

AUSTRALASIAN STATISTICS,

1882.

Compiled in the Office of the Government Statistician of Tasmania, chiefly from Returns furnished by the respective Governments of the various Colonies.

AUSTRALASIAN STATISTICS,

YEAR 1882.

THE following Comparative Tables have been prepared chiefly from Returns specially furnished by the respective Governments of the various Colonies.

ROBT. M. JOHNSTON,

Government Statistician.

General Register Office,

22*nd October*, 1883.

AUSTRALASIAN STATISTICS, 1882.

TABLE I.

[a] Including Northern Territory.

[b] The following note respecting the Native Population of the various Colonies is taken from Mr. Hayter's Australasian Statistics for the year 1882:—"Aborigines are included in the figures relating to Victoria and New South Wales, but not in those relating to the other Colonies. The following are the numbers of Aborigines enumerated at the Census of 1881: In Victoria, 780; New South Wales (civilised Aborigines only), 1643; Queensland (roughly estimated), 20,585; South Australia (in settled districts only), 6346; Western Australia (number employed by settlers only), 2346; Tasmania, *nil*; New Zealand (Maories), 44,097."

[c] Including Tramways. [d] Included in Post Office. [e] Including Telegraphs. [f] 54 miles Government Railways only. [g] Included in Railways.

[h] Including land in permanent artificial grasses and land in fallow.

* Not furnished, or incomplete.

† The approximate sub-division of the two items of revenue so marked is based upon figures given in Mr. Hayter's Preliminary Table, as the Registrar-General of New Zealand states that the sub-divisions cannot be correctly ascertained,—the revenue from various sources being collected by means of one sort of stamp, and postage stamps being also used for the collection of stamp revenue.

ROBT. M. JOHNSTON, *Government Statistician.*
