

August-September Severe Weather Event - Business Support

Mr WOOD question to MINISTER for ENERGY and RENEWABLES

Many thousands of businesses and households have suffered power outages in recent weeks. I have been contacted by constituents in my electorate of Bass whose business operations have been significantly impaired, especially those in the agricultural sector and the dairy industry whose livestock have suffered. Can you provide my constituents with details about what is being done to support business owners, especially dairy farmers, with extended power outages and to ensure animal welfare?
