Subject: hemp

Yeh, you go guys! About time there was some support to growing this valuable resource in this state.

There is great opportunity for value adding this wonderful commodity. Such as turning it into fabric, clothing, skin care, rope, food etc.

Perhaps if the pulp mill gets the go-ahead, it could process hemp also. Many jobs could be created and land for growing rejuvenated.

I look forward to hearing about the progress with growing hemp.

Kind regards

Brenda Goddard
