

Royal Tasmanian Botanical Gardens - Upgrades Timeline

Mr BEHRAKIS question to MINISTER for PARKS

Constituents in my electorate are excited about the plans to improve visitor experiences at the much-loved Royal Tasmanian Botanical Gardens. I understand that upgrades announced will include improvements to the main entry to the gardens, a new pedestrian footpath and accessible crosswalk, new lighting, traffic wayfinding enhancements, disability and bicycle parking, and new landscaping works. It is great to see these much-needed improvements progressing, but with areas of the garden closed to the public during construction, we need the work to be done as soon as possible.

Can you please provide a timeline for the works and advise when construction will be completed?
