

Road Condition Complaints in Braddon in the Last 12 Months

Dr BROAD question to MINISTER for INFRASTRUCTURE and TRANSPORT

I've been contacted by a Braddon constituent who tells me the road outside their property has been patched so many times it now looks like a quilt. They say they are replacing tyres because of potholes, school buses are swerving to avoid craters and when it rains, sections of the road become undrivable. They want to know how many complaints your department has received about the condition of roads in Braddon in the last 12 months. And when will Tasmanian road users see permanent repairs instead of temporary patches?
