

The following Table lists relatively recently constructed stadiums with a focus towards stadiums with roofs and stadiums in countries where the construction industry and wage structures are similarly compatible to our economy. These are listed chronologically newest to older. This is not a complete listing and we have purposely not included a lot of recent US stadiums that fall in the upper middle of the table ( \$1-2B US) simply to illustrate the broader global context.

Name	Capacity	Location	Sport/Field Dimension	Date Completed	Cost (Local Currency unless noted)	Notes
Gabba Redevelopent	50,000	Brisbane Queensland	AFL/165m long x 130 wide	Proposed 2030	2.7B AUS	No roof proposed
