

Sustainable Timber Tasmania - Responses to Inquiries

Dr WOODRUFF question to MINISTER for BUSINESS, INDUSTRY and RESOURCES

My constituent, Michelle, has contacted Sustainable Timbers Tasmania several times over the last six weeks seeking information about the proposed logging coupes that are on their latest three-year plan and particularly about coupes that are marked to be logged in 2024. She received one reply after her initial email asking that she supply more information. She replied providing answers to STT's questions but has not had a responding email since, despite resending her questions each week.

Feedback on their annual logging plan is part of commitment to engaging with local stakeholders. Why has Sustainable Timbers Tasmania not provided the information Michelle requested or acknowledged receipt of her subsequent emails?
