

## Jean Brook Reserve - Water Transfer Licence

### **Dr BROAD question to PREMIER**

My question is from John at South Nietta regarding the Jean Brook Reserve water transfer licence you approved in 2016 when you were the minister responsible for water management.

On 17 August last year in this place, you promised the South Nietta farmers that you would 'look after farmers, listen to farmers and act on farmers concerns'. Why is your government spending so much money and department resources trying to cover up your blunder so a former Liberal member can continue to make money from a private Hydro scheme while forcing flood-affected farmers to spend significant funds if they want the flooding to stop?
