

SUSTAINABLE FORESTRY #2

And just when I thought I had seen everything, I accidentally stumbled on this!

A magic weekend at St Mary's (Addlestone House B&B = magic), Bay of Fires, Pyengana Cheese State Factory, and the Pub in the Paddock. All glorious examples of Tasmania! And then I took the long way home through the Mt Victoria Forest and Ringarooma.

Some few kilometres out of the Pub I encountered a FT disaster that is probably some 10 years older than that adjacent to my property, see

<http://tasmaniantimes.com/index.php?/weblog/article/sustainable-forestry-...-i-think-not/>

Same old, same old! Foxgloves abundant, skinny and hapless plantations, across a huge area of the Mt Victoria Forest, out of sight and out of mind!

This area is managed by the same FT Bass District Officer. What would Mt Barrow look like?

Multiple use = tawdry spin!

Foxgloves and sick Eucalypts

Pyengana

Mt Victoria

Mt Victoria area plantations, Pyengana to the North East
