

## Bass - Additional Staff in Health Services

### **Mr WOOD question to MINISTER for HEALTH, MENTAL HEALTH and WELLBEING**

I note the large-scale ads you announced yesterday regarding what you have called the Tasmanian government's biggest ever healthcare recruitment blitz. On behalf of my constituents, I am particularly interested in the over 500 additional staff you have stated that have been delivered into our health system. While that is positive, many individuals in my electorate of Bass continue to require health care at increasing rates, whether this is acute care through the LGH or in our outpatient healthcare settings. Can you please provide a breakdown of these staff and tell me how many doctors, nurses and allied health professionals have been hired, and what more is being done for recruitment of staff?
