Tullah Oval – Use as Helipad

Dr BROAD question to MINISTER for POLICE, FIRE and EMERGENCY MANAGEMENT

My question comes from Kenneth from Tullah. There are many helicopters that use the Tullah Oval as a helipad throughout the year. There are no functioning fire hydrants or emergency equipment available on site. What are the users and/or the Government going to do if there is an accident or fire on the premises, or surrounds, without access to water or first aid equipment?
