**Subject:** Government reform

I would like to make a submission a out reform to electoral funding.

We should be able to know Who makes donations to members of parliament, how much, how often

There should be a cap on donations, this should prevent undue influence by mining, developers, or any company seeking to influence decisions which effect the population.

Further I feel that companies which profit by things which cause harm to people should be prevented from making donations at all.

This may prove difficult, but should be possible. Tobacco, gambling, unhealthy foods, i.e. Those heavily laden With sugar ( like Coca Cola), would fall into this category.

laws to ensure these things should make for. Parliament free to. Make decisions which are truly best for the country.
