Subject: Integrated Transport in Southern Tasmania

Submission Re: Integrated Transport in Southern Tasmania

Dear Mr Stuart Wright, Committee Secretary,

I am writing to express my concern regarding the future of public transport and would like to see an integrated sustainable public transport system in Southern Tasmania. There is an urgent need for governments to respond to both climate change and peak oil with sound public transport policies.

Integrated public transport system solutions include cross subsidies with road infrastructure, ferries on the Derwent River, light rail, integrated ticketing across modes of transport and bus lanes. The Government needs to develop a comprehensive Transport Plan which includes plans for the rail corridor.

Yours sincerely,

Alice Graham
