I am a concerned citizen,there is no need to spend money to this degree on a stadium we do not need.There are cheaper ways to upgrade the stadiums we already have both Launceston and Hobart. To spend this obscene amount of money on a new stadium is not only foolish but cuts to the heart of the Tasmanian people this amount of money would be better spent by putting it in to health to get elective surgeries done, to upgrade the hospitals and make life better for struggling Tasmanians. I have a personal stake in this as my wife is waiting for surgery to replace a hip, her second one she waited four years for the first and in terrible pain for all those years and now she has been waiting for over a year in pain for the second.I contend that this government need to get their priorities right forget a new stadium as the majority of people have already spoken and said no to the stadium..
