HOUSE OF ASSEMBLY.

## LAUNCESTON GENERAL HOSPITAL.

REPORT FOR 1875.

Laid upon the Table by the Colonial Secretary and ordered by the House to be printed, September 12, 1876.

### LAUNCESTON GENERAL HOSPITAL.

#### ANNUAL REPORT for 1875.

SIR,

I HAVE the honor to submit the Report of the Launceston General Hospital for 1875.

The past year was a comparatively uneventful one in the annals of the Institution, and there is nothing important to report.

The admissions were more numerous than in the previous year, but the daily average number in the house was smaller.

The total expenditure in 1875 exceeded that of 1874, the increase being chiefly in clothing, bedding, and stores, and in medicines and instruments.

The number of Out-patients increased during the past year; and I desire again to express my conviction that many persons obtain advice and medicines at the Hospital who, were there no such place, would contrive to pay for medical aid elsewhere.

There were admitted during 1875, 402 Patients, of whom 285 were males and 117 females.

There had remained at the close of the previous year 62 Patients, so that the total number treated in 1875 was 464; and of these 347 were discharged cured or relieved, 67 died, and 50 remained under treatment.

The great majority of those who died were admitted in a hopeless state, and nearly three-fourths of them were over 50 years of age.

Of the Patients admitted, 64 were Self-supporting, 3 were wholly or in part chargeable to Imperial Funds, and 335 were Colonial Paupers.

The sum of £211 17s. 6d. was received from or on account of Self-supporting Patients during the year.

I have to express my satisfaction with the attention paid by the House Surgeon, Dr. Murphy, to the duties of his office.

I append the usual statistical information.

I have the honor to be,

Your obedient Servant,

J. L. MILLER, F.F.P.S., Chief Medical Officer at Launceston.

The Hon. the Colonial Secretary.
