

## Animal Welfare - Livestock Processing Taskforce

### **Mr FAIRS question to MINISTER for PRIMARY INDUSTRIES and WATER**

As recent commentary in this place has demonstrated, there are many constituents across the state who want to see the government taking action to boost animal welfare. I understand that you have been highlighting the work of the Livestock Processing Taskforce, which has been meeting regularly, conducting workshops, and taking on feedback. Can you please detail some tangible and real-world actions taken by this taskforce and how these actions will make a real difference to the farmers and the wider community?
