

Penguin - Proximity of Road Work Signs to Works Location

Ms DOW question to MINISTER for INFRASTRUCTURE

My question comes from one of my constituents in Penguin who wants to know why road works signs are placed so far out from where road works are being carried out. They said the example of this was at the Howth roundabout recently where the road works signs were two kilometres out from where the actual road works are being carried out on the incoming lanes to Burnie, but only 400 metres on the outbound lanes.
