

Tamar River – New Bridge

Mr FAIRS question to MINISTER for INFRASTRUCTURE

A constituent for my electorate of Bass, Mark, is a regular driver to Hobart. He tells me he is stoked that the Bridgewater bridge is nearing completion on time and budget, and is equally as excited for what a new bridge on the River Tamar in Launceston would do for the city. Can the minister please advise of any early feedback on the recently released bridge options and outline what the next steps are?
