Veterinarians – Support and Jobs

Ms FINLAY question to MINISTER for PRIMARY INDUSTRIES and WATER

My constituent veterinarian in Launceston has asked for support from Government to continue to provide their essential services to our community, to our agricultural industries and also across animal welfare. The profession continues to face significant workforce pressures. What is your Government doing to support attracting, retaining and supporting veterinarians in our community and will you actively work with the Australian Veterinarian Association on its proposals to strengthen Tasmania's veterinary workforce?
