

CI No.	Topic	Numerator	Denominator	Numerator	Denominator	In collecting and reporting the data for this indicator the definitions in the Users Manual were followed precisely	Comments
1.1	ICU - adult non-admission due to inadequate resources	Number of appropriate adult patients referred to an ICU, who have documented evidence by an Intensivist that they could not be admitted to the unit because of inadequate resources, during the 6 month reporting period	Number of adult admissions into the ICU plus the non-admissions resulting from inadequate resources (Numerator CI 1.1), during the 6 month reporting period	12	773		
1.2	ICU - elective adult surgical cases deferred or cancelled due to unavailability of bed	Number of adult elective surgical cases deferred or cancelled due to lack of an ICU bed, during the 6 month reporting period.	Number of adult elective surgical patients with a planned postoperative admission to ICU plus the non-admitted post-surgical patients (Numerator CI 1.2), during the 6 month reporting period.	10	771		
1.3	ICU - adult transfer to another facility / ICU due to unavailability of bed	Number of adult patients who were transferred to another facility / ICU due to unavailability of an ICU bed, during the 6 month reporting period.	Number of adult admissions into the ICU plus the non-admissions resulting from transfers to other facility / ICU due to bed unavailability (Numerator CI 1.3), during the 6 month reporting period.	0	761		
1.4	ICU - adult discharge delay more than 12 hours	Number of adult patients whose discharge from the ICU was delayed more than 12 hours, during the 6 month reporting period.	Number of adult patients discharged alive from the ICU, during the 6 month reporting period.	171	592		
1.5	ICU - adult discharge between 6pm and 6am	Number of adult patients discharged from the ICU between 6pm and 6am, during the 6 month reporting period.	Number of adult patients discharged alive from the ICU, during the 6 month reporting period.	45	592		
1.6	ICU - paediatric discharge between 6pm and 6am	Number of paediatric patients discharged from the ICU between 6pm and 6am, during the 6 month reporting period.	Number of paediatric patients discharged alive from the ICU, during the 6 month reporting period.				Not reported
1.7	ICU - elective paediatric surgical cases deferred or cancelled	Number of paediatric elective surgical cases deferred or cancelled, during the 6 month reporting period.	Number of paediatric elective surgery patients with a planned postoperative admission to ICU plus the non-admitted post-surgical patients (Numerator CI 1.7), during the 6 month reporting period.				Not reported
2.1	Rapid response system calls to adult ICU patients within 48 hours of ICU discharge	Number of rapid response system calls to adult ICU patients within 48 hours of being discharged from the ICU, during the 6 month reporting period.	Number of adult patients discharged alive from the ICU, during the 6 month reporting period.	28	592		
2.2	Rapid response system calls to paediatric ICU patients within 48 hours of ICU discharge	Number of rapid response system calls to paediatric ICU patients within 48 hours of being discharged from the ICU, during the 6 month reporting period.	Number of paediatric patients discharged alive from the ICU, during the 6 month reporting period.				Not reported
3.1	VTE prophylaxis in adult patients within 24 hours of ICU admission	Number of adult patients being treated by one or more appropriate forms of venous thromboembolism (VTE) prophylaxis, according to local protocol, within 24 hours of admission to the ICU, during the 6 month reporting period.	Number of adult admissions into the ICU, during the 6 month reporting period.				Not reported
4.1	Adult ICU-associated CI-CLABSI	Number of adult ICU-associated CI-CLABSI, during the 6 month reporting period.	Number of CI central line-days in adult ICU patients, during the 6 month reporting period.				

4.2	Paediatric ICU-associated PI-CLABSI	Number of paediatric ICU-associated PI-CLABSI, during the 6 month reporting period.	Number of PI central line-days in paediatric ICU patients, during the 6 month reporting period.				
5.1	Participation in the ANZICS CORE Adult Patient Database (APD)	Number of adult admissions to the ICU, submitted to the ANZICS CORE Adult Patient Database with completed information and review of results, during the 6 month reporting period.	Number of adult admissions into the ICU, during the 6 month reporting period.				Not reported
5.2	Participation in the ANZICS CORE Paediatric Intensive Care (ANZPIC) registry	Number of paediatric admissions to the PICU, submitted to the ANZICS CORE Paediatric Intensive Care registry with completed information and review of results, during the 6 month reporting period.	Number of paediatric admissions into the ICU, during the 6 month reporting period.				Not reported
5.3	Participation in the ANZICS CORE Critical Care Resources survey	Have you responded to the most recent ANZICS CORE Critical Care Resources survey?					No
6.1	Empathetic practice toward families of ICU patients	Number of occasions where at least one family member received follow-up contact within 4 weeks of the patient's death, during the 6 month reporting period.	Number of patient deaths within the ICU or within 48 hours of discharge from the ICU, during the 6 month reporting period.				No reported
