

Public Transport on the Tasman and Forestier Peninsulas

Mr MITCHELL question to MINISTER for INFRASTRUCTURE and TRANSPORT

I've been contacted by members of the Nubeena township on the Tasman Peninsula who are deeply concerned about the lack of bus services. The Tasman Peninsula population includes many older people who do not have ready access to private transport and who require regular trips to Hobart for medical appointments. What steps are you taking to improve public transport for people living on the Tasman and Forestier Peninsulas? When can people expect to see an improvement?
