

Sorell SES - Support for Community Engagement

Ms WHITE question to MINISTER for POLICE, FIRE and EMERGENCY MANAGEMENT

My question is on behalf of volunteers at the Sorell SES. They have witnessed some terrible incidents, including young people engaging in risky behaviour on roads and in traffic, putting themselves and motorists in great danger. They have identified a need to engage with the school community and speak directly with the students about the risk-taking behaviour, in the hope it will see a reduction and hopefully elimination of this behaviour once they understand how serious the consequences can be. Will you commit to working with the SES and the school to provide an opportunity for students to learn from those at the frontline about how risk-taking behaviour can have terrible outcomes, in the hope it will lead to a reduction in such behaviour?
