

## Government Disclosure of Information from Encrypted Messaging Apps

### **Mr GARLAND question to PREMIER**

My question comes from a constituent who wants to know if any state government departments have disclosed any information that originates from encrypted messaging apps used by ministers or their staff in response to a Right to Information request in the last 12 months? If the answer is yes, please provide the total number of disclosures made which contained information retrieved from an encrypted messaging app used by a state government minister or their staff.
